# Maintaining the Cutting Edge

Proceedings of the American Agricultural Economics  
Association Extension Workshop

July 31, 1987 - August 1, 1987

East Lansing, Michigan

Editors: Cara L. Mitchell  
Kim B. Anderson

Produced at Oklahoma State University

Additional funding provided by Agriculture-Agribusiness Program,  
Oklahoma Cooperative Extension Service,

## Comparative Advantage and Competitiveness: New Extension Programs to Teach Old Concepts

John Ikerd, organizer (University of Georgia)

Coleman Dangerfield, moderator (University of Georgia)

Kevin Moore (University of Missouri)

Bob Glover (University of Georgia)

Parr Rosson III, Johnny Jordan (Clemson University)

A national task force of Extension specialists has developed a comprehensive set of educational materials to teach the basic concepts of comparative advantage and competitiveness as they relate to farm enterprise selection, interregional competition and international trade. An understanding of international and interregional competition is built on a foundation of individual farm decision making. The concept of opportunity costs is used as a cornerstone for competitive advantage analyses at all three levels.

Educational materials include a base book with separate sections for each level of competition; an instructor's manual with introductory video skits, visuals, a computer game, instructional video tapes and instructional micro spread sheet templates; and specialized analytical tools which include micro spread sheets and an interregional linear programming application.

The symposium discussion followed an exposition of the concepts and materials developed as they relate programs of individual farm decision making, interregional competition and international trade. Discussion centered on potential use of these materials in Extension programs.

Competitive Advantage and Competitiveness: New Extension Programs to Teach Old Concepts

John Ikerd, Organizer (University of Georgia)  
Colman Gangelied, Moderator (University of Georgia)

Farr Henson III, Johnny Jordan (Clemson University)

A national task force of Extension specialists has developed a comprehensive set of educational materials to teach the basic concepts of competitive advantage and competitiveness as they relate to farm enterprise selection, interregional competition, and international trade. An understanding of interregional and interregional competition is built on a foundation of individual farm decision making. The concept of opportunity costs is used as a cornerstone for competitive advantage analysis at all three levels.

Educational materials include a case book with separate sections for each level of competition, an instructor's manual with introductory video cassettes, a computer game, instructional video tapes and instructional video cassettes, and specialized analytical tools which include video spreadsheets and an interregional linear programming application.

The symposium discussion followed an exposition of the concepts and materials developed as they relate to the process of individual farm decision making, interregional competition and international trade. Discussion centered on potential use of these materials in Extension programs.
