1. This table is on a crop-year basis for 12 months beginning as follows: types 11-14 and 61-62 - July 1; all other types, October 1. Disappearance for any crop year is the sum of the stocks at the beginning of the year plus the current crop minus stocks remaining at the end of the crop year. Exports are on a farm-sales-weight basis. Domestic disappearance is total disappearance minus exports, and includes leaf used by manufacturers in the United States, losses or wastage, and difference which may result from errors in estimates and conversions of weights.

2. Preliminary.

3. Puerto Rican type 40 production is that which is planted in the Fall of the crop year shown and harvested the following Spring.

Basic data obtained from "Crop Production", monthly and annual publication of Statistical Reporting Service, USDA; "Tobacco Stocks" quarterly publication of Agricultural Marketing Service, USDA; and monthly export reports from Bureau of the Census, U.S. Dept. of Commerce. Puerto Rican statistics obtained from the Puerto Rican Dept. of Agriculture.

Type 71 is defined as all domestic tobacco not otherwise classified.
 Separate reporting of Mexican stocks was not required until October 1968. In previous quarters Mexican totals were included as other foreign-grown cigar leaf. Other foreign-grown leaf is now type 89.
 These tobaccos were previously grouped together and reported as type 90. Beginning January 1, 1971, they were reclassified as oriental and Aromatic, Type 91; Foreign-grown Flue-cured, Type 92; and Foreign-grown Burley, Type 93.

Compiled from quarterly Tobacco Stocks Reports, Tobacco Division, AMS.

1. Stocks listed are reported on the basis of packed weight.

2. Farm-sales-weight equivalent based on unsystemed sweated weight factor.

3. For structures of 1 reported, domestic cigar-leaf of the domestic type require that dealer or manufacturers indicate the weight basis used in the tobacco reported, namely, farm-sales-weight, marked weight, or sweated weight. The stocks are converted to the farm-sales-weight equivalent at the rate of average factor reflecting the percentage reported each quarter in each of these categories.

4. Dimensions are in capacity of storage containers for tobacco

| Spain | Duty Free 2/ |
| Philippines | 100 percent ad valorem 3/ |

Import Duties converted at current exchange rates.
 1/ Approximate minimum and maximum charges - tariff is ad valorem, and varies with the type and value of tobacco. Flue-cured and burley maximum is about .25 per pound.
 2/ Imports by Government Tobacco Monopoly.
 3/ Applied on IIO of F.O.B. invoice value.

NOTE: Government monopoly controls imports from Japan, Republic of Korea, Sweden, Thailand and Spain; imports are subject to non-tariff restrictions in Australia and the Philippines. Foreign Import duties as expressed in dollars are approximate and subject to change with fluctuations in exchange rates.
