...About the authors

**Roger E. Brinner**, Executive Research Director for DRI/McGraw-Hill, directs DRI's U.S. research and operations groups. Dr. Brinner guides the development and delivery of DRI publications, information systems and modeling capabilities, and leads DRI's professionals in applying DRI's capabilities to specific client management and policy decisions.

He frequently testifies before Congress on the business impacts of such issues as tax legislation, Federal spending, Federal Reserve policy, trade matters, and environmental initiatives. A former senior staff member of the President's Council of Economic Advisers and professor at Harvard University, Dr. Brinner holds a Ph.D. in Economics from Harvard University and a B.A. from Kalamazoo College, where he is a member of the Board of Trustees.

**Terry E. Etherton** is Professor of Animal Nutrition at the Pennsylvania State University. He is widely recognized for his expertise and leadership in the area of endocrine regulation of animal growth. Dr. Etherton is most noted for his studies which were the first to establish that treating pigs with

recombinantly-derived porcine growth hormone (pGH) improves growth rate, improves productive efficiency, increases muscle mass and decreases carcass fat. He pioneered the application of techniques to determine how insulin and growth hormone bind to target cells and regulate intracellular metabolism. He received a Ph.D. in Animal Science from the University of Minnesota and was an NIH Post-doctoral Fellow at Stanford University before joining Pennsylvania State University.

**George E. Rossmiller** is Director and Senior Fellow of the National Center for Food and Agricultural Policy and Executive Director of the International Policy Council on Agriculture and Trade. Dr. Rossmiller has written extensively on agriculture and trade policy and economic development. He holds a Ph.D. from

Michigan State University where he was a professor for several years. From 1978 to 1985, he worked with USDA's Foreign Agricultural Service as Agricultural Attaché with the U.S. Mission to the OECD in Paris, Assistant Administrator for International Trade Policy, and the Director of the Planning and Analysis Staff of the Agency. As Director of the National Center for Food and Agricultural Policy, he has had the unique opportunity to observe changes in food and agricultural policy in the United States and in many other countries.

**Stewart Smith** is Professor at the University of Maine in the Department of Agricultural and Resource Economics on leave to the Congressional Joint Economic Committee as a Senior Economist. Dr. Smith was Associate Administrator of USDA's Agricultural Stabilization and Conservation Service of the USDA from 1977 to 1979

and Maine Commissioner of Agriculture from 1979 to 1985. From 1985-1990, he was Henry Luce Professor of Agricultural Production and Society at Tufts University, School of Nutrition. He is a 1959 graduate of Yale University and holds a Ph.D. from the University of Connecticut. From 1961 to 1977, he owned and operated farm and agricultural marketing firms and participated in the activities of a number of farm and commodity organizations.

**Brett W. House** is a graduate research assistant working toward a Ph.D. in the Department of Agricultural Economics at the University of California, Davis. His research involves modeling best management practices for agricultural nonpoint source pollution for the California State Water Resources Control Board. He is a graduate of Claremont McKenna College.

**Gloria E. Helfand** has been an Assistant Professor of Agricultural Economics at the University of California, Davis since 1988. Her Ph.D. is from the University of California at Berkeley. She previously worked for the Natural Resources Defense Council

and the Wilderness Society as a policy analyst and economist, concentrating on forestry issues. In recent years, her research has emphasized pollution control strategies.

**Douglas M. Larson**, an Assistant Professor at the University of California, Davis, conducts research in the area of valuing non-marketed goods and the behavior of firms and individuals under uncertainty. He received his Ph.D. in Agricultural and Resource Economics from the University of Maryland and joined the faculty at Davis in 1988. Previously, he worked as a research associate with the University of Alaska and as the staff economist for the North Pacific Fishery Management Council.
