STATEMENT OF COOPERATION

In assembling the information on which this report is based, the following agencies cooperated during each of the years in the period covered by the data:

Arizona Agricultural Experiment Station.
California State Department of Agriculture.
Georgia Experiment Station.
North Carolina Agricultural Experiment Station.
Oklahoma Agricultural Experiment Station.
South Carolina Agricultural Experiment Station.
Tennessee Agricultural Experiment Station.

In addition, the following agencies cooperated during some part of the period:

Alabama Agricultural Experiment Station.
Arkansas Agricultural Experiment Station.
Florida Agricultural Experiment Station.
Louisiana Agricultural Experiment Station.
Mississippi Agricultural Experiment Station.
Missouri Agricultural Experiment Station.
New Mexico Agricultural Experiment Station.
Texas Agricultural Experiment Station.

Credit is due cotton ginners, warehousemen, dealers, manufacturers, and owners of cotton whose cooperation has made this report possible.

INTRODUCTION

All of the information in this report relating to grade, staple length, and tenderability of cotton is based on classification according to the official cotton standards of the United States in effect prior to August 20, 1936.

The 1935–36 season is the eighth consecutive season for which the United States Department of Agriculture has gathered and released information on grade, staple length, and tenderability of cotton in this country. Preliminary work of reporting on the grade, staple length, and tenderability of cotton ginned in the United States was undertaken in the 1927–28 season under the general authority conveyed by the Agricultural Appropriation Act of January 18, 1927, and with funds made available for the fiscal year ended June 30, 1928. The work of the 1927–28 season was of restricted scope, covering only the 1927 crop of the State of Georgia and of a Texas-Oklahoma area of 27

© UPDATA 1981

counties. The results were published in Statistical Bulletin No. 40.

Beginning with the 1928–29 season the grade and staple reporting activities were inaugurated for the United States as a whole, under the authority of legislation enacted in 1927 (act of Mar. 3, 44 Stat. 1372–1374) providing for the assembling and dissemination of information on the grade, staple length, and tenderability of the annual cotton crop and carry-over. The first of the annual carry-over reports was issued on September 21, 1928. It had reference to stocks of cotton on hand in the United States at the beginning of the season on August 1.

The present publication carries forward the information that was published in Statistical Bulletins Nos. 40, 47, 52, and 56.

All of the figures on the grade, staple length, and tenderability of the crop are based on the classification of samples of cotton mailed by cooperating ginners to the local offices of the Bureau of Agricultural Economics. The cooperating ginners furnish a press-box sample of not less than 4 ounces from each bale ginned at their establishments.

By agreement, cooperating ginners forward their samples daily to official classing offices located at Atlanta, Ga., Memphis, Tenn., and Dallas, Austin, and El Paso, Tex. There the samples are classed, according to official standards, and the results are published weekly. Additional information regarding the assembling of basic data on the crop and regarding the preparation of reports is contained in Statistical Bulletin No. 40, which contains also similar information concerning the carry-over.

Figures on the grade, staple length, and tenderability of stocks of cotton in the United States on August 1 are based on the classification of samples representing stocks in public warehouses and compresses, consuming establishments, and other places of storage.

Throughout this report the names of the grades have been abbreviated as follows: 1–M. F., Middling Fair; 2–S. G. M., Strict Good Middling; 3–G. M., Good Middling; 4–S. M., Strict Middling; 5–M., Middling; 6–S. L. M., Strict Low Middling; 7–L. M., Low Middling; 8–S. G. O., Strict Good Ordinary; 9–G. O., Good Ordinary.

Table 1 lists the standards for grade for American upland cotton.

[1] The grades shown above the heavy black line are deliverable on futures contracts made in accordance with sec. 5 of the Cotton Futures Act. Those below the line are untenderable on such contracts. These standards were superseded by revised official standards for grades effective Aug. 20, 1936. These new standards are described in Service and Regulatory Announcements 150, Bureau of Agricultural Economics, and in Statistical Bulletin 56.

District 2	16.00	District 3	14.49
District 3	16.71	District 4	15.16
District 4	15.04	District 5	14.39
Mississippi	16.82	District 6	14.81
District 1	18.23	District 7	15.04
District 2	16.26	District 8	14.44
District 3	15.11	District 9	15.60
Missouri	15.57	District 10	15.45
		District 11	15.66
		Virginia	15.29
		All other [3]	15.68

[1] Average calculated by multiplying the number of bales in each length group by the midpoint of the group expressed in sixteenths of an inch (that is, $^{15}/_{16}$ and $^{31}/_{32}$=15.5 etc.), summating, and dividing by the total number of bales. The midpoint of the $^{15}/_{16}$- and $^{31}/_{32}$-inch group, for example, was taken as 15.5 sixteenths ($^{31}/_{32}$) inch because according to regulations $^{15}/_{16}$ is the lower limit of the group which includes all cotton classed as being as long as $^{15}/_{16}$ and shorter than 1 inch. In making the calculations, the midpoints of the groups "shorter than $^{7}/_{8}$ inch" and "1$^{1}/_{4}$ inches and longer" were considered to be 13.5 and 20.5, respectively. Averages can be converted to inches by dividing by 16.

[2] For location of districts into which States are divided, see maps accompanying tables for individual States, by districts, pp. 39–51.

[3] Includes Illinois, Kansas, and Kentucky.

Alabama	14.33	14.65	14.53	14.34	New Mexico	16.76	16.88	17.50	17.30
Arizona	16.51	16.68	17.05	16.91	North Carolina	15.06	15.31	15.76	15.65
Arkansas	15.84	16.43	16.17	15.99	Oklahoma	14.89	15.24	14.40	14.39
California	17.12	17.41	17.80	17.54	South Carolina	15.44	15.70	16.10	16.04
Florida	14.45	14.88	14.59	14.33	Tennessee	15.16	15.45	15.19	15.02
Georgia	14.60	14.82	15.13	15.18	Texas	15.01	15.16	14.77	14.87
Louisiana	15.65	16.10	15.74	16.18	Virginia	14.72	14.69	14.84	15.29
Mississippi	16.61	17.29	17.28	16.82	All other [2]	16.45	16.02	16.16	15.68

[1] Average calculated by multiplying the number of bales in each length group by the midpoint of the group expressed in sixteenths of an inch (that is, 1 1/16 and 1 1/32=15.5, etc.), summating, and dividing by the total number of bales. The midpoint of the 1 9/16- and 1 1/32-inch group, for example, was taken as 15.5 sixteenths (1 1/32) inch because according to regulations 1 1/16 is the lower limit of the group which includes all cotton classed as being as long as 1 1/16 and shorter than 1 inch. In making the calculations, the midpoints of the groups "shorter than 7/8 inch" and "1 1/4 inches and longer" were considered to be 13.5 and 20.5, respectively. Averages can be converted to inches by dividing by 16. Averages for each individual year of the period 1928–32 are published in table 5 of Statistical Bulletin 52.

[2] Includes Illinois, Kansas, and Kentucky.

TABLE 7.—*Grade of American upland cotton ginned in the United States during specified periods,* [1] *by States, crop of 1935*

[Quantities are given in running bales, except that round bales are counted as half bales. Linters are not included]

TABLE 26.—*Average staple length* [1] *of American upland cotton on hand in the United States, by places of storage, August 1, 1928–36*

Place of storage	1928	1929	1930	1931	1932	1933	1934	1935	1936
	Sixteenth inches	*Sixteenth inches*	*Sixteenth inches*	*Sixteenth inches*	*Sixteenth inches*	*Sixteenth inches*	*Sixteenth inches*	*Sixteenth inches*	*Sixteenth inches*
All places of storage	16.44	15.95	15.65	15.46	15.67	15.83	15.74	15.49	15.26
Public warehouses and compresses [2]	16.32	15.56	15.42	15.25	15.58	15.73	15.63	15.34	14.99
Consuming establishments	16.62	16.45	16.38	16.28	16.36	16.35	16.38	16.74	16.65

[1] Average calculated by multiplying the number of bales in each length group by the midpoint of the group expressed in sixteenths of an inch (that is, $1\frac{5}{16}$ and $2\frac{1}{32}$=15.5, etc.), summating, and dividing by the total number of bales. The midpoint of the $1\frac{5}{16}$- and $2\frac{1}{32}$-inch group, for example, was taken as 15.5 sixteenths ($2\frac{1}{32}$) inch because according to regulations $1\frac{5}{16}$ is the lower limit of the group which includes all cotton classed as being as long as $1\frac{5}{16}$ and shorter than 1 inch. In making the calculations, the midpoints of the groups "shorter than ⅞ inch" and "1¼ inches and longer" were considered to be 13.5 and 20.5, respectively. Averages can be converted to inches by dividing by 16.

[2] Figures include cotton reported by the Bureau of the Census as "elsewhere."

TABLE 27.—*Staple length of Egyptian cotton* [1] *on hand in the United States, August 1, 1928–36*

[PUBLIC—No. 740—69TH CONGRESS]

[S. 4746]

An Act Authorizing the Secretary of Agriculture to collect and publish statistics of the grade and staple length of cotton.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of Agriculture be, and he is hereby, authorized and directed to collect and publish annually, on dates to be announced by him, statistics or estimates concerning the grades and staple length of stocks of cotton, known as the carry-over, on hand on the 1st of August of each year in warehouses and other establishments of every character in the continental United States; and following such publication each year, to publish, at intervals in his discretion, his estimate of the grades and staple length of cotton of the then current crop: *Provided*, That not less than three such estimates shall be published with respect to each crop. In any such statistics or estimates published, the cotton which on the date for which such statistics are published may be recognized as tenderable on contracts of sale of cotton for future delivery under the United States Cotton Futures Act of August 11, 1916, as amended, shall be stated separately from that which may be untenderable under said Act as amended.

SEC. 2. That the information furnished by any individual establishment under the provisions of this Act shall be considered as strictly confidential and shall be used only for the statistical purpose for which it is supplied. Any employee of the Department of Agriculture who, without the written authority of the Secretary of Agriculture, shall publish or communicate any information given into his possession by reason of his employment under the provisions of this Act shall be guilty of a misdemeanor and shall, upon conviction thereof, be fined not less than $300 or more than $1,000, or imprisoned for a period of not exceeding one year, or both so fined and imprisoned, at the discretion of the court.

SEC. 3. That it shall be the duty of every owner, president, treasurer, secretary, director, or other officer or agent of any cotton warehouse, cotton ginnery, cotton mill, or other place or establishment where cotton is stored, whether conducted as a corporation, firm, limited partnership, or individual, and of any owner or holder of any cotton, and of the agents and representatives of any such owner or holder, when requested by the Secretary of Agriculture, or by any special agent or other employee of the Department of Agriculture acting under the instructions of said Secretary to furnish completely and correctly, to the best of his knowledge, all of the information concerning the grades and staple length of cotton on hand, and when requested to permit such agent or employee of the Department of Agriculture to examine and classify samples of all such cotton on hand. The request of the Secretary of Agriculture for such information may be made in writing or by a visiting representative, and if made in writing shall be forwarded by registered mail, and the registry receipt of the Post Office Department shall be accepted as evidence of such demand. Any owner, president, treasurer, secretary, director, or other officer or agent of any cotton warehouse, cotton ginnery, cotton mill, or other place or establishment where cotton is stored, or any owner or holder of any cotton or the agent or representative of any such owner or holder, who, under the conditions hereinbefore stated, shall refuse or willfully neglect to furnish any information herein provided for or shall willfully give answers that are false or shall refuse to allow agents or employees of the Department of Agriculture to examine or classify any cotton in store in any such establishment, or in the hands of any owner or holder or of the agent or representative of any such owner or holder, shall be guilty of a misdemeanor and, upon conviction thereof, shall be fined not less than $300 or more than $1,000.

SEC. 4. The Secretary of Agriculture may cooperate with any department or agency of the Government, any State, Territory, District, or possession, or department, agency, or political subdivision thereof, or any person; and shall have the power to appoint, remove, and fix the compensation of such officers and employees, not in conflict with existing law, and make such expenditures for the

purchase of samples of cotton, for rent outside the District of Columbia, printing, telegrams, telephones, books of reference, periodicals, furniture, stationery, office equipment, travel, and other supplies and expenses as shall be necessary to the administration of this Act in the District of Columbia and elsewhere, and there are hereby authorized to be appropriated, out of any moneys in the Treasury not otherwise appropriated, such sums as may be necessary for such purposes.

SEC. 5. That, of the reports issued by the Secretary of Agriculture, pursuant to the Act entitled "An Act authorizing the Department of Agriculture to issue semimonthly cotton crop reports and providing for their publication simultaneously with the ginning reports of the Department of Commerce", approved May 3, 1924, only five shall be issued hereafter, one as of August 1, one as of September 1, one as of October 1, one as of November 1, and one as of December 1, each of which shall state the condition and progress of the crop and the probable number of bales which will be ginned, these reports to be issued simultaneously with the cotton ginning reports of the Bureau of the Census relating to the same dates, the two reports to be issued from the same place at eleven antemeridian of the eighth day following that to which the respective reports relate. When such date of release falls on Sunday or a legal holiday the report shall be issued at eleven o'clock antemeridian of the next succeeding workday.

SEC. 6. The Secretary of Agriculture shall cause to be issued a report on or before the 10th day of July of each year showing by States and in toto the number of acres of cotton in cultivation on July 1, to be followed on September 1 and December 1 with an estimate of the acreage of cotton abandoned since July 1.

Approved, March 3, 1927.
