INTRODUCTION

This bulletin contains tabulations showing the number of carloads of 37 fruits and vegetables shipped during 1929 and 1930, segregated by States of origin and by months. It also contains tabulations showing the number of carloads of 19 of these commodities unloaded in 66 cities during the same years. The information contained herein supplements that in Statistical Bulletin No. 30,[2] and is based on reports secured by the division of fruits and vegetables of the Bureau of Agricultural Economics.

The shipment figures were compiled from daily telegraphic reports rendered by the railroad superintendents or other transportation officials and checked against monthly mail reports furnished to the division by station agencies of railroad, express, and boat lines.

The unload reports for 37 cities were compiled from information received at Washington direct from railroad and boat agencies, but in the 29 cities where the division maintains a representative the reports were compiled by that representative, from reports furnished locally by the transportation companies.

Both the shipment and the unload figures include car-lot freight and express movement by rail, and boat shipments reduced to car-lot equivalents. The shipment reports include only the movement of fruits and vegetables produced in the United States. Complete shipment information on imported stock is not available. Unload

reports, however, do include imported stock under the general heading imports. In some instances it was impossible to avoid listing imports twice, once in the unloads of the port at which they entered the country and again in the unloads of the city to which they were reshipped.

The total movement of fruits and vegetables produced in the United States is much greater than the car-lot figures would indicate, as large quantities are moved by motor truck and in less-than-carload lots by boat and rail. These are not included because of lack of adequate data. The car-lot unloads should not be regarded as representing the actual consumption in the various metropolitan areas, as freight and express receipts of less-than-carload lots and arrivals by truck are not included. Reshipments by rail and truck to outlying territory are also not accounted for. The unloads do indicate, however, the number of car lots of these products which are handled by the marketing agencies in the various cities.

Arrangement of States and cities is alphabetical except in the unload tables (Tables 22 to 87), where the geographical arrangement is used.

Shipment and unload figures are shown for the following:

Deciduous fruits.—Apples, grapes, peaches, pears, and plums and fresh prunes.
Citrus fruits.—Grapefruit, lemons, oranges (including Satsumas) and tangerines. (Tangerines were included with oranges in both shipment and unload figures during 1929, but were shown separately for 1930.)
Berries.—Strawberries.
Cantaloupes.—Including Casaba, Honeydew, Honey Ball, and other melons except watermelons.
Vegetables.—Cabbage, celery, lettuce (including romaine), onions, potatoes, sweetpotatoes, and tomatoes.
Watermelons.

Shipment figures only are shown for the following additional crops:

Deciduous fruits.—Cherries, mixed deciduous.
Citrus fruits.—Mixed citrus fruits.
Berries.—Cranberries.
Dried fruits.—Apples, peaches, and prunes.
Vegetables.—Asparagus, snap (string) beans, carrots, cauliflower, cucumbers, eggplant, mixed vegetables, green peas, peppers, spinach, and turnips.
