California Department of Food and Agriculture

Agricultural Commissioners' Crop Reports

Imperial County

2005-2009

California County Agricultural Commissioners' Reports from the California Department of Food and Agriculture. This collection consists of annual crop and livestock data from each of the 58 California Counties. The collection covers 1915-1981; digitization of the rest of the collection is forthcoming.

This digitization project was funded by the Giannini Foundation of Agricultural Economics,
<http://giannini.ucop.edu/>.

The work was completed by the staff of the Giannini Foundation Library, University of California, Berkeley, <http://are.berkeley.edu/library/>. **Please contact the Library to consult the originals.**

2005 Agricultural Crop & Livestock Report

Imperial County

*In cooperation with the
Imperial Irrigation District*

Economic Impacts of Imperial County's Agricultural Production 2005

Impact On

TO: A. G. Kawamura, Secretary
Department of Food and Agriculture
And The Honorable Board of Supervisors,
County of Imperial
Gary Wyatt, Chairperson
Victor M. Carrillo
Larry Grogan
Joe Maruca
Wally Leimgruber

In accordance with the provisions of Section 2279 of the California Food and Agricultural Code, I am pleased to submit the 2007 Annual Agricultural Crop and Livestock Report for the centennial year for Imperial County Agriculture. This report is a summary of acreage, yield, and gross value of agricultural production in Imperial County. It must be emphasized that the values presented in this report represent **Gross** receipt of producers and **do not** take into account the various costs of production, marketing or transportation. **No attempt is made to reflect net income of the producer.** Also included is a report on the activities for sustainable agriculture as specified in section 2272 of the aforementioned code.

The total gross agricultural production value in 2007 remained relatively stable at \$1,369,147,000. Livestock continues to be the dominant commodity with a minor decrease in value of (1.81%) Increases in value were realized in Field Crops 3.28%, Vegetable and Melon Crops 5.96% and Apiary Products 23.39%. Field Crop acreage decreased slightly with the increased value coming from improved prices varied in both directions. Apiary products benefited directly from increased pollination. Fruit & Nut crops (30.77%) and Seed & Nursery Crops (23.72%) recorded dramatic reductions in value. The freeze in 2007 directly impacted Fruit & Nut values by reducing acreage and yields. The Seed & Nursery Crop acreage declined.

I wish to thank the many producers, agricultural business representatives, and public agencies that have cooperated in providing the information required for the compilation of this report. I would also like to express sincere thanks to the Agricultural Department Staff, particularly project coordinator David Ritter who compiled the report.

Sincerely,

A handwritten signature in black ink, appearing to read "Stephen L. Birdsall".

Stephen L. Birdsall
Agricultural Commissioner

June 9, 2009

TO: A. G. Kawamura, Secretary
Department of Food and Agriculture
And The Honorable Board of Supervisors,
County of Imperial
Wally Leimgruber, Chairperson
Victor M. Carrillo
Jack Terrazas
Michael W. Kelley
Gary Wyatt

In accordance with the provisions of Section 2279 of the California Food and Agricultural Code, I am pleased to submit the 2008 Annual Agricultural Crop and Livestock Report for the centennial year for Imperial County Agriculture. This report is a summary of acreage, yield, and gross value of agricultural production in Imperial County. It must be emphasized that the values presented in this report represent **Gross** receipt of producers and **do not** take into account the various costs of production, marketing or transportation. **No attempt is made to reflect net income of the producer.** Also included is a report on the activities for sustainable agriculture as specified in section 2272 of the aforementioned code.

The total gross agricultural production value in 2008 increased to \$1,684,522,000. Values in all the commodity groups either increased or remained relatively stable. Field Crops posted the largest gain at 56.31% largely as the result of a significant increase in wheat acreage and price. Wheat ranking jumped from 14th to 3rd. Seed & Nursery Crops improved by 54.42% and also benefited from increased acreage and prices. Pollination demands and improved honey prices boosted Apiary Products up by 20.17%. An overall increase in acreage, yield and price contributed to the 17.34% gain in Vegetable and Melon Crops. Fruit & Nut crops increased 16.12% due mostly to favorable prices. Livestock remained relatively stable.

I wish to thank the many producers, agricultural business representatives, and public agencies that have cooperated in providing the information required for the compilation of this report.

Sincerely,

Stephen L. Birdsall
Agricultural Commissioner

IMPERIAL COUNTY

TO: A. G. Kawamura, Secretary
Department of Food and Agriculture
And
The Honorable Board of Supervisors, County of Imperial
Louis Fuentes, Chairperson
Jack Terrazas
Michael W. Kelley
Gary Wyatt
Wally Leimgruber

In accordance with the provisions of Section 2279 of the California Food and Agricultural Code, I am pleased to submit the 2009 Annual Agricultural Crop and Livestock Report for Imperial County Agriculture. This report is a summary of acreage, yield, and gross value of agricultural production in Imperial County. It must be emphasized that the values presented in this report represent **Gross** receipt of producers and **do not** take into account the various costs of production, marketing or transportation. **No attempt is made to reflect net income of the producer.** Also included is a report on the activities for sustainable agriculture as specified in section 2272 of the aforementioned code.

The total gross agricultural production value in 2009 decreased to \$1,452,970,000 for an overall reduction of 13.75%. Several commodity groups showed decreases over last year. Reduced prices were the biggest factor contributing to the decrease. Field Crops and Seed and Nursery Crops posted losses of over 35% while Livestock decreased 13.94%. Apiary Products and Vegetable and Melon Crops remained relatively stable. Fruit & Nut Crops showed an increase of 27.91%.

For the last 25 years it has been my distinct honor to compile and present this report on behalf of the agricultural industry of Imperial County. It memorializes not only the health but also resilience of the agricultural industry and ultimately the economy of Imperial County.

I would also like to thank all of the folks who diligently, each year, provided the statistics for this report. Thanks to the folks who reviewed the drafts and validated the data which are presented here.

And finally, thanks to my staff, without their dedication this report would not be possible.

This will be the last Crop and Livestock report under my signature. To you all, thanks for allowing me the opportunity to serve as your Agricultural Commissioner and Sealer of Weights and Measures — It has been a great ride.

Sincerely,

Stephen L. Birdsall
Agricultural Commissioner

IN MEMORY OF CLIFF GRUENBERG

6/27/51 – 11/19/09

This year's Agricultural Crop and Livestock Report is dedicated to the memory of Cliff Gruenberg who worked for the Imperial County Agricultural Commissioner's Office for 30 years. Cliff began his career with Imperial County in 1977, working in pest detection, standardization, seed inspection, and pesticide use enforcement. He was the Deputy Agricultural Commissioner/Sealer in charge of Pesticide Use Enforcement for 20 years. Throughout that time, Cliff was instrumental in providing documentation and background information that allowed many low toxicity pesticides obtain local provisional registrations, and his broad knowledge of pesticide regulations and consistent enforcement stance provided the public and the local agricultural community with policies that have safeguarded the public welfare, while ensuring the availability of pest management tools needed to successfully grow our crops. He stepped in as the interim Assistant Agricultural Commissioner/Sealer in 2006, where he remained until his retirement in 2008.

Cliff was best described by one of his coworkers in an announcement of his passing, to those in our office that perhaps did not know him well..." Although Cliff was a Regulator extraordinaire he was not without humor and a strange sense of jest. Yes, at times he was a practical joker, an admiral quality considering that he was often involved in many intense, and sometimes volatile, environmental situations. In his own unique way, Cliff took time to make people laugh and feel good about the day. We have all been fortunate to have been touched, although briefly, by this wonderful human being and he will be sorely missed."
