ECONOMIC RESEARCH OF INTEREST TO AGRICULTURE
1979-1981

Compiled and Edited by
Grace Dote
Giannini Foundation of Agricultural Economics Library
University of California
Berkeley, California

June 1982
INTRODUCTORY NOTE

The following list of publications represents the research activities of the agricultural economics group in the California Agricultural Experiment Station, California Cooperative Extension Service, Giannini Foundation of Agricultural Economics, the Department of Agricultural and Resource Economics, University of California, Berkeley, and the Department of Agricultural Economics, University of California, Davis. Although not every publication has been included, it is sufficiently comprehensive to be representative of the research work accomplished during the period covered. The list serves not only as a record of published materials but also as a reference guide to source material in the area of agricultural and resource economics research.

This list is in two parts. Part I, Economic Classification, includes all of the publications classified into various economic categories. Some category changes have been made from the previous edition. Due to increasing research in certain areas, three of the subsections in Part I have been further divided. "Agricultural Marketing: International" has been separated from "Agricultural Marketing and International Trade"; "Resources Development and Conservation: Land and Water" from "Resource Development and Conservation"; and "Rural Development: Developing Countries" from "Rural Development." "Statistical Analysis of Prices and Supplies"; "Statistics: Compilations"; "Statistics: Discussions"; and "Labor and Social Security" have been changed to "Agricultural Statistics"; "Econometric and Statistical Analyses and Models"; "Prices and Supplies"; and "Labor and Wages," respectively. Part II, Commodity Classification, includes only those items which pertain explicitly to particular farm products, with the titles on a single group of products brought together under each subheading. The arrangement in each section is alphabetical by title.

Information on the availability and copying cost of the materials may be requested from the Library, Giannini Foundation of Agricultural Economics, 248 Giannini Hall, University of California, Berkeley, California, 94720.

Grateful acknowledgment is made to Cookie Takeshita and her staff of the Word Processing Unit and to Phyllis Donald, Jeannie Imazumi, Tom Kim, and Sophit Lee, Library Assistants.
