California Department of Food and Agriculture

Agricultural Commissioners' Crop Reports

Lake County

1946-1969

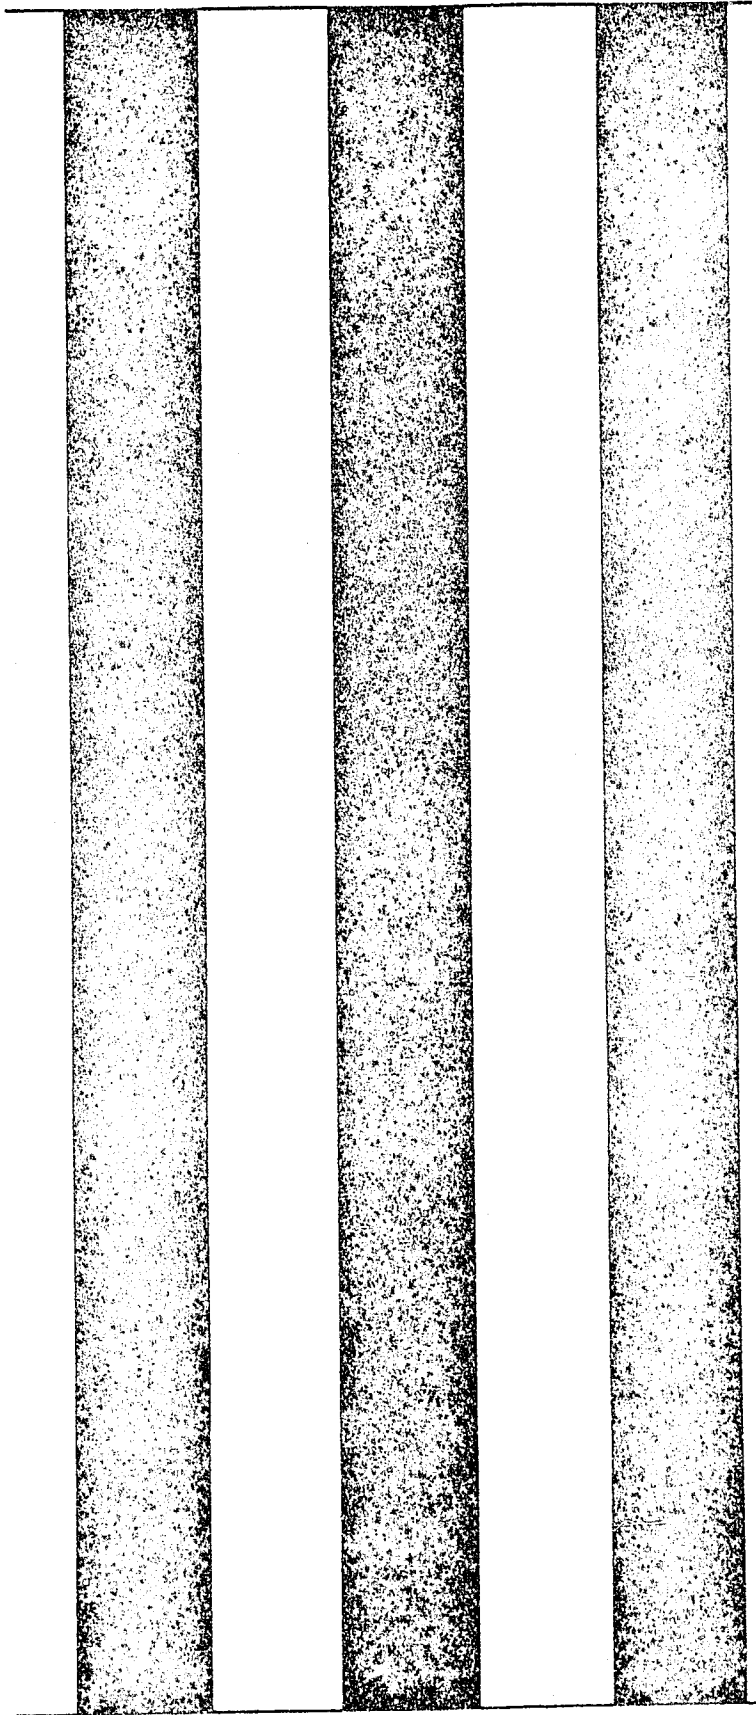

California County Agricultural Commissioners' Reports from the California Department of Food and Agriculture. This collection consists of annual crop and livestock data from each of the 58 California Counties. The collection covers 1915-1981; digitization of the rest of the collection is forthcoming.

This digitization project was funded by the Giannini Foundation of Agricultural Economics,
<http://giannini.ucop.edu/>.

The work was completed by the staff of the Giannini Foundation Library, University of California, Berkeley, <http://are.berkeley.edu/library/>. **Please contact the Library to consult the originals.**

**COMPILED BY THE
LAKE COUNTY DEPARTMENT
OF AGRICULTURE
KELSEYVILLE, CALIFORNIA**

LAKE COUNTY DEPARTMENT OF AGRICULTURE
KELSEYVILLE, CALIFORNIA

TO: W. C. Jacobsen, Director
State Department of Agriculture

- and -

Honorable Board of Supervisors
of Lake County:

Earle W. Wrieden, Chairman, Middletown
J. H. Pearce, Clearlake Highlands
L. D. Kirkpatrick, Kelseyville
C. W. Lampson, Lakeport
Dean Turner, Witter Springs

In accordance with the provisions of Section 65.5 of the Agricultural Code, I hereby submit the annual crop report of Lake County for the year 1953.

Lake County is situated about 100 miles north of the Bay area in the mountainous region between the coast counties and the Sacramento Valley. Its land area is about 812,160 acres. Clear Lake, Lake County, is the largest lake within the boundaries of the state, covering an area of 41,000 acres.

The grand total for 1953 is \$2,693,244 less than that of 1952; PMA payments and timber income which account for \$519,400 of this reduction have been deleted from this year's report. The annual value of some of the agricultural crops for the year 1953 is considerably less than 1952 because of heavy frost damage to deciduous fruits and nuts and considerably lower prices for beef as compared to last year.

The amounts shown as farm income in this report are gross figures; no deductions have been made for cost of production.

Compiled by Warren Cruickshank, Senior Inspector.

Respectfully submitted,

Rex Lyrdall
Rex Lyrdall

and

The Honorable Board of Supervisors of Lake County

Dean Turner, Chairman, Upper Lake
J. H. Pearce, Clearlake Highlands
L. D. Kirkpatrick, Kelseyville
C. W. Lampson, Lakeport
Earle W. Wrieden, Middletown

Gentlemen:

In accordance with the provisions of Section 65.5 of the Agricultural Code, I hereby submit the annual crop report of Lake County for the year 1954.

Lake County is situated about 100 miles north of the Bay area in the mountainous region between the coast counties and the Sacramento Valley. Its land area is about 812,160 acres. Clear Lake, Lake County, is the largest lake within the boundaries of the state, covering an area of 41,000 acres.

The grand total for 1954 is \$2,125,256 more than the 1953 total. There has been a decided increase in income from deciduous fruits and nuts and a noticeable decrease in poultry income. The amounts shown as farm income in this report are gross figures; no deductions have been made for cost of production.

Respectfully submitted,

Rex Lyndall

Gentlemen:

In accordance with Section 65.5 of the Agricultural Code, I hereby submit the annual crop and acreage report of Lake County for the year 1955. The total is \$1,314,875 less than 1954, accounted for mainly because of the reduced pear tonnage, crop failure in almonds, and generally lower prices of some animal products. The walnut tonnage for 1955 was lower than 1954, however the dollar value was the highest in the history of Lake County. A significant increase is noted in sheep population and value despite lower prices.

Respectfully submitted,

REX LYNDALL,

Agricultural Commissioner

Gentlemen:

In accordance with Section 65.5 of the Agricultural Code, I hereby submit the annual crop and acreage report of Lake County for the year 1956. The 1956 agricultural income was \$1,556,887 more than 1955, accounted for mainly by favorable growing conditions for deciduous fruits and nuts, and the attainment of optimum production for many of the orchards. It is to be noted that the figures used in this report are gross figures and no deductions were made for production costs.

Respectfully submitted,

REX LYNDALL

Agricultural Commissioner.

In accordance with Section 65.5 of the Agricultural Code, I hereby submit the annual crop report of Lake County for the year 1957. The agricultural income was \$1,212,963 less than that of 1956. Decided reductions are noted in poultry, swine, and field crops. Many losses occurred in field crops due to the unprecipitated early rains which prevented harvesting as well as reducing the value of many of the crops. This report is compiled by using gross figures, and no deductions have been made for cost of production.

Respectfully submitted,
 REX LYNDALL
 Agricultural Commissioner

Gentlemen:

It is with pleasure that we, the Lake County Department of Agriculture, submit the annual crop report for the year 1959 for the County of Lake.

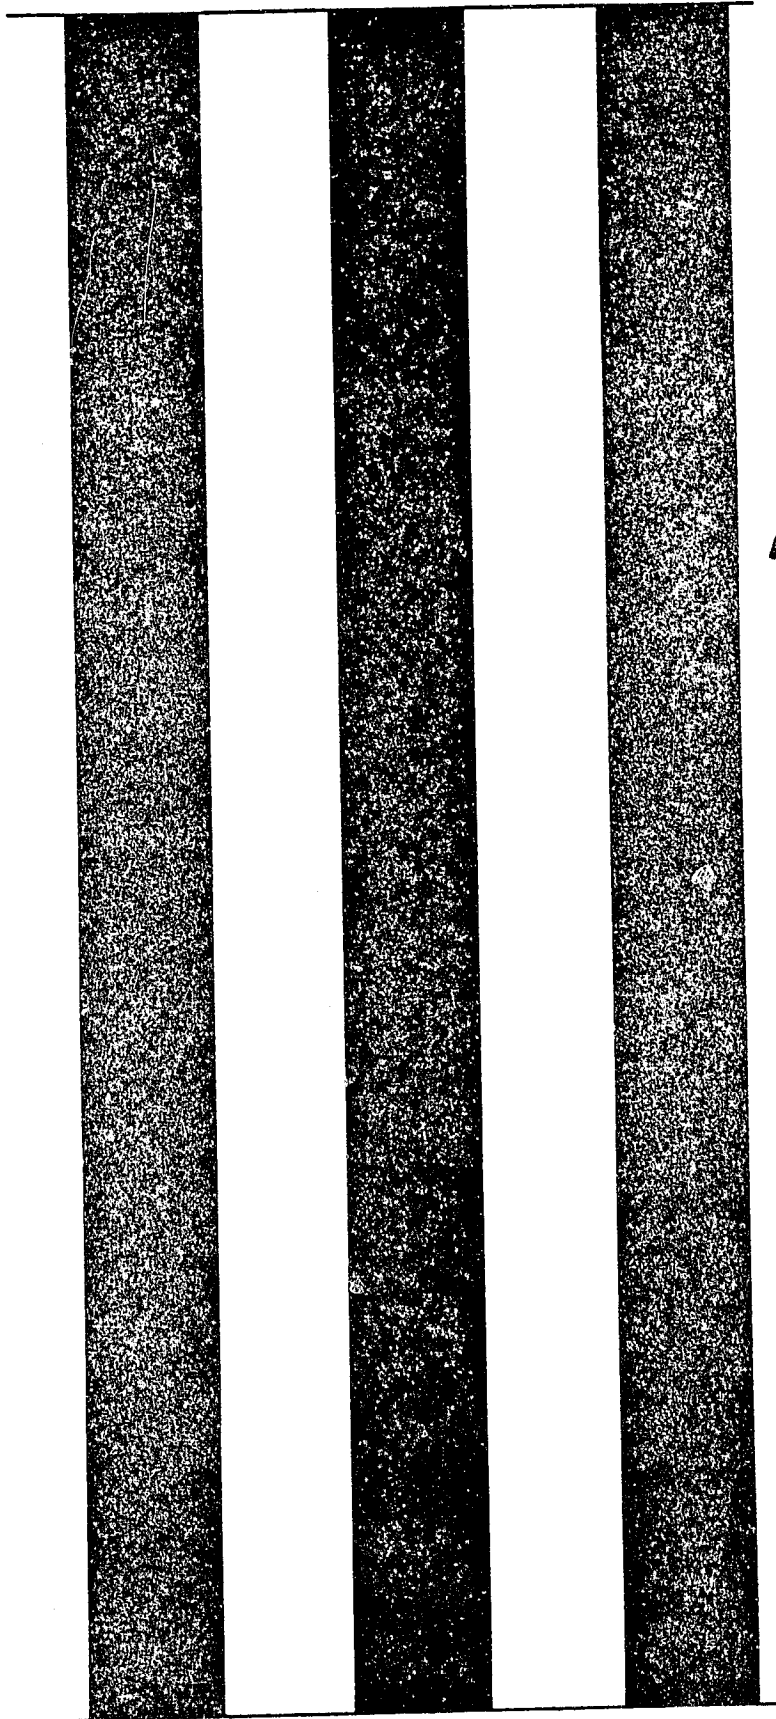

This report was compiled by using gross figures; no deductions have been made for cost of production.

I wish to thank Senior Inspector Warren Cruickshank and Secretary Mrs. Thelma Traylor for gathering and compiling this report.

Respectfully submitted,

Earl R. Kalar
Agricultural Commissioner

Gentlemen:

This annual crop report depicts the acreage, production, and value of various crops grown in Lake County. The price figures represent gross income and DO NOT take into consideration the cost of production, harvesting, and marketing.

F.O.B. prices have been used this year on fresh pears to conform with the statewide program of crop reporting. These prices include the handling and packing house cost of \$80.00 per ton.

The art work on our cover is another Lake County product, by Mr. Lee Fidge of Lower Lake.

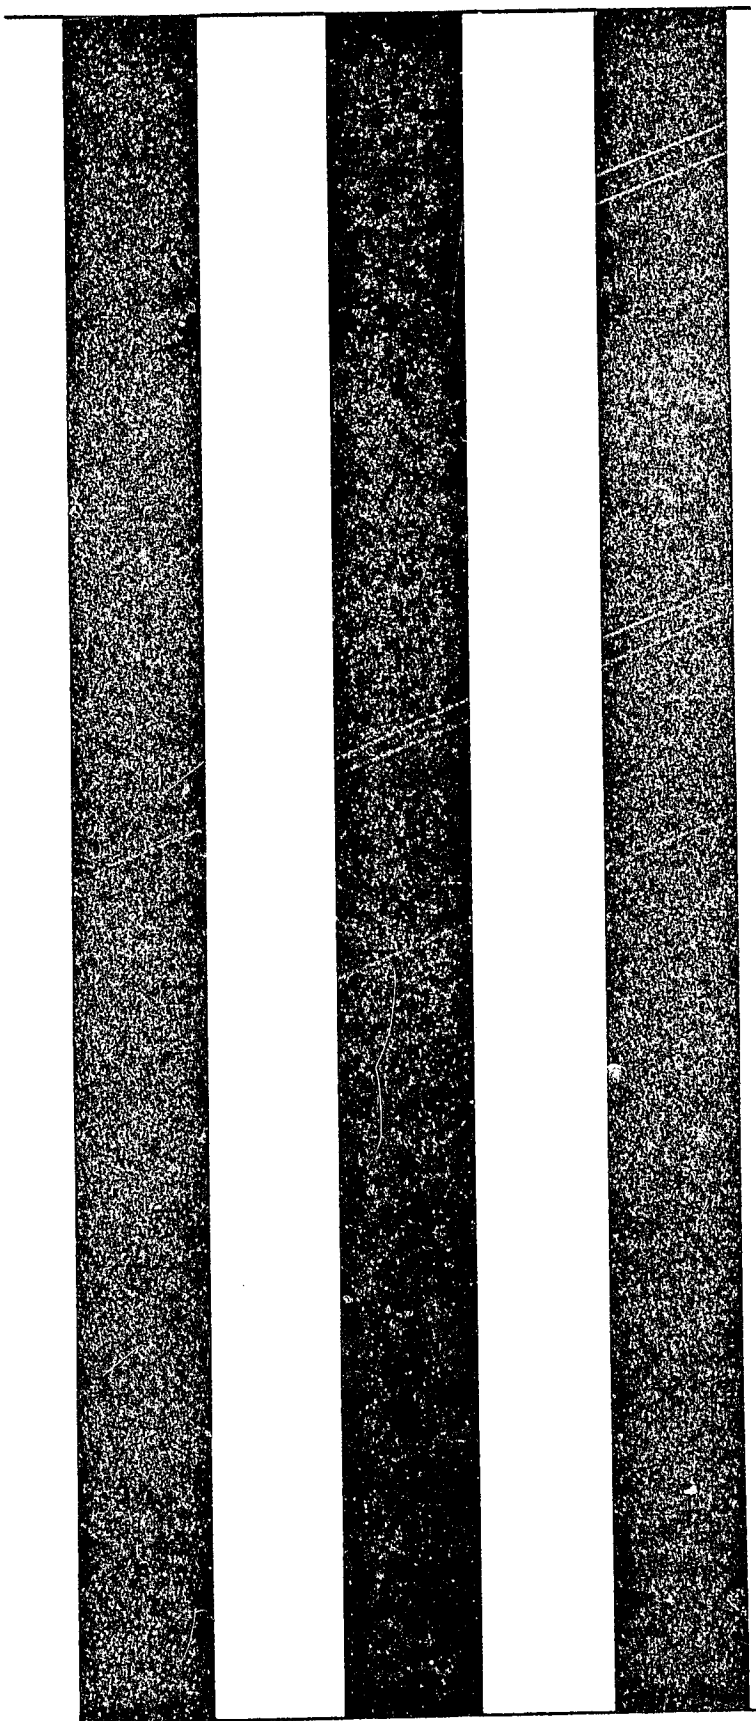

I wish to express my sincere appreciation to the many individuals who have assisted by furnishing the necessary information to make this report possible.

The data used in this report was assembled by
Warren F. Cruickshank, Senior Agricultural Inspector.

Respectfully submitted,

Earl R. Kalar
Agricultural Commissioner

Gentlemen:

This annual crop report depicts the acreage, production, and value of various crops grown in Lake County for 1961. The price figures represent gross value and DO NOT take into consideration the cost of production, harvesting, or packing.

F.O.B. prices have been used again this year on fresh fruit to conform with the statewide program of crop reporting. 1961 was high quality year for Bartlett pears in Lake County with over 85 percent of the crop making No. 1 grade. Walnuts were also high quality but size was very poor. Lower price this year affected the return for our number two tree crop.

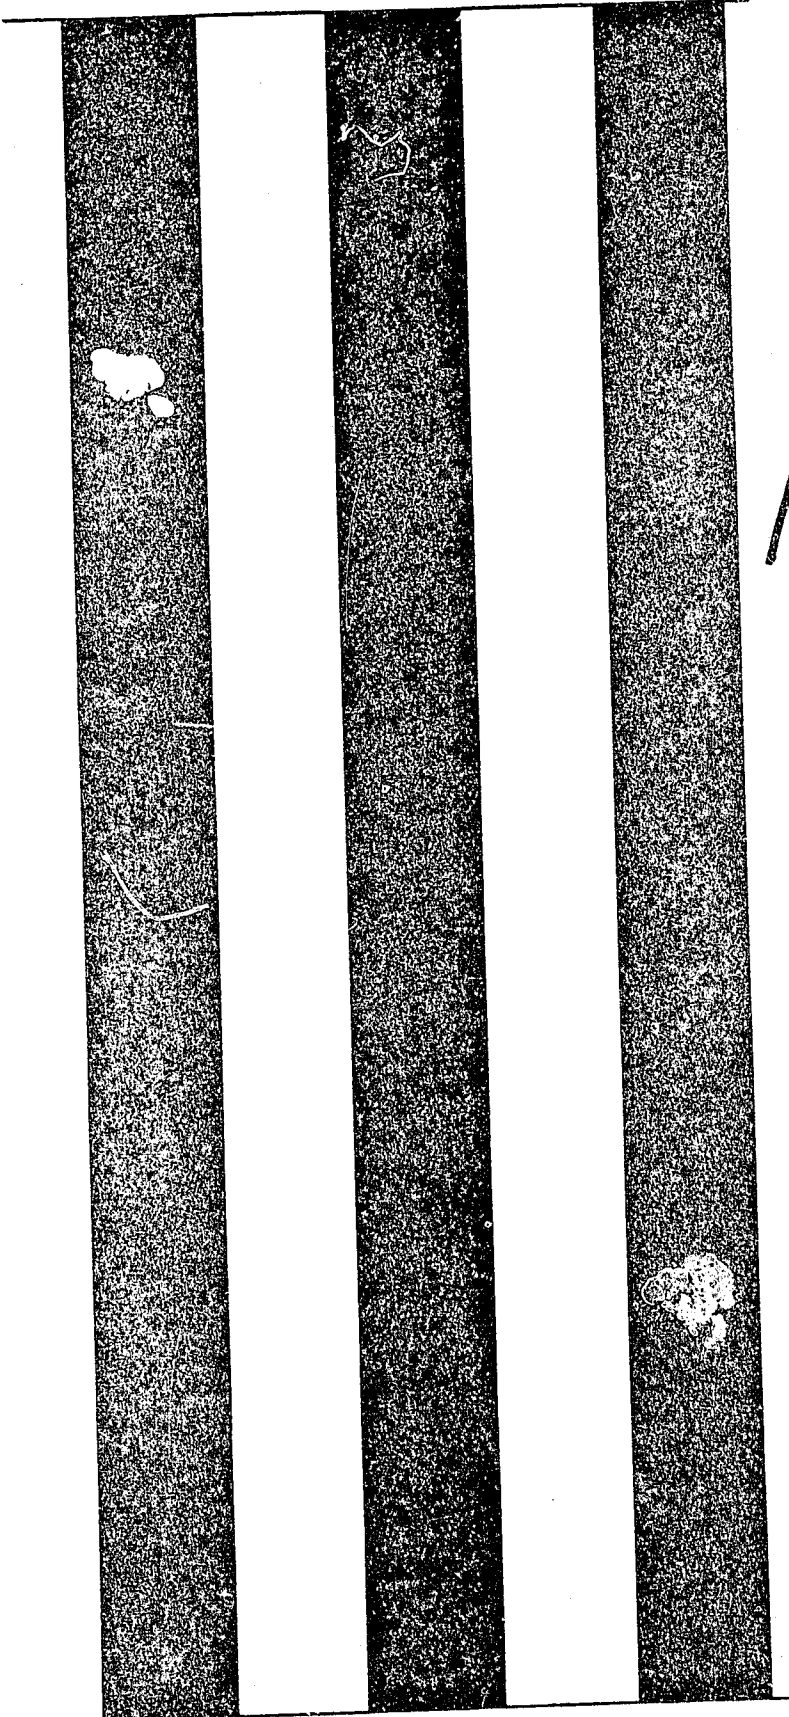

I wish to express my sincere appreciation to the many individuals who have assisted by furnishing the necessary information to make this report possible.

The data used in this report was gathered and assembled by W. F. Cruickshank,
Senior Agricultural Inspector.

Respectfully submitted,

Earl R. Kalar

Agricultural Commissioner

Gentlemen:

This annual crop report depicts the acreage, production, and value of various crops grown in Lake County for 1962. The price figures represent gross production and DO NOT take into consideration the cost of production, harvesting, or packing.

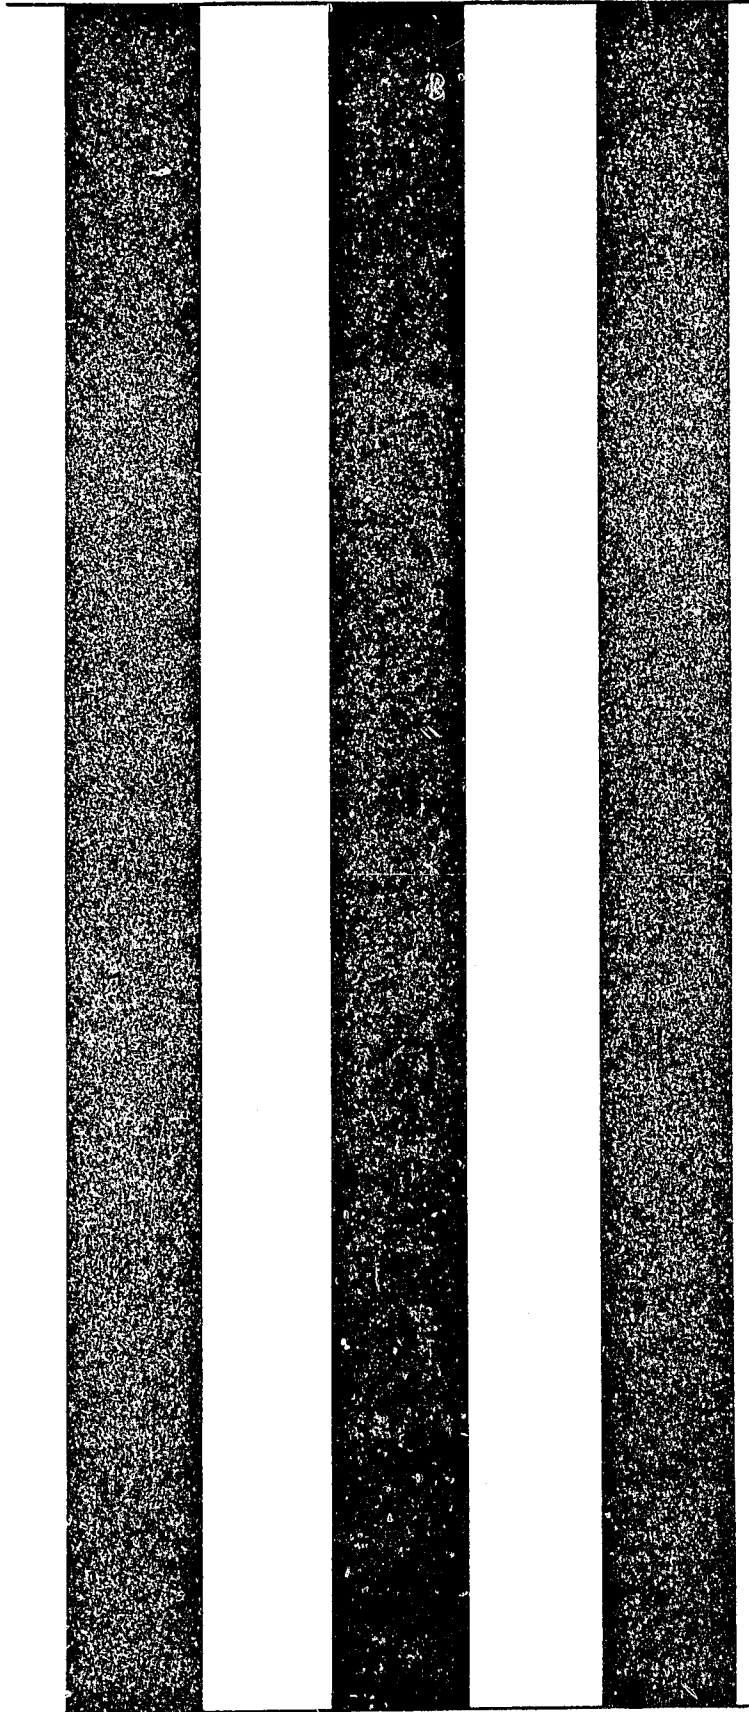

F.O.B. prices have been used again this year on fresh fruit to conform with the statewide program of crop reporting. 1962 was our largest production year for pears but the lower price was reflected in returns to the growers.

I wish to express my sincere appreciation to all who have assisted by contributing information necessary for this report.

Respectfully submitted,

W. F. Cruickshank

Senior Inspector

Richard E. Rominger, Director
California Department of Food
and Agriculture
and
The Honorable Board of Supervisors
Lake County

Gentlemen:

In compliance with the provisions of Section 2279 of the California Food and Agricultural Code, I am pleased to submit the Lake County Agricultural Crop Report for the calendar year 1981. Lake County's gross value for 1981 agricultural crops totaled \$37,157,310, a 0.7% increase of \$267,865 over the previous year and a new high for Lake County.

Pears continue to be the leading agricultural crop in Lake County with a gross value of \$18,407,905. This value is up \$126,670 over the previous year, primarily due to fresh pack pear prices were up a bit and tonnages nearly equal to the previous year. A greater amount of the processed pears went to juice in 1981. Walnut prices were up a bit and total yield down somewhat from last year, thus totaling \$4,278,295. Grape yields and tonnage continue to increase as more vineyards mature. Tonnage unit prices increased somewhat over last year because more of the white grape variety tonnages are reflected in this year's total crop of \$3,603,160. Kiwi production has become significant enough in production and numbers of growers producing that I have reported it as a separate crop item this year in the amount of \$268,500 on 89.5 tons.

Field crops were about the same production, with inclusion of a new crop (wild rice). This increase amounted to \$14,280 over the previous year.

Livestock values were down somewhat from last year. Unit prices were down on cattle and sheep. Sheep numbers are increasing slightly as more small family farm units occur and provide a livestock enterprise along with an off-farm job. Aquaculture dropped off in production substantially from the previous year.

I must emphasize that this Crop Report represents gross values of agricultural products and does not reflect costs of producing these crops nor a net return to the grower.

The Department sincerely appreciates the cooperation of the many growers, packing houses, vintners, livestock producers and various other producers in supplying the information necessary for this report.

Respectfully submitted,

Don Tompkins

Gentlemen:

This annual crop report depicts the acreage, production, and value of various crops grown in Lake County for 1963. The price figures represent gross production and do not take into consideration the cost of production, harvesting, or packing.

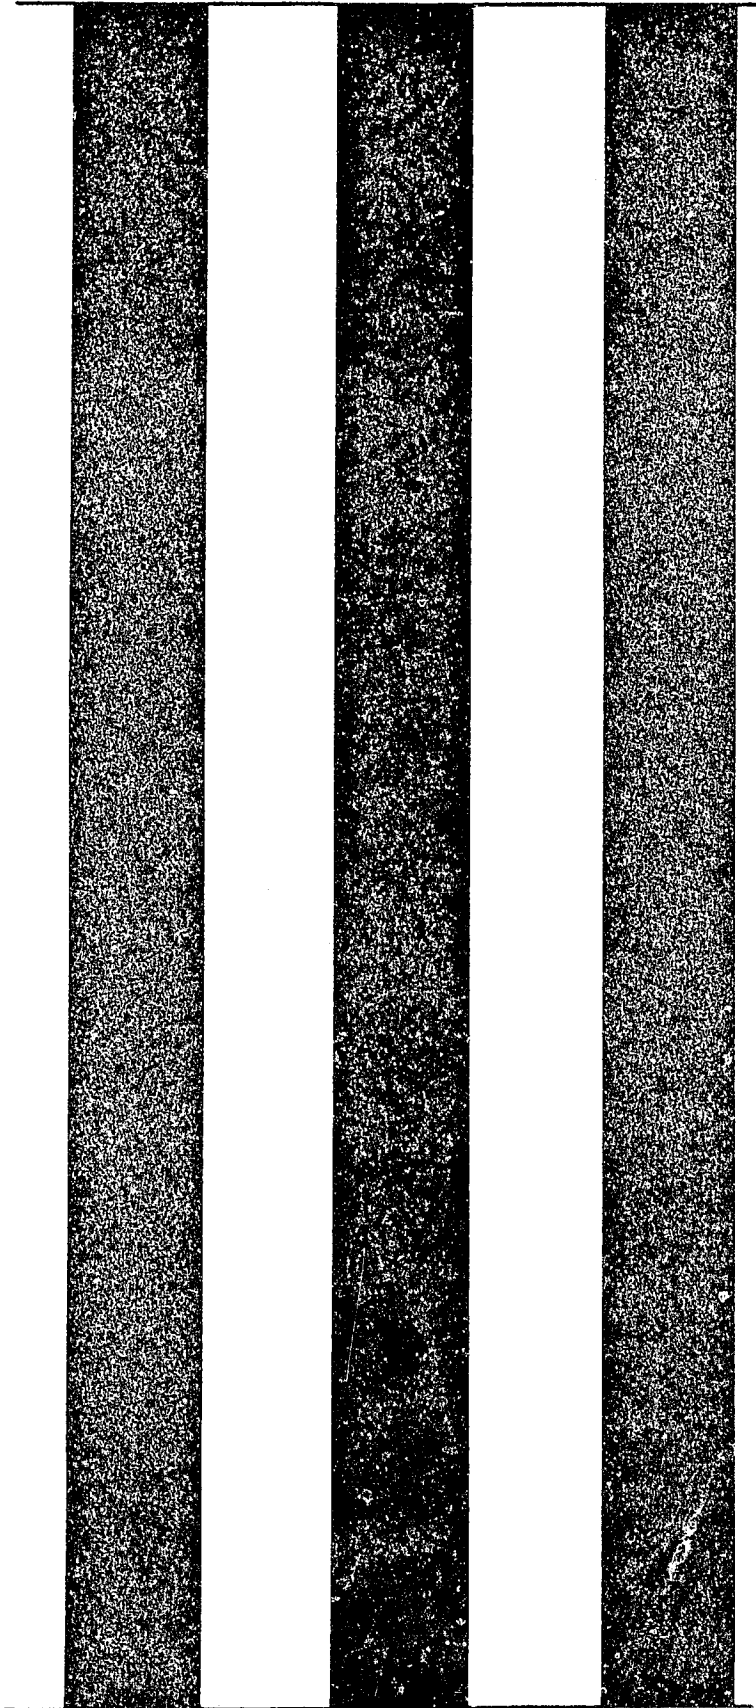

F.O.B. prices are used on fresh fruit to conform with the statewide program of crop reporting. 1963 was a low production year for pears but better prices have had a tendency to stabilize the overall figures.

I express my sincere appreciation to all who have contributed information necessary to compile this report.

Respectfully submitted by the cooperative efforts of

Charles L. Geoble
Agricultural Commissioner

W. F. Cruickshank
Senior Inspector

Gentlemen:

This annual crop report depicts the acreage, production, and value of various crops grown in Lake County for 1964. The price figures represent gross production and do not take into consideration the cost of production, harvesting, or packing.

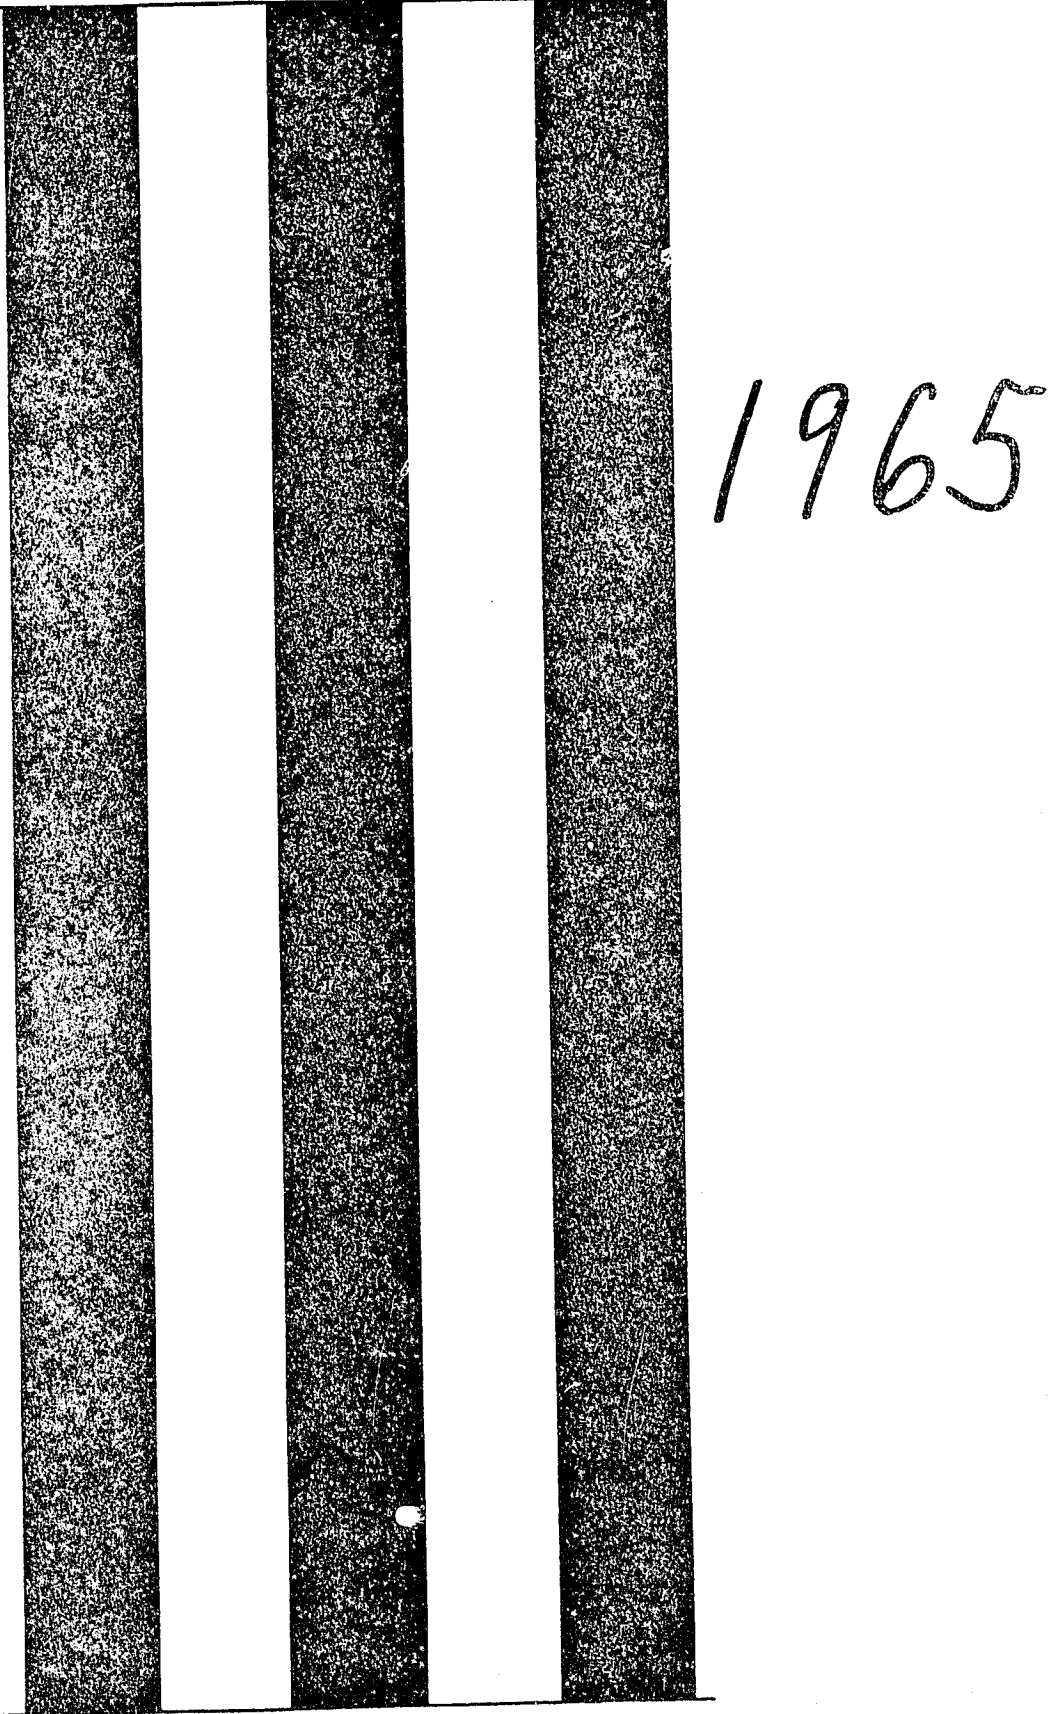

F.O.B. prices are used on fresh fruit to conform with the statewide program of crop reporting. Pear production was good in 1964 but walnut production was low. The overall figure is slightly above average over a six-year period.

I express my sincere appreciation to all who have contributed information necessary for this report, with special emphasis to Mr. W. F. Cruickshank, Senior Inspector.

Respectfully submitted,

Charles L. Geoble

COUNTY OF LAKE

CHARLES L. GEOBLE
Agricultural Commissioner

Route 1 - Box 315-C
Kelseyville, California, 95451

Charles A. Paul
Director of Agriculture

Honorable Board of Supervisors
Lake County

Donald M. Griner, Chairman, Upper Lake
L. D. Kirkpatrick, Kelseyville
Wesley O. Lampson, Lakeport
A. D. Shipley, Clearlake Highlands
Earle W. Wrieden, Middletown

Gentlemen:

The annual crop report for Lake County depicts the acreage, production, and value of the various crops for the year 1965. The prices represent gross production and do not take into consideration the cost of production, harvesting, or packing. F.O.B. prices are used on fresh fruit to conform with the statewide policy program of crop reporting.

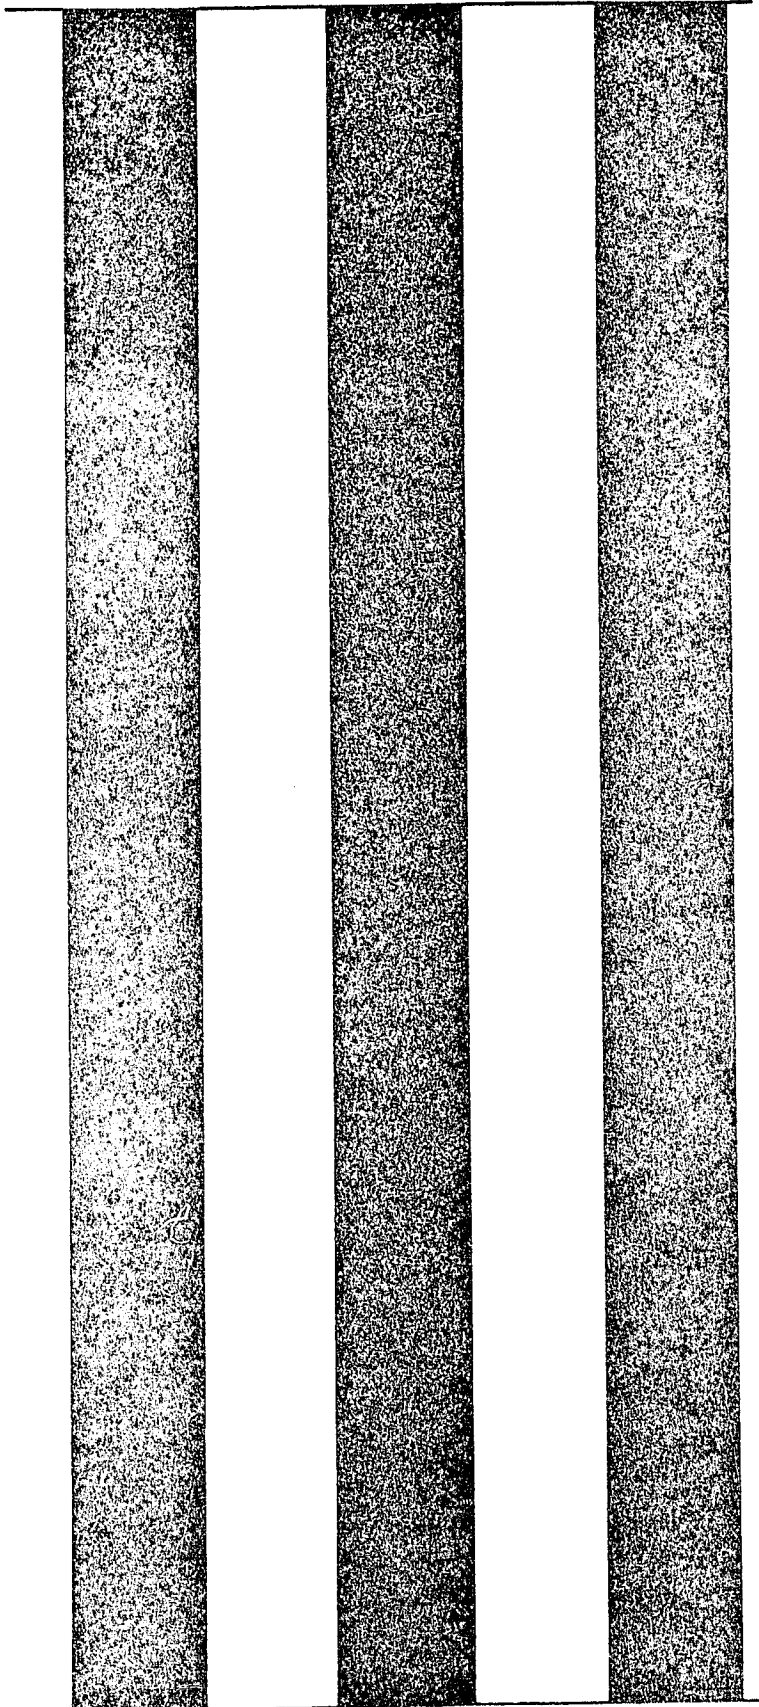

Pear production was low in 1965 due to unfavorable weather conditions during blooming season. Walnuts were slightly below average, resulting in a below average overall total value of agricultural crops in Lake County.

I express my sincere appreciation to all who have contributed the information to make this report possible.

Respectfully submitted,

Charles L. Geoble

COUNTY OF LAKE

CHARLES L. GEUBLE
Agricultural Commissioner

Route 1 - Box 315-C
Kelseyville, California, 95451

Earl Coke
Director of Agriculture

Honorable Board of Supervisors
Lake County

L. D. Kirkpatrick, Chairman, Kelseyville
Arthur Burry, Lucerne
Carl Denner, Clearlake Oaks
Wesley O. Lampson, Lakeport
Earle W. Wrieden, Middletown

Gentlemen:

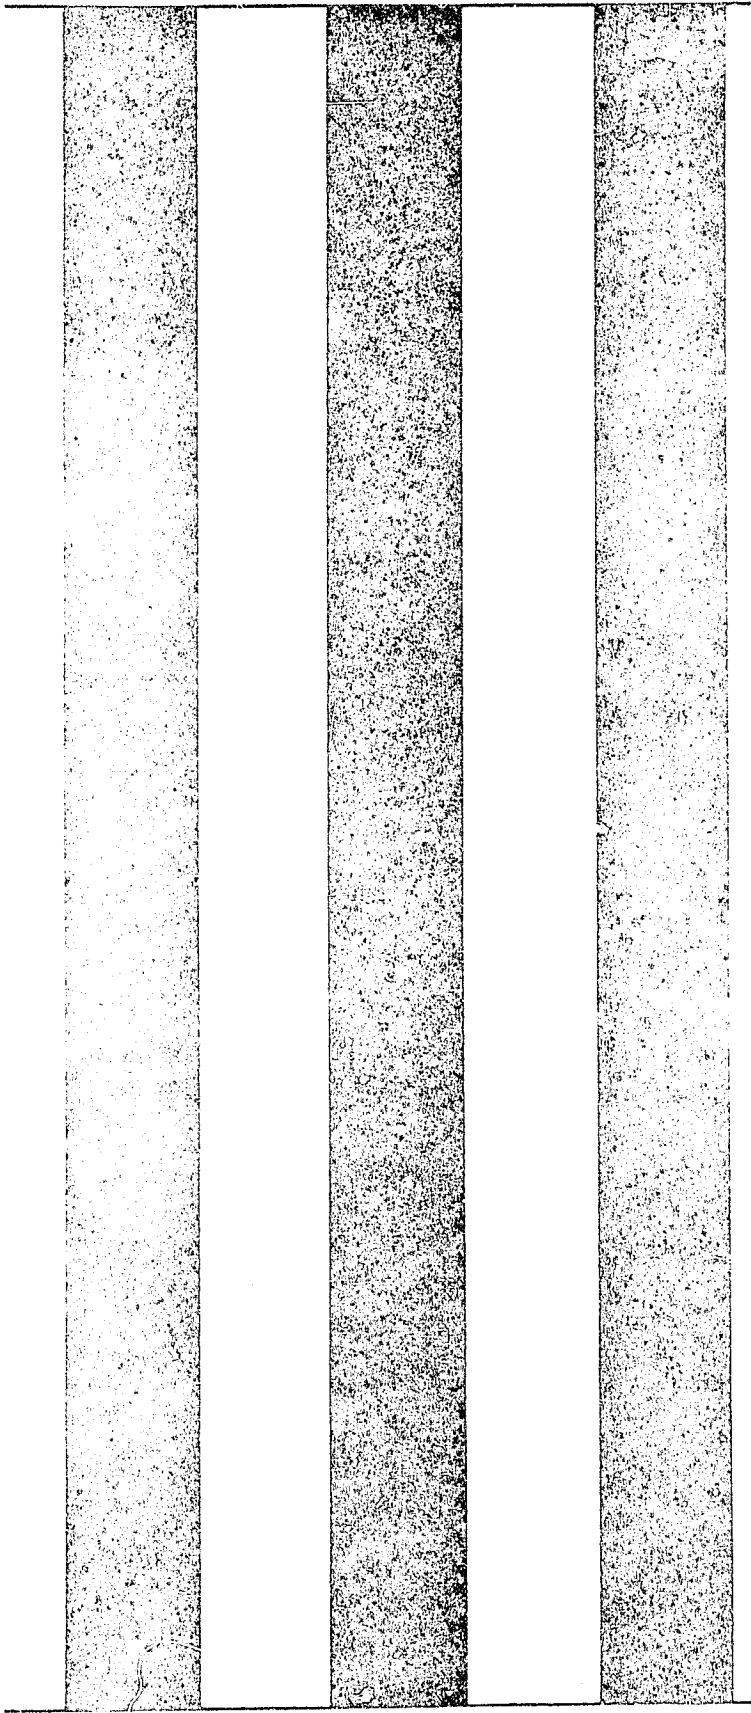

The annual crop report for Lake County depicts the acreage, production, and value of the various crops for the year 1966. The prices represent gross production and do not take into consideration the cost of production, harvesting, or packing. F.O.B. prices are used on fresh fruit to conform with the statewide program of crop reporting.

I express my sincere appreciation to all who have contributed the information to make this report possible.

Respectfully submitted,

Charles L. Geoble

Carl Denner, Clearlake Oaks
L. D. Kirkpatrick, Kelseyville
Earle W. Wrieden, Middletown

Gentlemen:

The annual crop report for Lake County depicts the acreage, production, and value of the various crops. The prices express the economic value to Lake County but do not express the net value to growers and producers.

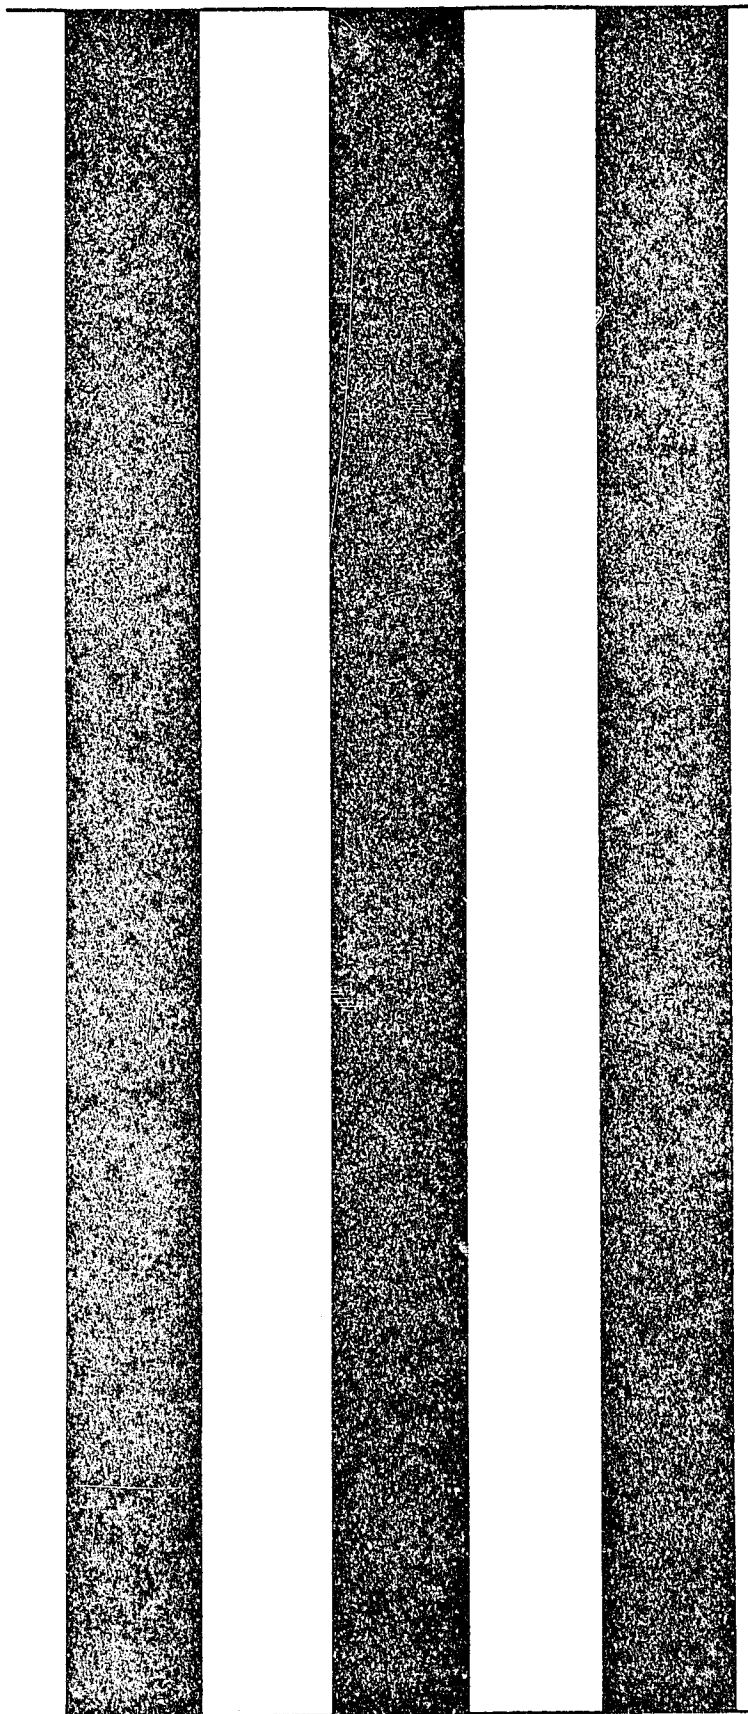

The 1967 pear production was about 50 percent less than 1966 but higher prices stabilized the end result. Walnut production was also low because of adverse weather factors, as with most commodities. F.O.B. prices are used on fresh fruit to conform with the statewide program of crop reporting.

I wish to express my thanks to all who have contributed the information necessary for the data in this report.

Sincerely,

Charles L. Geoble
Agricultural Commissioner

Gentlemen:

The annual crop report for Lake County indicates the acreage, production, and value of the various crops. The prices represent economic value to Lake County but do not express the net value to growers and producers.

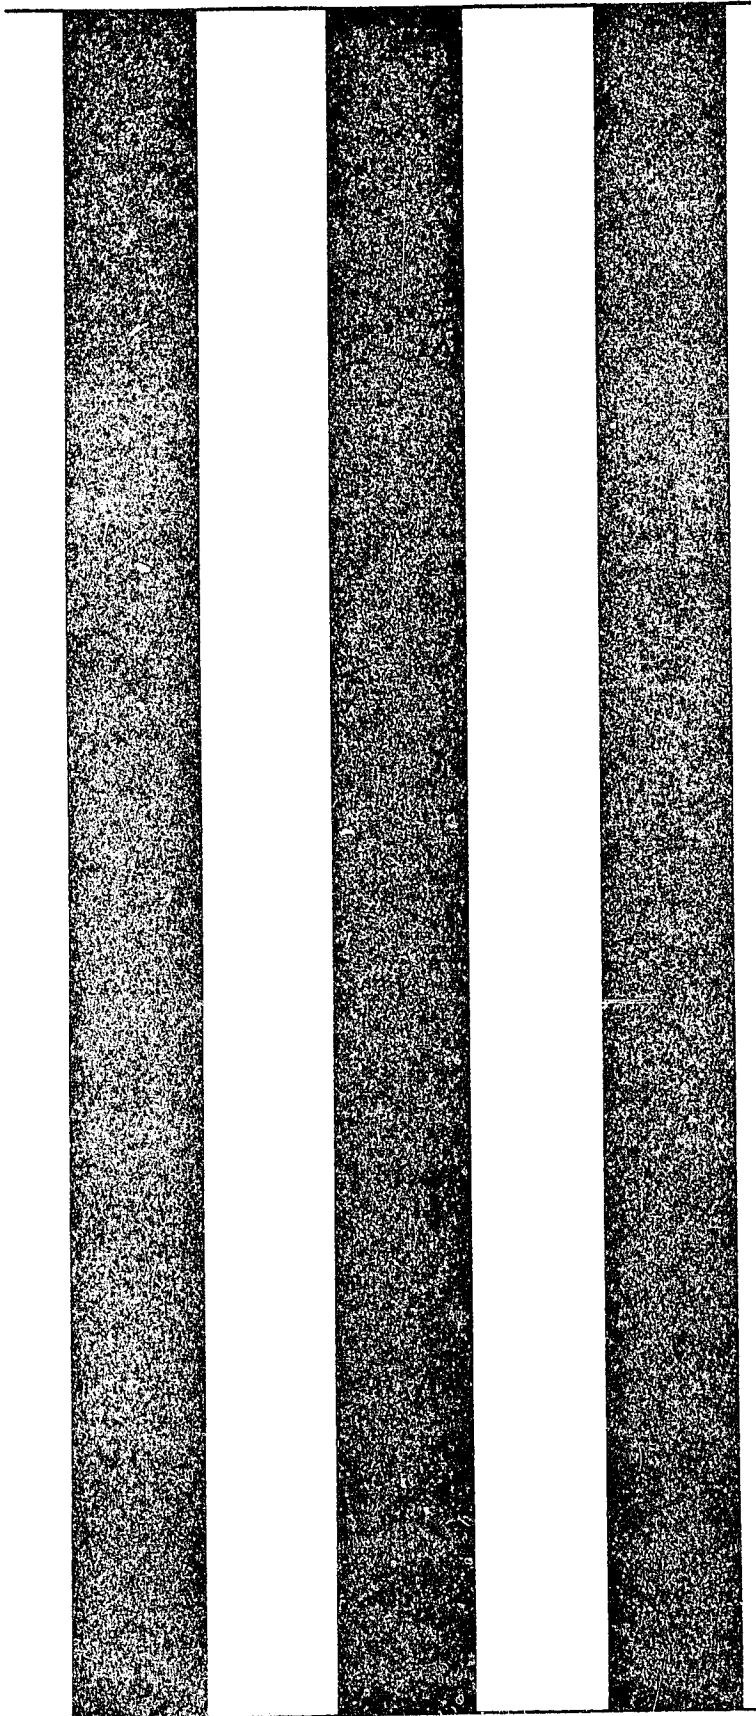

Pear production for 1968 was up from the previous year and favorable price produced the highest value on record. Walnut production and value also increased. Livestock production and value continues to increase each year. F.O.B. prices are used to conform with statewide crop reporting.

My thanks to all who have contributed the information necessary for the data in the report which was compiled by Deputy Commissioner Charles Lipska.

Sincerely,

Charles L. Geoble
Agricultural Commissioner

Mr. Jerry W. Fielder
Director of Agriculture

Honorable Board of Supervisors
Lake County

Earle W. Wrieden, Chairman, Middletown
Carl W. Denner, Clearlake Oaks
Wesley O. Lampson, Lakeport
Junior C. Wilds, Kelseyville
(District Three - vacant)

Gentlemen:

The value of Lake County agricultural production for 1969 was second highest on record but somewhat less than last year. Pear and walnut prices were down and the walnut crop was light. Prices shown are F.O.B. and represent only the value of the products ready for market. The dollar turnover required for production is not included.

Grapes are shown separately for the first time this year and are expected to show considerable increase in the next few years. Livestock production and value continues to increase. Quality of purebred stock competes with the best on the market.

My thanks to the growers, shippers, and all others who contributed the information necessary for this report which was compiled by Deputy Commissioner Charles Lipska.

Sincerely,

Charles L. Geoble
Charles L. Geoble
Agricultural Commissioner
