CENTER FOR SOCIAL RESEARCH

## Acknowledgments

Special thanks are extended to several individuals from the North Dakota University System Office.

Terry Meyer for her administrative oversight of the project.

Tammy Dolan for her editorial suggestions during preparation of the document.

Robin Putman for providing financial information.

Brenda Zastoupil for providing financial information.

David Krebsbach for providing financial information.

The authors wish to thank Chelsey Hukriede, Research Specialist, and Briana Wilhelmi, Graduate Research Assistant, Center for Social Research, NDSU, for updating tables, document text, and creating graphics.

Thanks are extended to Edie Nelson, Department of Agribusiness and Applied Economics, NDSU, for document preparation and to our colleagues for reviewing this manuscript.

Financial support was provided by the North Dakota University System.

The authors assume responsibility for any errors of omission, logic, or otherwise. Any opinions, findings, or conclusions expressed in this publication are those of the authors and do not necessarily reflect the views of the North Dakota University System or the NDSU Department of Agribusiness and Applied Economics.

## Executive Summary

The North Dakota University System (NDUS) consists of the NDUS Office and 11 college campuses located throughout the state. In addition to the 11 main campuses, numerous other university facilities, centers, and offices are located throughout the state. Institutions of higher education have an economic effect in their respective areas and across the state as those institutions acquire inputs, purchase services, and provide for payroll and employment at both the local and state level. NDUS expenditures include general fund sources (e.g., state appropriated monies) and non-general fund sources (i.e., grants, contracts, donations). NDUS in-state expenditures comprise the direct economic impact or ‘first round effects.’ NDUS expenditure data were available for selected fiscal years from 1999 to 2017, with the FY2017 data the most recent available for this study. All dollar values in this analysis are expressed in terms of current year dollars (i.e., the effects of inflation have not been removed).

The North Dakota Input-Output Model was used to estimate the secondary economic effects as those direct effects (i.e., expenditures) are circulated and re-spent in the economy. The model estimates the changes in gross business volume (gross receipts) for all sectors of an economy and is used to provide key economic indicators such as retail trade activity, economy-wide personal income, and total business activity. Historic relationships were used to estimate secondary employment and state-level tax receipts.

Salient observations include:

- Direct economic impacts (expenditures) by the NDUS have grown from \$533 million in FY1999 to \$1.4 billion in FY2017, an increase of 163 percent
- Direct economic impacts have increased by \$421 million from FY2009 to FY2017 (43 percent), and decreased by \$210 million from FY2015 to FY2017 (13 percent)
- Growth in NDUS expenditures has been facilitated by the strong North Dakota economy
- Wages and salaries represent the largest itemized expense for the NDUS, generally accounting for 40 percent of the total expenditures
- Benefits are the second largest expenditure category, representing over 10 percent of total expenditures
- Non-general fund revenues are an important source of funding for the NDUS, providing about 70 percent of the total until recently, when the ratio dropped to 66 percent in FY2015 and 67 percent in FY2017
- Total NDUS economic impacts (direct and secondary) were \$1.6 billion in FY1999, \$2.9 billion in FY2009, and \$4.1 billion in FY2017
- Direct expenditures created total business activity of \$4.1 billion including \$1 billion in retail trade activity, and \$1.6 billion in economy-wide personal income

- University system in-state expenditures and subsequent secondary business activity was estimated to generate \$132 million in state tax collections. Of that total, \$83 million would be from sales and use taxes and about \$38 million were for individual and corporate income taxes.
- Direct employment by the NDUS was 10,741 FTE jobs on FY2017
- Enrollment at the NDUS's 11 colleges and universities was 37,397 FTE students for Fall Semester 2017
- NDUS student living expenses were estimated to be \$455 million for FY2017
- Economic impact of student living expenses resulted in \$1.1 billion in total business activity, highlighted by \$511 million in additional retail trade activity and \$275 million in economy-wide personal income
- Combined NDUS and student spending was nearly \$1.9 billion in FY2017, creating a total economic impact of \$5.3 billion

# **Economic Contribution of the North Dakota University System**

Dean A. Bangsund and Nancy M. Hodur\*

The North Dakota University System (NDUS) is comprised of the NDUS Office and 11 college campuses, and their related entities located throughout the state. These institutions contribute to the state and local economies through expenditures for inputs and services and through personal spending by staff, faculty, and students. Previous studies have estimated the economic contribution of the NDUS for fiscal years (FY) 1999 and 2004 (Leistriz and Coon 2005), FY2006 (Leistriz and Coon 2007), FY2008 (Leistriz and Coon 2009), FY2009 (Bangsund et al. 2010), FY2011 (Coon et al. 2012), FY2012 and FY2013 (Coon et al. 2014), and FY2014 and FY2015 (Bangsund and Hodur, 2016). This study will provide a similar analysis for FY2017.

The NDUS experienced substantial growth during the 1999-2017 period. The number of students attending schools in the NDUS has increased since 1999. Employment at the 11 universities has also increased since 1999. Consistent with the increases in enrollment and employment, expenditures to operate the NDUS have also increased. From the FY1999 to FY2017 period, a substantial amount of the funding has come from the federal government and/or other out-of-state sources, primarily for research.

The economic contribution of the NDUS was estimated with consideration given to the source of revenue for the system colleges and universities. General fund revenues are primarily received from state government appropriations. Non-general fund revenues come from sources other than the appropriated state tax revenue. Examples of non-general fund revenues are federal grants, private grants, private/public research contracts, and donations. The main body of the report focuses on the NDUS and the economic effects of general and non-general fund expenditures by colleges and universities. An abbreviated economic impact analysis for each of the 11 campuses in the state and the NDUS Office are appended to the end of this report.

## **Methods**

The initial task in any impact assessment is estimating the direct effects or first round of spending associated with an activity, project, or program. The NDUS Office has provided expenditure data through FY2017 for each of the 11 institutions and the NDUS Office. Also provided were Fall Semester 2016 and 2017 student enrollment data and university employment numbers for each of the state's 11 public colleges and universities. The expenditure data were provided for the same budget categories as previous studies (i.e., FY1999, FY2004, FY2006, FY2008, FY2009, FY2011, FY2012, FY2013, FY2014, and FY2015 analyses) giving a long-term consistent data base (see Appendix A). Data were provided for general and non-general fund expenditures. As part of the budget expense categories, capital improvement (building) and capital equipment expenditures for each of the institutions were also included.

Actual expenditures data were used for this analysis, not amounts presented in budgets. Expenditure data were obtained from the ConnectND system. This system provided a database that was reported annually for consistent line item categories for each year of the analysis. Expenditures for each individual institution may not correspond exactly with that institution's financial statement, but instead correspond with the data provided by the NDUS computer

---

\*The authors are, respectively, Research Scientist, Department of Agribusiness and Applied Economics, and Director, Center for Social Research, North Dakota State University.

network. The following colleges and universities, along with their respective centers and stations, were included in the ConnectND data system:

- NDUS Office (including Core Technology Services)
- Bismarck State College
- Dickinson State University
- Lake Region State College
- Mayville State University
- Minot State University
- Dakota College Bottineau
- North Dakota State College of Science
- North Dakota State University
  - Agricultural Experiment Station:
    - NDSU Main Research Center
    - Dickinson Research Extension Center
    - Central Grasslands Research Extension Center
    - Hettinger Research Extension Center
    - Langdon Research Extension Center
    - North Central Research Extension Center
    - Williston Research Extension Center
    - Carrington Research Extension Center
  - Agronomy Seed Farm
  - Northern Crops Institute
  - Upper Great Plains Transportation Institute
  - NDSU Cooperative Extension Service
  - North Dakota Forest Service
- University of North Dakota
  - School of Medicine and Health Sciences
- Valley City State University
- Williston State College

Data for organizations such as development foundations and university/private partnerships (e.g., NDSU Research & Technology Park) are not included in the ConnectND database. Therefore, the financial activity of those entities is not reflected in this analysis. The absence of those expenditure data, in some cases, understates the economic effects of the NDUS. However, despite those omissions, the ConnectND data set provides a consistent, accurate, and annual database for an economic contribution analysis.

Spending on capital improvements came from both general fund and non-general fund sources. Non-general fund construction would have been funded by external sources such as grants, contracts, and donations. All expenditure data were in current year dollar values (also called nominal dollars), meaning dollar values have not been adjusted for inflation. Some of the growth reported in expenditures would be accounted for with inflation. In other words, some growth in expenditures would be required to keep spending steady on a real basis (i.e., account for inflationary changes in the purchasing power of the dollar). The Consumer Price Index suggests inflation during the 1999-2017 period was 47 percent (Bureau of Labor Statistics 2018). Therefore, a 47 percent increase in expenditures from 1999 to 2017 would be required to represent a zero change in expenditures if corrected for inflation (i.e., dollars expressed in real terms).

The North Dakota Input-Output Model was used to estimate the secondary economic impacts based on NDUS expenditure data. The North Dakota Input-Output Model consists of interdependence coefficients, or multipliers, that measure the level of business activity generated

in each economic sector from an additional dollar of expenditures in a given sector. (A sector is a group of similar economic units, e.g., the firms engaged in retail trade make up the retail trade sector.) For a complete description of the input-output model, see Coon and Leistriz (1989). The model estimates the changes in total business activity (gross receipts) for all sectors of the area economy resulting from the direct expenditures associated with the NDUS. The increased business volumes are used to estimate secondary employment and tax revenues based on historic relationships. The procedures used in the analysis are parallel to those used in estimating the impact of other facilities and activities in North Dakota (Leistriz 1995; Bangsund and Leistriz 2004). Empirical testing has confirmed the model's accuracy in estimating changes in levels of economic activity in North Dakota; over the period 1958-2012, estimates of statewide personal income derived from the model averaged within 7 percent of comparable values reported by the U.S. Department of Commerce (Leistriz et al. 1990; Coon et al. 2014).

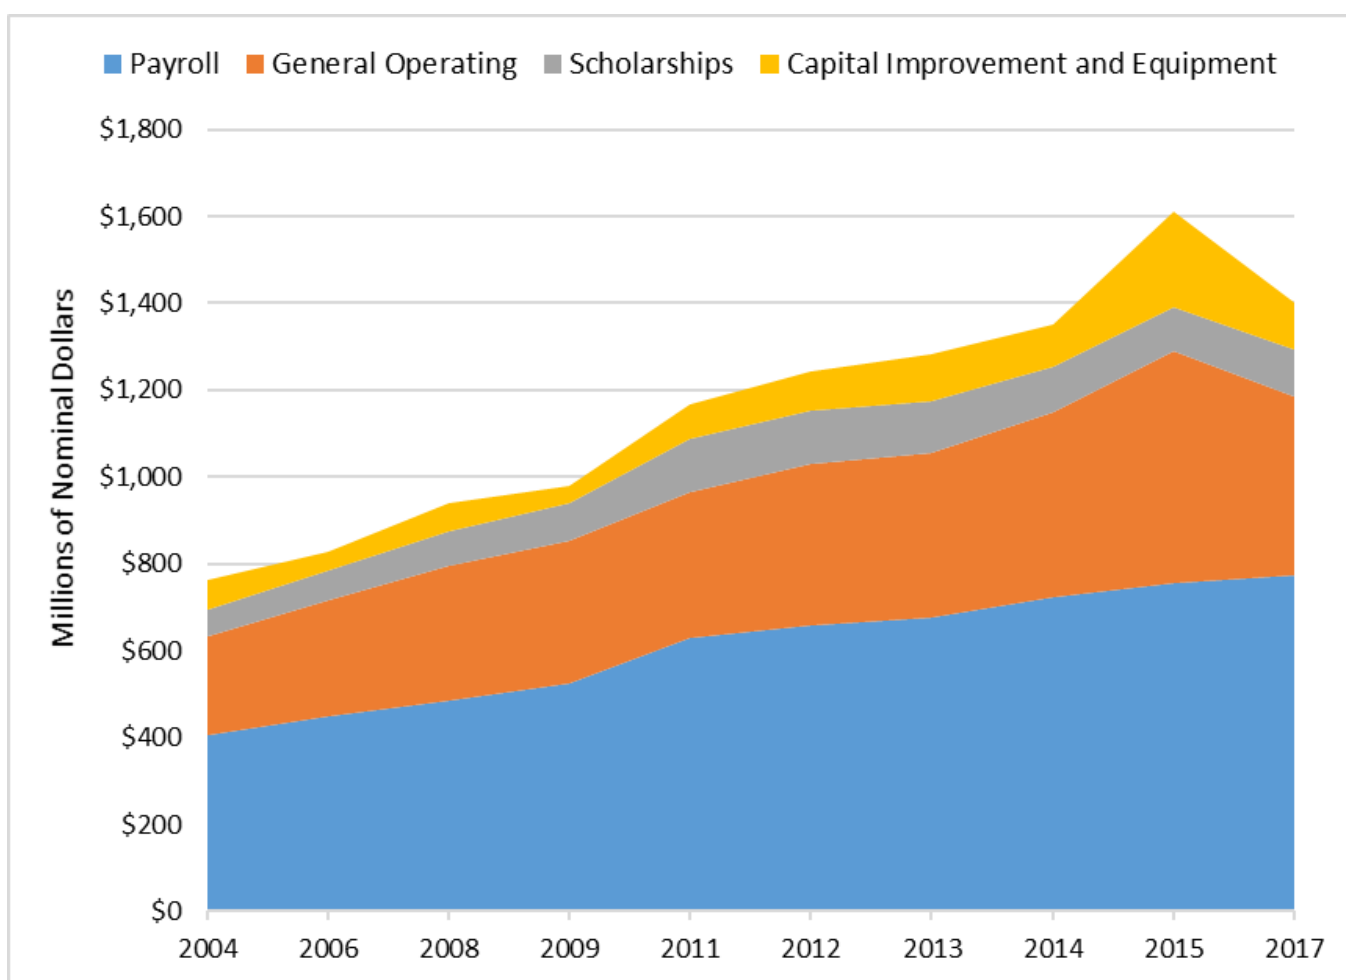

This analysis also includes the economic impact of student spending. Student spending has an economic impact beyond that of the NDUS. Estimated costs of education for the 2017-2018 academic year was obtained from the North Dakota Career Resource Network (2018). Those expenditures provide an indication of the economic contribution of student spending in the state.

### **North Dakota University System Economic Contribution**

The NDUS operating budget increased 163 percent from \$533 million in FY1999 to \$1.4 billion in FY2017, a decrease from its peak of \$1.6 billion in FY2015 (Table 1). Wages and salaries represented the largest itemized expense for that period. Wages and salaries were \$226 million in FY1999 (42 percent of total) and grew to \$562 million in FY2017 (40 percent of total). The percentage of total general and non-general fund expenditures for wages and salaries remained in the 40<sup>th</sup> percentile range over the 1999 to 2017 period (Table 1). Fringe benefits represented the second largest itemized expenditure, increasing from \$56 million in FY1999 (10.5 percent of total) to \$212 million in FY2017 (15.1 percent of total). A large component of benefits is health insurance, which has been experiencing significant annual cost increases. Benefits increased by \$10 million from FY2015 to FY2017, a 4.8 percent increase. Wages and salaries plus benefits equaled \$281 million in FY1999 and \$775 million in FY2017 (Table 1). Education tends to be a labor-intensive activity, with salaries and wages along with benefits, averaging over 50 percent of total expenditures during the FY1999 to FY2014 period, but declined to 46.9 percent in FY2015 and again increased to 55 percent in FY2017 (Table 1).

**Figure 1. North Dakota University System, General and Non-general Fund Expenditures by Major Expense Types, Selected Years 2004 through 2017.**

Capital improvements were \$27 million in FY1999 and \$91 million in FY2017. Expenditures for construction are often based on availability of funds from a variety of sources. General fund monies allocated to capital improvements come from tax revenues. Non-general fund expenditures accounted for over 75 percent of the capital improvement expenditures for FY1999, FY2004, FY2006, and FY2008 (Table1, Table2). In FY2009, these outlays had declined to 56 percent of the total, and were 48 percent in FY2011 and 51 percent in FY2012 (Table 1, Table 2). Non-general fund capital investment expenditures share of the total has continued to decline, dropping to 36 percent in FY2015 and 39 percent in FY2017. A larger share of the funding for capital improvements since FY2012 has come from general fund sources.

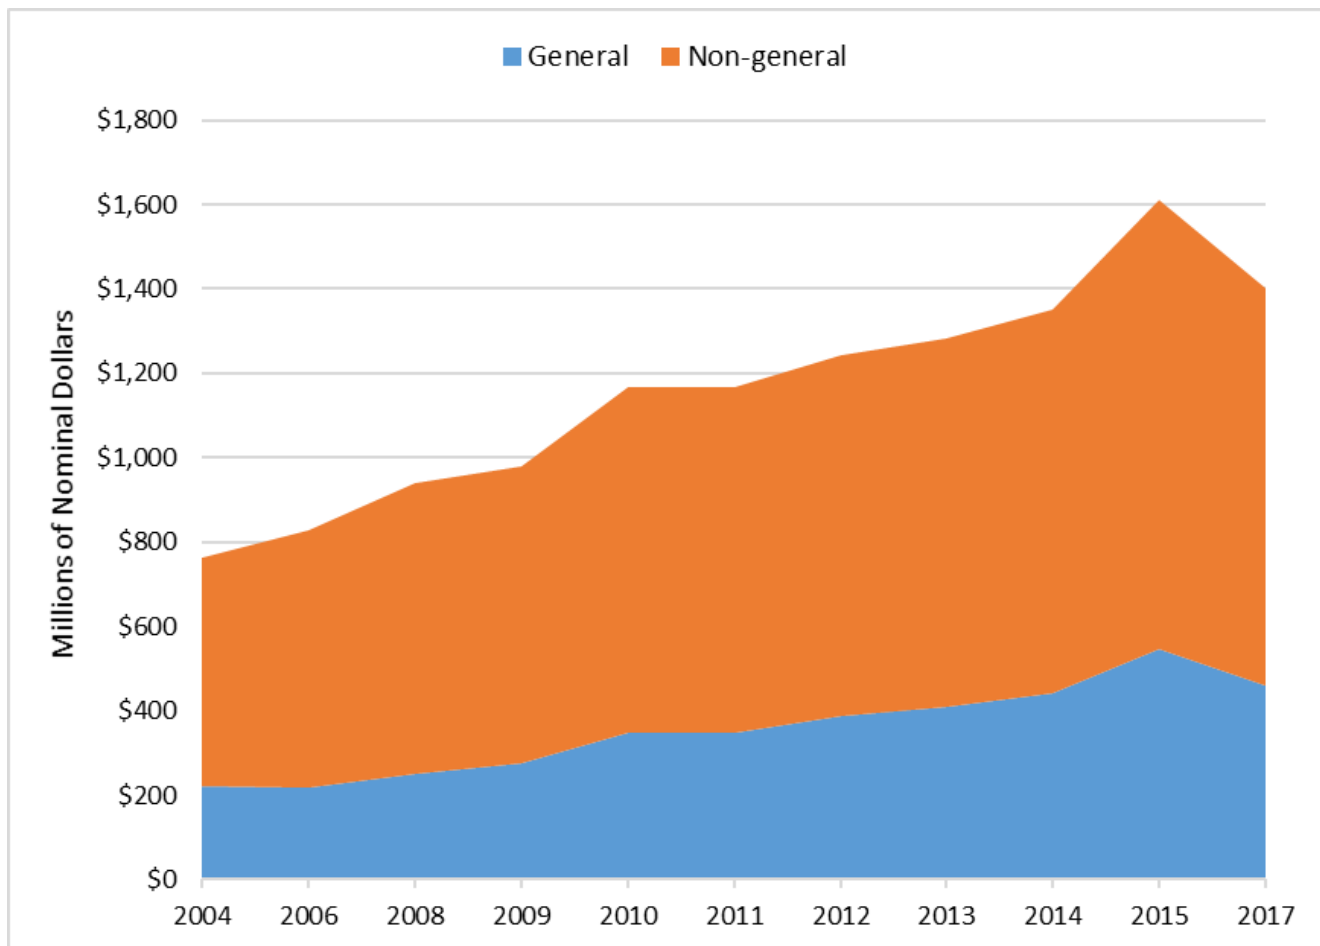

As the state's higher education institutions have expanded their roles in research, economic development, outreach, and developed community and industrial partnerships, sources of funding for many of the universities' activities also have changed. Non-general fund revenue (grants, contracts, donations) has become an important source of growth in the higher education system in North Dakota. In FY1999, \$333 million of non-general fund expenditures comprised 62 percent of the total expenditures by the University System in North Dakota. Since the late 1990s, non-general fund outlays averaged around 70 percent of the total outlays for the University System, but declined to 67 percent in FY2015. In

FY2017, total non-general fund expenditures were \$942 million and represented 67 percent of the all system-wide expenditures.

Non-general fund expenditures in FY2017 have increased by over \$600 million since FY1999 (183 percent), but decreased by \$123 million or 12 percent from FY2015 to FY2017. Wages and salaries were the largest single source of expenditures for each of the study years. In FY2017, salaries and wages from non-general fund sources accounted for 62 percent of all expenditures for wages and salaries. Thus, almost two-thirds of NDUS wages and salaries for staff and faculty come from sources other than state government appropriations. It is likely that in the absence of external funding for wages and salaries, overall employment in the NDUS could be expected to be much lower than current levels. Non-general fund revenue not only provides funding for wages and salaries and capital improvement projects, but also provided \$77 million in scholarships in FY2017.

**Figure 2. North Dakota University System, Total General and Non-general Fund Expenditures, Selected Years 2004 through 2017.**

Expenditures made by the NDUS comprise the direct impacts or first-round effects on the state's economy. These expenditures were reported for the NDUS total (General Fund and Non-General Fund) in Table 1 and for Non-General fund in Table 2. The economic effects of those first-round expenditures are distributed in numerous locations throughout the state. Total direct impacts were \$533 million in FY1999 and \$1.4 billion in FY2017 (Table 3). These expenditures were allocated to six economic sectors of the North Dakota Input-Output Model: *Construction; Communications and Public Utilities; Retail Trade; Finance, Insurance, and Real Estate; Business and Personal Services; and, Households*. Applying these expenditures to the North Dakota Input-Output Model interdependence coefficients (i.e., multipliers) provides total (direct and secondary) economic impacts for General Fund and Non-General Fund outlays.

Similarly, the Non-General Fund expenditures were allocated to the same six economic sectors. Non-General Fund direct impacts were \$333 million in FY1999 and \$942 million in FY2017 (Table 3). Business volumes were estimated for both total expenditures (general and non-general fund) and for only non-general fund expenditures (Table 4).

Levels of business activity associated with general and non-general fund expenditures in the state were estimated at \$1.6 billion in FY1999 and \$4.1 billion in FY2017 (Table 4). The total business activity for the NDUS has increased by \$2.6 billion or by 166 percent from FY1999 to FY2017. Economic sectors of the ND economy that received major contributions include *Households* (i.e., economy-wide personal income of state residents), *Retail Trade*, *Construction*, and *Finance, Insurance and Real Estate*. Retail trade activity amounted to \$393 million in FY1999 and \$1 billion in FY2017. Economic activity in the *Retail Trade* Sector increased by \$629 million or by 160 percent over the period. The University System was estimated to increase economy-wide personal income (i.e., *Households* Sector) in North Dakota from \$613 million in FY1999 to \$1.6 billion in FY2017. Levels of business activity resulting from the NDUS including student living expenditures would support 12,138 secondary (indirect and induced) full-time equivalent (FTE) jobs in 1999 and 9,917 FTE secondary jobs in 2017 (Table 5). These jobs represent employment in addition to the 8,120 persons employed by the NDUS in 1999 and the 10,741 positions (excluding student jobs) in 2017 (Table 5).

In FY2017, the gross business volume generated by the NDUS for all funding was estimated to result in \$132 million in state tax collections (Table 6). Of that total, \$83 million would be from sales and use taxes and about \$38 million were for individual and corporate income taxes.

A similar analysis was conducted for non-general fund expenditures (Table 4). Non-general fund outlays in FY1999 generated total business activity of nearly \$1.0 billion and \$2.7 billion in FY2017. Business activity in the state resulting from non-general fund expenditures in the NDUS increased by \$1.8 billion (187 percent) from FY1999 to FY2017. Overall activity in the *Retail Trade* Sector was estimated at \$248 million in FY1999 and \$714 million in FY2017.

In FY2017, the gross business volume generated by the NDUS from non-general funds was estimated to result in \$104 million in state tax collections (Table 6). Of that total, \$66 million would be from sales and use taxes and about \$29 million were for individual and corporate income taxes.

The economic effects associated with non-general fund expenditures comprise a substantial share of the total NDUS economic contribution. Both the relative share of NDUS spending that comes from non-general funds sources and that the share has been increasing over the 16-year period highlight the importance that outside financial support plays in the economic effects on the North Dakota economy.

<sup>1</sup> NDUS employment is a June 30 <sup>th</sup> employee head count consisting of faculty, classified, other non-classified and temporary positions. Student workers were not included in this total.			
<sup>2</sup> Secondary employment is full-time equivalent workers. Estimates are based on business activity from university expenditures and student living expenses. A new methodology for estimating secondary employment was developed in 2011 and has been used for all subsequent analyses. This methodology will eliminate possible overestimation of secondary workers due to economic factors such as technological changes, excess capacity, and constrained economic variables. Secondary employment for each year the analysis has been completed (1999-2017) and was calculated using the new methodology to provide a consistent time-series database. Reductions in secondary employment are a reflection of the new methodology and not a result of university system expenditures having a smaller role in secondary job creation.			
<sup>3</sup> Student enrollment is full-time equivalent students.

## **Student Economic Contribution**

Student spending also adds to the economic contribution of the NDUS. Student spending included outlays for personal items, recreation, books, supplies, and room and board. Excluded from student expenditures were outlays for tuition and fees. Estimates of student expenditures were available for each of the 11 institutions in the NDUS for the 2017-2018 school year (North Dakota Career Resource Network 2018). The North Dakota Career Resource Network estimated room and board and books and supplies for students at each of the 11 respective institutions in the NDUS. Also, personal, recreation, and miscellaneous costs were estimated to be \$3,450 for the 2017-2018 school year. Student living expenditures were estimated to range from \$9,670 per student per academic year at Lake Region State College to \$14,280 per student per academic year at Williston State College for the 2013-2014 school year (Appendix Table A24). In the 2017-2018 academic year Mayville State University had the lowest student living expenses (\$10,270), and Williston State College had the highest at \$13,320 per student. University of North Dakota and North Dakota State University had the second and third highest student living expenses (\$12,648 and \$12,626 respectively).

Multiplying the Fall Semester 2017 FTE student enrollment for each school by their respective per-student living expenditures provided an estimate of direct impacts or first-round effects associated with student spending for each school year. However, the use of ND Career Resource Network estimates of room and board expenses may overstate the economic effects of student expenditures. Although a large number of students live on-campus or live independently off-campus, some students live at home. Students living at home would likely incur less expense for room and board compared to those living on-campus or independently off-campus. Another factor that complicates the estimation of the effects of student spending is that some of the revenues for room and board for students living in university dormitories could be considered double counting with expenditures by the universities. The revenues received by universities and colleges for on-campus room and board would likely be dispersed by the universities for inputs and services associated with student housing. As such, expenditures for providing student housing are probably partially captured by the analyses of university spending. Therefore, including room and board expenses for all students might result in some double counting of University System expenditures. Data were unavailable to adjust the economic contribution of student spending to account for those students living at home or to adjust for the percentage of room and board expenses already captured by University System expenditures.

Another area of potential double counting could occur in how expenses are handled for books and other educational materials. Books and educational materials purchased by students through campus-sponsored book stores or at on-campus varsity marts also are likely to be fully or partially captured by university expenditures. Since those facilities are part of the university or college, expenses for staff, facilities, and materials/inventory would necessarily be included in the university analysis. Further, it is highly likely that a large percentage of college text books would be acquired from entities outside of North Dakota and would not represent in-state expenditures by universities and colleges. However, to the extent that educational materials are purchased by students from off-campus sources, those expenditures would not represent double counting. The degree of overlap between student spending for books and educational supplies and university expenditures associated with book stores and varsity marts is unknown, as is the degree of those supplies purchased by universities from out-of-state entities. Despite these

potential problems, the cost of books was included in the student spending analysis for consistency with previous analyses.

In Fall Semester 2017, NDUS indicated that 37,397 FTE students were enrolled and attended the 11 state universities and colleges. Based on expenditures per FTE student, students were estimated to have spent \$455.3 million in North Dakota on books, room and board, personal items, and recreation during the 2017-2018 school year (Table 7). Students also incur expenses for fees, tuition, and other items not covered in this analysis. Those expenditures were not included in this study and would be captured by the analysis of university expenditures.

A large share of the student spending would occur in the communities where the institutions are located, due to the nature of their purchases (i.e., books, supplies, and room and board). Some of the student expenditures for recreation and personal items will occur in cities and trade areas other than those where the university or college is located. However, for this analysis, all student spending will be assumed to remain in close proximity to the community where the college or university is located (data presented for each university in Appendix B).

Student spending was estimated at \$455.3 million for FY2017 (Table 7). The \$455.3 million in student expenditures would be in addition to expenditures made by the NDUS universities and colleges, considering the potential problems identified earlier in this section. In 2017-2018, student direct expenditures were 32.5 percent of the general and non-general fund expenditures made by the NDUS.

Student spending was allocated to the *Retail Trade* (75 percent) and *Finance, Insurance, and Real Estate* (25 percent) Sectors of the North Dakota Input-Output Model. The total economic contribution associated with student spending was estimated at \$1.1 billion in FY2017. The sector that received the largest impact was the *Retail Trade* Sector, with \$512 million in retail trade activity. The *Household* Sector (economy-wide personal income) was estimated at \$275 million in FY2017.

In FY2017, the gross business volume generated by student spending was estimated to result in \$12.6 million in state tax collections (Table 6). Of that total, \$8 million would be from sales and use taxes and about \$2.5 million were for individual and corporate income taxes.

## Conclusions

The NDUS consists of 11 colleges and universities located throughout the state. Those universities receive revenues from state appropriated funds, state grants, federal grants, and from private grants, contracts, and donations. The universities and colleges have positive effects on the state economy and local economies as those revenues are used to purchase inputs and services and pay wages and salaries. Expenditure data for the NDUS came from the ConnectND system.

The NDUS was responsible for \$533 million in direct expenditures within North Dakota in FY1999. By FY2017, direct expenditures within ND had increased by 163 percent to \$1.4 billion. Much of the growth during this 18-year period has come from non-general fund sources, such as grants, contracts, and donations, which increased by 183 percent over the period. Non-general fund expenditures represented over 67 percent of the total direct spending by the NDUS in FY2017.

The North Dakota Input-Output Model was used to estimate the amount of business activity generated from expenditures by the NDUS. The total direct effects, \$1.4 billion in NDUS expenditures, were allocated to various sectors of the ND I/O Model. Interdependence coefficients within the model were then used to estimate the secondary economic effects. Combining direct and secondary economic effects provides an estimate of the gross business volume. The gross business volume associated with the NDUS was estimated at \$1.6 billion in FY1999 and \$4.1 billion in FY2017. Other key measures of economic impact include retail trade activity and economy-wide personal income. Retail trade sales attributed to the NDUS expenditures were estimated at \$393 million in FY1999 and \$1 billion in FY2017. Economy-wide personal income was estimated to be \$613 million in FY1999 and \$1.61 billion in FY2017.

Student expenditures create an economic impact that is in addition to that of the NDUS. Student spending, excluding tuition and fees, was estimated at \$455 million in FY2017. The business activity associated with spending from the 37,397 FTE students enrolled in the NDUS during the 2017-2018 academic year was estimated at \$1.1 billion.

Overall, student spending and NDUS expenditures approached \$1.9 billion in FY2017. Including secondary economic impacts raises the total economic impact to nearly \$5.3 billion. State-level effects included \$1.5 billion in additional retail trade activity and \$1.9 billion of economy-wide personal income. In FY2017, the gross business volume generated by the NDUS, combined with total economic effects from student spending, was estimated to generate \$145 million in state tax collections. Of that total, \$91 million would be from sales and use taxes and nearly \$42 million from individual and corporate income taxes.

**Figure 7. Composition of the North Dakota University System's Total Economic Contribution, \$5.2 Billion, Fiscal Year 2017.**

Institutions of higher education in North Dakota are influential in many perspectives. They help provide the state with an educated workforce ready to meet the challenges of an ever changing work environment. They provide outreach and continuing education programs for the state's residents and businesses. In addition to providing education, the state's universities and colleges create and support jobs and employment opportunities through research, extension, and teaching activities. All these important services and products provide economic benefits which enhance local and state economies.

Essentially, the state's 11 University System colleges, universities, and supporting centers and facilities act as centers for local and regional economic development. The state's colleges and universities are able to leverage \$2.05 from external sources for every dollar of state appropriated funds. Much of those non-appropriated funds come from outside sources, and could be considered new money to the state of North Dakota. Those dollars, along with appropriated funds, are dispersed within the state through purchase of services, inputs, and payroll that support university programs, events, and activities. In FY2017, these institutions employed over 10,000 workers, were educating 46,787 headcount students (37,397 full-time equivalents), and their expenditures supported over 9,900 FTE secondary jobs.

The NDUS has a strong economic presence in the state. The universities and colleges in the state continue to serve as example of the importance of higher education and the benefits that a strong University System can have on the quality of life in North Dakota.

<sup>1</sup> Headcount is all students enrolled regardless of number of credit hours.

<sup>2</sup> Full-time is students enrolled in 12 credit hours or more.

<sup>3</sup> In August 2006, the SBHE changed the definition of undergraduate FTE to 15 credit hours from 16. This new definition is compatible with National Integrated Post- Secondary Education Data System (IPEDS) reporting requirements. FTE students is calculated by dividing accumulated undergraduate student credit hours by 15 credit hours plus total graduate credit hours by 12. A professional student is counted as one FTE.

<sup>4</sup> Includes 89 VCSU elementary education students located on the NDSU campus.

## **APPENDIX B**

Economic Contribution to North Dakota,  
NDUS Member Universities and Colleges,  
Fiscal Years 1999, 2004, 2006, 2008, 2009, 2011, 2012, 2013, 2014,  
2015, and 2017

## Bismarck State College

Each of the state's college campuses is an important component of that area's local economy. This brief analysis will provide highlights of an economic contribution analysis of Bismarck State College in the Bismarck area. Key economic indicators estimated in the analysis include direct impacts, total level of economic activity, personal income, retail trade, tax revenues, and employment. All dollar values are presented in terms of current year dollars, i.e., the effects of inflation have not been removed. The Consumer Price Index indicates that inflation during the 18-year period 1999-2017 was 47 percent.

Expenditures by Bismarck State College comprise the direct impacts, or "first round effects". Expenditures by Bismarck State College were \$17.9 million in FY1999, \$27.7 million in FY2004, \$29.6 million in FY2006, \$37.7 million in FY2008, \$40.2 million in FY2009, and \$50.9 million in FY 2011, \$49.6 million in FY2012, \$51.5 million in FY2013, \$58.4 million in FY2014, \$68.3 million in FY2015, and \$51.2 in FY2017 (Appendix Table B1). Expenditures increased over the 18-year period by \$50.4 million or by 281 percent.

Total impacts associated with Bismarck State College were estimated by applying the North Dakota Input-Output Model coefficients to total direct expenditures. Total economic contribution was estimated at \$52.1 million in FY1999, \$81.2 million in FY2004, \$87.8 million in FY2006, \$109.3 million in FY2008, \$116.0 million in FY2009, \$149.3 million in FY2011, \$147.1 million in FY2012, \$151.4 million in FY2013, \$170.8 million in FY2014, \$194.9 million in FY2015, and \$153.6 million in FY2017. The sector that had the largest impact was the *Households* Sector (i.e., personal income of area residents) for each year presented. Personal income increased from \$20.9 million in FY1999 to \$60.2 million in FY2017 or by 194.8 percent. Other sectors receiving major contributions included *Retail Trade*, *Construction*, *Finance*, *Insurance*, and *Real Estate*, and *Business and Personal Services*. Increased retail trade activity was estimated at \$13.7 million in FY1999, \$20.8 million in FY2004, \$22.0 million in FY2006, \$26.8 million in FY2008, \$30.8 million in FY2009, \$37.1 million in FY2011, \$35.9 million in FY2012, \$37.7 million in FY2013, \$40.6 in FY20014, \$46.3 in FY2015, and \$36.8 million in FY2017. This represents a \$23.0 million (167.8 percent) increase for the 18-year period.

Tax collections generated by Bismarck State College in FY2017 included \$3.1 million in retail sales, \$881,000 in personal income, \$555,000 in corporate income, and \$404,000 in miscellaneous revenues.

Levels of business activity resulting from Bismarck State College expenditures would support 312 secondary (indirect and induced) jobs in 2017. These jobs are in addition to the 571 positions (excluding student jobs) at Bismarck State College in 2017. In the Fall Semester of 2017, 2,646 full-time equivalent students were enrolled at Bismarck State College.

In addition to the economic contribution resulting from the institution's expenditures, spending by students also contributes to the local economy. Direct impacts of student spending in the Bismarck area were \$31.5 million in FY2017. The total economic contribution of student spending was \$78.2 million. Student spending was estimated to generate an additional \$1.6 million in sales and use tax revenue and \$285,000 in personal income tax collections. This level of student spending would create enough business activity to support about 109 secondary (indirect and induced) jobs. A detailed analysis of the economic impact resulting from student expenditures is presented in Appendix Table A28.

## Dickinson State University

Each of the state's college campuses is an important component of that area's local economy. This brief analysis will provide highlights of an economic contribution analysis of Dickinson State University in the Dickinson area. Key economic indicators estimated in the analysis include direct impacts, total level of economic activity, personal income, retail trade, tax revenues, and employment. All dollar values are presented in terms of current year dollars, i.e., the effects of inflation have not been removed. The Consumer Price Index indicates that inflation during the 18-year period from 1999-2017 was 47 percent.

Expenditures by Dickinson State University comprise the direct impacts, or "first round effects". Expenditures by Dickinson State University were \$14.9 million in FY1999, \$23.0 million in FY2004, \$28.9 million in FY2006, \$31.1 million in FY2008, \$37.5 million in FY2009, \$37.3 million in FY2011, \$35.8 million in FY2012, \$30.0 million in FY2013, \$30.1 million in FY2014, \$30.2 million in FY2015, and \$30.0 in FY2017 (Appendix Table B2). Expenditures increased over the 18-year period by \$15.1 million or by 101 percent.

Total impacts associated with Dickinson State University were estimated by applying the North Dakota Input-Output Model coefficients to total direct expenditures. Total economic contribution was estimated at \$43.6 million in FY1999, \$67.2 million in FY2004, \$84.4 million in FY2006, \$92.6 million in FY2008, \$109.6 million in FY2009, \$111.3 million in FY2011, \$107.4 million in FY2012, \$91.4 million in FY2013, \$90.5 million in FY2014, \$91.4 million in FY2015, and \$91.6 million in FY2017. The sector that had the largest impact was the *Households* Sector (i.e., personal income of area residents) for each year presented. Personal income increased from \$17.3 million in FY1999 to \$37.2 million in FY2017 or by 115.2 percent. Other sectors receiving major contributions included *Retail Trade*, *Construction*, *Finance*, *Insurance*, and *Real Estate*, and *Business and Personal Services*. Increased retail trade activity was estimated at \$10.7 million in FY1999, \$16.5 million in FY2004, \$20.6 million in FY2006, \$22.5 million in FY2008, \$25.7 million in FY2009, \$26.5 million in FY2011, \$25.3 million in FY2012, \$21.4 million in FY2013, \$21.5 million in FY2014, \$21.7 million in FY2015, and \$21.1 million in FY2017. This represents a \$10.5 million (98.3 percent) increase for the 18-year period.

Tax collections generated by Dickinson State College in FY2017 included \$1.9 million in retail sales, \$521,000 in personal income, \$305,000 in corporate income, and \$242,000 in miscellaneous revenues.

Levels of business activity resulting from Dickinson State University expenditures would support 188 secondary (indirect and induced) jobs in 2017. These jobs are in addition to the 231 positions (excluding student jobs) at Dickinson State University in 2017. In the Fall Semester of 2017, 1,128 full-time equivalent students were enrolled at Dickinson State University.

In addition to the economic contribution resulting from the institution's expenditures, spending by students also contributes to the local economy. Direct impacts of student spending in the Dickinson area were \$12.7 million in FY2017. The total economic contribution of student spending was \$31.5 million. Student spending was estimated to generate an additional \$660,000 in sales and use tax revenue and \$115,000 in personal income tax collections. This level of student spending would create enough business activity to support 44 secondary (indirect and induced) jobs. A detailed analysis of the economic impact resulting from student expenditures is presented in Appendix Table A28.

## Lake Region State College

Each of the state's college campuses is an important component of that area's local economy. This brief analysis will provide highlights of an economic contribution analysis of Lake Region State College in the Devils Lake area. Key economic indicators estimated in the analysis include direct impacts, total level of economic activity, personal income, retail trade, tax revenues, and employment. The Consumer Price Index indicates that inflation during the 18-year period from 1999-2017 was 47 percent.

Expenditures by Lake Region State College comprise the direct impacts, or "first round effects". Expenditures by Lake Region State College were \$6.7 million in FY1999, \$9.2 million in FY2004, \$10.2 million in FY2006, \$11.4 million in FY2008, \$11.8 million in FY2009, \$15.1 million in FY2011, \$20.5 million in FY2012, \$21.1 million in FY2013, \$21.8 million in FY2014, \$20.5 million in FY2015, and \$17.9 million in FY2017 (Appendix Table B3). Expenditures increased over the 18-year period by \$11.1 million or by 165 percent.

Total impacts associated with Lake Region State College were estimated by applying the North Dakota Input-Output Model coefficients to total direct expenditures. Total economic contribution was estimated at \$19.6 million in FY1999, \$27.3 million in FY2004, \$30.1 million in FY2006, \$33.9 million in FY2008, \$35.2 million in FY2009, \$45.5 million in FY2011, \$59.4 million in FY2012, \$60.8 million in FY2013, \$63.3 million in FY2014, \$60.6 million in FY2015, and \$53.8 million in FY2017. The sector with the largest impact was the *Households* Sector (i.e., personal income of area residents) for each year presented. Personal income increased from \$7.9 million in FY1999 to \$21.7 million in FY2017 or by 175.7 percent. Other sectors receiving major contributions included *Retail Trade, Construction, Finance, Insurance, and Real Estate, and Business and Personal Services*. Increased retail trade activity was estimated to be \$4.9 million in FY1999, \$6.6 million in FY2004, \$7.2 million in FY2006, \$8.3 million in FY2008, \$8.5 million in FY2009, \$11.2 million in FY2011, \$13.9 million in FY2012, \$14.1 million in FY2013, \$14.9 million in FY2014, \$14.8 million in FY2015, and \$12.9 million in FY2017. This represents an \$8 million (161.3 percent) increase for the 18-year period.

Tax collections generated by Lake Region State College in FY2017 included \$1.1 million in retail sales, \$303,000 in personal income, \$180,000 in corporate income, and \$142,000 in miscellaneous revenues.

Levels of business activity resulting from Lake Region State College expenditures would support 110 secondary (indirect and induced) jobs in 2017. These jobs are in addition to the 271 positions (excluding student jobs) at Lake Region State College in 2017. In the Fall Semester of 2017, 995 full-time equivalent students were enrolled at Lake Region State College.

In addition to the economic contribution resulting from the institution's expenditures, spending by students also contributes to the local economy. Direct impacts of student spending in the Devils Lake area were \$10.9 million in FY2017. The total economic contribution was \$27.1 million. Student spending was estimated to generate an additional \$567,000 in sales and use tax revenue, and \$99,000 in personal income tax collections. This level of student spending would create enough business activity to support 38 secondary (indirect and induced) jobs. A detailed analysis of the economic impact resulting from student expenditures is presented in Appendix Table A28.

**Appendix Table B3. Direct and Total Economic Impacts for Lake Region State College, Selected Fiscal Years 1999 to 2017 (Current Year Dollars)**

Item		FY1999	FY2004	FY2006	FY2008	FY2009	FY2011	FY2012	FY2013	FY2014	FY2015	FY2017	Change

<sup>1</sup> Includes agriculture, mining, manufacturing, transportation, and government.

## Mayville State University

Each of the state's college campuses is an important component of that area's local economy. This brief analysis will provide highlights of an economic contribution analysis of Mayville State University in the Mayville area. Key economic indicators estimated in the analysis include direct impacts, total level of economic activity, personal income, retail trade, tax revenues, and employment. All dollar values are presented in terms of current year dollars, i.e., the effects of inflation have not been removed. The Consumer Price Index indicates that inflation during the 18-year period from 1999-2017 was 47 percent.

Expenditures by Mayville State University comprise the direct impacts, or "first round effects". Expenditures by Mayville State University were \$9.4 million in FY1999, \$15.8 million in FY2004, \$13.7 million in FY2006, \$14.0 million in FY2008, \$14.6 million in FY2009, \$24.5 million in FY2011, \$21.0 million in FY2012, \$20.6 million in FY2013, \$22.6 million in FY2014, \$25.5 million in FY2015, and \$22.8 million in FY2017 (Appendix Table B4). Expenditures increased over the 18-year period by \$13.4 million or by 141.9 percent.

Total impacts associated with Mayville State University were estimated by applying the North Dakota Input-Output Model coefficients to total direct expenditures. Total economic contribution was estimated at \$28.4 million in FY1999, \$45.2 million in FY2004, \$41.0 million in FY2006, \$41.5 million in FY2008, \$43.5 million in FY2009, \$70.2 million in FY2011, \$62.3 million in FY2012, \$61.8 million in FY2013, \$67.5 million in FY2014, \$75.4 million in FY2015, and \$69.7 million in FY2017. The sector with the largest impact was the *Households* Sector (i.e., personal income of area residents) for each year presented. Personal income increased from \$11.3 million in FY1999 to \$28.5 million in FY2017 or by 151.4 percent. Other sectors receiving major contributions included *Retail Trade, Construction, Finance, Insurance, and Real Estate, and Business and Personal Services*. Increased retail trade activity was estimated to be \$6.8 million in FY1999, \$10.3 million in FY2004, \$10.2 million in FY2006, \$10.2 million in FY2008, \$10.4 million in FY2009, \$16.2 million in FY2011, \$14.9 million in FY2012, \$14.9 million in FY2013, \$15.9 million in FY2014, \$17.6 million in FY2015, and \$16.3 million in FY2017.

Tax collections generated by Mayville State University in FY2017 included \$1.4 million in retail sales, \$395,000 in personal income, \$228,000 in corporate income, and \$185,000 in miscellaneous revenues.

Levels of business activity resulting from Mayville State University expenditures would support 143 secondary (indirect and induced) jobs in 2017. These jobs are in addition to the 290 positions (excluding student jobs) at Mayville State University in 2017. In the Fall Semester of 2017, 784 full-time equivalent students were enrolled at Mayville State University.

In addition to the economic contribution resulting from the institution's expenditures, spending by students also contributes to the local economy. Direct impacts of student spending in the Mayville area were \$8.1 million in FY2017. The total economic contribution was \$20.0 million. Student spending was estimated to generate an additional \$419,000 in sales and use tax revenue and \$73,000 in personal income tax collections. This level of student spending would create enough business activity to support nearly 28 secondary (indirect and induced) jobs. A detailed analysis of the economic impact resulting from student expenditures is presented in Appendix Table A28.

## Minot State University

Each of the state's college campuses is an important component of that area's local economy. This brief analysis will provide highlights of an economic contribution analysis of Minot State University in the Minot area. Key economic indicators estimated in the analysis include direct impacts, total level of economic activity, personal income, retail trade, tax revenues, and employment. All dollar values are presented in terms of current year dollars, i.e., the effects of inflation have not been removed. The Consumer Price Index indicates that inflation during the 18-year period from 1999-2017 was 47 percent.

Expenditures by Minot State University comprise the direct impacts, or "first round effects". Expenditures by Minot State University were \$30.1 million in FY1999, \$39.4 million in FY2004, \$46.3 million in FY2006, \$44.7 million in FY2008, \$48.5 million in FY2009, \$61.6 million in FY2011, \$77.0 million in FY2012, \$62.1 million in FY2013, \$64.2 million in FY2014, \$65.7 million in FY2015, and \$59.0 million in FY2017 (Appendix Table B5). Expenditures increased over the 18-year period by \$29 million or by 96.2 percent.

Total impacts associated with Minot State University were estimated by applying the North Dakota Input-Output Model coefficients to total direct expenditures. Total economic contribution was estimated at \$89.0 million in FY1999, \$119.8 million in FY2004, \$136.5 million in FY2006, \$135.1 million in FY2008, \$145.5 million in FY2009, \$183.6 million in FY2011, \$222.7 million in FY2012, \$186.4 million in FY2013, \$192.3 million in FY2014, \$196.5 million in FY2015, and \$180.0 million in FY2017. The sector with the largest impact was the *Households* Sector (i.e., personal income of area residents) for each year presented. Personal income increased from \$36.3 million in FY1999 to \$74.0 million in FY2017 or by 103.9 percent. Other sectors receiving major contributions included *Retail Trade, Construction, Finance, Insurance, and Real Estate, and Business and Personal Services*. Increased retail trade activity was estimated to be \$21.2 million in FY1999, \$28.2 million in FY2004, \$33.0 million in FY2006, \$31.9 million in FY2008, \$34.2 million in FY2009, \$42.4 million in FY2011, \$49.5 million in FY2012, \$42.7 million in FY2013, \$44.7 million in FY2014, \$45.0 million in FY2015, and \$41.9 million in FY2017. This represents a \$20.7 million (97.8 percent) increase for the 18-year period.

Tax collections generated by Minot State University in FY2017 included \$3.7 million in retail sales, \$1 million in personal income, \$577,000 in corporate income, and \$477,000 in miscellaneous revenues.

Levels of business activity resulting from Minot State University expenditures would support 369 secondary (indirect and induced) jobs in 2017. These jobs are in addition to the 727 positions (excluding student jobs) at Minot State University in 2017. In the Fall Semester of 2017, 2,467 full-time equivalent students were enrolled at Minot State University.

In addition to the economic contribution resulting from the institution's expenditures, spending by students also contributes to the local economy. Direct impacts of student spending in the Minot area were \$28 million in FY2017. The total economic contribution of student spending was \$69.5 million. Student spending was estimated to generate an additional \$1.5 million in sales and use tax revenue and \$253,000 in personal income tax collections. This level of student spending would create enough business activity to support about 97 secondary (indirect and induced) jobs. A detailed analysis of the economic impact resulting from student expenditures is presented in Appendix Table A28.

## Dakota College at Bottineau

Each of the state's college campuses is an important component of that area's local economy. This brief analysis will provide highlights of an economic contribution analysis of Dakota College at Bottineau in the Bottineau area. Key economic indicators estimated in the analysis include direct impacts, total level of economic activity, personal income, retail trade, tax revenues, and employment. All dollar values are presented in terms of current year dollars, i.e., the effects of inflation have not been removed. The Consumer Price Index indicates that inflation during the 18-year period from 1999-2017 was 47 percent.

Expenditures by Dakota College at Bottineau comprise the direct impacts, or "first round effects". Expenditures by Dakota College at Bottineau were \$4.6 million in FY1999, \$5.4 million in FY2004, \$6.0 million in FY2006, \$6.7 million in FY2008, \$7.4 million in FY2009, \$9.5 million in FY2011, \$9.0 million in FY2012, \$9.6 million in FY2013, \$11.0 million in FY2014, \$11.4 million in FY2015, and \$11.2 million in FY2017 (Appendix Table B6). Expenditures increased over the 18-year period by \$6.6 million or by 144.6 percent.

Total impacts associated with Dakota College at Bottineau were estimated by applying the North Dakota Input-Output Model coefficients to total direct expenditures. Total economic contribution was estimated at \$13.5 million in FY1999, \$15.9 million in FY2004, \$17.6 million in FY2006, \$19.8 million in FY2008, \$21.9 million in FY2009, \$28.1 million in FY2011, \$27.1 million in FY2012, \$28.7 million in FY2013, \$32.7 million in FY2014, \$33.7 million in FY2015, and \$33.2 million in FY2017. The sector with the largest impact was the *Households* Sector (i.e., personal income of area residents) for each year presented. Personal income increased from \$5.4 million in FY1999 to \$13.0 million in FY2017 or by 139.1 percent. Other sectors receiving major contributions included *Retail Trade, Construction, Finance, Insurance, and Real Estate, and Business and Personal Services*. Increased retail trade activity was estimated to be \$3.3 million in FY1999, \$3.9 million in FY2004, \$4.2 million in FY2006, \$4.9 million in FY2008, \$5.3 million in FY2009, \$6.6 million in FY2011, \$6.6 million in FY2012, \$6.8 million in FY2013, \$8.0 million in FY2014, \$7.9 million in FY2015, and \$7.8 million in FY2017. This represents a \$4.5 million (135.2 percent) increase for the 18-year period.

Tax collections generated by Dakota College Bottineau in FY2017 included \$672,000 in retail sales, \$188,000 in personal income, \$120,000 in corporate income, and \$87,000 in miscellaneous revenues.

Levels of business activity resulting from Dakota College at Bottineau expenditures would support 67 secondary (indirect and induced) jobs in 2017. These jobs are in addition to the 160 positions (excluding student jobs) at Dakota College at Bottineau in 2017. In the Fall Semester of 2017, 527 full-time equivalent students were enrolled at Dakota College at Bottineau.

In addition to the economic contribution resulting from the institution's expenditures, spending by students also contributes to the local economy. Direct impacts of student spending in the Bottineau area were \$5.7 million in FY2017. The total economic contribution was \$14.2 million. Student spending was estimated to generate an additional \$297,000 in sales and use tax collections and \$52,000 in personal income tax collections. This level of student spending would create enough business activity to support 20 secondary (indirect and induced) jobs. A detailed analysis of the economic impact resulting from student expenditures is presented in Appendix Table A28.

## North Dakota State College of Science

Each of the state's college campuses is an important component of that area's local economy. This brief analysis will provide highlights of an economic contribution analysis of North Dakota State College of Science in the Wahpeton area. Key economic indicators estimated in the analysis include direct impacts, total level of economic activity, personal income, retail trade, tax revenues, and employment. All dollar values are presented in terms of current year dollars, i.e., the effects of inflation have not been removed. The Consumer Price Index indicates that inflation during the 18-year period from 1999-2017 was 47 percent.

Expenditures by North Dakota State College of Science comprise the direct impacts, or "first round effects." Expenditures by North Dakota State College of Science were \$30.6 million in FY1999, \$34.7 million in FY2004, \$35.6 million in FY2006, \$39.7 million in FY2008, \$40.5 million in FY2009, \$44.6 million in FY2011, \$46.3 million in FY2012, \$59.7 million in FY2013, \$49.9 million in FY2014, \$54.4 million in FY2015, and \$57.0 million in FY2017 (Appendix Table B7). Expenditures increased over the 18-year period by \$26.4 million or by 86.4 percent.

Total impacts associated with North Dakota State College of Science were estimated by applying the North Dakota Input-Output Model coefficients to total direct expenditures. Total economic contribution was estimated at \$87.5 million in FY1999, \$100.8 million in FY2004, \$103.6 million in FY2006, \$115.5 million in FY2008, \$117.7 million in FY2009, \$131.4 million in FY2011, \$137.8 million in FY2012, \$170.4 million in FY2013, \$147.3 million in FY2014, \$159.2 million in FY2015, and \$165.6 million in FY2017. The sector that had the largest impact was the *Households* Sector (i.e., personal income of area residents) for each year presented. Personal income increased from \$33.5 million in FY1999 to \$62.9 million in FY2017 or by 87.8 percent. Other sectors receiving major contributions included *Retail Trade*, *Construction*, *Finance*, *Insurance*, and *Real Estate*, and *Business and Personal Services*. Increased retail trade activity was estimated to be \$22.6 million in FY1999, \$26.0 million in FY2004, \$27.1 million in FY2006, \$29.5 million in FY2008, \$31.0 million in FY2009, \$33.0 million in FY2011, \$33.0 million in FY2012, \$39.4 million in FY2013, \$34.7 million in FY2014, \$38.3 million in FY2015, and \$40.3 million in FY2017. This represents a \$17.7 million (78.3 percent) increase for the 18-year period.

Tax collections generated by North Dakota State College of Science in FY2017 included \$3.3 million in retail sales, \$943,000 in personal income, \$635,000 in corporate income, and \$428,000 in miscellaneous revenues.

Levels of business activity resulting from North Dakota State College of Science expenditures would support 331 secondary (indirect and induced) jobs in 2017. These jobs are in addition to the 572 positions (excluding student jobs) at North Dakota State College of Science in 2017. In the Fall Semester of 2017, 2,253 full-time equivalent students were enrolled at North Dakota State College of Science.

In addition to the economic contribution resulting from the institution's expenditures, spending by students also contributes to the local economy. Direct impacts of student spending in the Wahpeton area were \$23.8 million in FY2017. The total economic contribution was \$59.1 million. Student spending was estimated to generate an additional \$1.2 million sales and use tax revenue and \$215,000 in personal income tax collections. This level of student spending would create enough business activity to support 83 secondary (indirect and induced) jobs. A detailed analysis of the economic impact resulting from student expenditures is presented in Appendix Table A28.

## North Dakota State University

Each of the state's college campuses is an important component of that area's local economy. This brief analysis will provide highlights of an economic contribution analysis of North Dakota State University in the Fargo area. Key economic indicators estimated in the analysis include direct impacts, total level of economic activity, personal income, retail trade, tax revenues, and employment. All dollar values are presented in terms of current year dollars, i.e., the effects of inflation have not been removed. The Consumer Price Index indicates that inflation during the 18-year period from 1999-2017 was 47 percent.

Expenditures by North Dakota State University comprise the direct impacts, or "first round effects." Expenditures by North Dakota State University were \$167.6 million in FY1999, \$246.8 million in FY2004, \$284.7 million in FY2006, \$346.0 million in FY2008, \$355.4 million in FY2009, \$404.3 million in FY2011, \$432.1 million in FY2012, \$439.1 million in FY2013, \$452.9 million in FY2014, 540.4 million in FY2015, and \$520.3 million in FY2017 (Appendix Table B8). Expenditures increased over the 18-year period by \$352.7 million or by 210.4 percent.

Total impacts associated with North Dakota State University were estimated by applying the North Dakota Input-Output Model coefficients to total direct expenditures. Total economic contribution was estimated to be \$490.8 million in FY1999, \$730.6 million in FY2004, \$835.6 million in FY2006, \$1.0 billion in FY2008, \$1.0 billion in FY2009, \$1.2 billion in FY2011, \$1.3 billion in FY2012, \$1.3 billion in FY2013, \$1.3 billion in FY2014, \$1.5 billion in FY2015, and \$1.5 billion in FY2017. The sector with the largest impact was the *Households* Sector (i.e., personal income of area residents) for each year presented. Personal income increased from \$194.2 million in FY1999 to \$574.6 million in FY2017 or by 195.9 percent. Other sectors receiving major contributions included *Retail Trade, Construction, Finance, Insurance, and Real Estate*, and *Business and Personal Services*. Increased retail trade activity was estimated to be \$125.3 million in FY1999, \$171.7 million in FY2004, \$206.4 million in FY2006, \$250.8 million in FY2008, \$255.6 million in FY2009, \$287.3 million in FY2011, \$308.5 million in FY2012, \$321.1 million in FY2013, \$335.8 million in FY2014, \$405.3 million in FY2015, and \$384.7 million in FY2017. This represents a \$259.5 million (207.1 percent) increase for the 18-year period.

Tax collections generated by North Dakota State University in FY2017 included \$30 million in retail sales, \$8.6 million in personal income, \$5.8 million in corporate income, and \$3.9 million in miscellaneous revenues.

Levels of business activity resulting from North Dakota State University expenditures would support 3,029 secondary (indirect and induced) jobs in 2017. These jobs are in addition to the 3,619 positions (excluding student jobs) employed at North Dakota State University in 2017. In the Fall Semester of 2017, 12,784 full-time equivalent students were enrolled at North Dakota State University.

In addition to the economic contribution resulting from the institution's expenditures, spending by students also contributes to the local economy. Direct impacts of student spending in the Fargo area were \$161.4 million in FY2017. The total economic contribution of student spending was \$401.1 million. Student spending was estimated to generate an additional \$8.4 million in sales and use tax revenue and \$1.5 million in personal income tax collections. This level of student spending would create enough business activity to support 562 secondary (indirect and induced) jobs. A detailed analysis of the economic impact resulting from student expenditures is presented in Appendix Table A28.

## University of North Dakota

Each of the state's college campuses is an important component of that area's local economy. This brief analysis will provide highlights of an economic contribution analysis of University of North Dakota in the Grand Forks area. Key economic indicators estimated in the analysis include direct impacts, total level of economic activity, personal income, retail trade, tax revenues, and employment. All dollar values are presented in terms of current year dollars, i.e., the effects of inflation have not been removed. The Consumer Price Index indicates that inflation during the 18-year period from 1999-2017 was 47 percent.

Expenditures by University of North Dakota comprise the direct impacts, or "first round effects". Expenditures by University of North Dakota were \$225.4 million in FY1999, \$315.1 million in FY2004, \$341.5 million in FY2006, \$370.5 million in FY2008, \$384.1 million in FY2009, \$435.2 million in FY2011, \$467.2 million in FY2012, \$489.1 million in FY2013, \$531.8 million in FY2014, \$676.8 million in FY2015, and \$522.9 million in FY2017 (Appendix Table B9). Expenditures increased over the 18-year period by \$297.4 million or by 132.0 percent.

Total impacts associated with University of North Dakota were estimated by applying the North Dakota Input-Output Model coefficients to total direct expenditures. Total economic contribution was estimated at \$657.4 million in FY1999, \$931.1 million in FY2004, \$1.0 billion in FY2006, \$1.09 billion in FY2008, \$1.13 billion in FY2009, \$1.3 billion in FY2011, \$1.4 billion in FY2012, \$1.4 billion in FY2013, \$1.6 billion in FY2014, \$1.9 billion in FY2015, and \$1.5 billion in FY2017. The sector that had the largest impact was the *Households* Sector (i.e., personal income of area residents) for each year presented. Personal income increased from \$255.7 million in FY1999 to \$609.6 million in FY2017 or by 138.4 percent. Other sectors receiving major contributions included *Retail Trade*, *Construction*, *Finance*, *Insurance*, and *Real Estate*, and *Business and Personal Services*. Increased retail trade activity was estimated to be \$166.0 million in FY1999, \$225.1 million in FY2004, \$243.8 million in FY2006, \$270.7 million in FY2008, \$278.0 million in FY2009, \$317.7 million in FY2011, \$341.9 million in FY2012, \$358.6 million in FY2013, \$395.1 million in FY2014, \$518.2 million in FY2015, and \$386.9 million in FY2017. This represents a \$220.9 million (133.1 percent) increase for the 18-year period.

Tax collections generated by University of North Dakota in FY2017 included \$31.4 million in retail sales, \$8.7 million in personal income, \$5. million in corporate income, and \$4 million in miscellaneous revenues.

Levels of business activity resulting from University of North Dakota expenditures would support 3,126 secondary (indirect and induced) jobs in 2017. These jobs are in addition to the 3,765 positions (excluding student jobs) at University of North Dakota in 2017. In the Fall Semester of 2017, 11,964 full-time equivalent students were enrolled at University of North Dakota.

In addition to the economic contribution resulting from the institution's expenditures, spending by students also contributes to the local economy. Direct impacts of student spending in the Grand Forks area were \$151.3 million in FY2017. The total economic contribution of student spending was \$376.0 million. Student spending was estimated to generate an additional \$7.9 million in sales and use tax revenue and \$1.4 million in personal income tax collections. This level of student spending would create enough business activity to support about 5527 secondary (indirect and induced) jobs. A detailed analysis of the economic impact resulting from student expenditures is presented in Appendix Table A28.

**Appendix Table B9. Direct and Total Economic Impacts for University of North Dakota, Selected Fiscal Years 1999 to 2017 (Current Year Dollars)**

Item		FY1999	FY2004	FY2006	FY2008	FY2009	FY2011	FY2012	FY2013	FY2014	FY2015	FY2017	Change

## Valley City State University

Each of the state's college campuses is an important component of that area's local economy. This brief analysis will provide highlights of an economic contribution analysis of Valley City State University in the Valley City area. Key economic indicators estimated in the analysis include direct impacts, total level of economic activity, personal income, retail trade, tax revenues, and employment. All dollar values are presented in terms of current year dollars, i.e., the effects of inflation have not been removed. The Consumer Price Index indicates that inflation during the 18-year period from 1999-2017 was 47 percent.

Expenditures by Valley City State University comprise the direct impacts, or "first round effects". Expenditures by Valley City State University were \$13.4 million in FY1999, \$17.0 million in FY2004, \$16.4 million in FY2006, \$18.7 million in FY2008, \$19.2 million in FY2009, \$26.3 million in FY2011, \$28.3 million in FY2012, \$30.3 million in FY2013, \$26.1 million in FY2014, 30.9 million in FY2015, and \$36.2 million in FY2017 (Appendix Table B10). Expenditures increased over the 18-year period by \$22.9 million or by 171.2 percent.

Total impacts associated with Valley City State University were estimated by applying the North Dakota Input-Output Model coefficients to total direct expenditures. Total economic contribution was estimated at \$39.3 million in FY1999, \$50.1 million in FY2004, \$48.8 million in FY2006, \$55.7 million in FY2008, \$57.0 million in FY2009, \$77.3 million in FY2011, \$83.0 million in FY2012, \$88.3 million in FY2013, \$78.3 million in FY2014, \$91.6 million in FY2015, and \$104.7 million in FY2017. The sector that had the largest impact was the *Households Sector* (i.e., personal income of area residents) for each year presented. Personal income increased from \$15.5 million in FY1999 to \$38.4 million in FY2017 or by 148.0 percent. Other sectors receiving major contributions included *Retail Trade, Construction, Finance, Insurance, and Real Estate, and Business and Personal Services*. Increased retail trade activity was estimated to be \$9.5 million in FY1999, \$11.5 million in FY2004, \$11.8 million in FY2006, \$13.0 million in FY2008, \$13.5 million in FY2009, \$17.8 million in FY2011, \$19.3 million in FY2012, \$19.9 million in FY2013, \$18.2 million in FY2014, \$20.4 million in FY2015, and \$22.6 million in FY2017. This represents a \$13.1 million (138.3 percent) increase for the 18-year period.

Tax collections generated by Valley City State University in FY2017 included \$2 million in retail sales, \$613,000 in personal income, \$436,000 in corporate income, and \$270,000 in miscellaneous revenues..

Levels of business activity resulting from Valley City State University expenditures would support 209 secondary (indirect and induced) jobs in 2017. These jobs are in addition to the 226 positions (excluding student jobs) at Valley City State University in 2017. In the Fall Semester of 2017, 1,086 full-time equivalent students were enrolled at Valley City State University.

In addition to the economic contribution resulting from the institution's expenditures, spending by students also contributes to the local economy. Direct impacts of student spending in the Valley City area were \$10.2 million in FY2017. The total economic contribution of student spending was \$29.4 million. These levels of business activity would generate an additional \$616,000 in sales and use tax revenue and \$107,000 in personal income tax collections. This level of student spending would create enough business activity to support 41 secondary (indirect and induced) jobs. A detailed analysis of the economic impact resulting from student expenditures is presented in Appendix Table A28.

## Williston State College

Each of the state's college campuses is an important component of that area's local economy. This brief analysis will provide highlights of an economic contribution analysis of Williston State College in the Williston area. Key economic indicators estimated in the analysis include direct impacts, total level of economic activity, personal income, retail trade, tax revenues, and employment. All dollar values are presented in terms of current year dollars, i.e., the effects of inflation have not been removed. The Consumer Price Index indicates that inflation during the 18-year period from 1999-2017 was 47 percent.

Expenditures by Williston State College comprise the direct impacts, or "first round effects." Expenditures by Williston State College were \$6.1 million in FY1999, \$10.1 million in FY2004, \$9.2 million in FY2006, \$10.9 million in FY2008, \$12.1 million in FY2009, \$23.7 million in FY2011, \$22.8 million in FY2012, \$20.7 million in FY2013, \$28.1 million in FY2014, \$31.8 million in FY2015, and \$18.7 million in FY2017 (Appendix Table B11). Expenditures increased over the 18-year period by \$12.5 million or by 203.8 percent.

Total impacts associated with Williston State College were estimated by applying the North Dakota Input-Output Model coefficients to total direct expenditures. Total economic contribution was estimated at \$17.8 million in FY1999, \$29.1 million in FY2004, \$27.2 million in FY2006, \$31.3 million in FY2008, \$34.5 million in FY2009, \$64.9 million in FY2011, \$63.2 million in FY2012, \$59.3 million in FY2013, \$78.8 million in FY2004, \$84.8 million in FY2015, and \$56.4 million in FY2017. The sector that had the largest impact was the *Households* Sector (i.e., personal income of area residents) for each year presented. Personal income increased from \$7.2 million in FY1999 to \$23.5 million in FY2017 or by 227.4 percent. Other sectors receiving major contributions included *Retail Trade, Construction, Finance, Insurance, and Real Estate, and Business and Personal Services*. Increased retail trade activity was estimated at \$4.7 million in FY1999, \$7.3 million in FY2004, \$6.9 million in FY2006, \$8.8 million in FY2008, \$9.0 million in FY2009, \$14.8 million in FY2011, \$15.6 million in FY2012, \$14.4 million in FY2013, \$18.2 million in FY2014, \$20.0 million in FY2015, and \$13.8 million in FY2017. This represents a \$9.1 million (193.2 percent) increase for the 18-year period.

Tax collections generated by Williston State College in FY2017 included \$1.2 million in retail sales, \$308,000 in personal income, \$172,000 in corporate income, and \$149,000 in miscellaneous revenues..

Levels of business activity resulting from Williston State College expenditures would support 115 secondary (indirect and induced) jobs in 2017. These jobs are in addition to the 158 positions (excluding student jobs) at Williston State College in 2017. In the Fall Semester of 2017, 763 full-time equivalent students were enrolled at Williston State College.

In addition to the economic contribution resulting from the institution's expenditures, spending by students also contributes to the local economy. Direct impacts of student spending in the Williston area were \$10.2 million in FY2017. The total economic contribution of student spending was \$25.3 million. Student spending was estimated to generate an additional \$529,000 in sales and use tax revenue and \$92,000 in personal income tax collections. This level of student spending would create enough business activity to support 35 secondary (indirect and induced) jobs. A detailed analysis of the economic impact resulting from student expenditures is presented in Appendix Table A28.

## North Dakota University System Office

Each of the state's college campuses is an important component of that area's local economy. This brief analysis will provide highlights of an economic contribution analysis of NDUS Office in the Bismarck area. Key economic indicators estimated in the analysis include direct impacts, total level of economic activity, personal income, retail trade, tax revenues, and employment. All dollar values are presented in terms of current year dollars, i.e., the effects of inflation have not been removed. The Consumer Price Index indicates that inflation during the 18-year period from 1999-2017 was 47 percent.

Expenditures by NDUS Office comprise the direct impacts, or "first round effects". Expenditures by NDUS Office were \$6.1 million in FY1999, \$17.3 million in FY2004, \$6.1 million in FY2006, \$9.4 million in FY2008, \$9.0 million in FY2009, \$32.1 million in FY2011, \$34.3 million in FY2012, \$47.7 million in FY2013, \$54.4 million in FY2014, \$55.7 million in FY2015, and \$27.0 million in FY2017 (Appendix Table B12). Expenditures increased over the 18-year period by \$20.9 million or by 341.4 percent.

However, it should be noted that the growth in the NDUS office budget since 2009 is the result of changes in accounting practices rather than higher levels of expenditures. Core Technology Services (CTS) serves all campuses in the state with computer hardware and personnel housed primarily at North Dakota State University. Prior to 2010, financial support for CTS was included in the respective host campus budget (NDSU), but transferred to the University System office for FY2010. These accounting changes were made to satisfy auditor's requests.

Total impacts associated with NDUS Office were estimated by applying the North Dakota Input-Output Model coefficients to total direct expenditures. Total economic contribution was estimated at \$18.0 million in FY1999, \$53.6 million in FY2004, \$18.7 million in FY2006, \$28.8 million in FY2008, \$27.7 million in FY2009, \$96.1 million in FY2011, and \$103.1 million in FY2012, \$143.3 million in FY2013, \$163.7 million in FY2014, \$168.4 million in FY2015, and \$83.1 million in FY2017. The sector that had the largest impact was the *Households* Sector (i.e., personal income of area residents) for each year presented. Personal income has grown from \$7.6 million in FY1999 to \$40.6 million in FY2017 or by 432.2 percent. Other sectors receiving major contributions included *Retail Trade, Construction, Finance, Insurance, and Real Estate*, and *Business and Personal Services*. Increased retail trade activity was estimated to be \$4.2 million in FY1999, \$10.7 million in FY2004, \$4.4 million in FY2006, \$6.8 million in FY2008, \$6.6 million in FY2009, \$21.4 million in FY2011, \$23.2 million in FY2012, \$31.9 million in FY2013, \$36.8 million in FY2014, \$36.9 million in FY2015, and \$19.7 million in FY2017. This represents a \$15.6 million (374.0 percent) increase for the 18-year period.

Tax collections generated by the North Dakota University System office in FY2017 included \$1.9 million in retail sales, \$386,000 in personal income, \$113,000 in corporate income, and \$221,000 in miscellaneous revenues..

Levels of business activity resulting from NDUS Office expenditures would support 171 secondary (indirect and induced) jobs in 2015. These jobs are in addition to the 27 positions at the NDUS Office and the 136 CTS positions attached to the NDUS Office in 2015.

**Appendix Table B12. Direct and Total Economic Impacts for the NDUS Office, Selected Fiscal Years 1999 to 2017 (Current Year Dollars)**

Item		FY1999	FY2004	FY2006	FY2008	FY2009	FY2011	FY2012	FY2013	FY2014	FY2015	FY2017	Change
