# The Operational Impacts of Governmental Restructuring of the Airline Industry in China

Carl Scheraga

Fairfield University

Charles F. Dolan School of Business

# Data Envelopment Analysis

# The Restructuring

- Prior to 2001, the commercial aviation industry was overseen and controlled by the Civil Aviation Administration of China (CAAC).
- By 2001:
  - 31 international, regional and domestic carriers
    - 10 CAACC airlines
    - 21 Provincial airlines

# The Restructuring – 2000 Directive

- ***Air China*** consolidated with China National Aviation Corporation, China Southwest Airlines, and Zhejiang Airlines.
- ***China Eastern Airlines*** absorbed Air Great Wall, China Yunnan Airlines and China Northwest Airlines.
- ***China Southern Airlines*** absorbed China Northern Airlines, China Xinjiang Airlines and Zhongyuan Airlines.

# Behavioral Model – Schefczyk (1993)

- 2 outputs
  - (1) Revenue passenger kilometers and (2) Non-passenger revenue ton-kilometers
- 3 inputs
  - (1) Available ton-kilometers, (2) Operating cost, and (3) non-flight assets
- Available ton-kilometers
  - Available aircraft capacity
- Operating cost
  - Operating cost excluding capital and aircraft captured by available ton-kilometers
- Non-flight assets
  - Facilities, reservation systems, and current assets

# Table 1 – Sample Airlines

<b>Aerolines Argentinas</b>	<b>EL AL</b>
<b>Aeromexico</b>	<b>Iberia</b>
<b>Air Canada</b>	<b>KLM</b>
<b>Air China</b>	<b>Korean Air</b>
<b>Air France</b>	<b>LOT Polish Airlines</b>
<b>Air India</b>	<b>Lufthansa</b>
<b>All Nippon Airways</b>	<b>Malaysia Airlines</b>
<b>American Airlines</b>	<b>Mexicana</b>
<b>Asiana Airlines</b>	<b>Northwest Airlines</b>
<b>Austrian Airline Group</b>	<b>Pakistan International Airlines</b>
<b>British Airways</b>	<b>Scandinavian Airlines</b>
<b>Cathay Pacific</b>	<b>Singapore Airlines</b>
<b>China Eastern Airlines</b>	<b>SriLankian Airlines</b>
<b>China Southern Airlines</b>	<b>TAP Air Portugal</b>
<b>Continental Airlines</b>	<b>Tarom</b>
<b>CSA Czech Airlines</b>	<b>Thai Airways International</b>
<b>Delta Airlines</b>	<b>United Airlines</b>

# Base Model

Table 3

*Input and Output Percentage Inefficiencies*

Air China (CCA), China Eastern Airlines (CES), China Southern Airlines (CSN)

	CCA (%)	CES (%)	CSN (%)
<i>INPUT</i>			
Available Ton-Km	0	0	0
Operating Cost	-30.83	-33.62	-36.22
Non-Flight Assets	-44.74	-43.52	-24.24
<i>OUTPUT</i>			
Revenue Passenger-Km	0	+21.54	+40.38
Non-Passenger Ton-Km	+20.19	+43.24	+90.30

Negative/Positive Sign = Necessary Reduction/Increase Required to Achieve Efficiency

# Input-Oriented Model

Table 2  
Input-Oriented Operating Efficiencies

<b>NAME</b>	<b><math>t^j</math></b>	<b>NAME</b>	<b><math>t^j</math></b>

# Operating and Environmental Variables

- Average Flight Length
- Passenger revenues as a percentage of total revenues
- Scheduled service revenues as a percentage of total revenues
- International passenger revenue-kilometers as a percentage of total passenger revenue-kilometers
- Average load factor
- Expenditures on passenger services per revenue passenger-kilometer
- Expenditures on ticketing sales and promotion per revenue passenger-kilometer
