AJC Brand Family

- Brands Sold In More Than 60 Countries
- Diverse Products
- Year-Round Supply

- Marketing & Promotional Support
- Customized packing
Founded in 1984, USAPEEC is a non-profit, industry-sponsored trade organization dedicated to increasing exports of U.S. poultry and egg food products in all foreign markets.

USAPEEC is also a cooperator organization sanctioned by the Foreign Agricultural Service of the U.S.D.A. As a cooperator, USAPEEC administers export promotion funds allocated under the USDA's Market Access Program and Foreign Market Development program.

USAPEEC members account for more than 90% of all poultry and egg exports, and include nearly all major U.S. poultry and egg producing and processing companies, as well as many international trading firms. Associate members include steamship lines, cold storage facilities, freight forwarders, port authorities and others whose businesses benefit from thriving poultry and egg exports.
So why’s poultry such a big deal?.. 

The U.S. poultry industry has 62,000 small and medium sized contract farmers that produce for the broiler and turkey industry companies.*

U.S. exports of poultry and eggs have created over 50,400 jobs! *

Global Economic Forecasts
2010 – 2019

* Global Economic Growth to Rebound to 3.3 % !

Largest Projected Growth in Developing Economies

- Asia (8%); China → 10% GDP
- South Asia (8%); India → 8.7%
- Eastern Europe/Poland/FSU & Russia: 5.2 %
- Middle East: 5%
- Africa: 5% (North Africa 5%; Sub Sahara 5.3%)

- Source: USDA & U.S. Census Bureau
Global Economic Forecasts
2010 – 2019

World Population growth projected 1.1 %
(1980’s-1990’s: world population growth averaged 1.7 %)

- Major Regions that will average greater than 1.1%:
  - Africa: 2.2 % (North Africa 1.5 %; Sub Sahara 2.3 %)
  - Southeast Asia (ie Malaysia/Philippines) 1.7-1.8 %
  - India/Bangladesh/Pakistan 1.3%
  - Middle East 1.5 %

- China & India combined represents 37 % of the world’s population.
Global Economic Forecasts
2010 - 2019

Some Nations with Declining Populations:
- Germany
- Italy
- Spain
- Russia / Ukraine
Factors Driving World Meat Demand

- Income Growth – Consumers diversify diets: More meat, dairy products, vegetables and processed foods
- Increased Demand for feedstuffs and higher valued food
- Urbanization

- At a 1.1% growth rate, there will be nearly 75 Million additional mouths to feed each year!!
Top U.S. Broiler Export Markets

2009
- ROW: 36.1%
- Russia: 20.5%
- Cuba: 4.1%
- Hong Kong: 4.6%
- Mexico: 10.4%
- Iraq: 4.5%

2010
- ROW: 51.5%
- Russia: 9.8%
- Hong Kong: 13.0%
- Mexico: 13.0%
- Angola: 4.4%
- Cuba: 4.2%
- Iraq: 4.1%
Poultry Exports benefit everyone..

- Poultry exports benefit both U.S. producers and consumers.
- The reason: U.S. consumer preference for breast meat, coupled with foreign consumers preference for dark meat (i.e., leg quarters) and even chicken paws. Thanks to increased exports, U.S. consumers enjoy lower prices of breast meat.
- Exports are expected to play a more important role in driving poultry production in the future as U.S. domestic consumption levels off.

Source: USAPEEC
It’s not that easy... obstacles to overcome:

- Market access issues.
- Animal disease.
- International competition; local producers.
- Increased corn/feed costs.
- Politics.. (we must support trade based on sound science, not political science).
The opportunities ahead look good!

- U.S. poultry and egg industry can supply quality, disease-free products to a growing world.
- Broiler meat is most competitive value in the World!
- Developing Nation Growth & Population Increases, especially in developing countries, means greater demand for broiler meat.
- Broilers are the most energy efficient protein; the most efficient converter of feed. Also, environmentally friendly production; demands less water, uses less arable land; smaller carbon footprint.
Conclusion

- Exports will play an ever more important role in driving poultry production in the future as U.S. domestic consumption levels off (this is also good news for the U.S. corn and soybean industries).
- Despite various obstacles, poultry export volumes continue to grow; more market diversification.
