California Department of Food and Agriculture

Agricultural Commissioners' Crop Reports

Glenn County

1982-1989

California County Agricultural Commissioners' Reports from the California Department of Food and Agriculture. This collection consists of annual crop and livestock data from each of the 58 California Counties. The collection covers 1915-1981; digitization of the rest of the collection is forthcoming.

This digitization project was funded by the Giannini Foundation of Agricultural Economics, <http://giannini.ucop.edu/>.

The work was completed by the staff of the Giannini Foundation Library, University of California, Berkeley, <http://are.berkeley.edu/library/>. **Please contact the Library to consult the originals.**

ED ROMANO, Agricultural Commissioner

SEALER OF WEIGHTS & MEASURES

March 17, 1983

Clare L. Berryhill, Director
California Department of Food and Agriculture
and
The Honorable Board of Supervisors
County of Glenn

Gentlemen:

I am pleased to submit the 1982 Annual Crop and Livestock Report for Glenn County as required by Section 2279 of the California Agricultural Code.

Agriculture continued to be the leading industry in the county with a gross value of \$155,990,000. Rice and dairy products continue to be the leading crops. Because of lower prices and production the county gross income did not equal the \$193,380,000 of 1981. The gross income includes forest products again, after many years of absence from the report.

Values given in this report are gross receipts received by growers and they in no way reflect the net income to growers.

I wish to express my appreciation for the cooperation and assistance of all individuals who contributed to this report and especially members of my staff who compiled the reports.

Respectfully submitted,

Ed Romano
Agricultural Commissioner

ED ROMANO, Agricultural Commissioner

SEALER OF WEIGHTS & MEASURES

March 20, 1984

Clare L. Berryhill, Director
California Department of Food and Agriculture
and
The Honorable Board of Supervisors
County of Glenn

Gentlemen:

I am pleased to submit the 1983 Annual Crop and Livestock Report for Glenn County as required by Section 2279 of the California Agricultural Code.

Agriculture continues to be the leading industry in the county. However, due to the wet spring and tough economic conditions the gross value of agricultural production declined from \$155,510,000 in 1982 to \$131,581,000 in 1983. Government payments of approximately \$21,000,000 helped to soften the blow and kept the year from being a total disaster by bringing the total gross income to \$152,581,000.

We hope for a better year in 1984!

I wish to express my appreciation for the cooperation and assistance of all individuals who contributed to this report and especially members of my staff who compiled the report.

Respectfully submitted.

Ed Romano
Agricultural Commissioner

County of Glenn

Department of Agriculture

ED ROMANO, Agricultural Commissioner

April 1, 1985

SEALER OF WEIGHTS & MEASURES

Clare Berryhill, Director
State Department of Food and Agriculture
and
The Honorable Board of Supervisors
County of Glenn

Gentlemen:

I am pleased to submit the 1984 Annual Crop and Livestock Report for Glenn County as required by Section 2279 of the California Agricultural Code.

Agriculture continues to be the leading industry in the county with a gross value of \$150,975,000, an increase of \$19,298,000 over 1983. However, because of the lower prices and increased cost net income continued to decline. Government payment of several million helped to soften the blow, but didn't improve the overall farm picture.

Values given in this report are gross receipts received by growers and they in no way reflect the net income to growers.

I wish to express my appreciation for the cooperation and assistance of all individuals who contributed to this report and especially members of my staff who compiled the reports.

Respectfully submitted,

Ed Romano
Agricultural Commissioner

ER:m

ED ROMANO, Agricultural Commissioner

SEALER OF WEIGHTS & MEASURES

April 08, 1986

Clare J. Berryhill, Director
California Department of Food and Agriculture
-and-
The Honorable Board of Supervisors
County of Glenn

Gentlemen:

I am pleased to submit the 1985 Annual Crop and Livestock Report for Glenn County as required by Section 2279 of the California Agricultural Code.

Agriculture continued to be the leading industry in the county with a gross value of \$149,977,000. Rice and dairy products continue to be the leading crops. Because of lower prices and production, the county gross income did not equal the \$151,312,000 of 1984. This year we saw sun-flower seed enter the top ten in production for the first time.

Values given in this report are gross receipts received by growers and they in no way reflect the net income to growers.

I wish to express my appreciation for the cooperation and assistance of all individuals who contributed to this report and especially members of my staff who compiled the reports.

Respectfully submitted,

Ed Romano
Agricultural Commissioner

ER:s

SEALER OF WEIGHTS & MEASURES

June 11, 1987

Jack C. Parnell, Director
California Department of Food and Agriculture

-and-

The Honorable Board of Supervisors
County of Glenn

I am pleased to submit the 1986 Annual Crop and Livestock Report for Glenn County as required by Section 2279 of the California Agricultural Code.

Agriculture continued to be the leading industry in the county with a gross value of \$152,734,000, an increase of \$2,757,000 over last year. The year also saw Almonds move from seventh place to third place in the counties top ten crops.

Values given in this report are gross receipts received by growers and they in no way reflect the net income to growers.

I wish to express my appreciation for the cooperation and assistance of all individuals who contributed to this report and especially members of my staff who compiled the reports.

Respectfully submitted,

Ed Romano
Agricultural Commissioner

ED ROMANO, Agricultural Commissioner

SEALER OF WEIGHTS & MEASURES

March 25, 1988

Jack C. Parnell, Director
California Department of Food and Agriculture

-and-

The Honorable Board of Supervisors
County of Glenn

I am pleased to submit the 1987 Annual Crop and Livestock Report for Glenn County as required by Section 2279 of the California Agricultural Code.

Agriculture continued to be the leading industry in the county with a gross value of \$167,810,000, an increase of 15,091,000 over last year. The year also saw Olives move into the counties top ten crops.

Values given in this report are gross receipts received by growers and they in no way reflect the net income to growers.

I wish to express my appreciation for the cooperation and assistance of all individuals who contributed to this report and especially members of my staff who compiled the reports.

Respectfully submitted,

Ed Romano
Agricultural Commissioner

1988 ANNUAL CROP
AND LIVESTOCK REPORT
GLENN COUNTY

FOOD SAFETY

This year will undoubtedly be remembered as the year in which food safety became a major concern of the public. Reports concerning Alar on apples and adulterated Chilean fruit served to heighten public awareness and concern over the safety of their fresh food supply. Ironically, at the very same time, the National Academy of Sciences released a 1400 page report strongly encouraging the public to double their consumption of fresh fruits and vegetables.

California has long had the well deserved reputation of having the toughest regulations concerning food safety and pesticide usage in the world. California's strong pesticide regulatory program is administered jointly throughout the state by the California Department of Food and Agriculture and the county Agricultural Commissioners. This program utilizes over 650,000 staff hours annually to make certain that pesticides are being used legally and safely. Food grown under California's tight regulatory program is safe.

This program is not only the toughest state program in existence but has restrictions on pesticides and their usage which exceed the United States Environmental Protection Agency's standards. While these restrictions substantially increase the cost of agricultural production for California producers over products grown in other states and countries, they provide top protection to farm workers, the environment and consumers of California products. California has long been on the leading edge in developing programs to regulate pesticides and quite often the E.P.A. adopts its pesticide programs based on California's leadership.

California's pesticide residue sampling for agricultural products is by far the most extensive program anywhere. The number of residue samples analyzed in this program not only exceeds the total number of samples of all other state programs combined but also exceeds the total number of samples analyzed by the U.S. Food and Drug Administration for the entire nation. Because this program is cooperatively administered by a system of county and state regulatory agencies, it affords a timely response in sampling, analyzing and quarantining any product not meeting the high standards established to insure its safety.

While agricultural producers must bear the increased burden of trying to produce top quality products under increasingly tighter restrictions, California's leadership has determined that affording this level of protection is the cost of doing business in California.

Other states and countries would be well advised to afford their citizens and environments California's level of protection.

The bottom line is that food is safe. The amount of pesticide residue in food is negligible and the best advise is a balanced diet with California fruits and vegetables.

Department of Agriculture

ED ROMANO, Agricultural Commissioner

SEALER OF WEIGHTS & MEASURES

April 10, 1989

Jack C. Parnell, Director
California Department of Food and Agriculture

-and-

The Honorable Board of Supervisors
County of Glenn

I am pleased to submit the 1988 Annual Crop and Livestock Report for Glenn County as required by Section 2279 of the California Agricultural Code.

Agriculture continued to be the leading industry in the county with a gross value of \$189,591,000, an increase of \$925,000 over last year. The year also saw beans move into the counties top ten crops.

Values given in this report are gross receipts received by growers and they in no way reflect the net income to growers.

I wish to express my appreciation for the cooperation and assistance of all individuals who contributed to this report and especially members of my staff who compiled the reports.

Respectfully submitted,

Ed Romano
Agricultural Commissioner

**1989 ANNUAL CROP
AND LIVESTOCK REPORT
GLENN COUNTY**

FOOD SAFETY

This year will undoubtedly be remembered as the year in which food safety became a major concern of the public. Reports concerning Alar on apples and adulterated Chilean fruit served to heighten public awareness and concern over the safety of their fresh food supply. Ironically, at the very same time, the National Academy of Sciences released a 1400 page report strongly encouraging the public to double their consumption of fresh fruits and vegetables.

California has long had the well deserved reputation of having the toughest regulations concerning food safety and pesticide usage in the world. California's strong pesticide regulatory program is administered jointly throughout the state by the California Department of Food and Agriculture and the county Agricultural Commissioners. This program utilizes over 650,000 staff hours annually to make certain that pesticides are being used legally and safely. Food grown under California's tight regulatory program is safe.

This program is not only the toughest state program in existence but has restrictions on pesticides and their usage which exceed the United States Environmental Protection Agency's standards. While these restrictions substantially increase the cost of agricultural production for California producers over products grown in other states and countries, they provide top protection to farm workers, the environment and consumers of California products. California has long been on the leading edge in developing programs to regulate pesticides and quite often the E.P.A. adopts its pesticide programs based on California's leadership.

California's pesticide residue sampling for agricultural products is by far the most extensive program anywhere. The number of residue samples analyzed in this program not only exceeds the total number of samples of all other state programs combined but also exceeds the total number of samples analyzed by the U.S. Food and Drug Administration for the entire nation. Because this program is cooperatively administered by a system of county and state regulatory agencies, it affords a timely response in sampling, analyzing and quarantining any product not meeting the high standards established to insure its safety.

While agricultural producers must bear the increased burden of trying to produce top quality products under increasingly tighter restrictions, California's leadership has determined that affording this level of protection is the cost of doing business in California.

Other states and countries would be well advised to afford their citizens and environments California's level of protection.

The bottom line is that food is safe. The amount of pesticide residue in food is negligible and the best advise is a balanced diet with California fruits and vegetables.

Department of Agriculture

ED ROMANO, Agricultural Commissioner

SEALER OF WEIGHTS & MEASURES

April 06, 1990

Henry Voss, Director
California Department of Food and Agriculture

- and -

The Honorable Board of Supervisors
County of Glenn

I am pleased to submit the 1989 Annual Crop and Livestock Report for Glenn County as required by Section 2279 of the California Agricultural Code.

Agriculture continued to be the leading industry in the county with a gross value of \$211,745,000, an increase of \$24,366,000 over last year. The year also saw Olives move into the counties top ten crops.

Values given in this report are gross receipts received by growers and they in no way reflect the net income to growers.

I wish to express my appreciation for the cooperation and assistance of all individuals who contributed to this report and especially members of my staff who compiled the reports.

Respectfully submitted,

Ed Romano
Agricultural Commissioner
