AgEcon Search

AgEcon Search is a vast digital library where researchers and students of agricultural and applied economics can access a world of knowledge. As part of the University of Minnesota's *Driven* campaign, we seek to secure AgEcon Search into the future to ensure free access to timely, cutting-edge knowledge for users across the globe.

Global | Irreplaceable

How it began

Built in 1995 as a cooperative project of the University of Minnesota Department of Applied Economics and University of Minnesota Libraries, AgEcon Search serves as the permanent archive of the digital scholarly works of agricultural and applied economics researchers worldwide, providing stewardship, reliable long-term access, and broad dissemination. Today, over 180,000 research papers in AgEcon Search are freely accessible and easy to find in Google.

How does it work?

AgEcon Search collects, indexes, and electronically distributes full-text copies of scholarly research in the broadly defined field of agricultural and applied economics.

This includes:

- agribusiness
- food security and supply
- energy and natural resource economics
- environmental economics
- policy issues
- international trade
- economic development

“Graduate students in our program who shared their theses in AgEcon Search have been able to get jobs in international research organizations, and most are now progressing with Ph.D. degrees in Europe or the United States. Over 164 graduate students over the next two to three years are gearing to submit their theses in AgEcon Search when they complete their studies.”

Professor George Owuor

Center Leader of the African Centre of Excellence in Sustainable Agriculture and Agribusiness Management (CESAAM) at Egerton University, Kenya

Relevant

Global Impact

What began as a local project with 50 papers has evolved into an international resource covering current and retrospective content in 15 languages from all over the world. Digitization projects have ensured the preservation and dissemination of thousands of research papers ranging from 1914 to the present.

Our global reach is evident in the 15,000 daily visitors from over 170 countries, making us the largest free, digital library of literature in agricultural and applied economics in the world. Researchers access AgEcon Search to learn from our global community of scholars and make new discoveries that build on their legacy.

Your support makes the difference.

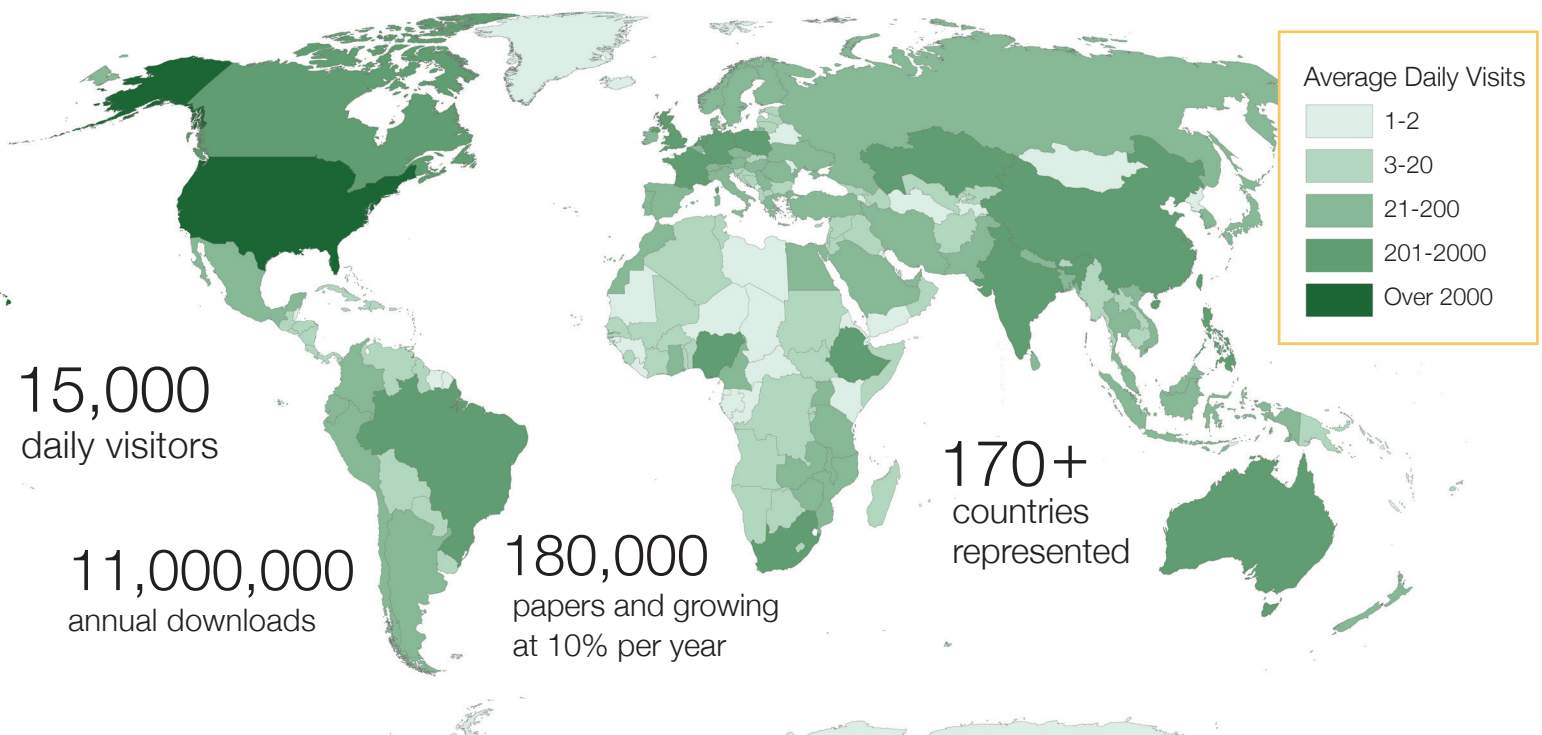

We are committed to ensuring that AgEcon Search remains a free repository for agricultural and applied economics research from around the globe. To do this we are establishing an endowment that will ensure this resource can continue regardless of grant funding or staffing changes.

We need the philanthropic support of people like you who are driven to provide free access to timely, cutting-edge knowledge without financial or geographical barriers.

We need you

Your investment in AgEcon Search advances our vision to:

- ➞ Secure AgEcon Search into the future making high-quality research available to the world, particularly poor and rural economies in the Global South and other underserved areas
- ➞ Provide free access to a broad, unique research collection that would otherwise only be available in print in a small and declining number of locations
- ➞ Expand global productivity and remove barriers for researchers at under-resourced institutions that cannot afford expensive journal subscriptions
- ➞ Preserve critical literature to stem the tide of lost knowledge
- ➞ Enlarge and enrich the international community of applied economists

“AgEcon Search is the archive of the agricultural and applied economics profession. Without it my research task would have been much harder and the whole profession would be at a loss. AgEcon Search provides an invaluable service in preserving older and lesser-used works, especially in developing countries such as my own. Even more importantly, their easy-to-use platform disseminates it to the largest possible audience.”

Jan Greyling

Junior Lecturer and Researcher,
Stellenbosch University, South Africa

AgEcon Search is a nonprofit subject repository co-sponsored by the UMN Department of Applied Economics and the University Libraries, with guidance from an international Advisory Board and partners including:

- Agricultural and Applied Economics Association
- Australian Agricultural and Resource Economics Society
- European Association of Agricultural Economists
- Giannini Foundation of Agricultural Economics
- International Association of Agricultural Economists
- USDA Economic Research Service
