MAJOR ECONOMIC TRENDS IN SELECTED U.S.

MASTER PLAN FISHERIES:

A GRAPHICAL SURVEY

by

Richard K. Kinoshita

and

Frederick W. Bell

Working Paper No. 37

December 1969

U.S. BUREAU OF COMMERCIAL FISHERIES
DIVISION OF ECONOMIC RESEARCH

WORKING PAPER SERIES

1. An Application of an Investment Model to Channel Catfish Farming by R. Thompson and F. Mange.
2. The Development of Catfish as a Farm Crop and an Estimation of Its Economic Adaptability to Radiation Processing by D. Nash and M. Miller.
3. Design Study: An Optimum Fishing Vessel for Georges Bank Groundfish Fishery by A. Sokoloski (Project Monitor).
4. The Relation between Vessel Subsidy Percentage and the Rate of Return on Investment for Various Technologies and Scale Levels: The Haddock Fishery by D. Nash, A. Sokoloski and F. Bell (Project Monitors).
5. An Economic Justification for Recommended Legislative Changes in the 1964 Fishing Fleet Improvement Act by F. Bell, E. Carlson, D. Nash and A. Sokoloski.
6. The Economic Impact of Current Fisheries Management Policy on the Commercial Fishing Industry of the Upper Great Lakes by D. Cleary.
7. Cost and Earnings in the Boston Large Trawler Fleet by B. Noetzel and V. Norton.
8. Some Elements of An Evaluation of the Effects of Legal Factors on the Utilization of Fishery Resources by A. Sokoloski.
9. A Report on the Economics of Polish Factory Trawlers and Freezer Trawlers by B. Noetzel.
10. An Inventory of Demand Equations for Fishery Products by D. Nash and F. Bell.
11. Industry Analysis of West Coast Flounder and Sole Products and an Estimation of Its Economic Adaptability to Radiation Processing by D. Nash and M. Miller.
12. Bio-Economic Model of a Fishery (Primarily Demersal) by E. Carlson.
13. The Factors behind the Different Growth Rates of U. S. Fisheries by F. Bell.
14. A Price Incentive Plan for Distressed Fisheries by A. Sokoloski and E. Carlson.
15. Demand and Prices for Shrimp by D. Cleary.
16. Industry Analysis of Gulf Area Frozen Processed Shrimp and an Estimation of Its Economic Adaptability to Radiation Processing by M. Miller, D. Nash and F. Schuler.

MAJOR ECONOMIC TRENDS IN SELECTED U.S.
MASTER PLAN FISHERIES: A GRAPHICAL SURVEY

by

Richard K. Kinoshita and Frederick W. Bell

A graphical presentation provides at a glance the major economic trends for selected U.S. Master Plan fisheries and can serve as a guide to administrators, biologist, economists and others. The figures illustrate the trend in landings, imports, per capita consumption, exvessel price index, fisherman, and vessels and boats. The supporting data appear in the Appendix.

A Graphical Survey by R. Kinoshita and F. Bell
38. Market Potential of the San Pedro Wetfish Fishery: A Demand
Analysis Approach by D. Nash

The goal of the Division of Economic Research is to engage in economic studies which will provide industry and government with costs, production and earnings analyses; furnish projections and forecasts of food fish and industrial fish needs for the U. S.; develop an overall plan to develop each U. S. fishery to its maximum economic potential and serve as an advisory service in evaluating alternative programs within the Bureau of Commercial Fisheries.

In the process of working towards these goals an array of written materials has been generated representing items ranging from interim discussion papers to contract reports. These items are available to interested professionals in limited quantities of offset reproduction. These "Working Papers" are not to be construed as official BCF publications and the analytical techniques used and conclusions reached in no way represent a final policy determination endorsed by the U. S. Bureau of Commercial Fisheries.
