California Department of Food and Agriculture

# Agricultural Commissioners' Crop Reports

# Santa Barbara County

# 1931-1940

California County Agricultural Commissioners' Reports from the California Department of Food and Agriculture. This collection consists of annual crop and livestock data from each of the 58 California Counties. The collection covers 1915-1981; digitization of the rest of the collection is forthcoming.

This digitization project was funded by the Giannini Foundation of Agricultural Economics, http://giannini.ucop.edu/ .

The work was completed by the staff of the Giannini Foundation Library, University of California, Berkeley, http://are.berkeley.edu/library/ . **Please contact the Library to consult the originals.**

# AGRICULTURAL CROP REPORT

## 1931

## Santa Barbara County, California

Many requests are received at the County Agricultural Commissioner's office for figures dealing with the agricultural output of Santa Barbara County. These requests come from government agencies, Chambers of Commerce, transportation companies, banking institutions, farmers' co-operative organizations, marketing agencies and investigators from various institutions throughout the country. The figures found in this report have been secured from various agencies, including the several large warehouses of the county, the railroads and other common carriers, the various agricultural cooperative marketing associations, the University of California Extension Service, the Federal Agricultural Census, various farmers' organizations, packers, shippers and many individuals in close touch with the movement of agricultural commodities.

It is somewhat difficult to arrive at the production figures on many commodities, such as grain and alfalfa hay since a large tonnage remains on farms, but much of this appears in the form of animal industry products shipped later.

While this is a commodity production report, there is a very strong demand for valuation figures. Those shown here are on an f.o.b. basis, not what the farmer received. The figures given represent products sold, and in the case of animal industry should not be taken to mean a census of animals in the county.

The acreage of the county has been divided very roughly into three main districts: The Santa Maria, including Guadalupe, Casmalia, Orcutt, Los Alamos and Sisquoc; the Lompoc, including all of the Santa Ynez and Lompoc Valleys and the coast north of Gaviota; the Santa Barbara, including Carpinteria, Montecito, Goleta and the coast south of Gaviota. Allocation of production figures to each district in the case of Animal Industry is estimated. Acreage figures for field crops and vegetables are also estimated.

Eugene S. Kellogg
County Agricultural Commissioner

# AGRICULTURAL CROP REPORT

## 1931

## Santa Barbara County, California

| | |
|---|---|
| Total Number Farms | 1,408 |
| Total Value Agricultural Products | $13,016,523. |
| Total Acreage | 1,683,200 |
| Total Acreage U.S.Forest Reserve Area | 754,380 |
| Total Acreage Agricultural Area | 775,191 |
| Estimated Total Population | 65,075 |
| Estimated Total Population Outside Incorporated Cities | 21,552 |
| Estimated Value Petroleum Products | $8,205,000. |
| Estimated Value Other Mineral Products | $1,000,000. |
| Assessed Valuation (including operative property) | $157,000,000. |

Due to its geographic position Santa Barbara County represents a variety of climatic and soil types. From Point Concepcion, the great continental headland, the coast line runs north in one instance and south in the other, exposing approximately 100 miles of coast line.

Two main streams traverse the county from east to west: the Santa Maria River on the county's north boundary, and the Santa Ynez River to the south of the Santa Maria. These streams have laid down large deltas where vegetable growing and other intensive crops are grown.

On the south is a long, narrow coastal plain with a southern exposure where orchard crops and general farms are found. Citrus and semi-tropic fruits are grown in this area.

The islands off the coast are devoted to the production of live-stock.

Approximately one half the area of the county is made up of United States Forest lands.

# AGRICULTURAL CROP REPORT

## 1932

## Santa Barbara County, California

Many requests are received at the County Agricultural Commissioner's office for figures dealing with the agricultural output of Santa Barbara County. These requests come from government agencies, Chambers of Commerce, transportation companies, banking institutions, farmers' cooperative organizations, marketing agencies and investigators from various institutions throughout the country. The figures found in this report have been secured from various agencies, including the several large warehouses of the county, the railroads and other common carriers, the various agricultural cooperative marketing associations, the University of California Extension Service, the Federal Agricultural Census, various farmers' organizations, packers, shippers and many individuals in close touch with the movement of agricultural commodities.

It is somewhat difficult to arrive at the production figures on many commodities, such as grain and alfalfa hay, since a large tonnage remains on farms, but much of this appears in the form of animal industry products shipped later.

While this is a commodity production report, there is a very strong demand for valuation figures. Those shown here are on an f.o.b. basis, not what the farmer received. The figures given represent products sold, and in the case of animal industry should not be taken to mean a census of animals in the county.

The acreage of the county has been divided very roughly into three main districts: the Santa Maria, including Guadalupe, Casmalia, Orcutt, Los Alamos and Sisquoc; the Lompoc, including all of the Santa Ynez and Lompoc Valleys and the coast north of Gaviota; the Santa Barbara, including Carpinteria, Montecito, Goleta and the coast south of Gaviota. Allocation of production figures to each district in the case of Animal Industry is estimated. Acreage figures for field crops and vegetables are also estimated.

Eugene S. Kellogg
County Agricultural Commissioner

| Estimated Total Population Outside Incorporated Cities | 21,552 |
| Estimated Value Petroleum Products | $4,760,000. |
| Estimated Value Other Mineral Products | 500,000. |
| Assessed Valuation (including operative property) | $133,092,558. |

Due to its geographic position Santa Barbara County represents a variety of climatic and soil types. From Point Concepcion, the great continental headland, the coast line runs north in one instance and south in the other, exposing approximately 100 miles of coast line.

Two main streams traverse the county from east to west: the Santa Maria River on the county's north boundary, and the Santa Ynez River to the south of the Santa Maria. These streams have laid down large deltas where vegetable growing and other intensive crops are grown.

On the south is a long, narrow coastal plain with a southern exposure where orchard crops and general farms are found. Citrus and semi-tropic fruits are grown in this area.

The islands off the coast are devoted to the production of live-stock.

Approximately one half the area of the county is made up of United States Forest lands.

# AGRICULTURAL CROP REPORT

## 1933

## Santa Barbara County, California

Many requests are received at the County Agricultural Commissioner's office for figures dealing with the agricultural output of Santa Barbara County. These requests come from government agencies, Chambers of Commerce, transportation companies, banking institutions, farmers' cooperative organizations, marketing agencies and investigators from various institutions throughout the country. The figures found in this report have been secured from various agencies, including the several large warehouses of the county, the railroads and other common carriers, the various agricultural cooperative marketing associations, the University of California Extension Service, the Federal Agricultural Census, various farmers' organizations, packers, shippers and many individuals in close touch with the movement of agricultural commodities.

It is somewhat difficult to arrive at the production figures on many commodities, such as grain and alfalfa hay, since a large tonnage remains on farms, but much of this appears in the form of animal industry products shipped later.

While this is a commodity production report, there is a very strong demand for valuation figures. Those shown here are on an f.o.b. basis, not what the farmer received. The figures given represent products sold, and in the case of animal industry should not be taken to mean a census of animals in the county.

The acreage of the county has been divided very roughly into three main districts: the Santa Maria, including Guadalupe, Casmalia, Orcutt, Los Alamos and Sisquoc; the Lompoc, including all of the Santa Ynez and Lompoc Valleys and the coast north of Gaviota; the Santa Barbara, including Carpinteria, Montecito, Goleta and the coast south of Gaviota. Allocation of production figures to each district in the case of Animal Industry is estimated. Acreage figures for field crops and vegetables are also estimated.

Eugene S. Kellogg
County Agricultural Commissioner

| Assessed Valuation Non-operative Property (real estate and improvements) | $64,205,770. |
| Total Assessed Valuation (including operative property) | $127,009,313. |

Due to its geographic position Santa Barbara County represents a variety of climatic and soil types. From Point Concepcion, the great continental headland, the coast line runs north in one instance and east in the other, exposing approximately 100 miles of coast line.

Two main streams traverse the county from east to west: the Santa Maria River on the county's north boundary, and the Santa Ynez River to the south of the Santa Maria. These streams have laid down large deltas where vegetable growing and other intensive crops are grown.

On the south is a long, narrow coastal plain with a southern exposure where orchard crops and general farms are found. Citrus and semi-tropic fruits are grown in this area.

The islands off the coast are devoted to the production of live-stock.

Approximately one half the area of the county is made up of United States Forest lands.

# AGRICULTURAL CROP REPORT

## 1934

## Santa Barbara County, California

Many requests are received at the County Agricultural Commissioner's office for figures dealing with the agricultural output of Santa Barbara County. These requests come from government agencies, Chambers of Commerce, transportation companies, banking institutions, farmers' cooperative organizations, marketing agencies and investigators from various institutions throughout the country. The figures found in this report have been secured from various agencies, including the several large warehouses of the county, the railroads and other common carriers, the various agricultural cooperative marketing associations, the University of California Extension Service, the Federal Agricultural Census, various farmers' organizations, packers, shippers and many individuals in close touch with the movement of agricultural commodities.

It is somewhat difficult to arrive at the production figures on many commodities, such as grain and alfalfa hay, since a large tonnage remains on farms, but much of this appears in the form of animal industry products shipped later.

While this is a commodity production report, there is a very strong demand for valuation figures. Those shown here are on an f.o.b. basis, not what the farmer received. The figures given represent products sold, and in the case of animal industry should not be taken to mean a census of animals in the county.

The acreage of the county has been divided very roughly into three main districts: the Santa Maria, including Guadalupe, Casmalia, Orcutt, Los Alamos and Sisquoc; the Lompoc, including all of the Santa Ynez and Lompoc Valleys and the coast north of Gaviota; the Santa Barbara, including Carpinteria, Montecito, Goleta and the coast east of Gaviota. Allocation of production figures to each district in the case of Animal Industry is estimated. Acreage figures for field crops and vegetables are also estimated.

Eugene S. Kellogg
County Agricultural Commissioner

| Assessed Valuation Non-operative Property (real estate and improvements) | $64,186,180. |
| Total Assessed Valuation (including operative property) | $139,651,452. |

Due to its geographic position Santa Barbara County represents a variety of climatic and soil types. From Point Concepcion, the great continental headland, the coast line runs north in one instance and east in the other, exposing approximately 100 miles of coast line.

Two main streams traverse the county from east to west: the Santa Maria River on the county's north boundary, and the Santa Ynez River to the south of the Santa Maria. These streams have laid down large deltas where vegetable growing and other intensive crops are grown.

On the south is a long, narrow coastal plain with a southern exposure where orchard crops and general farms are found. Citrus and semi-tropic fruits are grown in this area.

The islands off the coast are devoted to the production of live-stock.

Approximately one half the area of the county is made up of United States Forest lands.

# AGRICULTURAL CROP REPORT

## Santa Barbara County, California

Many requests are received at the County Agricultural Commissioner's office for figures dealing with the agricultural output of Santa Barbara County. These requests come from government agencies, Chambers of Commerce, transportation companies, banking institutions, farmers' cooperative organizations, marketing agencies and investigators from various institutions throughout the country. The figures found in this report have been secured from various agencies, including the several large warehouses of the county, the railroads and other common carriers, the various agricultural cooperative marketing associations, the University of California Extension Service, the Federal Agricultural Census, various farmers' organizations, packers, shippers and many individuals in close touch with the movement of agricultural commodities.

It is somewhat difficult to arrive at the production figures on many commodities, such as grain and alfalfa hay, since a large tonnage remains on farms, but much of this appears in the form of animal industry products shipped later.

While this is a commodity production report, there is a very strong demand for valuation figures. Those shown here are on an f.o.b. basis, not what the farmer received. The figures given represent products sold, and in the case of animal industry should not be taken to mean a census of animals in the county.

The acreage of the county has been divided very roughly into three main districts: the Santa Maria, including Guadalupe, Casmalia, Orcutt, Los Alamos and Sisquoc; the Lompoc, including all of the Santa Ynez and Lompoc Valleys and the coast north of Gaviota; the Santa Barbara, including Carpinteria, Montecito, Goleta and the coast east of Gaviota. Allocation of production figures to each district in the case of Animal Industry is estimated. Acreage figures for field crops and vegetables are also estimated.

Eugene S. Kellogg
County Agricultural Commissioner

| Assessed Valuation Non-operative Property (real estate and improvements) | $78,133,850. |
| Total Assessed Valuation (including operative property) | $153,347,622. |

Due to its geographic position Santa Barbara County represents a variety of climatic and soil types. From Point Concepcion, the great continental headland, the coast line runs north in one instance and east in the other, exposing approximately 100 miles of coast line.

Two main streams traverse the county from east to west: the Santa Maria River on the county's north boundary, and the Santa Ynez River to the south of the Santa Maria. These streams have laid down large deltas where vegetable growing and other intensive crops are grown.

On the south is a long, narrow coastal plain with a southern exposure where orchard crops and general farms are found. Citrus and semi-tropic fruits are grown in this area.

The islands off the coast are devoted to the production of live-stock.

Approximately one-half the area of the county is made up of United States Forest lands.

NOTE: Vegetable acreage surveys are made Jan.1, May 1 and Sept.1, and show all acreage. Prices figured are f.o.b. Mixed cars include, in addition to vegetables listed above, table beets, Brussels sprouts, cabbage, cucumbers, cauliflower, broccoli, green onions and spinach. Considerable acreage is planted to two crops each season. Acreage surveys made quarterly show that 25% of the acreage planted is located in Oso Flaco, San Luis Obispo County, but packed and shipped in Santa Barbara County.

| Total | 32,172 | 28,680 | 15,047 | 13,389 | $5,461,917 | $5,049,697 |

Note: Acreage of each crop planted as indicated, except mixed and miscellaneous, which includes also acreage for asparagus, artichokes, beets, onions, parsley, radishes, rhubarb, spinach and turnips.

Note: Considerable percentage of acreage in broccoli, carrots, cauliflower, celery, chicory and lettuce shipped in mixed cars, which is reflected in yield per acre figures.

Note: 1940 production for mixed and miscellaneous does not show acreage as such for artichokes, cucumbers and parsley, as shown as mixed and miscellaneous in 1939.

Note: Values of all crops shown are f.o.b. basis; not what the farmer received.
