ECONOMIC RESEARCH OF INTEREST TO AGRICULTURE
1985-1987

Compiled and Edited by

June 1988
The following list of publications represents the research activities of the Agricultural economics group in the California Agricultural Experiment Station and the California Cooperative Extension Service. The California Agricultural Experiment Station includes the members of the Giannini Foundation of Agricultural Economics in the Department of Agricultural and Resource Economics, University of California at Berkeley, and in the Department of Agricultural Economics, University of California at Davis. The California Cooperative Extension Service includes the Extension economists who are members of the Giannini Foundation and who are located on the campuses of Berkeley, Davis, and Riverside, and the field office in Parlier. Although not every publication has been included, it is sufficiently comprehensive to represent the research work accomplished during the period covered. All titles included in this issue have been received by the Giannini Foundation Library and housed there. A few titles received after the publication of the 1982-84 list and those received up through 31 March 1988, have been included here. The list serves not only as a record of published and unpublished materials but also as a reference guide to source materials in the area of agricultural and resource economics research.

This list is in two parts. Part I, Economic Classification, includes all of the publications classified into various economic categories. A few titles are entered in more than one category. Two new categories, Fisheries and Technology, have been added to reflect the increasing research done in these areas. Part II, Commodity Classification, includes only those items which pertain explicitly to particular farm products, with the titles on a single group of products brought together under each subheading. These titles are also included in Part I. The arrangement in each section is alphabetical by title.

At the end is the author index of only the Giannini Foundation members and associate members for the period covered by this list. The numbers following each name refer to the pages on which his/her works appear in Part I.

Annual updates of the formal publications by the Giannini Foundation members and associate members are announced in the Giannini Reporter, published by the Foundation and available on request from:

Carole Nuckton
Dept. of Agricultural Economics
118 Voorhies Hall
University of California
Davis, CA  95616

The 1988 issue is forthcoming.
Information on the availability of the listed publications is given in the following section.

Grateful acknowledgment is made to Susan Casement and her assistants for sending us the Davis Giannini Foundation members' publications and to Max Leavitt, Programmer/Analyst, Department of Agricultural and Resource Economics, for writing two very helpful programs to make formatting this list a little easier. Any errors in this list are the responsibility of the compiler and editor.
