SPECIAL NOTICE

This statistical reference presents analytical tables showing current and historical data on U.S. foreign trade in agricultural products. Detailed tables cover commodity and country information for the most recent 2-year period. Statistics were compiled based on preliminary data.

Agricultural trade statistics in this report were derived from official data released by the U.S. Bureau of the Census. Agricultural commodities are defined as (1) non-marine food products and (2) other products of agriculture which have not passed through complex processes of manufacture, such as fibers, raw hides and skins, fats and oils, beer, and wine. Such manufactured products as textiles, leather, boots and shoes, cigarettes, naval stores, forestry products, and distilled alcoholic beverages are not considered agricultural.

The trade statistics exclude shipments between the 50 States and Puerto Rico, between the 50 States and the island possessions, between Puerto Rico and the island possessions, among the island possessions, and intransit through the United States from one foreign country to another when documented as such by the U.S. Customs Bureau.

Exports

The export data in this report include "exports of domestic merchandise," defined as commodities grown, produced, or manufactured in the United States, and commodities of foreign origin which have been changed from the form in which they were imported. The export value is generally equivalent to a free-alongside-ship (f.a.s.) value at the U.S. port of export, based on the transaction price including inland transportation, insurance, and other costs incurred in placing the merchandise alongside the carrier.

The country of destination is defined as the country of ultimate destination known to the exporter at the time a commodity is exported. In many cases, however, the exporter cannot determine the ultimate destination because commodities frequently are transshipped through transfer facilities located at intermediate ports enroute. Shipments to "unknown" destinations in the commodity-by-country tables represent intransit grains and oilseeds from U.S. Great Lakes ports to Canadian St. Lawrence transfer points. Subsequently, these intransit commodities may be transshipped again in Belgium, the Netherlands, or the Federal Republic of Germany to interior European countries, to Scandanavian countries, or the United Kingdom. Supplementary tables on transshipments on pages 273 and 274 are provided to assist the user in determining ultimate destinations for some commodities. Destination information is based on statistics acquired from the Canadian Grain Commission.

Agricultural exports under specified Government-financed programs (table 14) include shipments under Public Law 480 programs, authorized by Public Law 83-480 as amended; and AID programs, authorized by P.L. 82-165, 83-665, and 87-195 as amended. Commercial exports include, in addition to unassisted commercial transactions, shipments of some commodities with governmental assistance in the form of (1) extension of credit guarantees for relatively short periods repayable in dollars plus interest by USDA's Commodity Credit Corporation, and (2) Export-Import Bank loans and medium-term loan guarantees.

Apparent excesses of exports under specified Government programs over total exports, which result in negative values in the column "Agricultural exports outside specified Government programs," may be due to lags in reporting, differences in valuation procedures, or the recording of the export as destined for the country through which a transshipment was made.

In commodity group-by-country data (table 15), 7-digit Schedule B commodity codes were summed to group totals. Each of the countries listed under each group accounted for 0.3 percent or more of the commodity group's export value with the following exceptions: wheat, rice, feed grains, grains and preparations, corn, wheat and wheat products, grain sorghums, wheat and wheat flour, feed grains and products, and nonfat dry milk were listed if they accounted for 0.1 percent or more.

Commodity-by-country data (table 16) are printed at the 7-digit Schedule B commodity code level. Statistics on commodities valued under $1 million are not shown, but are available for reference from agricultural tabulations in the International Economics Division, World Analysis Branch, Economics and Statistics Service, U.S. Department of Agriculture. So-called "basket" classifications (28 commodities) were excluded because they consist of diverse items and do not provide for analytical clarity. Countries listed under commodity headings were selected on a percentage of commodity export values as follows: (1) Commodities having an export value from $1 million to $5 million show countries accounting for 5 percent or more; (2) Commodities with export value from $5 million to $20 million show countries accounting for 2 percent or more; (3) Commodities with export value of $20 million to $50 million show countries accounting for 1 percent or more; and (4) Commodities valued over $50 million show countries accounting for 0.3 percent or more.

Data on agricultural exports by country for selected commodity groups will be published as supplementary tables to this publication and made available on request.

Imports

Import data consist of "imports for consumption," representing entries for immediate consumption and withdrawals from bonded warehouses. The import value is defined as the "Customs value," based on the foreign market value, export value, or constructed value, and excludes U.S. import duties, freight, insurance, and other charges incurred in moving the commodity to the U.S. port of entry.

Data on shipments valued at less than $251 are not shown in individual commodity listings or in agricultural totals. Low-valued imports are placed in "basket" classifications and appear in nonagricultural import totals.

Imports similar to agricultural commodities produced commercially in the United States and others that are interchangeable in use to any significant extent with such U.S. commodities are termed supplementary or partly competitive. All other commodities are considered complementary or noncompetitive.

In commodity group-by-country data (table 25), 7-digit Tariff Schedules of the United States Annotated (TSUSA) commodity codes were summed up to group totals. Countries listed under each group accounted for 0.3 percent or more of the commodity group's import value with the following exceptions: Bananas and plantains, green coffee, cocoa beans, crude rubber, pork, and raw sugar were listed if they accounted for 0.1 percent of more.

Commodity-by-country data (table 26) are printed at the 7-digit Schedule A commodity code level. Basket classifications (31 commodities) were excluded. Countries listed under commodity headings were based on a percentage of commodity import values as follows: (1) Commodities having an import value from $1 million to $5 million show countries accounting for 5 percent or more; (2) Commodities with import values from $5 million to $20 million show countries accounting for 2 percent or more; (3) Commodities with import values of $20 million to $50 million show countries accounting for 1 percent or more; and (4) Commodities valued over $50 million show countries accounting for 0.3 percent or more. The value of commodities from selected countries was subtracted from each commodity total to derive "other countries."

NA = Not available.

1/ Preliminary.

2/ Includes evaporated and condensed milk, nonfat dry milk, anhydrous milk fat, butter and cheese.

3/ Includes corn-soya-blend and wheat-soya-blend.

4/ Not separately classified prior to 1974.

5/ Includes prepared animal feeds, corn byproducts, and alfalfa meal and cubes.

6/ Includes fresh fruits, canned fruits, dried fruits.

7/ Excludes oilstock.

8/ Includes fresh vegetables, canned vegetables, and pulses.

Economics and Statistics Service

The Economics and Statistics Service (ESS) collects data and carries out research on food and nutrition, international agricultural trade, natural resources, and rural development. The Economics unit researches and analyzes production and marketing of major commodities; foreign agriculture and trade; economic use, conservation, and development of natural resources; trends in rural population, employment, and housing and rural economic adjustment problems; and performance of agricultural industry. The Statistics unit collects data on crops, livestock, prices, and labor, and publishes official USDA State and national estimates through the Crop Reporting Board. Through its information program, ESS provides objective and timely economic and statistical information for farmers, government policymakers, consumers, agribusiness firms, cooperatives, rural residents, and other interested citizens.
