PORTUGAL AND AFRICA, 1815-1910

R. J. Hammond

About \$8.00

A narrative and interpretive history with chief emphasis upon the period 1870-1910. The present volume is the first in English to relate events in Portugal itself to developments in Portuguese Africa. It strives to make intelligible the Portuguese view on imperial questions, a matter that has generally been neglected except by Portuguese historians. In doing so, it affords a fresh view of British, as well as Portuguese, policy during the heyday of European expansion in Africa.

Available September 1966.

THE PAPALOAPAN PROJECT: AGRICULTURAL
DEVELOPMENT IN THE MEXICAN TROPICS

Thomas T. Poleman

\$4.50

"a thoroughly documented and convincing analysis of the first major attempt by a Latin American government to solve the pressing man/land relationship problem through a large-scale combined reclamation, agriculture, and colonization effort."—*Hispanic American Historical Review*.

CANADIAN AGRICULTURE IN WAR AND PEACE 1935-1950

G. E. Britnell and V. C. Fowke

\$10.00

The fourfold purpose of this book is to assess the contribution of Canadian agriculture to the Allied war effort, to note the impact of the war on the Canadian farmer, to outline the readjustments that were made in response to this impact and the means by which wartime adjustments were made, and to indicate the steps by which the Canadian farming community returned to peacetime circumstances.—"the authors accomplish all four tasks admirably"—*American Historical Review*.
