Contributors

Contributors are on the Staff of the Bureau of Agricultural Economics unless otherwise stated

PETER L. HANSEN, Agricultural Economist in the Division of Farm Management and Costs, divides his time between research in production economics and foreign trainee programs in economic investigations for the BAE.

JOHN C. FREY is Assistant Professor of Land Economics at Pennsylvania State College. He formerly worked jointly with the Division of Land Economics and Iowa State College in studying obstacles to conservation farming.

BUIS T. INMAN, Assistant Head of the Division of Land Economics, has represented BAE in cooperative work with the Bureau of the Census in the analysis of tenure and land use data and work with the Iowa State College in studies of obstacles to conservation farming.

SCOTT A. WALKER is Assistant Agricultural Economist in the Idaho Agricultural Experiment Station. He was formerly a cooperative agent of the Bureau of Agricultural Economics.

HILTON E. ROBISON, Chief of the Section on Farm Economics and Financial Statistics, Agricultural Division, Bureau of the Census, is in charge of the work on classification of farms by tenure.

JAMES P. CAVIN of the Office of Statistical Standards in the Bureau of the Budget was formerly head of the Division of Statistical and Historical Research in BAE. In a course in Modern Economic Thought in the USDA Graduate School, Mr. Cavin lectures on Marshall and Keynes.

JOHN H. DAVIS, Assistant Secretary of Agriculture, has long been interested in the agricultural cooperatives. From 1944 to 1952 he was Executive Secretary of the Council of Farmer Cooperatives.

RICHARD J. FOOTE is in charge of commodity research under the Research and Marketing Act in the Division of Statistical and Historical Research.

MARK E. REGAN is Assistant Head of the Division of Land Economics. He has worked on assignments dealing with aspects of the economics of resource development and use, including service on the staff of the Benefit-Cost Subcommittee of the Federal Interagency River Basin Committee, the President's Water Policy Commission, and the Missouri Basin Survey Commission.

L. D. HOWELL is leader of the section for nonfood products in the Division of Marketing and Transportation Research. He has published reports of several studies relating to the textile industry.

CHARLES E. ROGERS, co-editor of this journal, became interested in the farmers' movement while writing a biography of a midwestern newspaperman, William Rockhill Nelson, founder of the *Kansas City Star*.

GLADYS L. BAKER has been studying agricultural policies and administration since 1936 when as a field fellow of the Social Science Research Council she surveyed the work and functions of the county agricultural agent in its relation to other agricultural field agencies. Since 1942 she has been a staff member of the History Section of the Division of Statistical and Historical Research.

WILLIAM H. METZLER, Labor Economist in the Division of Farm Population and Rural Life, was formerly associated in the BAE field office in California with Lloyd Fisher, whose book he reviews in this issue. Mr. Metzler's interest in seasonal farm labor stems partly from the fact that he formerly managed harvest workers on his home ranch in California.
