1997 BUSINESS ANALYSIS SUMMARY FOR DAIRY FARMS

**Michigan Data from Telfarm/MicroTel, AgriSolutions, and Salisbury Mgt. Services
Staff Paper No. 98-29**

by

Sherrill B. Nott¹

58 pages

Introduction

- I. This report is organized as follows:
 - A. List and sequence of Tables
 - B. Data Source
- II. List and sequence of Tables for 1997
 - A. Averages of 132 Dairy Farms, All Sizes
 - 1. Livestock and Crop Production Summary..... Page 4
 - 2. Farm Income Statement..... Page 5
 - 3. Farm Income Statement, continued..... Page 6
 - 4. Inventory Changes..... Page 7
 - 5. Depreciation and Other Capital Adjustments Page 8
 - 6. Profitability and Liquidity Analysis..... Page 9
 - 7. Balance Sheet at Cost Values..... Page 10
 - 8. Balance Sheet at Market Values..... Page 11
 - 9. Statement of Cash Flows Page 12
 - 10. Financial Guidelines Measures Page 13
 - 11. Operator Information and Nonfarm Summary Page 14
 - B. Averages of 24 Dairy Farms, 10 to 75 Milk Cows Page 15
 - Same tables as above, numbered Table B1 ... B11
 - C. Averages of 29 Dairy Farms, 76 to 120 Milk Cows Page 26
 - Same tables as above, numbered C1 ... C11
 - D. Averages of 34 Dairy Farms, 121 to 175 Milk Cows Page 37
 - Same tables as above, numbered D1 ... D11
 - E. Averages of 45 Dairy Farms, 176 to 1,300 Milk Cows Page 48
 - Same tables as above, numbered E1 ... E11

Data Source

Farm types were assigned using the 1992 Census of Agriculture's Standard Industrial Classification (SIC) definitions. Basically, any farm with 50 percent or more of value of farm sales from one item becomes a farm of that type. Dairy farms have 50 percent or more of value of combined sales from milk and cull dairy animals.

This report is a summary of the financial and production records kept by dairy farmers enrolled in the Telfarm/MicroTel record program through Michigan State University Extension, or were accounting clients of either AgriSolutions or Salisbury Management Services. Farm

¹Co-workers in the Telfarm/MicroTel project were L. Borton, R. Hepp, D. Stein, T. Purdy, S. Harsh, M. Kelsey, R. Betz, G. Schwab, R. Clark, W. Schauer, V. Varner and G. Kole with the assistance of MSU Extension Agents in Michigan. AgriSolutions co-workers included Gary Lenneman and Kelly Tobin. Salisbury Management co-worker was Mike Fassler.

records were included if a Finan² summary was completed on 1997 data including beginning and ending balance sheets, income and expenses plus crop acres and yields. The summary was included if cash discrepancy was less than 10% of gross cash inflow, and if the debt discrepancy was less than \$1,000. The averages are reported in the tables below; it should be recognized that considerable variability exist in the data. In statistical terms, the expected standard deviations would be large.

This report has three purposes: 1)to provide statistical information about the financial results on dairy farms during 1997; 2)to provide production costs for comparative analysis and forward planning; and 3)to provide information on the trends in resource use, income and costs during the last few years. Following long term trends may be a problem, as Telfarm/MicroTel and the Department of Agricultural Economics in 1995 adopted Finansum,³ a different software package than had been previously used for doing annual analysis. For dairy farm averages for 1995, see Staff Paper No. 96-86, Michigan Farm Database, New Directions for 1995; it contains averages of 106 dairy calculated with Finansum. Staff Paper No. 97-31, Business Analysis Summary for Dairy Farms, contains averages of 146 dairy farms for 1996. These staff papers are available from me.

Finansum allows rapid analysis of group averages with some degree of choice over how the results are presented. I chose to show the average of the high or low 25 percent by net income, but only if the 25 percent meant 6 or more farms. The farm was accepted in the average regardless of whether the farm was a proprietorship, partnership, limited liability company, or corporation. Finansum will produce a variety of report options; a subset is included in this publication.

The farms included in the averages below are not a random sample. Most of them kept their financial records with Michigan State University's Telfarm/MicroTel accounting project, with AgriSolutions, or with Salisbury Management Services. The averages may be representative of bigger and better managed dairy farms.

This document may be found and downloaded from the following:

<http://www.msu.edu/user/nott>

² Finan = financial analysis, one of the parts of Finpack, a financial software package from the Center for Farm Financial Management at the University of Minnesota.

³ Finansum provides summarization calculations for data files generated by Finan. It also comes from the Center for Farm Financial Management.

Table A1. **Livestock and Crop Production Summary, 1997**

Michigan Dairy Farms, All Sizes
 (Farms sorted by Net Farm Income)

	Average Of All Farms	Average Of Low 25%	Average Of High 25%
Dairy
