the missing ecosystem

improving venture capital effectiveness
in italy to finance Innovation

dr. maurizio balestrieri

role of startup in creating innovation

“Indeed, as Christensen points out and studies have shown, it is often entirely rational for incumbent companies to ignore disruptive innovations, since they compare so badly with existing technologies or products, and the deceptively small market available for a disruptive innovation is often very small compared to the market for the established technology. Even if a disruptive innovation is recognized, existing businesses are often reluctant to take advantage of it, since it would involve competing with their existing (and more profitable) technological approach.”

role of venture capital industry in creating startup

“These contributions bridge the significant gap between discovery, validation, and patenting through the time when the resulting innovative product is far enough along its development cycle that the sponsoring company can seek funding through public capital markets.”
