California Department of Food and Agriculture

Agricultural Commissioners' Crop Reports

Calaveras County

1982-1989

California County Agricultural Commissioners' Reports from the California Department of Food and Agriculture. This collection consists of annual crop and livestock data from each of the 58 California Counties. The collection covers 1915-1981; digitization of the rest of the collection is forthcoming.

This digitization project was funded by the Giannini Foundation of Agricultural Economics,
<http://giannini.ucop.edu/>.

The work was completed by the staff of the Giannini Foundation Library, University of California, Berkeley, <http://are.berkeley.edu/library/>. **Please contact the Library to consult the originals.**

Clare Berryhill, Director
California Department of Food and Agriculture

and

The Honorable Board of Supervisors
County of Calaveras

In accordance with Section 2279 of the California Food and Agricultural Code, I am pleased to submit the Calaveras County Report of Agriculture for 1982.

The gross agricultural production for Calaveras County in 1982 was \$15,484,500 as compared to \$16,474,260 in 1981. The reduction was primarily attributed to lower timber and cattle prices. Producers of several other commodities, however, enjoyed an outstanding year with high yields and strong prices.

All figures used in this report represent gross values and do not indicate net income, or profit received by growers.

I wish to extend my appreciation to the many individuals and organizations who contributed to the compilation of this report, and to Doug Norfolk of my staff who coordinated and compiled the report.

Respectfully submitted,

A handwritten signature in dark ink, appearing to read "Jearl D. Howard".

Clare Berryhill, Director
California Department of Food and Agriculture

and

The Honorable Board of Supervisors
County of Calaveras

In accordance with Section 2279 of the California Food and Agricultural Code, I am pleased to submit the Calaveras County Report of Agriculture for 1983. This report was made possible by the many growers, livestock producers, and organizations who voluntarily supplied the needed statistics. I would like to express my sincere appreciation to those agricultural producers and organizations and to Douglas Norfolk of my staff who compiled the report.

The gross agricultural production of Calaveras County was \$20,198,200 in 1983 as compared to the 1982 value of \$15,484,500. This is the first time the agricultural production has reached the \$20,000,000 mark; this increase is attributed primarily to the increased timber harvest. Fruit and nut producers generally experienced both reduced production and lower prices. The one exception to this trend was winegrape production which continued to increase in 1983. Other production remained relatively constant.

I would like to stress that all figures used in this report represent gross values and do not indicate net income or profit received by growers.

Respectfully submitted,

Jearl D. Howard
Agricultural Commissioner
and Director of Weights and Measures

Mr. Clare Berryhill, Director
California Department of Food and Agriculture

and

The Honorable Board of Supervisors
County of Calaveras

Gentlemen and Mrs. Kuehl:

In compliance with Section 2279 of the California Food and Agriculture Code, I am pleased to submit the Calaveras County Report of Agriculture for 1984. This report was made possible by the many growers, livestock producers and organizations who voluntarily supplied the needed statistics. I would like to express my sincere appreciation to those agricultural producers and to Douglas Norfolk of my staff who compiled this report.

The gross agricultural production of Calaveras County was \$14,643,100 in 1984 compared to \$20,187,200 in 1983. This drastic reduction is primarily attributed to a reduced timber harvest and reduced timber value. The value of livestock and poultry products also declined by nearly \$700,000 in 1984. Other production remained relatively constant, even though some growers were adversely affected by late spring frost in 1984.

I would like to stress that all figures used in this report represent gross values and do not indicate net income or profit received by the growers.

Respectfully submitted,

Jearl D. Howard
Agricultural Commissioner
and Director of Weights and Measures

Mr. Clare Berryhill, Director
California Department of Food and Agriculture
and

The Honorable Board of Supervisors
County of Calaveras

Gentlemen and Mrs. Kuehl:

In compliance with Section 2279 of the California Food and Agriculture Code, I am pleased to submit the Calaveras County Report of Agriculture for 1985. This report was made possible by the many growers, livestock producers and organizations who voluntarily supplied the needed statistics. I would like to express my sincere appreciation to those agricultural producers and to Douglas Norfolk of my staff who compiled this report.

The gross agricultural production of Calaveras County was \$15,829,900 in 1985 compared to \$14,643,000 in 1984. This increase is due to an increase in the value of harvested timber. The value of livestock and poultry production remained generally constant with the exception of nut producers who endured both a reduced yield and a depressed market in 1985.

I would like to stress that all the figures used in this report represent gross values and do not indicate net income or profit received by the growers.

Respectfully submitted,

Jearl D. Howard
Agricultural Commissioner
and Director of Weights and Measures

Mr. Clare Berryhill, Director
California Department of Food and Agriculture

and

The Honorable Board of Supervisors
County of Calaveras

Gentlemen:

I am pleased to submit the Calaveras County Report of Agriculture for 1986 in accordance with Section 2279 of the California Food and Agriculture Code. This report was made possible by the numerous growers, livestock producers and organizations who voluntarily supplied the needed statistics. I would like to express my sincere appreciation to those agricultural producers and Douglas Norfolk of my staff who compiled this report.

The gross agricultural production of Calaveras County was \$15,450,900 in 1986 compared to \$15,829,000 in 1985. This decrease is due to a decrease in the value of harvested timber, production of swine and poultry. Other agricultural production remained fairly constant or showed modest gains. Nut prices rebounded considerably in 1986.

I would like to stress that all the figures used in this report represent gross values and do not indicate net income or profit received by the growers.

Respectfully submitted,

Jearl D. Howard
Agricultural Commissioner and
Director of Weights/Measures

JDH/sc

Jack Parnell, Director
California Department of Food and Agriculture
and
The Honorable Board of Supervisors
County of Calaveras

Gentlemen:

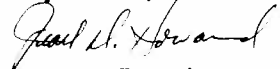

I am pleased to submit the Calaveras County Report of Agriculture for 1987 which was compiled in accordance with Section 2279 of the California Food and Agricultural Code.

My sincere thanks to the many growers, livestock producers and organizations who supplied the statistics necessary for this report and to Douglas Norfolk of my staff for the compilation of these figures.

The gross Agricultural Production of Calaveras County in 1987 was \$19,323,300, an increase of nearly \$4,000,000 from the previous year. The largest increases were in harvested timber and livestock production.

I must emphasize that these figures represent gross receipts and in no way indicate net profit or income to the growers nor do they reflect the production costs of the commodities listed.

Respectfully submitted,

Jearl D. Howard
Agricultural Commissioner
Director of Weights and Measures

The Honorable Board of Supervisors
County of Calaveras

Gentlemen:

In accordance with Section 2279 of the California Food and Agricultural Code, I am pleased to present the 1988 Report of Agriculture for Calaveras County.

The estimated 1988 gross agricultural production value was \$24,410,300.00. An increase of more than \$5,000,000.00 over the previous year. An increased timber harvest coupled with higher prices was primarily responsible for the increase over 1987 values. With production in excess of 24 million dollars, agriculture continues to make a significant contribution to the economy of the county.

It must be emphasized that the figures in this report represent gross values and do not indicate net farm income or the cost of production or marketing.

My sincere thanks to the many growers, livestock producers, organizations and agencies who supplied the data necessary to make this report possible and to Douglas Norfolk who compiled the report.

Respectfully submitted,

Jearl D. Howard

Henry J. Voss, Director
California Department of Food and Agriculture
and
The Honorable Board of Supervisors
County of Calaveras

Gentlemen:

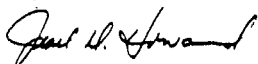

I am pleased to present the 1989 Report of Agriculture for Calaveras County as required by Section 2279 of the California Food and Agriculture Code.

The estimated value of agricultural production for 1989 was \$37,408,200.00, an increase of 53% from 1988, which is an all time high for Calaveras County. This increase is due to a \$9,015,300.00 increase in timber production which is the result of increased harvest and higher prices. Other significant increases occurred in livestock and poultry products and livestock and poultry production due to both increased production and higher prices.

It must be emphasized that the figures in this report represent gross values and do not indicate net farm income or the cost of production and marketing.

I wish to express my appreciation to the many growers, livestock producers, organizations and agencies who supplied the data necessary to make this report possible and to Douglas Norfolk and Scott Paulsen who compiled the Report.

Respectfully submitted,

Jearl D. Howard
Agricultural Commissioner
Director of Weights and Measures
