IMPORTANT INFORMATION ABOUT YOUR SUBSCRIPTION

Foreign Agricultural Trade of the United States is published six times a year with two supplements. Subscription prices are $26 a year domestic and $32.50 foreign (prices subject to change). Send check or money order payable to "Superintendent of Documents" to Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. For faster service, call (202) 783-3238 and charge your subscription to your VISA, MasterCard, Choice, or GPO Deposit Account.

IS IT TIME TO RENEW?

Your subscription to this publication may be due to expire soon. If so, you will get a renewal notice in the mail from GPO about 90 days ahead of time. Only one notice is sent. You must return it promptly to ensure uninterrupted service. If you have misplaced your renewal notice, use the form on the back of this report. Be sure to attach mailing label.

15. Supplementary Notes

16. Abstract (Limit: 200 words)

U.S. agricultural exports dropped $5 billion to $26.3 billion and 16 million tons to 110 million tons in fiscal year (FY) 1986 (October 1985-September 1986). Imports rose 6 percent to $20.9 billion in FY 1986, the third year in which import values have reached record highs. Nominal farm prices for U.S. grains and oilseeds have fallen to their lowest levels since crop year 1972. Exports, principally wheat, feed grains, cotton, and tobacco, to Western Europe continued to fall in FY 1986 but at a slower rate than in previous years.

Digest

U.S. Agricultural Exports Fall 16 Percent (see p. 2). U.S. agricultural exports dropped $5 billion to $26.3 billion and 16 million tons to 110 million tons in fiscal year (FY) 1986 (October 1985-September 1986). Grain and feed exports fell the most, $4 billion and 19 million tons, with those to the USSR alone falling 11 million tons. Cotton exports sank 62 percent in volume and $1.3 billion in value, to the lowest levels since World War II. In contrast, oilseed and product exports rose 4 million tons and $70 million. The decline in grain and cotton exports combined with record-high imports to cut the U.S. agricultural trade surplus in half. At $5.4 billion, the surplus was the smallest since the beginning of the export boom of the early 1970's.

U.S. Agricultural Imports Post Record Highs (see p. 72). Imports rose 6 percent to $20.9 billion in FY 1986, the third year in which import values have reached record highs. Continued strong U.S. consumer demand, unfavorable U.S. weather, and higher world coffee prices caused the $1.2-billion increase. Growth in farm product imports in FY 1986 included coffee, spices, fresh fruits, vegetables, pork, cheese, live cattle, bakery products, malt beverage, and tobacco.

Prices Fall With New Farm Legislation (see p. 117). Nominal farm prices for U.S. grains and oilseeds have fallen to their lowest levels since crop year 1972. According to the 1985 Food Security Act, prices can fall to levels below those of recent years, making disposal of surplus grain easier and discouraging further excess production.

U.S. Farm Exports to Western Europe Continue to Decline (see p. 122). Exports, principally wheat, feed grains, cotton, and tobacco, to Western Europe continued to fall in FY 1986 but at a slower rate than in previous years. Values dropped 5 percent to $6.8 billion. A strong 1985 U.S. dollar relative to EC currencies continued to hurt U.S. exports. However, reduced soybean prices in FY 1986 should spur demand in FY 1987. The declining value of the U.S. dollar relative to West European currencies could benefit some food exports.

U.S. Agricultural Exports Fall 16 Percent

U.S. agricultural exports dropped $5 billion to $26.3 billion and 16 million tons to 110 million tons in fiscal year (FY) 1986 (October 1985-September 1986). Grain and feed exports fell the most, $4 billion and 19 million tons. Grain exports to the USSR alone fell nearly 11 million tons. Cotton exports sank to the lowest level since World War II, falling 62 percent in volume and $1.3 billion in value. In contrast, oilseed and product exports rose 4 million tons and $70 million. Exports of horticultural goods and animal products also improved. The large decline in grain and cotton exports combined with record-high imports to cut the U.S. agricultural trade surplus in half. At $5.4 billion, the surplus was the smallest since the beginning of the export boom of the early 1970's.

World grain trade dropped nearly 40 million tons in crop year 1985/86. Soviet imports fell about 30 million tons and global consumption of wheat and coarse grains declined. In FY 1986, U.S. coarse grain exports to the Soviet Union fell 8 million tons from FY 1985's level and wheat exports dropped 2.7 million tons. U.S. agricultural exports to the USSR fell $1.4 billion, or 56 percent. The Soviets dropped from the second largest U.S. agricultural customer overseas to the seventh.

United States Loses Sales to Competitors

Smaller sales to the USSR stemmed in part from a smaller U.S. share of the Soviet market, although an 18-million-ton increase in Soviet grain production was also a factor. Export volume of U.S. wheat to the USSR fell to 153,000 tons in FY 1986, but total Soviet wheat imports in the 1985/86 and 1986/87 crop years are expected to average 15 million tons. Although a U.S.-USSR grain agreement stipulates that the Soviets will purchase at least 4 million tons of U.S. wheat each fiscal year, lower prices have led the Soviets to purchase elsewhere. The USSR imported 3 million tons of U.S. wheat during FY 1985 and 1986 combined.

At 153,000 tons, U.S. wheat exports to the USSR fell below 1 million tons for the first time since the Soviets entered world import markets in 1972. U.S. exports of wheat and coarse grain, at 62 million tons in FY 1986 compared with 84 million tons in 1985, fell below combined exports of major U.S. competitors for those crops for the first time since 1972.

U.S. grain exports to Japan fell 2 million tons as the United States lost market share. U.S. grain exports to Western Europe fell 2.4 million tons as expansion of the European Community (EC) to include Spain and Portugal and increased use of domestic products continued shrinking the region's import needs. U.S. grain exports to China virtually ceased in 1986 compared with 1.4 million tons in 1985, as China became a net grain exporter for the first time.

Importers' Increased Production Cuts U.S. Sales

U.S. grain and feed exports to Latin America dropped from 13.4 million tons to 10.1 million tons as Mexico, Venezuela, and Brazil harvested larger domestic crops. Rebounding local production helped reduce exports to Sub-Saharan Africa to 3 million tons in 1986 compared with 5.8 million tons in FY 1985. Record-high grain production in the Sudan cut much of the need there for aid shipments, and South

Africa's commercial imports largely halted as that country's supplies recovered sufficiently to resume exports. Wheat sales to Nigeria fell nearly 1 million tons as financial difficulties there delayed purchases. However, food shortages and aid shipments persist in some Sub-Saharan countries.

Anticipation of New Policies Slows Import Purchases

Feed grains were the hardest hit among U.S. grain exports in 1986, with shipments falling from 55 million tons in 1985 to 36 million tons in 1986. Wheat exports, on the other hand, fell only 3 million tons to 25.5 million tons, and if trade with the USSR is excluded, U.S. wheat exports fell 1 percent. Furthermore, rice exports rose 410,000 tons as implementation of a marketing loan program earlier in the year boosted competitiveness.

For feed grains, FY 1986 was the interregnum between passage of the 1985 Food Security Act and its implementation. During much of this period, importers' purchases slowed as they awaited lower prices under 1986/87 crop year programs beginning in September. However, new programs for wheat began in June. As of May, wheat exports had fallen 27 percent from year-earlier shipments as buyers awaited lower loan rates. But after loan rates fell from $121 per metric ton to $88 per metric ton in June, rising exports narrowed the difference with year-earlier performance to 11 percent. Rice prices declined in mid-April, and rice exports closed 1986 at 21 percent above those of 1985.

U.S. wheat exports also benefited in 1986 from the Export Enhancement Program (EEP), which played a pivotal role in increasing U.S. exports to North Africa. Although record-high Tunisian grain production cut U.S. wheat exports there 148,000 tons, shipments to all of North Africa rose 3 million tons, a 108-percent increase. EEP initiatives also helped increase wheat exports to the Middle East, Eastern Europe, and the Philippines, which together imported 3.4 million tons of U.S. wheat in 1986 compared with 2.5 million tons in 1985. EEP sales accounted for about 15 percent of 1986 wheat exports, and nearly 66 percent of the year's shipments were concessional, involving the EEP, P.L. 480, or credit guarantees.

Fruit Exports Rise

U.S. horticultural exports rose 2 percent to $3.2 billion in 1986. Although lower prices reduced nut exports slightly and higher volume and prices raised vegetable exports 6 percent to $1 billion, the changes were small and largely offset one another. Fruits and preparations shifted the most, with larger exports of citrus and prepared fruits offsetting weaker sales for noncitrus fruits and fruit juices.

Substantially lower U.S. fruit juice imports helped reduce U.S. juice exports. Brazil's 1985/86 orange crop in the commercial zone of Sao Paulo posted a record high, thanks to the incentive of rising U.S. imports following four Florida freezes in the past 5 years. With better U.S. weather and lower U.S. juice imports in 1986, Brazil sought other markets, competing with the United States, and helping reduce U.S. fruit juice exports $51 million, or 26 percent. However, U.S. juice imports fell $297 million in 1986, more than offsetting the effect on the trade balance.

The volume of U.S. noncitrus fruit exports also fell, largely due to smaller U.S. apple supplies. Higher prices helped cut fresh apple shipments 58,000 tons, or 28 percent. Exports dropped to all principal customers, except Western Europe. In contrast, grapefruit exports rose 71,000 tons as every principal customer, except

Canada, increased its purchases. The dollar's weakening against currencies of the major developed countries was probably a major factor in increasing grapefruit exports. U.S. apple exports, on the other hand, are directed more towards less developed countries (LDCs), where the dollar remained comparatively strong. Developed countries also import more U.S. processed fruit than do LDCs. U.S. processed fruit exports to developed countries rose 14 percent to $225 million in 1986, while those to developing countries remained at $60 million.

Oilseed Exports Respond to Overseas Production

U.S. exports of oilseeds and products rose 1 percent to $6.3 billion as increased exports of soybeans and soybean meal offset lower sunflowerseed exports and reduced vegetable oil values. Soybean exports rebounded to 20 million tons as drought cut Brazil's ability to supply world markets. Soybean meal exports also rebounded, increasing 22 percent to 5.5 million tons. In contrast, soybean oil exports fell 183,000 tons, offsetting increases for cottonseed and other oils and exacerbating the impact of dramatically lower vegetable oil prices in 1986.

Rapidly growing palm oil supplies and increased world vegetable oil production combined to outstrip global consumption levels in 1985. In 1986, Malaysia increased its palm oil exports 900,000 tons, while world soybean oil trade fell 600,000 tons. The value of U.S. soybean oil exports fell 48 percent as average export prices dropped more than $200 per metric ton and tonnage slipped 24 percent. Venezuela, Brazil, the USSR, Central America, and the Caribbean cut back their purchases from the United States. However, U.S. soybean oil exports to Pakistan, the largest U.S. customer, rose from 168,000 tons to 276,000 tons as vegetable oil consumption and imports continued rising there.

Soybean exports rose 21 percent to 20 million tons in 1986. Exports of U.S. soybeans and soybean meal together rose 4.5 million tons, closely matching the drop in Brazil's soybean production from 18.3 million tons to 13.4 million tons. Soybean meal consumption fell in the EC in 1986, but U.S. soybean exports to that market rose 19 percent to 8.9 million tons. Japan imported 4.3 million tons from the United States in 1986 compared with 4.1 million tons in 1985.

In contrast, foreign sunflowerseed production continued growing in 1986, and U.S. sunflowerseed exports fell 631,000 tons, or 63 percent, the sharpest proportionate decline in exports for any major U.S. agricultural product, slightly exceeding cotton's 62-percent drop.

Cotton Exports Fall Below 500,000 Tons

U.S. cotton exports fell to 481,000 tons, worth $678 million, as the U.S. world trade share temporarily plummeted. Although average annual prices for U.S. cotton declined 15 percent in crop year 1985/86, world prices slumped 29 percent under the impact of record-high world supplies. Ironically, the average price of U.S. cotton exports actually rose through July as competition restricted U.S. sales to higher quality cotton.

Undercut by lower priced competitors, U.S. cotton exports to Other East Asia fell from 404,000 tons to 131,000 tons; to Japan, 302,000 tons to 151,000 tons; and to Western Europe, 270,000 tons to 96,000 tons.

As they did with U.S. feed grains, importers widely anticipated the lower cotton prices stemming from 1985 farm legislation. Overseas customers postponed buying

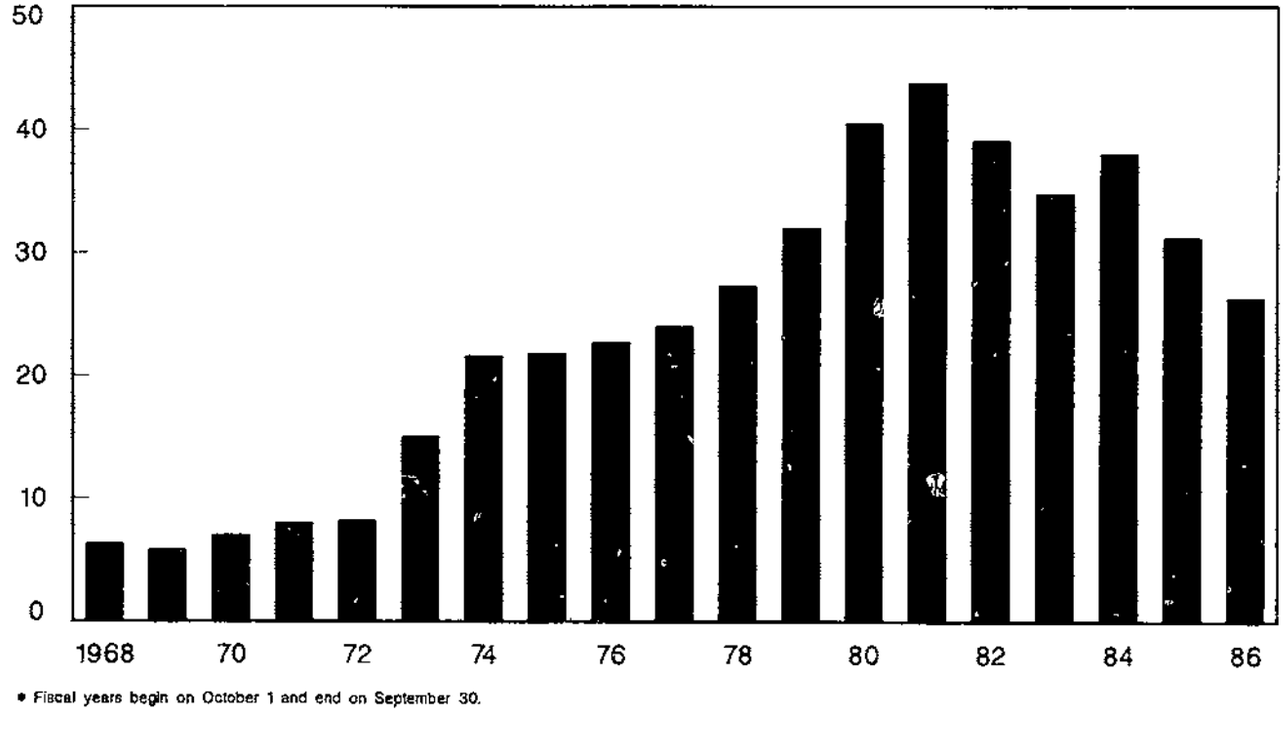
U.S. cotton until August 1, when U.S. prices fell substantially. Cotton exports rose from 5,000 tons in July to 62,000 tons in August and to 80,000 tons in September. U.S. cotton exports are expected to grow substantially in 1987 compared with those of 1986, thanks to lower prices and record world consumption.

Exports Rise to Some Countries

Although agricultural exports to many countries dropped during FY 1986, exports increased to some countries, generally led by increased wheat and rice exports. However, shipments of corn gluten feed and soybean meal boosted exports to The Netherlands, France, and West Germany by $300 million.

Exports in 1985 and 1986 posted the sharpest 2-year decline in the post-war era, but there are indications that 1987 will reverse the export slump that began in 1982. After May 1986, export volume began its first sustained rise in 2 years. Growing wheat exports under lower loan rates boosted export volume for 4 consecutive months, the first such climb since the beginning of 1984. Improved rice and cotton exports under marketing loan programs also helped improve exports in the latter months of FY 1986. Much of the uncertainty and incentive for delaying purchases in 1986 was removed as changes in U.S. farm programs were implemented, and U.S. exports are expected to rise as lower prices increase world demand and U.S. market share. (Stephen MacDonald, International Economic Indicators Branch)

Value of U.S. Agricultural Exports, FY 1968-86*



* Fiscal years begin on October 1 and end on September 30.

U.S. Agricultural Imports Post Record Highs

U.S. agricultural imports rose 6 percent to $20.9 billion in fiscal year (FY) 1986, (October 1985-September 1986), the third year in which import values have reached record highs. Continued strong U.S. consumer demand, unfavorable U.S. weather, and higher world prices for such products as coffee, spices, vegetables, and pork caused the increase. Imports averaged $1.7 billion a month in FY 1986 compared with $1.6 billion in FY 1985. However, import values dropped slightly toward the end of the fiscal year, mainly because of sluggish trade in some major items (especially sugar, vegetable oils, and orange juice), lower exchange rates, and seasonal variations in the summer. Competitive imports (imports interchangeable with U.S. commodities) in FY 1986 gained marginally to $13.1 billion, while noncompetitive imports climbed rapidly to $7.8 billion because of higher world prices for coffee and spices.

The United States bought farm products worth $12.2 billion from developing countries, accounting for 57 percent of U.S. agricultural imports compared with $8.2 billion from developed countries. Mexico replaced Brazil as the leading U.S. supplier in FY 1986. Imports from Mexico gained 54 percent to $2 billion, primarily because of higher values for vegetables, coffee, and live cattle. Agricultural imports from Brazil fell to third place, dropping 23 percent to $1.9 billion, due to lower values for orange juice and coffee. Imports from Canada, the second largest source of agricultural imports in FY 1986, advanced 3 percent because of larger shipments of pork, bakery products, grains, and fresh fruits. Market shares of the European Community (EC), Colombia, Ecuador, Guatemala, and India substantially exceeded FY 1985 levels.

Competitive Import Values Rise Marginally

Competitive imports rose marginally to $13.1 billion in FY 1986. Gains in such products as vegetables, pork, fresh fruits, and grains offset declines for sugar, orange juice, vegetable oils, and live hogs.

Beef imports remained almost unchanged at $1.3 billion as a 3-percent rise in volume to 693,000 tons offset a 6-percent decline in import unit prices. As U.S. beef output declines during the first quarter of fiscal year 1987, imports should strengthen. Australia supplied 43 percent of U.S. beef import volume, with New Zealand, Canada, and Argentina shipping most of the remainder. Higher prices pushed the pork export value up 6 percent to $900 million. Pork import unit prices increased 9 percent, but quantity declined nearly 3 percent. Canada, the largest U.S. supplier, increased pork exports to the United States 32,000 tons, or 17 percent, while those from Denmark, the second largest pork supplier, declined 34,000 tons, or 23 percent. The Canadian dollar slipped in FY 1986 relative to the U.S. dollar, making Canadian pork cheaper in U.S. currency. The Danish krone strengthened, causing the price of Danish pork to rise in U.S. dollars.

U.S. dairy product imports rose 3 percent to a record high of $786 million due to lower U.S. supplies and higher prices. Cheese import values advanced 6 percent to $386 million, while volume remained almost unchanged at 134,000 tons. Western Europe provided 71 percent of U.S. cheese imports in FY 1986 compared with 75 percent in FY 1985.

Larger shipments from Mexico pushed up total cattle entries in FY 1986 to 1.2 million head ($390 million) from FY 1985's 577,000 head ($245 million). Canada, however, shipped 290,000 head to U.S. markets compared with 365,000 head in FY 1985. Live hogs from Canada fell 61 percent to 560,000 head.

U.S. imports of vegetables and preparations jumped 16 percent in FY 1986 to $1.6 billion, mainly because of increased imports from Mexico. Volume increased 3 percent to 2.2 million tons. Tomatoes, cucumbers, onions, peppers, squash, and eggplant are the major fresh vegetables imported from Mexico. Higher prices boosted the value of Mexican vegetables to $662 million compared with $517 million in FY 1985. Import values for canned mushrooms in FY 1986 declined 4 percent to $121 million, while volume expanded 19 percent to 70,000 tons. Taiwan, Hong Kong, and China are the leading canned mushroom suppliers, providing 84 percent of volume.

Smaller U.S. orange juice imports in FY 1986 reduced imports of fruits and preparations 13 percent to less than $1.6 billion. Orange juice import volume declined 20 percent to 504 million gallons, and value dropped 46 percent to $417 million, chiefly because of larger domestic orange supplies. Import unit prices for orange juice fell 33 percent in FY 1986. However, imports gained for fresh apples from Canada and Chile, canned pineapples from Thailand, and melons from Mexico. Total fruit imports exceeded FY 1985's $796 million by 7 percent.

Sugar import values fell 28 percent to $654 million, while volume dropped 18 percent to 1.9 million tons. Import unit prices declined in FY 1986, averaging about $343 a ton compared with $390 a ton in FY 1985. Increased use of corn sweetener substitutes by the beverage industry and lower import quotas reduced sugar imports. Volume declined from most sources, particularly the Dominican Republic, Argentina, and Australia.

U.S. import values for oilseeds and products declined 18 percent to $639 million because of lower prices for coconut and palm oils. Coconut oil value fell 30 percent to $212 million, while volume rose sharply to 552,000 tons. Import unit prices for vegetable oils averaged $473 a ton compared with $779 a ton in FY 1985. The Philippines and Malaysia supplied most of the imported vegetable oil.

Grain and feed imports in FY 1986 gained 13 percent to $668 million, primarily because of larger purchases of bakery products at higher prices. Biscuit, cookie, and wafer entries rose from 106,000 tons in FY 1985 to 127,000 tons in FY 1986. Value climbed 27 percent to $245 million, mostly from Denmark and Canada.

An increase in filler leaf tobacco imports in FY 1986, principally from Turkey, Brazil, and Greece, boosted unmanufactured tobacco imports. Tobacco imports increased 9 percent to 208,000 tons valued at $606 million. Filler leaf imports rose from 150,000 tons in FY 1985 to 169,000 tons in FY 1986. Value increased 11 percent to $555 million, with import unit prices remaining at about $1.49 a pound.

Continued strong demand boosted imports of malt beverages 27 percent to $763 million. However, wine volume declined 15 percent. Italy, France, and West Germany are the major suppliers of wine, with The Netherlands, Canada, and West Germany providing most of the malt beverages. Values also increased for other competitive imports, such as cut flowers, seeds, olive oil, and cashew nuts.

Noncompetitive Values Climb Sharply

Noncompetitive imports, accounting for 37 percent of U.S. agricultural imports, rose 15 percent to $7.8 billion in FY 1986. Increased values for coffee, spices, and essential oils more than offset declines for cocoa, natural rubber, and tea.

Higher prices in FY 1986 boosted coffee imports, accounting for 56 percent of noncompetitive products, to a record-high $4.4 billion, 37 percent above those of FY 1985. Volume rose only 8 percent to 1.2 million tons. After Brazil's drought last fall, import unit prices for coffee rose steadily, reaching an average of $1.63 a pound in FY 1986, about 25 percent higher than FY 1985's prices. Average monthly U.S. wholesale prices for Brazilian coffee advanced from $1.37 a pound in October 1985 to $2.03 a pound in September 1986. The United States traditionally imports coffee from more than 30 countries, but in FY 1986, 10 major countries (Brazil, Colombia, Mexico, Guatemala, El Salvador, Indonesia, Ecuador, the Ivory Coast, Uganda, and Peru) supplied 71 percent of the U.S. total. All major suppliers, except Brazil and the Ivory Coast, increased exports to the United States in FY 1986.

Adequate U.S. inventories reduced imports of cocoa and products 7 percent to $1.2 billion. Volume dropped to 507,000 tons as import unit prices declined slightly to $1.06 a pound. Cocoa bean imports declined from FY 1985's levels, but products such as cocoa butter and chocolate gained.

Natural rubber, the fourth leading noncompetitive import, declined 10 percent to $615 million, due mainly to lower prices. Volume remained about the same, at 801,000 tons, while unit import prices dropped 10 percent to $768 a ton. Over half of U.S. rubber imports came from Indonesia, with nearly all of the remainder from Malaysia, Thailand, and Liberia.

U.S. banana imports in FY 1986 dropped slightly to $740 million, with volume remaining essentially unchanged from FY 1985's level of 3 million tons. Ecuador, Costa Rica, Honduras, and Colombia provided 80 percent of U.S. banana imports. Among other major noncompetitive imports, spices gained 42 percent to $345 million due mainly to sharply higher black pepper prices. (Charles E. Goode, International Economic Indicators Branch)

Table 10--U.S. agricultural imports:
Value by months, October 1983 - September 1986 1/

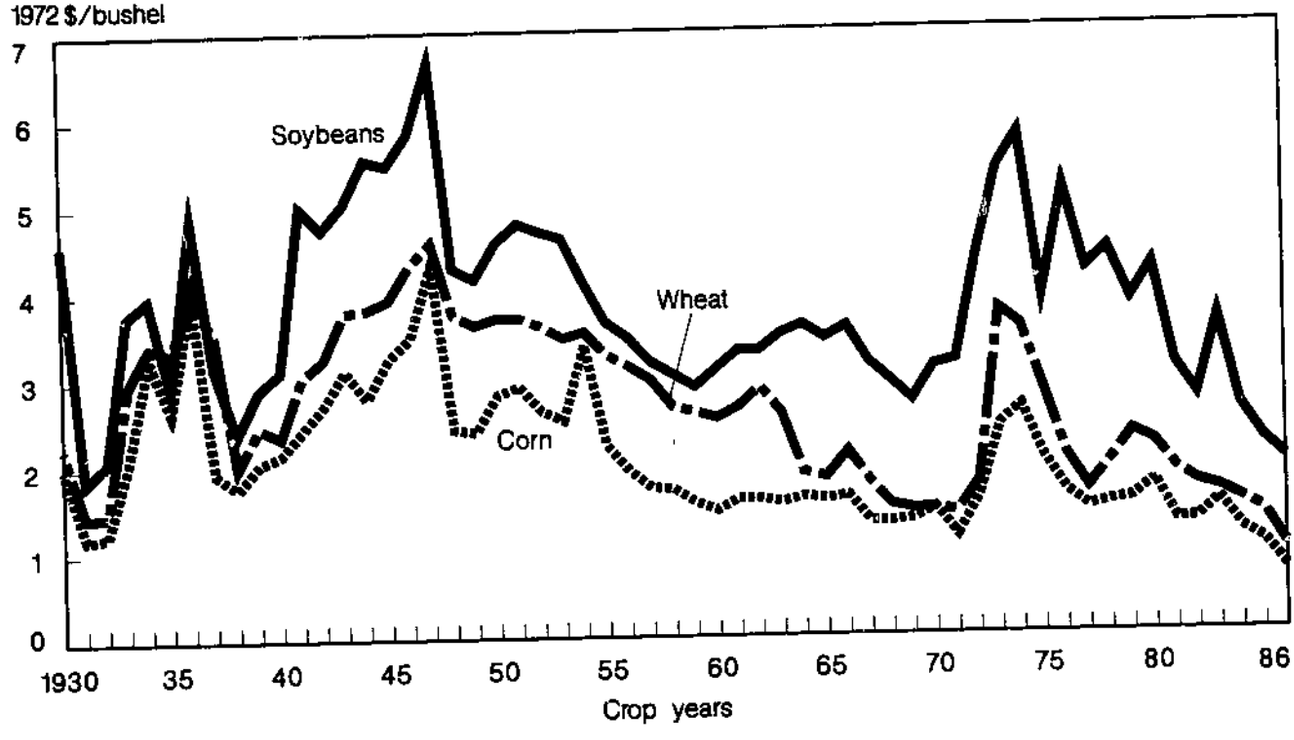
Prices Fall With New Farm Legislation

Nominal farm prices for U.S. grains and oilseeds have fallen to their lowest levels since crop year 1972. Real prices (1972=100) for wheat and corn in crop year 1986 are expected to fall below $1 per bushel, a level not even reached during the 1930's. Real farm prices for wheat, corn, and soybeans have generally declined since the late 1940's, despite periodic acreage diversion programs and droughts, and the export boom of the 1970's (see figure).

Export Price Competition Sharpens

The United States depends heavily on farm commodity sales overseas. Up to two-thirds of wheat and rice production and over half of soybean production have been exported in recent years. Changes in world grain demand and exchange rate movements have affected the U.S. market, particularly for wheat. Canada, Australia, and Argentina have expanded production and exports at the expense of the U.S. market by taking advantage of price and exchange rate differentials. The U.S. dollar recently depreciated against currencies of the largest U.S. agricultural import markets (Japan, The Netherlands, and West Germany) while appreciating against major U.S. export competitors (Canada, Australia, and Argentina).

U.S. Farm Prices



1985 Farm Act Lowers Prices

Provisions of the 1985 Food Security Act reflect the need to reassess commodity price-support levels in light of a changing world grain market. According to the legislation, prices can fall to levels below those of recent years, making disposal of surplus grain supplies easier and discouraging excess production in succeeding years.

Wheat Prices Fall

U.S. farm prices for wheat fell from a peak of $144 per ton in crop year 1980 to $82 a ton in September 1986. After a record-high wheat crop in 1980, U.S. wheat production in each of the next 5 years exceeded that record. At the same time, foreign import demand was gradually falling, finally dropping 36 percent in crop year 1985 from that of the previous year. Because wheat exports accounted for almost 60 percent of U.S. production in the 5 previous years, such a decline would probably drive prices down.

Export prices at the gulf averaged $104 a ton in September 1986 compared with $128 a ton in September 1985, $199 in November 1980, and $222 at its peak in February 1974.

Prices of Soybean Products Diverge

While grain prices currently seek lower equilibrium levels, prices of soybeans, soybean meal, and soybean oil followed divergent paths. Farm prices for soybeans remained in the range of $183-$193 a ton for crop year 1985 (September-August) compared with $212 in 1984 and $287 in 1983.

Soybean meal prices at Decatur have strengthened to $183 a ton, its highest level since June 1984. In most years, about half of all U.S. soybean production is crushed and three-fourths of that total is used domestically for animal feed. Meal does not store well, and because meal prices are not under price support restrictions, they tend to fluctuate more freely to ration a given year's supply between exports and domestic use. On the other hand, soybean oil ending stocks are projected to reach record highs in crop year 1986. This, along with low export demand, has pushed expected soybean oil prices to their lowest level in 15 years, 13 cents per pound.

Feed Grain Prices Fall

Farm prices for corn fell to $57 a ton in September as a record-high corn crop in 1986 and poor export prospects continued to drive prices lower. Export prices at the gulf were $67 a ton compared with $103 a year ago and $155 at their peak in January 1981. Sorghum export prices reached $107 a ton in May as a temporary export surge came just before harvest. However, these prices fell to $68 by September.

Cotton Prices Plunge

U.S. cotton prices fell from 66 cents to 27 cents a pound between July and August 1986 during harvest. Even though the 1986 harvest was significantly lower than those of the previous 2 years, prices were weak at the beginning of the season. Cotton exports, at 2 million bales in 1985/86, were at their lowest level since World War II, putting considerable downward pressure on prices. (Steve Milmoe, International Economic Indicators Branch)

U.S. Farm Exports to Western Europe Continue to Decline

U.S. agricultural exports to Western Europe continued to fall in fiscal year (FY) 1986 (October 1985-September 1986) but at a slower rate than in previous years. Exports dropped 5 percent to $6.8 billion in FY 1986. U.S. agricultural exports to the European Community (EC) declined 3 percent to $6.4 billion. 1/ Although the United States enjoyed an agricultural trade surplus of $2.3 billion with the EC, the U.S. share of the EC market declined steadily from 33 percent in FY 1980 to 26 percent in FY 1986. Nonetheless, the EC replaced Japan as the top-ranking customer for U.S. farm products following the accession of Spain and Portugal into the EC in 1986.

Major importers of U.S. farm products in Western Europe were The Netherlands ($2.0 billion), a major re-exporter of farm goods to EC partners; West Germany ($1 billion); Spain ($723 million); Italy ($693 million); and the United Kingdom ($628 million).

Values for U.S. agricultural exports to the EC in FY 1986 fell for many principal export categories but at a slower rate than in FY 1985. Several factors resulted in a continuing decline in exports of wheat, feed grains, cotton, and tobacco. EC feed demand was sluggish except in the hog sector.

Cattle numbers declined, a long-term development stimulated by increased slaughter of dairy cows under EC dairy reform programs. Other factors contributing to falling U.S. exports in FY 1986 were rising self-sufficiency in the EC, border protection, the strong 1985 U.S. dollar relative to EC currency, and severe price competition from third country suppliers.

U.S. grains to the EC declined 16 percent to $1.5 billion. Abundant supplies of EC wheat, despite a lower EC crop output in 1986, reduced U.S. wheat 28 percent to $173 million. U.S. corn exports sharply dropped by 58 percent in value to $328 million and over 50 percent in volume to 3 million tons due to reduced EC feed demand and increased EC supplies from other countries, such as Argentina.

U.S. oilcake and meal exports remained brisk in FY 1986, with sales volume rising by nearly 50 percent, reflecting relatively low prices in 1986 and declining rapeseed output in the EC. U.S. exports of certain feeds, such as corn byproducts, alfalfa meal, beet pulp, and citrus pulp pellets, were strong due to favorable relative prices. U.S. soybean exports to the EC increased nearly 20 percent in volume, with demand from crushers strong due to sharply lower bean prices. U.S. soybean prices (c.i.f. Rotterdam) were $211 per ton in FY 1986 compared with $233 in FY 1985. 2/ Some drought-stricken areas in the EC used more soybean meal in rations in lieu of grain and forage.

1/ The following countries are members of the EC: Belgium, Denmark, France, Greece, Ireland, Italy, Luxembourg, Portugal, Spain, The Netherlands, the United Kingdom, and West Germany.

2/ C.i.f. = cost, insurance, and freight.

Following two exceptionally strong years, U.S. cotton exports to the EC dropped sharply in FY 1986. Global competition was severe particularly from Far Eastern countries. Although use of synthetic fibers has competed with natural fibers in Western Europe, cotton has enjoyed a surge of popularity in recent years. An upturn in U.S. cotton exports is expected in FY 1987, but due to sharply higher prices, shipments probably will not rise to the high volumes of 1984 and 1985.

Reduced consumption due to relatively high excise taxes and anti-smoking campaigns and greater competition due to excess world supply reduced U.S. tobacco exports by about 10 percent--led largely by reduced shipments of flue-cured tobacco. Leading markets for U.S. unmanufactured tobacco exports were West Germany, The Netherlands, and Italy.

Demand for U.S. fruits, nuts, and vegetables expanded in 1986. Fruits, particularly fresh grapefruits, raisins, prunes, and fresh apples, increased in both volume and value. Strong EC demand for U.S. nuts was reflected in an 8-percent increase to $357 million, over twice the value of U.S. wheat exports to that region in FY 1986.

Outlook for FY 1987

Although the United States enjoyed an agricultural trade surplus of $2.3 billion with the EC in FY 1986, U.S. farm products are expected to decline in FY 1987. EC grain output should remain relatively large assuming favorable weather, despite EC efforts to control expensive surpluses through grain reform policies. Border protection now embraces the EC's new members, Spain and Portugal, dampening traditional markets for important bulk commodities, largely grains, to those countries.

U.S. soybean meal exports are expected to fall because of relatively high U.S. prices and EC production of substitute oilseeds and other protein crops.

Feeding practices in the EC have grown increasingly price sensitive due to serious cost/price pressures on farm income in recent years. Technology has enabled continental farmers to produce higher quality rapeseed varieties for feed use, while EC subsidies have encouraged expansion of both rapeseed and protein crops, such as peas and beans. With a recovery of rapeseed output in FY 1987 and increased U.S. soybean meal prices in late 1986, soybean meal exports are likely to suffer. Soybean meal prices in September 1986 exceeded those of September 1985 by about 25 percent. On the other hand, soybean prices have remained very attractive to EC crushers, and should result in brisk demand in FY 1987.

Consumer demand in the EC for such U.S. items as fruits and vegetables and a wide variety of high-value-added products will continue to face intense competition from within the EC and from third country suppliers.

The declining value of the U.S. dollar relative to European currencies and declining inflation rates are factors that could positively affect U.S. foodstuff exports which are not subject to a high EC levy. Nevertheless, West European economies contain ongoing vulnerabilities: unemployment is exceptionally high in many countries, and real growth rates in gross national product are not likely to match the 1986 level of 2.75 percent. 3/ (Marshall H. Cohen, Western Europe Branch)
