2001 BUSINESS ANALYSIS SUMMARY FOR SWINE FARMS

Michigan Data from Telfarm/MicroTel Staff Paper No. 2002-12, 16 pages

by

Sherrill B. Nott¹

Introduction

- I. This report is organized as follows:
 - A. List and sequence of Tables
 - B. Data Source

II. List and sequence of Tables

A. Averages of all 12 Swine Farms

1		Crop Production Summaries, 2001	Page 4	4
2	•	Farm Income Statement	Page :	5
3		Farm Income Statement, continued	Page	6
4		Inventory Changes	Page ′	7
5		Depreciation, Capital Adjustments	Page	8
6		Profitability Measures	Page	9
7		Liquidity Measures	Page	10
8		Balance Sheet at Cost Values	Page	11
9		Balance Sheet at Market Values	Page	12
1	0.	Statement of Cash Flows	Page	13
1	1.	Financial Standards Measures	Page	14
1	2.	Operator and Labor Summary	Page	15
1	3.	Financial Summary	Page	16

Data Source

Farm types were assigned using the 1992 Census of Agriculture's Standard Industrial Classification (SIC) definitions. Basically, any farm with 50 percent or more of value of farm sales from one item becomes a farm of that type. Swine farms have 50 percent or more of value of combined sales from fat hogs, feeder pigs and cull breeding hogs.

¹Professor and Farm Management Specialist; phone 517-353-4522 or nott@msu.edu Co-workers in the Telfarm/MicroTel project were R. Betz, L. Borton, R. Clark, B. Dartt, S. Harsh, M. Kelsey, G. Kole, T. Purdy, W. Schauer, G. Schwab, D. Stein, V. Varner, and C. Wolf with the assistance of Michigan State University Extension Agents.

This report is a summary of the financial and production records kept by swine farmers enrolled in the Telfarm/MicroTel record program through Michigan State University Extension. Farm records were included if a Finan² summary was completed on 2001 data including beginning and ending balance sheets, plus income and expenses. The summary was included if cash discrepancy was less than 10% of gross cash inflow, and if the debt discrepancy was less than \$1,000. The averages are reported in the tables below; it should be recognized that considerable variability exists in the data. Nine of the 12 farms grew crops in addition to hogs. The unweighted mean of acres cropped was 1,193 acres; the standard deviation of the mean was 1,193 acres and the median was 884 acres. The unweighted mean of the net farm income for all 12 farms was \$132,487. The standard deviation of the mean was \$166,890 and the median was \$77,408 of net farm income.

This report has three purposes: 1) to provide statistical information about the financial results on swine farms during 2001; 2) to provide production costs for comparative analysis and forward planning; and 3) to provide information on the trends in resource use, income and costs during the last few years. For swine farm averages in 1995, see Staff Paper 96-86, <u>Michigan Farm Database</u>, <u>New Directions for 1995</u>; it contains averages of 19 swine farms calculated with Finansum. Staff Paper 97-30, <u>Business Analysis Summary for Swine Farms</u>, contains averages of 17 swine farms for 1996. Staff Paper 98-23, <u>1997 Business Analysis Summary for Swine Farms</u>, contains averages of 20 swine farms for 1997. Staff Paper 99-34, <u>1998 Business Analysis Summary for Swine Farms</u>, contains averages of 14 swine farms for 1998. Staff Paper 2000-28, <u>1999 Business Analysis Summary for Swine Farms</u>, contains averages of 9 swine farms for 1999. Staff Paper 2001-32, <u>2000 Business Analysis Summary for Swine Farms</u>, contains averages of 14 swine farms for 1999. Staff Paper 2001-32, <u>2000 Business Analysis Summary for Swine Farms</u>, contains averages of 14 swine farms for 1999. Staff Paper 2001-32, <u>2000 Business Analysis Summary for Swine Farms</u>, contains averages of 14 swine farms for 1999. Staff Paper 2000-28, <u>1999 Business for 2000</u>. These staff papers are available from the author at http://www.msu.edu/user/nott

The 12 farms in Tables 1 to 13 include 7 farrow to finish farms plus 5 that were primarily in other types of hog enterprises. The 7 averaged 564 sows. The farm was accepted in the average regardless of whether it was a proprietorship, partnership, limited liability company, or corporation. RankEm³ will produce a variety of report options; a subset is included in this publication.

The farms included in the averages below are not a random sample. Most of them kept their financial records with Michigan State University's Telfarm/MicroTel accounting project. The averages may be representative of bigger and better managed swine farms. The 12 farms were spread across the 9 counties of Allegan, Benzie, Berrien, Branch, Eaton, Hillsdale, Huron, Ingham and Kalamazoo.
