Agricultural Commissioners' Crop Reports

Imperial County

1982-1989

California County Agricultural Commissioners' Reports from the California Department of Food and Agriculture. This collection consists of annual crop and livestock data from each of the 58 California Counties. The collection covers 1915-1981; digitization of the rest of the collection is forthcoming.

This digitization project was funded by the Giannini Foundation of Agricultural Economics, <http://giannini.ucop.edu/>.

The work was completed by the staff of the Giannini Foundation Library, University of California, Berkeley, <http://are.berkeley.edu/library/>. **Please contact the Library to consult the originals.**

and

THE HONORABLE BOARD OF SUPERVISORS
COUNTY OF IMPERIAL

I herewith submit the annual crop report as required by Section 2279 of the Food and Agricultural Code.

1982 was not a good year for agriculture in Imperial County or in the nation. However, because of the diversity of the agricultural industry in Imperial County, certain areas, particularly the vegetable crops area, during the winter of '81-82, which is reported, was a very good year. The overall production of crops and livestock, which amounted to \$761,980,000, indicates the size and magnitude of the agricultural industry in this area, and even in lean years the income indicates the enormous contribution to the welfare and economy of the area. 1982 saw a cutback in acreages in cotton and other crops, but it also represents an industry that is diversified and capable of continued growth in the face of adversity. These figures represent the gross sales and do not indicate net income or losses incurred.

Respectfully submitted,

CLAUDE M. FINNELL

I herewith submit the annual crop report as required by Section 2279 of the Food and Agricultural Code.

While the national economy seems to be moving ahead rapidly, the Imperial County agricultural economy seems to be in a holding pattern. The gross agricultural income for the past three years has been almost static. The 1983 gross income of \$755,166,000 is slightly lower than the 1982 gross income of \$761,980,000. If the PIK payments of approximately \$23,000,000 are added, the gross farm income is up slightly. The contribution of 3/4 billion dollars to the local economy, however, is still tremendous.

Although Imperial County farmers face many problems, such as new pests, water, and marketing, this is still a great place to farm.

Respectfully submitted,

TO: MR. CLARE BERRYHILL, DIRECTOR
DEPARTMENT OF FOOD AND AGRICULTURE
STATE OF CALIFORNIA

and

THE HONORABLE BOARD OF SUPERVISORS
COUNTY OF IMPERIAL

I herewith submit the annual crop report as required by Section 2279 of the Food and Agricultural Code.

1984 saw many upheavals in Imperial County agriculture. There was a continuing decline in the cotton acreage and a sizable movement of acreages of lettuce to Arizona. The bright spot in the agricultural economy for 1984 was the continued strong market for alfalfa hay.

The gross annual income for 1984 was \$762,291,000. This was a slight increase from 1983 and, although our agricultural economy was severely depressed, the gross income represents a tremendous input into the County's economy.

Respectfully submitted,

CLAUDE M. FINNELL
Agricultural Commissioner

IMPERIAL COUNTY BOARD OF SUPERVISORS

TO: CLARE BERRYHILL, DIRECTOR
DEPARTMENT OF FOOD AND AGRICULTURE
STATE OF CALIFORNIA

and

THE HONORABLE BOARD OF SUPERVISORS
COUNTY OF IMPERIAL

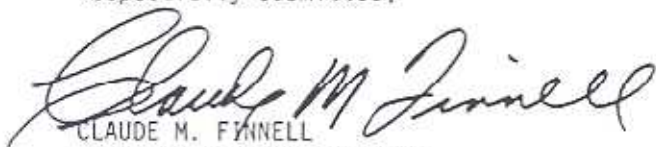

I herewith submit the annual crop report as required by Section 2279 of the Food and Agricultural Code.

Gross agricultural income in 1986 was lower than 1985 by 7%.

Although farm income has declined for several years, indications are that some improvement may be in store for 1987.

The gross income for 1986 was \$688,950,000, representing income received from agricultural commodities.

Respectfully submitted,

CLAUDE M. FINNELL
Agricultural Commissioner

TO: JACK C. PARNELL, DIRECTOR

STATE OF CALIFORNIA

and

THE HONORABLE BOARD OF SUPERVISORS
COUNTY OF IMPERIAL

I herewith submit the annual crop report as required by Section 2279 of the Food and Agricultural Code.

Gross agricultural income in 1987 was 16.3% higher than 1986.

Overall gains were posted in field crops, livestock and vegetable crops.

The most spectacular gain was in market onions. Onion gross income increased a record 249% in gross value over the previous year. The increase for all vegetables combined was 23.8%. Gross receipts for livestock increased by 33% and field crops gained by 8%.

For the first time in several years, overall farm income is looking on the brighter side. This comes as a welcome relief from several years of economic hardship felt throughout the agricultural and associated industries in Imperial County.

Respectfully submitted,

STEPHEN L. BIRDSALL
Agricultural Commissioner

TO: Jack C. Parnell, Director
Department of Food and Agriculture
and
The Honorable Board of Supervisors
County of Imperial:
 Jeanne Vogel, Chairperson
 James Bucher
 Bill Cole
 Luis Legaspi
 Abe F. Seabolt

I am pleased to submit the Annual Crop Report as required by Section 2279 of the Food and Agricultural Code.

Gross agricultural income in 1988 was \$976,481,000 dollars which represents a 21 percent increase over 1987 gross agricultural income. Increases were recorded in the production of Apiary Products, Field Crops, Fruit and Nut Crops, Livestock and Dairy and Vegetable Crops.

In the Vegetable Crop category, lettuce gross income posted 141 percent increase over 1987 gross income. Other vegetables also had strong gains which increased 1988 gross income 34 percent over 1987 income.

I wish to thank all the individuals, growers and organizations for their cooperation in providing the information required to compile this report and express special thanks to my staff for their dedicated work.

Sincerely,

Stephen L. Birdsall
Agricultural Commissioner

I am pleased to submit the Annual Crop Report as required by Section 2279 of the Food and Agricultural Code.

Gross annual agricultural income in 1989 was \$946,477,000 dollars, a 2.8 percent decrease from the 1988 gross annual agricultural income. The decrease was noted primarily in the winter vegetable market and spring melon harvest.

The field crop category, especially wheat and alfalfa, posted gains in 1989. Livestock income continued to increase strongly for the third straight year, posting a fifteen percent increase.

I wish to thank all the individuals, growers, and organizations for their cooperation in providing the information required to compile this report and express special thanks to my staff for their dedicated work.

Sincerely,

Stephen L. Birdsall
Agricultural Commissioner
