Introduction

The body of this report is organized as follows:

I. Introduction and Table of Contents

- A. List of Tables
- B. Data Source
- C. Per Acre Expense Worksheet

II. List & Sequence of Tables

A. Averages of 13 General Livestock Farms

1. Crop Production & Marketing Summary.....	Page 4
2&3. Farm Income Statement.....	Page 5&6
4. Inventory Changes.....	Page 7
5. Depreciation/Capital Adjustments.....	Page 8
6. Profitability & Liquidity Analysis.....	Page 9
7. Balance Sheet at Cost Values.....	Page 10
8. Balance Sheet at Market Values.....	Page 11
9. Statement of Cash Flows.....	Page 12
10. Financial Guidelines Measures.....	Page 13
11. Operator Information & Nonfarm Summary.....	Page 14
12. Expense Items Per Acre.....	Page 15

¹ Professor and Farm Management Specialist. (517)353-4522 or nott@msu.edu. Co-workers in the Telfarm/MicroTel project were R. Betz, L. Borton, R. Clark, S. Harsh, M. Kelsey, G. Kole, T. Purdy, W. Schauer, G. Schwab, D. Stein, and V. Varner with the assistance of Michigan State University Extension Agents.

² Student at Chicago H.S. for Ag. Sciences, and short-term intern as a part of the Minority Apprenticeship Program. gklef@hotmail.com

B. Data Source

Farm types were assigned using the 1992 Census of Agriculture's Standard Industrial Classification (SIC) definitions. Basically, any farm with 50 percent or more of value of farm sales from one item becomes a farm of that type. General livestock farms have 50 percent or more of value of combined sales from livestock and livestock products, such as milk and beef animals, and wool.

This report is a summary of the financial and production records kept by dairy farmers enrolled in the Telfarm/MicroTel record program through Michigan State University Extension. Farm records were included if a Finan³ summary was completed on 1998 data including beginning and ending balance sheets, plus income and expenses. The summary was included if cash discrepancy was less than 10% of gross cash inflow, and if the debt discrepancy was less than \$1,000. The averages are reported in the tables that follow; it should be recognized that considerable variability exists in the data. The unweighted mean of the net farm income for the 13 farms was \$9,081, the standard deviation of the mean was \$51,470 and the median was (\$8,694). The unweighted mean of the acres cropped was 580; the standard deviation of the mean was 382, and the median was 522.

This report has three purposes: 1)to provide statistical information about the financial results on dairy farms during 1998; 2)to provide production costs for comparative analysis and forward planning; and 3)to provide information on the trends in resource use, income and costs during the last few years. Following long term trends may be a problem, as Telfarm/MicroTel and the Department of Agricultural Economics in 1995 adopted Finansum⁴ and a different software package for doing annual analysis. For general livestock farm averages of 1995, see Staff Paper No. 96-86, Michigan Farm Database, New Directions for 1995; it contains averages of 12 general livestock farms calculated with Finansum.. During 1996 and 1997, there were not enough general livestock records in the system to publish averages.

The farm was accepted in the average regardless of whether the farm was a proprietorship, partnership, limited liability company, or corporation. Finansum will produce a variety of report options; we included a subset in this publication.

The farms included in the averages below are not a random sample. They kept their financial records on Michigan State University's Telfarm/MicroTel accounting project. The averages may be representative of bigger and better managed general livestock farms.

This document may be found and downloaded from the following:

<http://www.msu.edu/user/nott>

³ **Finan:** financial analysis, one of the parts of Finpack, a financial software package from the Center of Farm Financial Management at the University of Minnesota.

⁴ **Finansum:** provides summarized calculations for data files generated by Finan. It also comes from the Center for Farm Financial Management.
