Statistical Bulletin No. 159

U. S. DEPARTMENT OF AGRICULTURE
Agricultural Marketing Service
Agricultural Economics Division
Washington, D. C.
March 1955

© UPDATA 1981

This is the first edition of this publication under the title Grain and Feed Statistics. It formerly was entitled Feed Statistics --including Wheat--Rye--Rice. The statistical series herein are essentially the same as those carried under the former title; they provide basic information on stocks, production, supplies, utilization, commercial movement, foreign trade, and prices of grains and feeds. This bulletin was prepared in the Division of Agricultural Economics, Agricultural Marketing Service, and most of the data included are from the records of the AMS, although other sources were freely drawn upon. Sources of data other than the AMS are noted.

The primary purpose of this bulletin is to supplement the periodical publications, The Feed Situation and The Wheat Situation, issued by AMS, which carry current data for many of the series published here. Many of the statistical series contained in the issues of Feed Statistics for the years 1950 through 1954 were short-term series, bringing to date the longer-term series carried in the 1949 issue. This new edition contains longer-term series, and for all practical purposes it supersedes all earlier issues. There are some exceptions, however, where limited space made it necessary to omit data for a few of the earlier years which are carried in the 1949 edition.

GRAIN AND FEED STATISTICS

Prepared in the Division of Agricultural Economics, Agricultural Marketing Service

CONTENTS

	Page
Feed Concentrate Balance, United States, 1926-53	2-3
Feed Concentrates Consumed by Livestock, United States, by quarters, 1926-54	4
Feed Grains	
Planted and harvested acreages, specified grains, United States, 1900-54	5
Yield per acre, United States, 1900-54	6
Production, United States, 1900-54	7
Acreage, yield, and production of corn, oats, and barley, by regions, 1900-54	8-13
Production of sorghum grains in specified States, 1945-54	17
Supply and distribution of corn, oats, barley, and sorghum grains, United States, 1926-54	14-17
Stocks of corn, oats, and barley, United States, by quarters, 1926-55	18-20
Stocks of sorghum grains, United States, January 1 and October 1, 1945-55	17
Stocks of corn and oats, by regions, by quarters, 1926-55	21-32
Disappearance of corn, oats, and barley, by quarters, 1926-54	33-34
Corn grindings by wet-process, United States, by months, 1917-54	38
Use in producing alcohol, distilled spirits, and fermented malt liquors, 1935-53	34
Miscellaneous feeds fed on farms where produced, 1909-53	35
Receipts of corn, oats, and barley at primary markets, by months, 1924-54	36-37
Sales of corn, oats, barley, and sorghum grains by farmers, and average percentage sold by months, 1924-53	37-38
Prices received by farmers for corn, oats, barley, and sorghum grains, United States, 1908-54	39-44
Market prices of corn, oats, and barley, 1920-54	40-42
Parity prices of corn, oats, barley, and sorghum grains, United States, 1925-54	40-44
Index numbers of feed grain prices, United States, 1910-54	45
Loan rates on feed grains and quantities placed under loan, United States, 1933-54	46
Exports and imports of feed grains, United States, 1920-53	47
Canadian supplies and exports of oats and barley, 1937-54	48
Argentine supply and distribution of corn, 1935-54	48
Food Grains	
Wheat acreage, yield, and production of principal types, 1919-54	49
Rye acreage, yield, and production, United States, 1900-54	50
Rice acreage, yield, and production, Southern States, California, and United States, 1919-54	50
Supply and distribution of wheat, rye, and rice, United States, 1930-54	51-55
Wheat, rye, and rice fed on farms where produced, 1909-53	35
Wheat and rye used in producing alcohol and distilled spirits, 1935-53	34
Wheat and flour imports and exports, United States, 1939-53	53
Stocks of wheat and rye, United States, by quarters, 1927-55	56-57
Sales of wheat and rye by farmers and average percentage sold by months, 1924-53	38
Prices received by farmers for wheat, rye, and rice, United States, 1909-54	58-61
Market prices of wheat, rye, and rice, 1925-54	59-62
Parity prices of wheat and rye, United States, 1923-54	59-60
Wheat loan rates and quantity placed under loan, United States, 1938-55	55
Wheat supply and disappearance in Canada, Australia, and Argentina, 1935-54	63
Byproduct Feeds	
Estimated use for feed, United States, 1938-53	64
Production, specified kinds, United States, annual, 1921-53	65
Production, specified kinds, United States, by months, 1919-54	66-74
Oilseed cakes and meals: Production, foreign trade, and disappearance, by months, 1942-54	69-72
Wholesale prices, by months, 1920-54	75-84
Wholesale price of molasses, blackstrap, by months, 1925-54	84
Prices paid by farmers for specified feeds, United States, by months, 1948-54	86
Index of wholesale prices of high-protein feeds, United States, 1935-54	85-86
Exports and imports of byproduct feeds, United States, 1929-53	87
Hay	
Supply and disappearance, United States, 1910-54	88
Production by classes, United States, 1919-54	89
Production by regions, United States, 1909-54	90
Yield per acre, United States, 1900-54	6
Sales by farmers and average percentage sold by months, United States, 1924-53	37-38
Pasture and range conditions, United States, by months, 1900-54	91
Prices received by farmers, all hay and alfalfa hay, United States, 1940-54	92
Market prices and prices paid by farmers, alfalfa hay, 1940-54	92
Prepared Feeds and Livestock Rations	
Price paid for dairy ration, United States, by months, 1944-54	93-94
Prices paid by farmers for scratch feed and laying mash, United States, by months, 1924-54	95
Price paid by farmers for poultry ration, United States, by months, 1924-54	94
Livestock - Feed Price Ratios	
Ratios by months, 1920-54	96-99

1/ Data for 1926 through 1934 are, for the most part, comparable with the data for later years. Items which are not strictly comparable with data for years subsequent to 1934 include stocks at beginning of crop years, supply and utilization of byproduct feeds for feed, and livestock production. 2/ Farm, terminal market, and Government-owned stocks, 1926-42. Corn on basis of October 1, and oats July 1. Barley on basis of August 1 for 1926-33, and July 1, 1934 to date. Sorghum grain October 1, 1947, to date. Stocks in all positions, including interior mill, elevator, and warehouse stocks, 1943 to date. 3/ Imported grains and domestic wheat and rye. 4/ Exclusive of brewers' and distillers' dried grains, 1926-34, and rice millfeeds, 1926-33. 5/ Total quantities fed in the United States, including domestically produced and imported grains and byproduct feeds. 6/ Total of animal units computed by States. For current years the weights for converting United States livestock numbers to grain-consuming animal units are as follows: Number on January 1 of milk cows and heifers 2 years old and over, 1.00; heifers and heifer calves, 0.40; beef cows, 0.16; cattle on feed, 2.1; all other cattle, 0.14; stock sheep 0.022; sheep and lambs on feed, 0.12; horses and mules 2 years old and over, 1.3; colts, 0.15; hens and pullets, 0.055; number of hogs fed during the year, 0 .0; chickens raised, 0.018; commercial broilers raised, 0.0114; and turkeys raised, 0.076. 7/ One unit of livestock production is equal to the following: 4,400 pounds of milk; 288 pounds of hogs, liveweight; 256 pounds of chickens raised, liveweight; 311 pounds of broilers raised, liveweight; 246 pounds of turkeys raised, liveweight; and 183 dozen eggs. In addition it is equal to the following head of livestock on farms January 1: 0.45 cattle on feed, 2.60 heifers and heifer calves kept for milk on farms, 6.10 cattle other than cattle on feed, milk cows and heifers, and heifer calves kept for milk; 8.0 sheep and lambs on feed, 37.5 stock sheep, 0.75 horses and mules 2 years old and over, and 6.5 colts. 8/ Preliminary. 9/ Exclusive of grain at interior mills, elevators, and warehouses.

1/ Grain fed in silage and forage, hogged off, etc.; includes quantities fed after January 1.

2/ Oats, barley, sorghum grains, wheat, and rye. Quarterly distribution of sorghum grains is based on feeding of other grains, distribution of sales, and other related factors. Quarterly feeding of barley, wheat, and rye are partly estimated for years prior to 1935.

3/ Oilcakes and meals, animal protein feeds, wheat and rice millfeeds, gluten feed and meal, brewers' and distillers' dried grains, dried and molasses beet pulp, alfalfa meal, and miscellaneous byproduct feeds. For breakdown of annual statistics by types of feeds, see table 1, pages 2 and 3, and table 76, page 64. Quarterly distribution of the feeding of a number of these byproduct feeds was estimated for earlier years, when monthly production and stocks were not officially reported. Monthly production is reported currently for nearly all of these feeds and data on stocks are reported for the oilseed cakes and meals, alfalfa meal, and brewers' and distillers' dried grains.

4/ Preliminary.

Table 3 -- Feed grains: Planted and harvested acreages, United States, 1900-54

Year	Corn					Oats		Barley		Sorghums	
	All purposes										
	Planted	Harvested	Harvested for grain	For silage	For hogging down grazing, and forage	Planted for all purposes	Harvested	Planted for all purposes	Harvested for grain	Planted for all purposes	Harvested for grain

1/ In bins or other storage owned or controlled by CCC; additional CCC stocks are included in other positions. 2/ Not available prior to 1943. 3/ Compiled from reports of the Bureau of Foreign and Domestic Commerce and the Bureau of the Census. Imports include grain equivalent of cornmeal and flour; exports are grain only. 4/ Preliminary. Rough allowance for 1954-55 imports. 5/ Estimated quantities (based on census data) used in making prepared breakfast foods. 6/ Estimated quantities used in producing cornmeal, flour, hominy grits, and flakes for human food and for the production of fermented malt liquors. Based on reports of the Bureau of the Census and the Bureau of Internal Revenue. Does not include corn processed for livestock feed. 7/ Starch, sirup, sugar, etc. Compiled from data of Price, Waterhouse, and Company, New York. 8/ Compiled from data of the Bureau of Internal Revenue. Data, derived by converting grain and products to bushel equivalent, have been revised from 1942 to date. 9/ Based on acreage planted to the following crop. 10/ Residual; includes small quantities for other uses and waste. 11/ Includes exports for military civilian feeding during the period 1945-49. 12/ Total disappearance, minus exports of corn and grain equivalent of cornmeal and flour. 13/ Stocks at interior mills, elevators, and warehouses not included in computing 1942-43 disappearance.

1/ In bins or other storage owned or controlled by CCC; additional CCC stocks are included in other positions. 2/ Not available prior to 1943. 3/ Compiled from reports of the Department of Commerce. Imports include grain equivalent of oatmeal: exports are grain only. 4/ Preliminary. 5/ Used in production of oatmeal and other cereal preparations. Based on reports of the Census of Manufactures. 6/ Based on area seeded to the following crop. 7/ Residual; includes small quantities for other uses and waste. 8/ Includes exports for military relief feeding abroad during the period 1946-49. 9/ Total disappearance, minus exports of oats and grain equivalent of oatmeal. 10/ Stocks at interior mills, elevators, and warehouses not included in computing 1942-43 disappearance.

1/ In bins or other storage owned or controlled by Commodity Credit Corporation and in Canadian elevators; additional Government-owned stocks are included in other positions. 2/ Not available prior to 1943. 3/ Compiled from reports of the Department of Commerce. Both imports and exports include grain equivalent of malt. 4/ Preliminary. 5/ Compiled from reports of the Bureau of Internal Revenue. Includes small quantities of barley grain. 6/ Estimated on basis of total malt production and quantities exported, imported, and used in alcohol and alcoholic beverages. 7/ Based on acreage seeded to the following crop. 8/ Residual; includes small quantities for other uses and waste. 9/ Total disappearance, minus exports of barley grain and grain equivalent of malt exported. 10/ Includes exports for military relief feeding abroad during the period 1946-53. 11/ Stocks at interior mills, elevators, and warehouses not included in computing 1942-43 disappearance.

1/ Principally corn grits and flakes. Conversion to grain equivalent is based on a factor of approximately 33 pounds of products equal to one bushel of corn. 2/ Used principally for distilled spirits. 3/ Includes wheat on the basis of quantity ground for alcohol production instead of quantity that was used in alcohol production as reported by the Bureau of Internal Revenue.

Derived from data reported by the Bureau of Internal Revenue.

1/ Additional quantities, particularly of wheat, are purchased and fed to livestock.
2/ Includes rice fed on all farms in California and rice fed on farms where produced in other States. Equivalent 100-pound bags.
3/ Includes loss.
4/ Cottonseed "left on farms." Includes cottonseed fed, minor quantities used for fertilizer, and quantities used for planting the following crop. Approximately 405,500 tons of such seed are estimated to have been used for planting the 1953 crop.
5/ Liquid whole milk. Calendar year basis.
6/ Preliminary.

1/ Includes an allowance for unredeemed loans and for purchase agreement deliveries, valued at the average loan rate, for the years 1937-41 and 1948 to date.

2/ Crop year averages, by States, weighted by production to obtain weighted averages for the United States.

3/ Crop year averages, by States, weighted by sales to obtain weighted averages for the United States.

4/ Preliminary.

1/ Includes an allowance for unredeemed loans and for deliveries to the CCC under purchase agreements, valued at the average loan rate, for the years 1948 to date. 2/ Crop year averages, by States, weighted by production to obtain weighted averages for the United States. 3/ Crop year averages, by States, weighted by sales to obtain weighted averages for the United States. 4/ Preliminary. 5/ Parity prices through December 1949 are based on the average price received by farmers, including interest and taxes, as revised in January 1950. Transitional parity prices, 1950, 95 percent, 1951, 90 percent, and 1952, 85 percent of parity formula in use prior to January 1, 1950. Beginning January 1953, modernized parity. See Agricultural Prices, January 1950 and later issues.

1/ Includes an allowance for unredeemed loans and for deliveries to the CCC under purchase agreements, valued at the average loan rate, for the years 1940-44 and 1948 to date. 2/ Crop year averages, by States, weighted by production to obtain weighted averages for the United States. 3/ Crop year averages, by States, weighted by sales to obtain weighted averages for the United States. 4/ Preliminary. 5/ Parity prices through December 1949 are based on the average price received by farmers for barley during August 1909-July 1914 (61.9 cents per bushel) and the index of prices paid by farmers, including interest and taxes, as revised in January 1950. Transitional parity prices, 1950, 95 percent, 1951, 90 percent, and 1952, 85 percent of parity formula in use prior to January 1, 1950. Beginning January 1953 modernized parity. See Agricultural Prices, Bureau of Agricultural Economics, January 1950 and later issues.

1/ Includes an allowance for unredeemed loans and deliveries to CCC under purchase agreements for the years 1944 and 1948 to date. 2/ Crop-year averages, by States, weighted by production, to obtain averages for the United States. 3/ Crop-year averages, by States, weighted by sales, to obtain averages for the United States. 4/ Preliminary. 5/ Parity prices through December 1949 are based on the average price received by farmers for sorghum grains during August 1909-July 1914 ($1.21 per 100 pounds) and the index of prices paid by farmers, including interest and taxes, as revised in January 1950. Transitional parity prices, 1950, 95 percent, 1951, 90 percent, 1952, 85 percent, 1953, 80 percent, and 1954, 75 percent of parity computed by formula in use prior to January 1, 1950. See Agricultural Prices, Bureau of Agricultural Economics, January 1950 and later issues.

1954	1.62		90				

1/ Average price supports in the United States. During 1933 through 1940 there was a flat loan rate for all eligible producers. During the years 1941 to date the price supports varied by counties. 2/ Average loan value of corn sealed during each marketing year. 3/ The national average loan rate at the farm as a percentage of the parity price of corn at the beginning of the marketing year. Loans were based on parity from 1938 to date. 4/ Total quantity placed under loan, 1933-47, and under loan and purchase agreement, 1948 to date. 5/ Includes stocks at interior mills, elevators, and warehouses for the years 1943 to date. 6/ Loans were in the process of being repaid. Practically all of the corn under seal on September 30 was redeemed by farmers early in the next marketing year. 7/ Does not include 14 million bushels of 1937 corn sealed for the first time in 1938 under a short-term loan program. 8/ Includes corn under purchase agreement delivered to CCC or placed under loan after October 1. 9/ Includes corn on which loans were in the process of being repaid by farmers. 10/ Preliminary estimate.

Compiled from reports of the Commodity Stabilization Service.

1/ Includes flour and other wheat products in terms of wheat. 2/ Prior to 1937 some new wheat included; beginning with 1937 only old-crop wheat is shown in all stocks positions. The figure for July 1, 1937, including the new wheat, is 102.8 million bushels, which is used as year-end carryover in the 1936-37 marketing year. 3/ Imports include full-duty wheat, wheat imported for feed, and dutiable flour and other wheat products in terms of wheat. They exclude wheat imported for milling in bond and export as flour, also flour free for export. 4/ Includes procurement for both civilian relief feeding and for military food use; military takings for civilian feeding in occupied areas measured at time of procurement, not at time of shipment overseas. 5/ Exports as here used in addition to commercial exports of wheat, flour, and other wheat products, includes U.S.D.A. flour procurement rather than deliveries for export. Beginning with 1941-42, actual exports, including those for civilian feeding in occupied areas (deliveries for export) of wheat, flour, and other wheat products, in million bushels, were as follows: 27.9; 27.8; 42.6; 144.4; 390.6; 397.4; 485.9; 504.0; 299.1; 366.1; 475.3; 317.8; and for 1953-54, 216.5. 6/ To Alaska, Hawaii, Puerto Rico, Guam, Samoa, Virgin Islands, and Wake Island; partly estimated. 7/ Preliminary. 8/ For the period July-December 1954, known disappearance from the July 1 supply, without an allowance for quantities fed, is about 8 million bushels larger than that indicated by January 1 stocks. (This occurred also for July-December 1953 and 1952.) This discrepancy may be accounted for by possible inexactness in data, including some duplication in stocks reported in the various positions by different agencies.

1/ Includes flour expressed in wheat equivalent. Exports of wheat products other than flour, not shown in the table, expressed in thousand bushels, wheat equivalent, beginning with 1941-42, were as follows: 326; 1,265; 2,347; 2,464; 2,213; 3,441; 7,095; 1,438; 649; 572; 535; 574; and 530. 2/ As reported by the Department of Commerce. 3/ Classified as "unfit for human consumption" or imported for special feeding programs. 4/ Includes some flour imported free for export, which for 1939 was 214,000 bushels; 1940, 170,000 bushels; 1941, 2,000 bushels; 1942, 2,000 bushels; 1945, 19,000 bushels; 1948, 1,000 bushels; 1949, 29,000 bushels; and 1953, 2,000 bushels. 5/ Includes wheat and wheat products used for livestock and poultry feed, imported duty-free by the Commodity Credit Corporation. 6/ From the National Military Establishments; financed by the United States. 7/ Mostly from imported wheat, but an average of 283,000 bushels annually of U. S. wheat was also used in the 1941-50 period. 8/ 14,072,000 reported by the Department of Commerce plus 822,000 unreported exports to British Services. 9/ 142,637,000 reported by the Department of Commerce plus 11,358,000 unreported January-June 1947 exports to Germany financed by the United Kingdom. 10/ 154,407,000 reported by the Department of Commerce plus 11,884,000 unreported January-June 1947 exports to Germany financed by the United Kingdom. 11/ 184,324,000 reported by the Department of Commerce plus 23,038,000 exports to Germany financed by the United Kingdom. 12/ 123,546,000 reported by the Department of Commerce plus 9,539,000 exports to Germany financed by the United Kingdom.

1/ From reports of the Grain Division, Agricultural Marketing Service.

2/ Data not available by quarters for October 1, prior to 1934, or for January 1 and April 1, prior to 1935.

3/ Estimated total based upon Bureau of Census report of item "In mills and mill elevators attached to mills" for 1927 through April 1945. Data not available by quarters for October prior to 1931, or for January and April prior to 1932.

4/ Beginning July 1, 1942, wheat owned by CCC and stored in bins or other storage owned or controlled by CCC; also CCC-owned grain in transit and in Canadian elevators. Other wheat, owned by CCC as well as wheat outstanding under loan is included in other positions.

5/ Beginning with 1937 only old crop wheat shown in all positions. For the years 1927-36 inclusive, some new wheat is included in terminal and merchant mill stocks. The figure for July 1, 1937, including the new wheat, is 102,812,000 bushels.

1/ U. S. monthly prices are the result of weighting monthly State prices by production. U. S. marketing-year prices are the result of (1) weighting State monthly prices by monthly sales to obtain State marketing-year averages, and (2) weighting the State marketing-year average by total sales for each State.

2/ Includes an allowance for unredeemed loan and purchase agreement deliveries valued at the average rate.

3/ Does not include bonus payment of 30 cents per bushel delivered under the Government purchase program.

1/ Computation of parity prices: Average price in base period (August 1909-July 1914=88.4 cents) x monthly index of prices paid by farmers, interest, and taxes, as revised January and October 1950 for the period 1926 through 1949. Beginning January 1950, effective parity price based on old formula.

1/ U. S. monthly prices are the result of weighting monthly State prices by production. U. S. marketing-year prices are the result of (1) weighting State monthly prices by monthly sales to obtain State marketing-year averages, and (2) weighting the State marketing-year averages by monthly sales for each State. 2/ Includes an allowance for unredeemed loan and purchase agreement deliveries valued at the average rate. 3/ Average price in base period (August 1909 to July 1914-72.0 cents per bushel) X monthly index of prices paid by farmers, interest, and taxes, as revised January 1950 for the period 1926 through 1949. Transitional parity prices, 1950, 95 percent; 1951, 90 percent; and 1952, 85 percent of parity formula in use prior to January 1950. Beginning January 1953, modernized parity. See Agricultural Prices, Bureau of Agricultural Economics, January 1950 and later issues.

1/ U. S. monthly prices are the result of weighting monthly State prices by production. U. S. marketing year prices are the result of (1) weighting State monthly prices by monthly sales to obtain State marketing-year averages, and (2) weighting the State marketing-year averages by total sales for each State.

2/ Monthly figures prior to 1930 are not available. Season averages for 1909 to 1929 are respectively as follows: 1.76, 1.47, 1.75, 1.98, 1.98, 1.98, 1.86, 2.19, 4.26, 3.99, 5.46, 2.48, 2.18, 2.19, 2.49, 2.99, 2.30, 2.51, 2.02, 2.03, and 2.22.

3/ Includes an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

1/ Estimated use for feed is derived by adding production and imports; deducting exports, utilization for food, and other nonfeed uses; and adjusting for changes in stocks for the following feeds for which stock data have been compiled: Cottonseed cake and meal and brewers' and distillers' dried grains, 1935 to date; peanut cake and meal, 1938 to date; alfalfa meal, 1944 to date; soybean, linseed, and copra cakes and meals, February 1949 to date.

2/ Preliminary.

3/ Includes dried and concentrated skim milk, buttermilk, and whey manufactured for animal feed.

4/ Dry equivalent of milk, skim milk, buttermilk, and whey fed in liquid form.

5/ Estimated quantities of hominy feed, oat millfeeds, molasses, and screenings fed to livestock.

Table 77.- Production of specified byproduct feeds, United States, year beginning October, 1921-53

1/ Calendar year following.
2/ Preliminary.
3/ Partly estimated.

Compiled as follows: Wheat millfeeds and cottonseed cake and meal, and beginning January 1949, soybean, linseed, and copra cakes and meals, Bureau of the Census; prior to January 1949, soybean, linseed, and copra cakes and meals derived from Census crushings reports; fish meal and scrap, Fish and Wildlife Service, Department of the Interior; gluten feed and meal from reports of Price, Waterhouse, and Company, New York.

1/ Miscellaneous tame hay, including sweetclover. In certain States, contains small quantities formerly classified as wild hay and greens cut green for hay. Includes sweetclover hay for all States.

2/ Production in all States 1919-38, but only in the 22 principal producing States, 1939-54.

3/ Included under "Other".

4/ Preliminary.

1/ Estimated average value of concentrate ration fed to dairy cows in milk-selling areas was obtained by combining regional values in proportion to tonnages of ration fed to obtain the whole milk sold by farmers to plants and dealers. The average for the cream-selling areas was based on regional tonnages fed to obtain the milk skimmed on farms for sale as cream. These dairy ration prices are used in computing the milk-feed and the butterfat-feed price ratios. For the average value of all dairy rations fed, see table 113.

1/ Includes estimated value of home-grown grains as well as purchased feeds. 2/ Based on regional estimates of concentrate ration values combined in proportion to the amount of concentrates fed for producing milk sold as milk and as cream in each region. For data by regions see "Rations Fed to Milk Cows," Agricultural Marketing Service, January 1955, and earlier issues. 3/ Preliminary. 4/ Data by States and Regions are reported in "Poultry-Ration Costs and Poultry-Feed Price Ratios, 1924-45," Bureau of Agricultural Economics, March 1946; currently each month in Agricultural Prices.
