USE OF THE 1992 ICC PUBLIC USE WAYBILL SAMPLE TO ANALYZE CORN MOVEMENTS BY RAIL

by Dan Halbach and Jerry Fruin

Department of Agricultural and Applied Economics
University of Minnesota
College of Agriculture
St. Paul, Minnesota 55108

**USE OF THE 1992 ICC PUBLIC USE WAYBILL SAMPLE
TO ANALYZE CORN MOVEMENTS BY RAIL**

by Dan Halbach and Jerry Fruin

Presented to the North Central Regional Research Committee on
Agricultural Transportation (NC-137), Washington, D.C.

October 8, 1993

This research was supported by the
University of Minnesota Center for Transportation Studies and the University of Minnesota
Agricultural Experiment Station.

Staff Papers are published without formal review within the Department of Agricultural and Applied Economics.

The University of Minnesota is committed to the policy that all persons shall have equal access to its programs, facilities, and employment without regard to race, color, creed, religion, national origin, sex, age, marital status, disability, public assistance status, veteran status, or sexual orientation.

Information on other titles in this series may be obtained from: Waite Library, University of Minnesota, Department of Agricultural and Applied Economics, 1994 Buford Avenue, 232 COB, St. Paul, MN 55108-6040, U.S.A.

USE OF THE 1992 ICC PUBLIC USE WAYBILL SAMPLE TO ANALYZE CORN MOVEMENTS BY RAIL

by Dan Halbach and Jerry Fruin

This report uses information from the 1992 ICC Public Use Waybill Sample to estimate the rail movements of corn throughout the U.S. during calendar year 1992. The data fields of the Waybill Sample are found on page 3.

Report 1 contains the estimated number of carloads shipped from each origin BEA to each destination BEA as expanded from sample data. (BEA's are listed on pages 5 to 10 and partially shown on the map on page 11.) Also reported is the estimated number of bushels shipped in 1992 which is the expanded carloads times 3479.23 bushels per carload.

Example 1: From Report 1 on page 13 we find that an estimated 35,474 carloads or 123.4 million bushels of corn were shipped by rail from BEA 96 in Minnesota (shaded area on the maps) to eight BEA's. This included 25.9 million bushels shipped within BEA 96, 15.8 million bushels shipped to BEA 98 (Dubuque), 11.4 million bushels to BEA 99 (Davenport-Rock Island), 30.9 million bushels to BEA 171 (Seattle) and 21 million bushels to BEA 172 (Portland).

Report 2 contains the same information but is summarized by destination BEA.

Example 2: From Report 2 on page 37 we find that there were 16,649 estimated cars with 57.9 million bushels of corn shipped to BEA 96. That includes the previously noted 15.8 million bushels shipped within BEA 96, 4.5 million bushels from BEA 97 (Rochester, Minnesota) and 24.1 million bushels from BEA 147 (Sioux Falls).

Because of confidentiality rules the origin BEA or destination BEA or both is left off some records. These are all assigned a BEA code of 0.

STCC code 01132 (corn) has an origin BEA = 0 for 129.3 million bushels and a destination

BEA = 0 for 568.3 million bushels. This amounts to 5.6% of the total for origins and 24.6 % of the terminations of corn shipments in 1992. Both BEA codes are 0 for 16.5 million bushels or .7% of total shipments. However, origin and destination freight rate territories are given for all records. (The territories are shown on the map on page 12.) It is therefore possible to further analyze these movements by using the territory codes.

Report 3 on page 46 is a summary of those records reported as origin BEA = 0 and destination BEA = 0 and accounts for 4,751 carloads or 16,529,822 bushels.

Example 3: 1747 carloads with 6,078,215 bushels that had no origin BEA or destination BEA originated in rate territory 1 (official territory). Of this 1276 carloads with 4,439,497 bushels were shipped elsewhere in territory 1 and 471 carloads with 1,638,717 bushels were shipped to destinations in rate territory 2 (southern territory). There were no shipments without an origin or destination BEA shipped from Rate Territory 1 to destinations in Rate Territories 3, 4 or 5.

Report 4 on page 47 is a summary of records with no origin BEA but a destination BEA.

Example 4: 5584 carloads with 19,438,000 bushels without an origin BEA were shipped from Rate Territory 1. Of these 716 carloads with 2,491,129 bushels went to Portland-Lewiston Maine--Bea 2. Nine of the destination BEA's were also in freight territory 1 and three are in freight territory 2, i.e., BEA's 27, 50 and 113.

Report 5 is a summary of records with no destination BEA but an origin BEA.

Example 5: On page 58 origin BEA 96 has 3594 carloads or 12,504,353 bushels with no destination BEA given. Of this 100 carloads of 347,923 bushels go to destinations in freight territory 1, while 3038 carloads of 10.6 million bushels are shipped to other locations within freight territory 3. The remaining 456 carloads of 1,586,529 bushels are shipped to destinations in rate territory 5.
