The Journal of Food Distribution Research (JFDR) has an applied, problem-oriented focus. The Journal’s emphasis is on the flow of products and services through the food wholesale and retail distribution system. Related areas of interest include patterns of consumption, impacts of technology on processing and manufacturing, packaging and transport, and data and information systems in the food and agricultural industry, market development and, and international trade in food products and agricultural commodities. Business and agricultural and applied economic applications are encouraged. Acceptable methodologies include survey, review, and critique; analysis and synthesis of previous research; econometric or other statistical analysis; and case studies. Teaching cases will be considered. Issues on special topics may be published based on requests or on the editor’s initiative. Potential usefulness to a broad range of agricultural and business economists is an important criterion for publication.

The Journal of Food Distribution Research is a refereed Journal of the Food Distribution Research Society, Inc. (FDRS). The JFDR is published three times a year (March, July, and November).
