Important Notes to Our Readership

- The *Journal of Agricultural and Resource Economics* is currently published twice per year, in July and December. Commencing in 2003, production will be increased to three issues per year, in April, August, and December. This new schedule will allow accepted manuscripts and important research to be published in a more timely manner.

- Our publisher, Allen Press, has informed the editors that commencing with the December 2002 issue of the *Journal of Agricultural and Resource Economics*, a new procedure is to be used for producing the journal. Our previous procedure has been to submit camera-ready hard copy pages for journal production. Allen Press has recently purchased and installed prepress equipment that "allows efficient production directly from PDF electronic files," and consequently will no longer be accepting camera-ready copy submissions. We wish to apprise the readership that this new process is being implemented with the December 2002 issue. The editors welcome your input, comments, and suggestions following the publication of the December journal issue.
