FRUITS--NONCITRUS

By States, 1949-55, Revised Estimates, United States, 1934-55,
Production, Use, and Value

This publication presents statistics by States on production, farm disposition, price, value, and utilization of noncitrus fruits for the crop years 1949 through 1955. These statistics are revised on the basis of the 1954 Census of Agriculture and other pertinent data.

For the benefit of individuals who are interested primarily in the historical series of U. S. totals, tables are included in this report which show U. S. totals of production, farm disposition, price, value, and utilization of sales, 1934 through 1955. Data on utilization of sales are not available for years prior to 1934. Available data by States for 1889 to 1944 are shown in Bulletin CS-27 issued in May 1948. Data for 1944-49 are shown in Statistical Bulletin No. 114 released October 1952.

Commercial apple production refers to the total apple crop in the commercial areas of each State. The production of apples by varieties is shown for selected States and areas and for the United States.

Production includes fruit harvested plus quantities not harvested for economic reasons. Production having value includes quantities sold and quantities used in the farm household but excludes quantities not utilized because of economic conditions, that is, fruit not harvested and excess cullage of harvested fruit.

Statistics on utilization of fruit by commercial processors refer to first utilization, not necessarily the final utilization. For example, frozen fruit which may later be used for preserves is included as frozen fruit.

The season average prices in this report are estimated average returns to growers for all methods of sale. These prices are applied to the production having value to compute value of production and to the quantity sold to compute value of sales.

The value estimates in this report cover the marketing season or crop year and should not be confused with cash receipts from these crops for a calendar year.

A report on tree nuts and a report on citrus fruits similar to this bulletin will be issued later.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. - Price 50 cents

FRUITS (Noncitrus): MARKETING SEASONS FOR SPECIFIED CROPS

- Apples:** Fresh fruit, New Jersey, Indiana, Illinois, Missouri, New Mexico, and all South Atlantic and South Central States, June 1 to May 31; all other States, July 1 to June 30; canned, August 1 to February 28; dried, August 1 to July 31.
- Apricots:** Fresh fruit, June 1 to August 31; canned, June 1 to August 31; dried, California, July 1 to June 30.
- Avocados:** California, October 1 to September 30; Florida, July 1 to February 28.
- Cherries:** Fresh fruit, sweet varieties, May 1 to July 31; sour varieties, June 1 to August 31.
- Cranberries:** Fresh fruit, September 1 to December 31; processing, September 1 to March 31.
- Dates:** September 1 to August 31.
- Figs:** Fresh fruit, June 1 to October 31; canned, August 1 to October 31; dried, California, September 1 to August 31.
- Grapes:** Fresh fruit, June 1 to January 31; crushed for wine and brandy, August 1 to November 30; California, dried raisins, September 1 to August 31.
- Olives:** October 1 to February 28.
- Peaches:** Fresh fruit, Georgia, May 1 to August 31; South Atlantic States (except Georgia), South Central States and California, June 1 to September 30; New England States and Idaho, August 1 to September 30; all other States, July 1 to September 30; canned, California, July 1 to September 30; dried, California, August 1 to July 31.
- Pears:** Fresh fruit, California, June 1 to May 31; Washington, Oregon and New York, July 1 to May 31; South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana and Texas, June 1 to December 31; all other States, July 1 to December 31; canned, California, Washington and Oregon, August 1 to November 30; dried, California, September 1 to August 31.
- Pineapples:** Florida, May 1 to December 31.
- Plums:** Fresh fruit, May 1 to September 30; canned, June 1 to September 30.
- Prunes:** Fresh fruit, July 1 to October 31; canned, August 1 to October 31; dried, September 1 to August 31.

1/ Estimates of the commercial crop refer to production of apples in commercial areas of each State.

2/ Differences between production and production having value are economic abandonment.

3/ Mostly crushed for vinegar, cider and juice. For some States, small quantities canned, dried, and frozen are included.

4/ Dried and frozen apples in Virginia and West Virginia are included with other processing. In Total South Atlantic States and 35 Commercial States these quantities are included under dried and frozen.

5/ Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, and Pennsylvania.

6/ Delaware, Maryland, Virginia, West Virginia, and North Carolina.

7/ Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, Missouri, Nebraska, Kansas, Kentucky, Tennessee, and Arkansas.

8/ Montana, Idaho, Colorado, New Mexico, Utah, Washington, Oregon, and California.

1/ Differences between production and production having value are economic abandonment.

2/ Estimates of the commercial crop refer to production of apples in commercial areas of each State. 36 States through 1942. Georgia dropped from list effective with 1943. 35 States thereafter.

3/ Apples: Mostly crushed for vinegar, cider and juice. For some States small quantities canned, dried, and frozen are included. 4/ Peaches: Used for jams, preserves, brandy, etc. For the seasons 1934-42 quantities frozen also are included. 5/ Fresh sales include some quantities canned and/or frozen. 6/ Includes some frozen and other processed.

7/ Includes small quantities canned. 8/ Includes small quantities frozen.

Apricots and Pears: Production, utilization, season average price to growers, and value, for the United States, 1934-1955

- 1/ Separation of "All Varieties" into sweet varieties and sour varieties did not commence until 1938.
2/ Differences between production and production having value are economic abandonment.
3/ **Sweet Cherries:** Includes fruit used for juice, wine, preserves and candied cherries for 1938-1943. Thereafter these items are included with "brined." Through 1942 some quantities of sweet cherries frozen also are included.
Sour Cherries: Includes fruit used for juice, wine, preserves and candied cherries for 1938-1948. Thereafter included with canned. Through 1942 some quantities of sour cherries brined also are included.
4/ Includes small quantities used for juice, wine, brandy, etc. For 1955 small quantities frozen also are included.
5/ Includes some quantities of sour cherries brined.

Plums 1/: Production, utilization, season average price per ton to growers, and value, for the United States, 1934-1955
