BRIEF CLASSIFICATION OF LEAF TOBACCO

(Covering classes and types)

CLASS 1, FLUE-CURED TYPES

Type 11: Old Belt flue-cured; produced principally in the Piedmont sections of Virginia and North Carolina.
Type 12: Eastern North Carolina flue-cured; produced principally in the coastal sections of North Carolina, north of the South River.
Type 13: South Carolina flue-cured; produced principally in the coastal sections of South Carolina and the southeastern counties of North Carolina, south of the South River.
Type 14: Georgia and Florida flue-cured; produced principally in southern Georgia and northern Florida.

CLASS 2, FIRE-CURED TYPES

Type 21: Virginia fire-cured; produced in the Piedmont and mountain sections of Virginia.
Type 22: Tennessee-Kentucky fire-cured, eastern district, Clarksville, Springfield, and Hopkinsville; produced principally in a section east of the Tennessee River, in southern Kentucky and northern Tennessee.
Type 23: Kentucky-Tennessee fire-cured, western district, Mayfield, and Murray; produced principally in a section between the Tennessee, Ohio, and Mississippi rivers in western Kentucky and northwestern Tennessee.

CLASS 3, AIR-CURED TYPES

LIGHT AIR-CURED (CLASS 3a)

Type 31: Burley; produced principally in Kentucky, Tennessee, Ohio, Indiana, West Virginia, Virginia, North Carolina, and Missouri.
Type 32: Southern Maryland; produced principally in five counties of southern Maryland--Prince Georges, Anne Arundel, Calvert, Charles, and St. Marys.

DARK AIR-CURED (CLASS 3b)

Type 35: One Sucker; produced in north-central Tennessee and south-central Kentucky.
Type 36: Green River; produced in the northern part of Kentucky in the territory adjacent to Owensboro and Henderson.
Type 37: Virginia sun-cured; produced principally in central Virginia, north of the James River.

CLASS 4, CIGAR-FILLER TYPES

Type 41: Pennsylvania Seedleaf; produced principally in Lancaster County, Pa., and the adjoining counties.
Type 42-44: Ohio filler; produced principally in the Miami Valley section of Ohio and extending into Indiana.
Type 46: Puerto Rican sun-grown, including primed (Deshojado) and stalk-cut (Mata); produced on the Island of Puerto Rico

CLASS 5, CIGAR-BINDER TYPES

Type 51: Connecticut Broadleaf; produced in the Connecticut Valley sections of Connecticut and Massachusetts.
Type 52: Connecticut Havana Seed; produced in the Connecticut and Housatonic Valley sections of Connecticut and Massachusetts.
Type 53: New York and Pennsylvania Havana Seed; produced in the Big Flats and Onondaga sections of New York, and extending into Pennsylvania.
Type 54: Southern Wisconsin; produced in Wisconsin, south and east of the Wisconsin River.
Type 55: Northern Wisconsin; produced in Wisconsin, north and west of the Wisconsin River, and in eastern Minnesota.

CLASS 6, CIGAR-WRAPPER TYPES

Type 61: Connecticut Shade; produced in the Connecticut Valley sections of Connecticut and Massachusetts.
Type 62: Georgia and Florida Shade; produced in southwestern Georgia and north-central Florida.

MISCELLANEOUS TYPES OF DOMESTIC TOBACCO

Type 72: Louisiana Perique.
Type 73: All domestic types of tobacco not otherwise classified.

FOREIGN TYPES

Type 81: Cuba.
Type 82: Indonesia.
Type 83: Philippine Islands.
Type 84: Brazil.
Type 85: Colombia.
Type 86: Dominican Republic.
Type 87: Paraguay.
Type 88: All foreign-grown cigar-leaf not otherwise classified.
Type 90: Foreign-grown cigarette and smoking tobacco (Turkish and other).

BRIEF RESUME OF U.S. TOBACCO FOR 1967

Production

The United States and Puerto Rico tobacco harvest in 1967 totaled 2,019 million pounds compared with 1,900 million in 1966. A larger crop of flue-cured was responsible for the increase. The national average yield per acre (including Puerto Rico) was 2,040 pounds per acre compared with 1,927 in 1966.

1966-67 auction marketing season

Table A shows sales and average prices for the 1967 and 1966 crops for those types sold at auction. Maryland markets do not open until April 16, 1968, for sale of the 1967 crop.

Record prices were paid for burley, Kentucky and Tennessee fire-cured, and the three dark air-cured types. The flue-cured crop was 14: million pounds larger than 1966 due to the carry forward of undermarketings from the two prior crops under the acreage-poundage program plus considerable overmarketing this past season. Loan receipts of flue-cured in 1967 jumped to 22.7 percent of sales for the fourth largest volume on record.

The record prices for burley were paid for a crop considered to be superior in quality to the one grown in 1966. It was also a smaller crop by some 48 million pounds. Loan receipts were 12.0 percent of net sales compared with 10.7 percent in 1966. Growers voting in a regular referendum in March approved acreage controls for another three years. Maryland growers voted down controls for the third straight year.

The 1967 crop of Kentucky and Tennessee fire-cured (type 22 and 23) was the smallest ever and sold for the highest price on record. Volume was about 10 million pounds below 1966. Quality was good and loan receipts were extremely small. Virginia fire-cured declined both in volume and price. Quality of the crop was below 1966.

The dark air-cured types followed the same pattern of fire-cured. Record prices were paid for considerably smaller amounts of leaf while loan receipts were minor. Quality of types 35 and 36 was not as good as the 1966 crop, but Virginia sun-cured showed improvement.

Carryover stock of U.S. tobacco

Tobacco dealers and manufacturers report inventories of leaf tobacco quarterly, with the stocks segregated according to U.S. types. Stocks on hand as of the quarterly reporting date used as the beginning of the marketing year are referred to as carryover stocks. The carryover date is July 1 for flue-cured and shade grown cigar wrapper, and October 1 for all other kinds.

Carryover stocks of U.S. and Puerto Rican tobacco totaled 4,180 million pounds, a drop 222 million pounds from last year's level. Smaller stocks of flue-cured and cigar tobacco accounted for most of the decrease. Loan holdings, as shown in table B, totaled 1,043.5 million pounds and were 134 million below the level of 1966. Manufacturers' holdings were down 108 million pounds for the lowest level in nine years.

Domestic leaf usage

The indicated use of tobacco in products declined from last year. Consumption of domestic-grown tobacco at 1,418 million pounds, was down 71 million pounds. The usage of imported tobacco rose to a record high of 231 million pounds, 22 million above the previous year.

During the past fiscal year the production of cigarettes showed an increase of almost 2 percent. However, the amount of leaf used in their manufacture was estimated to be lower than the previous year. This estimate is based on the disappearance of the three domestic cigarette types (see table 17-19). Cigar production for the same period showed a decline for the third straight year. Usage of imported cigarette leaf was up 12 million pounds and imported cigar leaf increased by 10 million.

Tobacco products

Taxable removals of cigarettes for calendar year 1967 reached a new high of 528 billion, a gain of 1.0 percent over 1966 (522 billion). Filter tips continued to increase their share of the market and accounted for close to 73 percent of total sales. The new 100 millimeter brands (all filter tipped) accounted for 10 percent of all sales. Per capita consumption of cigarettes in 1967 was 4,280 per person 18 years and older, which was slightly below the 1966 level.

Removals of large cigars for the year were 8.0 billion, a decline of 2.5 percent from 1966.

Domestic invoices of smoking tobacco for 1967 amounted to 63 million pounds compared to 65 million in 1966. Sales of chewing tobacco were 64 million pounds, the same as the previous year, and snuff remained at 29 million pounds.

Consumers spent approximately 9,460 million dollars for tobacco products in 1967. This was 437 million more than in 1966. Cigarettes accounted for the entire increase. Expenditures were divided as follows: Cigarettes, 8,450 million, (up 5.7 percent); cigars, 710 (down 1.4 percent); and other tobacco products, 300 million (down 2.3 percent).

Leaf tobacco exports

Exports totaled 642 million pounds (farm-sales-weight) during 1967. This was 17 million pounds above 1966 and the largest since 1946. Flue-cured exports at 528 million pounds increased 19 percent. Burley shipments at 55 million were the same as last year. Maryland exports increased 45 percent to 16 million pounds, which was the largest amount since 1927. Fire-cured and dark air-cured also had higher exports, but cigar wrapper declined. The United Kingdom was the major outlet with 24 percent of the total. West Germany was second with 20 percent and the Netherlands third with 7 percent.

[1] A two-thirds majority of farmers voting is required to place marketing quotas in effect. Legislation approved in August 1955 required that voting be for a 3-year period only. For record of crops covered for the years 1938, 1939, and 1940, see previous editions of this publication. [2] Redetermined quotas for Burley for the 1955 crop. [3] Fire-cured (21-24) and dark air-cured (35-36): Referendums for both kinds combined for the crops of 1938 and 1939; quotas for the 1943 crop terminated August 14, 1943; and quotas were not in effect for the crops of 1944 and 1945. [4] Special referendum on acreage-poundage program.

[1] Types 11-37 are reported on the basis of packed weight.

[2] Farm-sales-weight equivalent based on unstemmed sweated weight factor.

[3] The instructions for reporting unstemmed cigar-leaf of the domestic types require that dealers and manufacturers indicate the weight basis on which the tobacco is reported, namely, farm-sales weight, marked weight, or sweated weight. The stocks are converted to the farm-sales-weight equivalent on the basis of average factors reflecting the percentage reported each quarter in each of these three categories.

[1] Type "73" is defined as all domestic types of tobacco not otherwise classified, but the bulk of the stocks reported in this type consists of cuttings, clippings, and trimmings. This is the result, in most instances, of the inability of reporters to designate cuttings, clippings, and trimmings in the "S" group of the types to which they properly belong.
[2] Prior to January 1, 1964, includes also types "HV" and "N" (both low nicotine) and "T" (domestic aromatic).

[1] Legislation approved February 20, 1965, provided that price supports for the 1965 crop be the same as for 1964; and that for subsequent crops they be adjusted according to the percentage change between (1) the 1959 parity index and (2) the average of the parity indexes for the 3 calendar years just preceding the year for which the supports are being determined. The 1965-67 average of the parity index calculated to 102 percent of the 1959 parity index, so the supports for 1968 were 2 percent above those for 1967. Prior to 1965, loan levels were based on 90 percent of the parity price as of the beginning of the marketing year, with the following exceptions: fire-cured and dark air-cured classes were set at 75 and [illegible] percent respectively of the burley loan rate, but, beginning with the 1968 crop, were not to exceed the 1967 levels, unless 90 percent of their respective parities exceeded such levels; Puerto Rican was 88 percent of parity in 1965, and [illegible] percent in 1966; types comprising the filler and binder group are adjusted-type differentials based on the parity price for the group; and rates for all types (except Puerto Rican) for the 1962 to 1965 crops are minimum levels as announced in March, which were higher than 90 percent of parity as of the beginning of the marketing year. According to legislation, loan levels were the higher of the two.

[2] The marketing year begins as of July 1 for fire-cured and cigar wrapper, and as of October 1 for all other types.

[3] Announced "no support," or were disapproved quotas. [4] Mandatory loans not applicable.

[1] The Philippine Trade Agreement Revision Act of [illegible], Public Law [illegible], [illegible] Congress, approved August 1, 1955, eliminates the absolute quotas of [illegible] million cigars and [illegible] million pounds of scrap and filler tobacco. For duty purposes, an amount equivalent to [illegible] percent of the former absolute quotas in each case may be admitted duty free during the calendar years [illegible], with quantities in excess of [illegible] percent of the base figure dutiable at the Cuban rate.

[2] In early February [illegible], the U.S. government placed an embargo against imports from Cuba, precluding any arrivals of Cuban tobacco after February [illegible]. Quantities of Cuban leaf already in the United States on that date, however, will continue to be withdrawn from bond by manufacturers, as needed, and will be reflected in the statistics for duty-paid imports for consumption.

[3] Rates shown are those which were in effect as of January [illegible]. Rates for imports from countries or areas under Communist domination or control are those as listed under the Tariff Act of 1930, effective varying dates by countries from Sept. 1, [illegible], to Jan. [illegible], under Section [illegible] of the Trade Agreement Extension Act of 1951.

TABLE 39. --Import duties on tobacco in selected foreign countries importing from the United States, as of December 1967--Continued

[1] Conversions made at current official exchange rates. In addition to the rates of duty shown, certain of the countries impose surtaxes in the form of percentages of the duty, ad valorem, fixed entry tax, [illegible], and varying additional duties.
[2] Government monopoly.
[3] Under Republic Act 698, as amended by Republic Act 1194, the importation of leaf tobacco (excepting cigar wrapper tobacco for cigars or chewing tobacco) is limited to the amount which, added to total Philippine production, will be sufficient to assure the output of a quantity of manufactured products not less than the output of the previous fiscal year. The rates shown are the full rate. The United States is currently paying [illegible] of the full rate.
[4] Australia converted to the decimal system as of February 14, 1966; New Zealand as of July [illegible], 1967.

[1] Unmanufactured, stemmed or unstemmed tobacco valued at less than [illegible] per lb., cigarette tobacco or ordinary tobacco. The FEC established a separate tariff rate for tobacco valued at [illegible] and over per pound. U.S. cigar wrapper tobacco falls in this category. The rate set for this new tariff item is [illegible] percent ad valorem with a maximum charge of [illegible] cents per pound.
[2] Effective January [illegible], 1968 the internal rate between member countries was reduced to zero.
[3] [illegible] countries raised external duties to [illegible] percent on Jan. [illegible], 1968 pursuant to [illegible] Association Agreement.
[4] The ultimate uniform common external rate which was agreed upon in the "Kennedy Round" negotiations. The scheduled reductions or alignments to reach the ultimate rate are as follows:

[illegible] percent of the reduction - July [illegible], 1968
[illegible] percent of the reduction - Jan. [illegible], [illegible]
[illegible] percent of the reduction - Jan. [illegible], [illegible]
