DAIRY AND POULTRY MARKET STATISTICS

1962

Annual Summary of Market Statistics Collected and Compiled by the Dairy and Poultry Market News Branch

PREFACE

An average price is computed by dividing the sum of the mid-points of price ranges reported during the period by the number of price ranges during the period.

A weighted average price is computed by dividing the total value of the sales during the period by the total number of units sold during the period.

An average price for a year is the mean of the twelve monthly averages.

A monthly average price is not computed when a price is not reported for five or more consecutive trading days.

A yearly average price is not computed when an average price is not reported for one or more months.

CONTENTS

	Table No.	Page No.
BUTTER		
Prices, by months:		
F.o.b. shipping points, Iowa-Minnesota-Wisconsin	7	16
Delivered warehouse or dock at San Francisco	8	16
Wholesale:		
Chicago	9	16
New York	9	16
Delivered to retailers:		
Boston	10	17
Fresno	10	17
Los Angeles	10	17
Philadelphia	10	17
Pittsburgh	10	17
Portland	10	17
San Francisco	10	17
Seattle	10	17
Movements:		
Into retail channels, by weeks:		
Chicago	6	15
Los Angeles	6	15
New York	6	15
San Francisco	6	15
Seattle	6	15
Cold storage holdings:		
Selected Storage Centers, by weeks	1	12
Selected Storage Centers, percent of total U.S. holdings, close of each month, by years	2	13
Total U.S. holdings in warehouses, close of each month	3	13
CHEESE		
Prices, by weeks:		
American:		
Sales on Wisconsin Cheese Exchange	12	19
Domestically made foreign type:		
Selling prices:		
Chicago	22	25
New York	23	26
San Francisco	24	27

July	33.000		
August	33.000	Average 1961	34.875

[1] These averages are calculated by a formula designed to serve the needs of Administrators of Federal milk marketing orders. They are averages of prices at which Cheddars sold on the Exchange, date listed, weighted by the number of cars sold. When there are no sales, the highest bid is used, if higher than the average computed for the previous week; if no sales or bids, the lowest offering price is used, When there are neither sales, bids nor offers, the average of the previous week is used by Milk Market Administrators as the prevailing price for the week.
