Half the world is hungry for your experience.

Around the world an estimated 800 million people are hungry or starving. And many more that do have food to eat, need a more balanced diet. They could eat. With your help.

If you have an agriculture degree or farming experience, your knowledge of crop development, plant protection, soil science, animal husbandry or agricultural economics is needed. As a Peace Corps volunteer, you could help close the food gap, working in developing countries to give people the skills they need to grow their own food.

It's one of many projects in more than sixty countries where Peace Corps volunteers are sharing their skills with others to make life better. And it's a unique opportunity to discover the world, and broaden your own capabilities with some real experience. At a professional level.

Whatever your degree or field of experience, there's a chance you can put it to work in today's Peace Corps. For further information, call Peace Corps, toll-free, 800-424-8580. And put your experience to work where it can do a world of good.

U.S. Peace Corps.
The toughest job you'll ever love.
