California Department of Food and Agriculture

Agricultural Commissioners' Crop Reports

Santa Clara County

1962-1965

California County Agricultural Commissioners' Reports from the California Department of Food and Agriculture. This collection consists of annual crop and livestock data from each of the 58 California Counties. The collection covers 1915-1981; digitization of the rest of the collection is forthcoming.

This digitization project was funded by the Giannini Foundation of Agricultural Economics,
<http://giannini.ucop.edu/> .

The work was completed by the staff of the Giannini Foundation Library, University of California, Berkeley, <http://are.berkeley.edu/library/> . **Please contact the Library to consult the originals.**

DAVID T. RAYNER
AGRICULTURAL COMMISSIONER
75 West St. James Street
SAN JOSE, CALIFORNIA

Mr. Charles Paul
Director, California Department of Agriculture
and
The Honorable Board of Supervisors
of Santa Clara County

Gentlemen:

In accordance with the provisions of Section 65.5 of the California Agricultural Code, I hereby submit the 1962 Annual Agricultural Crop Report for the County of Santa Clara.

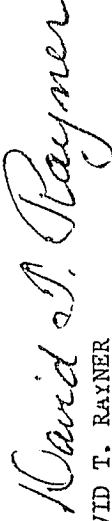

This report shows the acreage, production and values of all commercial crops grown in the County. The values indicated for the commodities reported are based on the gross farm income to producers, and does not necessarily represent the net income received by the producer.

The total agricultural value reported for 1962, shows a decrease from the preceding year. This was due mainly because of a reduction of production acreage for urbanization purposes; adverse weather conditions during blossom and fruit setting period of apricots and cherries; and, lower prices paid for most of the commodities.

A. C. P. payments are not included in the gross agricultural value, but are only reported for information purposes.

After nearly thirty-seven years of service with the Santa Clara County Department of Agriculture, of which sixteen years were as commissioner, I have decided to retire. Therefore, in this, my final Annual Crop Report, I wish to take this opportunity to express my sincerest thanks to the many friends, individuals and organizations who willingly cooperated with me and my staff in contributing the information necessary to make all previous reports, and the 1962 report possible.

Respectfully submitted,

DAVID T. RAYNER
AGRICULTURAL COMMISSIONER

SANTA CLARA COUNTY

MR. CHARLES PAUL, DIRECTOR
CALIFORNIA DEPARTMENT OF AGRICULTURE:

THE HONORABLE BOARD OF SUPERVISORS OF THE
COUNTY OF SANTA CLARA:

AND:

MR. HOWARD W. CAMPEN, COUNTY EXECUTIVE:

Gentlemen:

This 1963 Annual Agricultural Crop Report for the County of Santa Clara, is herewith submitted in accordance with the provision of Section 65.5 of the California Agricultural Code.

The report shows the acreage, production and values of the commercial crops and products produced in the County. The value figures presented in this report represent the gross farm income of agricultural production, and do not reflect net income to the producer. Cost of production, harvesting, packing and other costs should be deducted to arrive at a true farm value.

The A.C.P. payments are not included in the gross value figures, but are only reported for informational purposes. For a point of interest, also included in the report, is a data sheet showing the "Acreage Trend" of our principal commercial fruit, nut and vine crops from 1950 through 1963.

I wish to take this opportunity to express my appreciation and sincere thanks to all individuals and organizations who so willingly cooperated with me and my staff in contributing the necessary information for this report.

Expressed appreciation is given to all the members of my staff for their efforts in the compilation of this report.

Respectfully submitted,

THEODORE J. MONIZ
AGRICULTURAL COMMISSIONER

DEPARTMENT OF AGRICULTURE THEODORE J. MONIZ, COMMISSIONER
75 WEST ST. JAMES STREET
SAN JOSE, CALIFORNIA 95113 299-2171

March 15, 1965

MR. CHARLES PAUL, DIRECTOR
CALIFORNIA DEPARTMENT OF AGRICULTURE:

THE HONORABLE BOARD OF SUPERVISORS OF THE
COUNTY OF SANTA CLARA:

AND:

MR. HOWARD W. CAMPEN, COUNTY EXECUTIVE:

Gentlemen:

This 1964 Annual Agricultural Crop Report for the County of Santa Clara, is herewith submitted in accordance with the provision of Section 65.5 of the California Agricultural Code.

The report shows the acreage, production and values of the commercial crops and products produced in the County. The value figures represent the gross farm income of agricultural production, and do not reflect net income to the producer. Cost of production, harvesting, packing and other costs should be deducted to arrive at a true farm value.

Also included in this report, as a point of interest, are two data sheets, one showing the "Acreage Trend" of our principal commercial fruit, nut, strawberry and vine crops from 1950 through 1964, and the other showing the bearing and non-bearing acreage of our major fruit crops for North and South County, using Coyote as the dividing line.

A. C. P. payments are not included in the gross value figures, but are only reported for informational purposes.

I wish to take this opportunity to express my appreciation and to sincerely thank all individuals and organizations who so willingly cooperated with me and my staff in contributing the information necessary for this report.

To all the members of my staff, expressed appreciation is being given for their efforts in the compilation of this report.

Respectfully submitted,

THEODORE J. MONIZ
AGRICULTURAL COMMISSIONER

COUNTY OF SANTA CLARA

COMMENTS ON 1964 CROP PRODUCTION

Small sizes and poor quality of prunes resulted in a sharp reduction of prices to Santa Clara County prune growers. In spite of a \$60.00 per ton drop, dried prunes led all agricultural commodities at \$10,946,000.

Apricot production was down slightly. Fresh and canned fruit prices were above 1963 but the low price for dried apricots accounted for an over all reduction of over one million dollars.

Cherry production and prices returned to a normal level after a near disasterous 1963 season caused by rains during blossoming and ripening periods.

Pear growers realized a larger tonnage and better prices than in 1963. Pear Decline and urbanization reduced the pear acreage by approximately 200 acres.

Walnut Husk Fly continues to plague local walnut growers. In several areas where satisfactory control was not obtained, considerable tonnage was down graded with a resulting lower price to the grower.

During the 1964 growing season, a heavy Field Mice infestation resulted in damage and extra control costs to growers of sugar beets, alfalfa, vegetables and other crops.

Tomato acreage and production was up during 1964. Lack of early frosts extended the harvest season to about November 1. A labor shortage near the end of the harvest season was responsible for a loss of three to five percent of the total crop.

Lack of rainfall in 1963 - 1964, added extra irrigation costs to most growers in Santa Clara County. Range forage was also reduced and many cattlemen had to reduce their herds or buy supplemental feed.

FRUITS AND NUTS

SAN JOSE, CALIFORNIA 95113 299-2171

March 14, 1966

MR. CHARLES PAUL, DIRECTOR
CALIFORNIA DEPARTMENT OF AGRICULTURE:

THE HONORABLE BOARD OF SUPERVISORS OF THE
COUNTY OF SANTA CLARA:

AND:

MR. HOWARD W. CAMPEN, COUNTY EXECUTIVE:

Gentlemen:

This 1965 Annual Agricultural Crop Report for the County of Santa Clara, is herewith submitted in accordance with the provision of Section 65.5 of the California Agricultural Code.

The report shows the acreage, production and gross values of the commercial crops and products produced in the County

Also included in this report, as a point of interest, are two data sheets, one showing the "Acreage Trend" of our total bearing and non-bearing acreage of fruit and nut crops from 1950 through 1965, and the other showing the bearing and non-bearing acreage of our major fruit and nut crops for North and South County, using Coyote as the dividing line.

A. C. P. payments are not included in the gross value figures, but are only reported for informational purposes.

I wish to take this opportunity to express my appreciation and to sincerely thank all individuals and organizations who so willingly cooperated with this department in contributing the information necessary for this report.

To all the members of my staff, expressed appreciation is being given for their efforts in the compilation of this report.

Respectfully submitted,

THEODORE J. MONIZ
AGRICULTURAL COMMISSIONER

COUNTY OF SANTA CLARA

COMMENTS ON 1965 CROP PRODUCTION

Apricot growers suffered financially during 1965. Prices for fresh, canned, jam and nectar fruit were depressed. A heavy "cull out" was necessary to meet high quality standards required by processors. It was estimated that 2000 tons of fruit went unharvested due to unfavorable prices. Only dried apricots showed a price increase over 1964.

Cherry production was up over 1964. Lack of rain during pre-harvest and harvest season was favorable to local growers. Better prices and increased production accounted for over 1 million dollars in gross returns. Bird damage continues to plague local orchards.

Santa Clara County growers fared better, production wise than all other pear growing districts in California and the Northwest. Rains during the 1965 bloom period resulted in one half the tonnage on a state wide basis of 1964. Local production was only off approximately 20%. The light crop resulted in peak prices and reflected an over all increase to county growers of more than one million dollars over 1964. Pear Decline continues to be a problem to local growers. Research of this disease is still being carried on at local, state and national levels.

Prune growers again faced an adverse season. Total dried tonnage was down approximately 9,000 tons, a heavier than usual "dry-away" and smaller fruit accounted for the drop. Prices remained depressed. 20% of the crop was assigned to the Reserve Pool for management purposes. It is hoped that as this reserve is returned to the market, prices will be comparable to the 80% "free tonnage".

Quality of walnuts was below average, partially due to difficulties in Walnut Husk Fly control. Prices were down approximately \$75. per ton.

Tomato planting was down, probably due to uncertainty of harvest help. A ten dollar per ton increase over 1964 resulted in over a million dollar increase in this crop. A long harvest season was also favorable. Local labor, mechanical harvesters and a limited number of braceros harvested the crop with very little loss of fruit.

Strawberry acreage continues to drop. A high of 3,500 acres in 1957 has been reduced to a present 300 acres. Prices for berries for processing were good, averaging 16 $\frac{1}{2}$ ¢ per pound for 1965.

Neck Rot of onions was moderately prevalent in 1965.

Livestock raisers fared better in 1965. Above normal rainfall resulted in good range conditions. Firmer prices resulted in nearly 1 million dollar gross increase over 1964.

Urbanization and other factors continue to reduce farming acreage in Santa Clara County. Fruit and nut tree acreage alone showed a loss of approximately 2000 acres. Acreage of crops of low value per acre, such as alfalfa and permanent pasture, dropped due to irrigation, pump tax and other costs.
