Forward

One of the main objectives of this cooperative agreement project was to obtain the UNCTAD TCM data set with the help of cooperators at USDA. With the data, we hoped to learn more about the number and types of nontariff trade measures (NTM) imposed by various countries. The data is for the most part self reported by each country to the United Nations Conference for Trade and Development (UNCTAD) and is only as good as the reports. One of the major disappointments was that no European Country reported any NTM related to health and safety, even though they are known to have several. Another major problem is that the data for the developing countries is not coded in any way that enables it to be retrieved yet.

With these major and some other minor limitations, the UNCTAD TCM data still allows considerable insights into the breadth and depth of various NTM in OECD countries. The organization and tabulation of this data is completed and the results reported herein. Its usefulness in combination with data from other sources is being explored.

NONTARIFF MEASURES ON AGRICULTURAL PRODUCTS IN THE OECD COUNTRIES:

AN EXPLORATION OF THE UNCTAD TRADE CONTROL MEASURES (TCM) DATABASE.

A. INTRODUCTION

The successive multilateral trade negotiations through the General Agreement on Tariff and Trade (GATT) have lowered the average tariff in industrial countries from 40% to about 6% since 1947. The Uruguay round may result in even further tariff reductions. However, the relative importance of GATT admissible (under article XI for example) and nonadmissible nontariff measures have increased. According to the United Conference for Trade and Development (UNCTAD) estimates, there exist in developed countries more than 100 types of NTM (Laird and Yeats 1990). Simultaneously, the Most Favored Nation Principle (MFN) which has been the pillar of trade liberalization in the post-World War II period, is being eroded by bilateral agreements and other discriminatory arrangements among various trading blocks. As a consequence, an important share of world trade (15% by some estimates) now takes place outside the MFN principle which requires that any concession extended by any GATT member to another is automatically extended to all other members (also called contracting parties).

The implication of so many NTM is decreased transparency in protective instruments and increased international trade transaction costs attributable to monitoring, surveillance, compliance, information gathering and administration of NTM. Since most NTM are meant to be nontransparent, there is very little incentive for various countries to provide information on their use of NTM. This lack of empirical information on the extent of NTM use has greatly frustrated policy analysis that might be useful for corrective policy measures. Furthermore, important NTM such as health and sanitary measures, licensing requirements, marking and labeling are not easily translated into

some tariff equivalent measures so they cannot readily be dealt with by traditional tariff systems.

It is the recognition of these problems that led to initiatives by organizations such as UNCTAD to attempt to establish comprehensive NTM inventories for developed and underdeveloped countries. There is probably no more important testimony to the growing importance of NTM than the position of the US in the Uruguay round to negotiate away all NTM, the efforts by agencies such as the USDA, GATT and UNCTAD to establish NTM inventories and the arduous negotiations on agricultural NTM in the Uruguay round. These negotiations were near collapse on more than one occasion precisely because of disagreement over NTM in agriculture, a sector which has been continuously sheltered from the GATT discipline of international trade. Indeed, one of the objectives of the Tokyo round (1973-1979) and the current Uruguay round is to bring agricultural trade under GATT discipline.

B. SOURCES OF NONTARIFF MEASURES.

The growth of NTM has at least three sources (Hillman 1992). Since World War II, thousands of new products have been introduced and old ones modified, including increased use of chemicals and other production processes such as food irradiation. This created a need for new standards, new health and safety regulations and other control mechanisms. At the farm level increased use of pesticides and other productivity increasing products such as growth hormones contributed to the increase in health related regulations.

The development of transportation technology and new methods of food preservation also meant increased agricultural trade flows. The transfer of agricultural technology lowered production cost, increased food production and therefore international market competition that did not exist before. This

was exacerbated by policies to increase farm incomes, provide rural employment and promote self sufficiency in food production. The end result of agricultural technological innovation and its transfer, and surplus generating agricultural policies was to transform the world agricultural trade into a buyers' market. As a result, countries searched for ways to protect domestic markets.

On the demand side, third world countries (potential markets) did not have the foreign currencies needed to purchase imports, while in developed countries, Engel's law put an upper bound on the food share despite economic growth and increasing incomes. On top of this, the elasticity of supply and relatively inelastic demand for food products conspired to widen the gap between supply and demand. With long term inelastic demand, highly elastic supply, long term constant food budget shares and a strong desire to protect farmers' incomes, it seemed a natural course for countries to adopt import restrictions and export measures to penetrate foreign markets and protect domestic ones. Since tariffs have not been successful as an income raising policy instrument (Hillman, 1992), measures adopted by countries were nontariff measures.

A related reason for the growth of NTM follows from trade liberalization itself. GATT's success in reducing tariffs has created a strong incentive for countries to look for other, less transparent ways to protect their agricultural sector, whether it be through waivers and exception to GATT rules or simply the use of GATT nonadmissible measures. There is also a strand of the literature on *endogenous* policy formation that suggests that political parties will adopt indirect i.e roundabout, circuitous, oblique and labyrinthine policies, to obfuscate the redistributive process to avoid the wrath of informed voters (Magee, Brock, Young 1989). For example, imposing a

technical standard, presumably for health and safety reasons, keeps imports out and increases incomes for some domestic industries. Even though the policy effectively reduces consumers' choice set, consumers may not protest since the justification of the policy was to protect their health and safety. The implication is that if consumers are sophisticated enough to understand that the standard being imposed is simply to obfuscate the transfer to the industry, the politician will have to find other policies with a higher degree of obfuscation to achieve the same goal. According to this strand of the literature, then, the relatively high sophistication of voters in developed countries may have led to an exacerbation of increasingly obscure nontariff measures. In general the more difficult the computation of the tariff equivalent of a given policy, the higher the degree of obfuscation. A last source on NTM is GATT itself because it has always permitted the use of certain NTM, albeit under very specific circumstances.

This paper reports on the structure of NTM in a selected group of OECD countries as recorded in the UNCTAD TCM database. More specifically, the variations in the country coverage of NTM and variations in the coverage of specific product groups are analyzed. The analysis will be based on the following four measures: (1) the total number of NTM imposed by various countries, (2) the relative frequency of NTM use, (3) the variety of NTM across countries and (4) the stacking of NTM across commodity and countries. Also of interest is the distribution of NTM among those that explicitly restrict trade and the rest; producer protection NTM vs consumer protection NTM; offensive (import surveillance for example) vs defensive (anti dumping duties for example) NTM, and volume restraining measures vs fiscal and price measures.

In this report, nontariff measures are understood to be measures that either in practice or potentially affect international trade flows by introducing different treatment for domestic and foreign products whether it be because of the basic nature of the NTM or the way these NTM are applied. This definition has been advanced by a variety of authors but is by no means the only one possible.

C. DATA SOURCES

In recognition of the major problems posed by the NTM and the difficulties connected with the lack of information on their application and incidence, initiatives were made in the early 80's to establish comprehensive NTM inventories for developed and underdeveloped countries.

The most extensive effort was undertaken by UNCTAD (with related efforts by GATT) and resulted in the creation of the "UNCTAD Database on Trade Control Measures (TCM)." The database now contains tariff line statistics on over 100 NTM for most developed countries. The UNCTAD data shows the year any given restriction was first imposed, modified or removed between 1980 and 1991. UNCTAD subdivided the NTM into quantity control measures, automatic licensing measures, money and finance measures, price control measures, monopolistic measures and miscellaneous measures. The information is collected from government sources, notifications to GATT of trade measures by member states and other trade publications. However the database has recognized shortcomings.

D. LIMITATION OF THE DATABASE

Export measures such as subsidies and export bans are not included. This is a potentially important limitation since these measures are routinely used and are at the source of some bitter conflicts in international trade.

The US Export Enhancement Programs, the European Community export refund and the Canadian wheat board are examples that come to mind.

Government procurement policies are also not included. Governments are major buyers of goods and services (Baldwin 1970). In 1965 for example, government organizations bought 17% of the goods and services produced in the United Kingdom, 13% in France, 19% in Sweden, and 18% in the United States. In absolute terms, the UK spent \$2.5 billion, the French spent \$1.7 billion and the US spent \$32.6 billion. These are obviously significant potential markets for foreign suppliers but governments have demonstrated a tendency to reserve the public goods and services market for domestic producers. For example, when the Navy was about to accept a foreign tender for canned beef provisions, Congress objected and attached an amendment to the pending Navy Supply bill that categorically rules out foreign supplies, although beef of superior quality could have been procured from Argentina at less than half the cost of the best American bid (Hillman 1992). While GATT specifically excludes government purchasing policies from the basic nondiscrimination rule of the agreement, both the treaty of Rome and the European Free Trade association prohibit preferential treatment to domestic producers as against other producers in member countries. Viewed from this perspective, governments' procurement policies are legitimate issues of trade liberalization in the public markets where discrimination is rooted in tender procedures.

Measures which are implemented for the administration of other measures are not included in the database. This is potentially important because the more implementing measures, the less transparent is the process. Also, many implementing measures could be put in place for the sole purpose of frustrating imports. These measures may include numerous lengthy forms to be

filled out before exporting to a given country, or a lack of a central point where the exporters can get all the information they need about the regulations. Also, dispersing the implementation among many government agencies will effectively increase the international trade transaction costs in terms information gathering and decision costs.

Certain measures are not operational all the time and enter into action only when circumstances require their action. The use of a simple frequency index may therefore overstate the extent of trade restrictiveness.

Environmental measures and their product coverage are also not included. These measures are emerging as a potentially important source of conflict in international trade. The US Congress has made it clear that the passage of the North American Free Trade Act will depend on how environmental issues between US and Mexico are dealt with. As the GATT notes, "There is much evidence which points to a serious risk of environmental issues being exploited by protectionists to their own advantage. This can occur at any of the several stages: by promoting policies that discriminate against imports as part of the solution to environmental problems, by biasing the choice between positive and negative incentives in favor of trade sanctions, by pushing for the inclusion of unnecessary trade provisions in multilateral trade agreements, or by deliberately promoting product standards that place a proportionately greater cost burden on foreign producers."

Since 1980, the GATT dispute settlement mechanism has produced at least five panel reports that include relevant interpretation of GATT rules in the environmental area (US vs Canada on tuna products; Canadian ban on exports of unprocessed herrings and salmon for reasons of species conservation; Thailand's ban on imported cigarettes; Canada, EC and Mexico vs US for taxes on petroleum to finance a superfund for cleaning up toxic waste sites; US vs

Mexico on tuna caught in drift nets) (GATT 1992). Also since 1980, protection of the environment has been given as the rationale for applying technical regulations. From 1980 to 1990, 211 notifications of this nature were made and 168 notifications were given citing grounds of health and public safety.

At national levels governments are creating environmental legislation that would restrict or alter trade policy. The US International Trade Commission, for example, identified thirty three environmental bills introduced in the 101st Congress that would in some ways condition trade on environmental protection. This environmental conditionality would force US trading partners to comply with minimum environment standards or face trade sanctions. This was essentially the meaning of the recently resolved US-Mexico tuna dolphins dispute. What the above facts suggest is that future NTM inventories would have to gather information on environmentally related measures, as well as other measures that act as NTM.

Another major difficulty is that an NTM inventory only records the existence of nontariff measures but tells nothing about their restrictive effects. For many policy needs such as estimating trade, employment and other economic effects ad valorem equivalents of NTM are required. UNCTAD specifically cautions that as the degree of restrictiveness of measures classified into the same category may vary from country to country, particular caution should be exercised when cross-country analysis is made using the UNCTAD data.

E. METHODOLOGY

In the analysis the indicators used are based on simply counting the measures imposed by various countries on various commodities.

The first one is the total number of nontariff measures and is calculated as the total number of NTM imposed on imported agricultural

commodities. Let j be the type of NTM and i the imported product. Further let D_{ijr} be a binary variable which takes the value of one if NTM j was imposed on imported product i by country r and zero otherwise. The total number of NTM imposed by a country is given by the following formula:

$$T_r = \sum_i \sum_j D_{ijr} \quad (1)$$

Caution must be exercised when interpreting this measure as an indicator of potential protection because all NTM are not equally restrictive. Table I shows T_r for the various countries.

Using the same notation one can define the total number of type j NTM imposed by country r on all agricultural products imports as:

$$N_{jr} = \sum_i D_{ijr} \quad (2)$$

The relative frequency of application of NTM j is shown in Table IV and is calculated as:

$$F_{jr} = \frac{N_{jr}}{T_r} \quad (3)$$

Let J_r be the total number of different types of NTM imposed by country r . J_r is therefore a diversity of NTM use indicator. This indicator represents the number of different types of NTBs imposed by a country and is shown in Table II. Another important indicator is the stacking index. It indicates the number of different NTM that are simultaneously applied on a given commodity and is recorded in Table III. it is calculated as:

$$S_{ir} = \frac{\sum_j D_{ijr}}{J_r} \quad (4)$$

F. THE RESULTS

TABLE I

TOTAL NUMBER OF NONTARIFF MEASURES

<u>COUNTRY</u>	<u>TOTAL NTM</u>	<u>RANK</u>
CANADA	1464	1
COUNTRY 918	867	2
SWEDEN	709	3
AUSTRALIA	418	4
FRANCE	394	5
NORWAY	393	6
NEW ZEALAND	323	7

BELGIUM&LUX	93	12
GREECE	55	13
DENMARK	32	14
GERMANY	24	15
UNITED KINGDOM	14	16
IRELAND	3	17

The total number of NTM suggests that countries impose a high number of measures on the imports. This total number of NTM is closely related to the number of products imported. Also if the same measure is imposed on five commodities for example, it will be counted five times giving the misleading impression that the country imposes a lot of measures. It gives no indication of the type of measures and how restrictive they might be. Inferences on comparative protectionism based on the information in Table I should therefore be done with extreme caution. For example, Canada is by no means the most protectionist country. One has, therefore, to look at the number of different types of NTM imposed by countries, i.e, the diversity index given in Table II. Compared to the total number of NTM, the diversity indicator is a better measure of the extent of protectionism because the more types of NTM, the higher the probability that some will be highly restrictive. With the

exception of the US, Austria, Norway and France, where the rankings on Table I and Table II are different, the two measures give comparable rankings. For most of the other countries, the difference in ranking is only one or two points.

TABLE II

DIVERSITY: NUMBER OF DIFFERENT NONTARIFF MEASURES IMPOSED BY EACH COUNTRY

<u>COUNTRY</u>	<u>DIVERSITY</u>	<u>RANK</u>
NORWAY	15	1
UNITED STATES	14	2
AUSTRIA	13	3
CANADA	13	4
AUSTRALIA	11	5
SWEDEN	11	6

ITALY	3	13
GERMANY	3	14
BELGIUM&LUX	2	15
IRELAND	2	16
UNITED KINGDOM	1	17

With the qualification on the data limitations outlined earlier, the diversity indicator also gives a measure of the difficulties involved in a barrier by barrier negotiations for trade liberalization purposes. For a country like Norway, negotiations would have to cover 15 different NTM on a wide range of agricultural products. The problem is even magnified by the fact that different types of NTM are stacked on a single commodity as Table III demonstrates. Australia, for example, imposes 11 different types of NTM, 9 of these 11 are found on fruits and vegetables, 8 out of the 11 are also stacked on dairy products. Grain products rank third in terms of stacking degrees. In general, the stacking of NTM seems to be the norm. One way of

negotiating NTM that has been proposed in the current Uruguay round is their tariffication. Table III illustrates the practical difficulties involved in tariffication. Stacking makes it rather difficult to calculate the tariff equivalent because what is observed in fact are the cumulated effects of all the NTM imposed on the given commodity. It must be observed that stacking on commodity groups (as given in Table III) may differ from stacking on specific products but is present. For example, imports of sugar and honey into the EEC face seasonal prohibitions, variable import levies, licensing requirements and bilateral quotas while unmilled wheat faces quotas and levies. Naturally, stacking on commodity groups is higher than stacking on specific products. Table III also indicates that high levels of stacking are frequently present on fruits and vegetables and dairy products. In the stacking index column, the denominator is total number of different types of NTM imposed by the corresponding country and the numerator is the number of different types of NTM found on the corresponding commodity group.

The previous indicators, while demonstrating the magnitude of the NTM in agriculture, give no indication of what they are or how restrictive those measures are. That information can only be obtained through an analysis of the frequency of NTM use across countries. In Table IV the top three most frequently used NTM are listed for each country. Nearly all countries use some volume control measures such as quotas, embargoes, import permits and import surveillance. The other set of measures mainly used by EEC countries are price and tax measures such as commodity taxes, variable levies, minimum prices, reference prices and excise taxes. It appears that the three top measures used by each country generally restrict trade directly and are overwhelmingly producer protection measures. New Zealand, Australia, Canada and Norway have positive consumer measures such as marking and packing requirements. Health and safety measures are not available for many countries and therefore cross country comparisons would be highly misleading. The information presented in Table I-IV is aggregated. In the appendix and annexes that follow, details are given for all the countries under analysis. For each country, two tables were constructed. One table gives the name, the code, the number of times and the frequency of use of all nontariff measures imposed by that country. The second table gives the distribution of those

nontariff measures among product groups and all the summary indicators used above are calculated on the basis of these two tables using the formula developed in the methodology section.

TABLE IV

FREQUENCY OF NTM USE BY COUNTRY

<u>COUNTRY</u>	<u>NTM CODE</u>	<u>FREQUENCY</u>	<u>NTM NAMES</u>
AUSTRALIA	8711,13,14	45.9	Health and safety regulations
	8730,31	40.2	Marking and packing requirements

G. SOME CONCLUDING OBSERVATIONS.

The fundamental forces that have led to the proliferation of nontariff measures have not gone away. The structural gap between demand and supply elasticities, the long term constancy of the food budget will not change. The rate of introduction of new products and new production processes will not slow down. It is reported, for example, that the rate of introduction of new products in the United States in the 1980's was twice of that of the 70's and in 1990 alone, over 13,000 new products were introduced. This growth rate is expected to persist (Russo and McLaughlin 1992). New products carry new and unknown risks and with them the need for technical health and safety regulations that have the potential of acting as new nontariff measures. Increased value of time, structural change in the family with more working

women, expected mergers and acquisitions in the food industry to compete in the global marketplace, more sophisticated and health aware consumers with international linkages will all require regulations with the potential of them becoming NTM.

There is an emerging trend for policy makers to link environmental performance and trade. This is illustrated by the readiness to use trade measures to enforce national and international environmental objectives. So far, most of the prominent cases are food and agriculture related and their arbitration by GATT has shown the extent to which the environmental trade linkage is bound to lead to more NTM. Also from the arduous negotiations over nontariff measures in the current Uruguay round one cannot escape the conclusion that all that can be achieved is a reduction in some of the existing measures and a framework for future negotiations of the others. The implication of the above facts is that nontariff measures are here to stay and mechanisms must be designed to systematically collect information on their use. It is remarkable, for example, that despite the demonstrated importance of health and safety measures as NTM, no records of them can be found in UNCTAD TCM database for most of the EEC countries. Nevertheless, the summary measures we calculated show that even before any economic analysis is done, one can gain a first order estimate of the importance of nontariff measures across products and nations. These primitive indicators can be combined with product and country specific information in order to evaluate the impact of those NTM on trade flows.

APPENDIX 1: STRUCTURE OF NONTARIFF MEASURES FOR ALL COUNTRIES.

On the first table for each country, column three and four are respectively: The total number of j type NTM over all agricultural products (N_{jr} in the methodology section) and relative frequency of the use of a specific NTM compared to all the NTM in the country (F_{jr} in the methodology section). On the second table for each country are the details of the first table. Summing vertically gives N_{jr} while summing over the N_{jr} gives the total number of NTM imposed by a country on all its agricultural imports (T_r in the methodology section) and dividing the two gives the relative frequency. The columns are NTM codes. The meaning of the codes is given in ANNEX 2. The rows are product codes and the corresponding product names are shown in ANNEX 3 for all countries except US and Canada. ANNEX 4 and ANNEX 5 give product codes and names for Canada and the United States of America.

Australia (036)

Non tariff measures	NTM code	Number	Frequency
Preferential rates /under tariff quota	1191	8	1.9

ANNEX 6: STANDARD INDUSTRIAL CLASSIFICATION FOR AGRICULTURE, FORESTRY AND
FISHING, FOOD AND KINDRED PRODUCTS.

DIVISION A

Agriculture, Forestry, and Fishing

The Division as a Whole

This division includes establishments primarily engaged in agricultural production, forestry, commercial fishing, hunting and trapping, and related services.

The classification of agricultural production covers establishments (e.g., farms, ranches, dairies, greenhouses, nurseries, orchards, hatcheries) primarily engaged in the production of crops, plants, vines, or trees (excluding forestry operations); and the keeping, grazing, or feeding of livestock for the sale of livestock or livestock products (including serums), for livestock increase, or for value increase. Livestock as used here includes cattle, sheep, goats, hogs, and poultry. Also included are animal specialties, such as horses, rabbits, bees, pets, fur-bearing animals in captivity, and fish in captivity. Agricultural production also includes establishments primarily engaged in the operation of sod farms, cranberry bogs, and poultry hatcheries; in the production of mushroom, bulbs, flower seeds, and vegetable seeds; and in the growing of hydroponic crops.

Farms are the establishment units generally utilized for the purpose of industrial classification of agricultural production. A farm may consist of a single tract of land or a number of separate tracts which may be held under different tenures. For example, one tract may be owned by the farm operator and another rented. It may be operated by the operator alone or with the assistance of members of the household or hired employees, or it may be operated by a partnership, corporation, or other type of organization. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a farm.

The classification of agricultural services includes establishments primarily engaged in supplying soil preparation services, crop services, landscape and horticultural services, veterinary and other animal services, and farm labor and management services.

The classification of forestry covers establishments primarily engaged in the operation of timber tracts, tree farms, or forest nurseries; in the gathering of forest products; or in performing forestry services. Logging establishments are classified in Manufacturing, Industry 2411.

The classification of fishing and hunting and trapping covers establishments primarily engaged in commercial fishing (including shellfish and marine products); in operating fish hatcheries and fish and game preserves; and in commercial hunting and trapping.

Establishments which produce agricultural commodities and sell them directly to the general public for personal or household consumption are classified in Major Groups 01 and 02.

Major Group 01.—AGRICULTURAL PRODUCTION—CROPS

The Major Group as a Whole

This major group includes establishments (e.g., farms, orchards, greenhouses, nurseries) primarily engaged in the production of crops, plants, vines, and trees (excluding forestry operations). This major group also includes establishments primarily engaged in the operation of sod farms, and cranberry bogs; in the production of mushroom, bulbs, flower seeds, and vegetable seeds; and in the growing of hydroponic crops. Seeds of field crops are classified in the same industry as crops grown for other purposes.

An establishment primarily engaged in crop production (Major Group 01) is classified in the industry (four-digit) and industry group (three-digit) which accounts for 50 percent or more of the total value of sales for its agricultural production. If the total value of sales for agricultural products of an establishment is less than 50 percent from a single four-digit industry, but 50 percent or more of the value of sales for its agricultural products derives from the products of two or more four-digit industries within the same three-digit industry group, the establishment is classified in the miscellaneous industry of that industry group; otherwise, it is classified as a general crop farm in Industry 0191. Establishments that derive 50 percent or more of the value of sales from horticultural specialties of Industry Group 018 are classified in Industry 0181 or 0182 according to their primary activity.

Industry

011

CASH GRAINS

0111 Wheat

Establishments primarily engaged in the production of wheat.

Wheat farms

0112 Rice

Establishments primarily engaged in the production of rice.

Rice farms

0115 Corn

Establishments primarily engaged in the production of field corn for grain or seed. Establishments primarily engaged in the production of sweet corn are classified in Industry 0161, and those producing popcorn are classified in Industry 0119.

Corn farms, except sweet corn or popcorn

0116 Soybeans

Establishments primarily engaged in the production of soybeans.

Soybean farms

0119 Cash Grains, Not Elsewhere Classified

Establishments primarily engaged in the production of cash grains, not elsewhere classified. Included in this industry are establishments primarily engaged in the production of dry field and seed peas and beans, safflowers, sunflowers, or popcorn. This industry also includes establishments deriving 50

percent or more of their total value of sales of agricultural products from cash grains (Industry Group 011), but less than 50 percent from products of any single industry.

Barley farms
Bean farms, dry field and seed
Buckwheat farms
Clover farms
Flaxseed farms
Grain farms, except wheat, rice, corn, and soybeans
Lentil farms
Milo farms
Mustard seed farms
Oat farms, dry field and seed
Potato farms
Rye farms
Safflower farms
Sorghum farms, except for syrup
Sunflower farms

013

FIELD CROPS, EXCEPT CASH GRAINS

0131 Cotton

Establishments primarily engaged in the production of cotton and cotton-seed.

Cotton farms

Cottonseed farms

0132 Tobacco

Establishments primarily engaged in the production of tobacco.

Tobacco farms

0133 Sugarcane and Sugar Beets

Establishments primarily engaged in the production of sugarcane and sugar beets.

Beet farms, sugar
Cane farms, sugar

Sugar beet farms
Sugarcane farms

05

0134 Irish Potatoes

Establishments primarily engaged in the production of potatoes, except sweet potatoes. Establishments primarily engaged in the production of sweet potatoes and yams are classified in Industry 0139.

Potato farms, Irish
Potato farms, except sweet potato and yam

0139 Field Crops, Except Cash Grains, Not Elsewhere Classified

Establishments primarily engaged in the production of field crops, except cash grains, not elsewhere classified. This industry also includes establishments deriving 50 percent or more of their total value of sales of agricultural products from field crops, except cash grains (Industry Group 013), but less than 50 percent from products of any single industry.

Alfalfa farms
Broccoli farms
Clover farms

Mediterranean melon farms
Melon farms
Onion farms
Pineapple farms, except dry pine
Pumpkin farms, sweet and hot (vegetable)
Romaine farms
Snap bean farms (bush and pole)
Squash farms
Tomato farms
Turnip farms
Vegetable farms
Watermelon farms

017

FRUITS AND TREE NUTS

0171 Berry Crops

Establishments primarily engaged in the production of cranberries, bush berries, and strawberries.

Berry farms
Blackberry farms
Blueberry farms
Cranberry bogs
Currant farms

Dashberry farms
Loganberry farms
Raspberry farms
Strawberry farms

0172 Grapes

Establishments primarily engaged in the production of grapes.

Grape farms

Vineyards

0173 Tree Nuts

Establishments primarily engaged in the production of tree nuts.

Almond groves and farms
Pistachio groves and farms
Walnut groves and farms

Peanut groves and farms
Pistachio groves and farms
Walnut groves and farms

0174 Citrus Fruits

Establishments primarily engaged in the production of citrus fruits.

Citrus groves and farms
Grapefruit groves and farms
Lemon groves and farms

Lime groves and farms
Orange groves and farms
Tangerine groves and farms

0175 Deciduous Tree Fruits

Establishments primarily engaged in the production of deciduous tree fruits. Establishments primarily growing citrus fruits are classified in Industry 0174, and those growing tropical fruits are classified in Industry 0179.

Apple orchards and farms
Apricot orchards and farms
Cherry orchards and farms
Nectarine orchards and farms
Peach orchards and farms
Pear orchards and farms

FRUITS AND TREE NUTS—Con.

0179 Fruits and Tree Nuts, Not Elsewhere Classified

Establishments primarily engaged in the production of fruits and nuts, not elsewhere classified. This industry also includes establishments deriving 50 percent or more of their total value of sales of agricultural products from fruit and tree nuts (Industry Group 017), but less than 50 percent from products of any single industry.

Avocado orchards and farms
Banana farms
Coffee farms
Date orchards and farms
Fig orchards and farms

Kiwi fruit farms
Olive groves and farms
Pineapple farms
Plantain farms
Tropical fruit farms

018

HORTICULTURAL SPECIALTIES

0181 Ornamental Floriculture and Nursery Products

Establishments primarily engaged in the production of ornamental plants and other nursery products, such as bulbs, florists' greens, flowers, shrubbery, flower and vegetable seeds and plants, and sod. These products may be grown under cover (greenhouse, frame, cloth house, lath house) or outdoors.

Bedding plants, growing of
Bulbs, growing of
Floral nursery, except forest shrubbery
Flowers, growing of
Florists' greens, growing of
Foliage, growing of
Fruit stocks, growing of
Greenhouses for floral products
Moss, pressed and cream—growing of

Nursery stock, growing of
Plants, ornamental, growing of
Plants, potted, growing of
Rose growers
Seed, flower and vegetable, growing of
Shrubbery, except forest shrubbery
Sod farms
Vegetable bedding plants, growing of

06

0182 Food Crops Grown Under Cover

Establishments primarily engaged in the production of mushrooms or of fruits and vegetables grown under cover.

Bean sprouts grown under cover
Fruits grown under cover
Greenhouses for food crops
Hydroponic crops, grown under cover
Mushroom spawn, production of
Mushrooms, growing of

Mushroom grown under cover
Seedling grown under cover
Tomatoes grown under cover
Vegetables grown under cover

019

GENERAL FARMS, PRIMARILY CROP

0191 General Farms, Primarily Crop

Establishments deriving 50 percent or more of their total value of sales of agricultural products from crops, including horticultural specialties, but less than 50 percent from products of any single three-digit industry group.

Crop farms, general

Major Group 02.—AGRICULTURAL PRODUCTION—LIVESTOCK AND ANIMAL SPECIALTIES

The Major Group as a Whole

This major group includes establishments (e.g., farms, ranches, dairies, feedlots, egg production facilities, broiler facilities, poultry hatcheries, apiaries) primarily engaged in the keeping, grazing, or feeding of livestock for the sale of livestock or livestock products (including serum), for livestock increase, or for value increase. Livestock, as used here, includes cattle, hogs, sheep, goats, and poultry of all kinds, also included in this major group are animal specialties, such as horses, rabbits, bees, pets, fish in captivity, and fur-bearing animals in captivity.

An establishment primarily engaged in the production of livestock or livestock products (Major Group 02) is classified in the industry (four-digit) or industry group (three-digit) which accounts for 50 percent or more of the total value of sales for its agricultural production. If the total value of sales for agricultural products of an establishment is less than 50 percent from a single four-digit industry, but 50 percent or more of the value of sales for its agricultural products derives from the products of two or more four-digit industries within the same three-digit industry group, the establishment is classified in the miscellaneous industry of that industry group; otherwise, it is classified as a general livestock farm in Industry 0201.

Industry
Group
No.

Industry
No.

021

LIVESTOCK, EXCEPT DAIRY AND POULTRY

0211 Beef Cattle Feedlots

Establishments primarily engaged in the fattening of beef cattle in a confined area for a period of at least 30 days, on their own account or on a contract or fee basis. Feedlot operations that are an integral part of the breeding, raising, or grazing of beef cattle are classified in Industry 0212. Establishments which feed beef cattle for periods of less than 30 days, generally in connection with their transport, are classified in Transportation, Industry 4789.

Cattle feeding farms
Cattle feedlot operations
Feedlots, cattle

Stockyards, exclusively for fattening cattle

0212 Beef Cattle, Except Feedlots

Establishments primarily engaged in the production or feeding of beef cattle, except feedlots. Establishments primarily raising dairy cattle are classified in Industry 0241.

Beef cattle farms, except feedlots
Cattle raising farms

Cattle ranches

0213 Hogs

Establishments primarily engaged in the production or feeding of hogs on their own account or on a contract or fee basis.

Feedlots, hog

Hog farms

Industry
Group
No.

Industry
No.

LIVESTOCK, EXCEPT DAIRY AND POULTRY—Con.

0214 Sheep and Goats

Establishments primarily engaged in the production of sheep, lambs, goats, goats' milk, wool, and mohair, including the operation of lamb feedlots, on their own account or on a contract or fee basis.

Feedlot, lamb
Goat farms
Goat milk production
Mohair production
Sheep feeding farms and ranches
Sheep raising farms and ranches
Wool production

0219 General Livestock, Except Dairy and Poultry

Establishments deriving 50 percent or more of their total value of sales of agricultural products from livestock and livestock products classified in Industry Group 021, but less than 50 percent from products of any single industry.

DAIRY FARMS

0241 Dairy Farms

Establishments primarily engaged in the production of cows' milk and other dairy products and in raising dairy heifer replacements. Such farms may process and bottle milk on the farm and sell at wholesale or retail. However, the processing and/or distribution of milk from a separate establishment not on the farm is classified in manufacturing or trade. Establishments primarily producing goats' milk are classified in Industry 0214.

Dairy farms
Dairy heifer replacement farms
Milk production, dairy cattle farm

025

POULTRY AND EGGS

0261 Broiler, Fryer, and Roaster Chickens

Establishments primarily engaged in the production of chickens for slaughter, including those grown under contract.

Broiler chickens, raising of
Chicken farms or ranches, raising for slaughter
Cornish hen farms
Frying chickens, raising of
Roasting chickens, raising of

0262 Chicken Eggs

Establishments primarily engaged in the production of chicken eggs, including table eggs and hatching eggs, and in the sale of cull hens.

Chicken egg farms
Starved pullet farms

0263 Turkeys and Turkey Eggs

Establishments primarily engaged in the production of turkeys and turkey eggs.

Turkey egg farms and ranches
Turkey farms and ranches

0264 Poultry Hatcheries

Establishments primarily engaged in operating poultry hatcheries on their own account or on a contract or fee basis.

Chicken hatcheries
Egg hatcheries, poultry
Poultry hatcheries

Industry
Group
No.

Industry
No.

POULTRY AND EGGS—Con.

0269 Poultry and Eggs, Not Elsewhere Classified

Establishments primarily engaged in the production of poultry and eggs, not elsewhere classified. This industry also includes establishments deriving 50 percent or more of their total value of sales of agricultural products from poultry and eggs (Industry Group 026), but less than 50 percent from products of any single industry.

Duck farms
Egg farms, poultry, except chickens and turkey
Goose farms
Pheasant farms
Pigeon farms
Quail farms
Squab farms

027

ANIMAL SPECIALTIES

0271 Fur-Bearing Animals and Rabbits

Establishments primarily engaged in the production of fur and fur-bearing animals and rabbits.

Chinchilla farms
Fox farms
Fur farms
Gnu farms (fur-bearing animals)
Mink farms
Rabbit farms

0272 Horses and Other Equines

Establishments primarily engaged in the production of horses and other equines.

Barro farms
Dressage farms
Horse farms
Male farms
Pony farms

0273 Animal Aquaculture

Establishments primarily engaged in the production of finfish and shellfish, such as crustaceans and mollusks, within a confined space and under controlled feeding, sanitation, and harvesting procedures. Establishments primarily engaged in hatching fish and in operating fishing preserves are classified in Industry 0921.

Catfish farms
Crustacean farms
Prawn farms
Fish farms, except hatcheries
Goldfish farms
Minnow farms
Mollusk farms
Tropical aquarium fish farms
Trout farms

0279 Animal Specialties, Not Elsewhere Classified

Establishments primarily engaged in the production of animal specialties, not elsewhere classified, such as pets, bees, worms, and laboratory animals. This industry also includes establishments deriving 50 percent or more of their total value of sales of agricultural products from animal specialties (Industry Group 027), but less than 50 percent from products of any single industry.

Alligator farms
Aviculture
Aviculture (e.g., parakeet, canary, dove, budgie)
Bee farms
Cat farms
Dog farms
Earthworm hatcheries
Frog farms
Honey production
Kenneb, breeding and raising own stock
Laboratory animal farms (e.g., rats, mice, guinea pigs)
Silkworm production and silkworm farms
Worm farms

Industry
Group

029

GENERAL FARMS, PRIMARILY LIVESTOCK AND ANIMAL SPECIALTIES

0291 General Farms, Primarily Livestock and Animal Specialties

Establishments deriving 50 percent or more of their total value of sales of agricultural products from livestock and animal specialties and their products, but less than 50 percent from products of any single three-digit industry group.

Animal specialty and livestock farms, general Livestock and animal specialty farms, general

Major Group 07.—AGRICULTURAL SERVICES

The Major Group as a Whole

This major group includes establishments primarily engaged in performing soil preparation services, crop services, veterinary services, other animal services, farm labor and management services, and landscape and horticultural services, for others on a contract or fee basis. However, feedlots and poultry hatcheries operated on a contract or fee basis are included in Major Group 02.

Industry
Group
No.
071

SOIL PREPARATION SERVICES

0711 Soil Preparation Services

Establishments primarily engaged in land breaking, plowing, application of fertilizer, seed bed preparation, and other services for improving the soil for crop planting. Establishments primarily engaged in land clearing and earth moving for terracing and pond and irrigation construction are classified in Construction, Industry 1629.

Chemical treatment of soil for crops
Fertilizer application for crops
Limbs spreading for crops

Plowing
Seed bed preparation
Weed control, crop, before planting

072

CROP SERVICES

0721 Crop Planting, Cultivating, and Protecting

Establishments primarily engaged in performing crop planting, cultivating, and protecting services. Establishments primarily engaged in complete maintenance of citrus groves, orchards, and vineyards are classified in Industry 0762. Establishments providing water for irrigation, or providing both water and irrigation services, are classified in Transportation and Public Utilities, Industry 4971.

Aerial dusting and spraying
Bracing of orchard trees and vines
Citrus grove cultivation services
Cultivation services, mechanical and manual
Dusting of crops
Dusting control for crops, with or without fertilizing
Dusting crops, with or without fertilizing
Entomological services, agricultural
Flooding
Insect control for crops, with or without fertilizing
Irrigation system operation services (not providing water)
Orchard cultivation services

Planting crops, with or without fertilizing
Pollinating
Pruning of orchard trees and vines
Seeding crops, with or without fertilizing
Seeding of sprouts and tugs
Spraying crops, with or without fertilizing
Spraying on orchard trees and vines
Thinning of crops, mechanical and chemical
Tree, orchard, cultivation of
Tree, orchard, planting, pruning, hoeing, spraying, removal, and surgery
Vineyard cultivation services
Weed control, crop, after planting

0722 Crop Harvesting, Primarily by Machine

Establishments primarily engaged in mechanical harvesting, picking, and combining of crops, and related activities, using machinery provided by the service firm. Farm labor contractors providing personnel for manual harvesting are classified in Industry 0761.

2991131

ANIMAL SERVICES EXCEED VETERINARY

0751 Livestock Services, Extent Veterinary

Nuts, machine harvesting of
Peanuts, machine harvesting of
Sugar beets, machine harvesting of
Sugarcane, machine harvesting of
Threshing service
Vegetables, machine harvesting of

Establishments primarily engaged in performing services on crops, subsequent to their harvest, with the intent of preparing them for market or further processing. Establishments primarily engaged in buying farm products for resale to other than the general public for household consumption and which also prepare them for market or further processing are classified in Wholesale Trade. Establishments primarily engaged in stemming and redrying tobacco are classified in Manufacturing, Industry 2141.

- Nut hulling and shelling
- Packaging fresh or farm-dried fruits and vegetables
- Peanut shelling, custom
- Potato curing
- Seed cleaning
- Sorting, grading, and packing of fruitless and vegetables
- Sweet potato curing
- Tobacco grading
- Vegetable precooling, not in connection with transportation
- Vegetable vacuum cooling

Establishments primarily engaged in ginning cotton

Cotton spinning		(Ginn, cotton: operation of
-----------------	--	-----------------------------

Gins, cotton: operation of

VETERINARY SERVICES

Establishments of licensed practitioners primarily engaged in the practice of veterinary medicine, dentistry, or surgery, for cattle, hogs, sheep, goats, and poultry. Establishments of licensed practitioners primarily engaged in treating all other animals are classified in Industry 0742.

Veterinary services for livestock

Establishments of licensed practitioners primarily engaged in the practice of veterinary medicine, dentistry, or surgery, for animal specialties. Animal specialties include horses, bees, fish, fur-bearing animals, rabbits, dogs, cats, and other pets and birds, except poultry. Establishments of licensed practitioners primarily engaged in veterinary medicine for cattle, hogs, sheep, goats, and poultry are classified in Industry 0741.

Veterinary services for pets and other animal specialties

0751 Livestock Services, Extent Veterinary

Establishments primarily engaged in performing services, except veterinary for cattle, hogs, sheep, goats, and poultry. Dairy herd improvement associations are also included in this industry. Establishments primarily engaged in the fattening of cattle are classified in Industry 0211. Establishments engaged in incidental feeding of livestock as a part of holding them in stockyards for periods of less than 30 days (generally in the course of transportation) are classified in Transportation and Public Utilities, Industry 4789. Establishments primarily engaged in performing services, except veterinary, for animals, except cattle, hogs, sheep, goats, and poultry are classified in Industry 7162.

Pedigree record services for cattle, hogs, sheep, goats, and poultry
Sheep dipping and shearing
Showring of cattle, hogs, sheep, goats, and poultry
Slaughterhouse, custom: for individuals
Vaccinating livestock, except by veterinarians

Establishments primarily engaged in performing services, except veterinary, for pets, equines, and other animal specialties. Establishments primarily engaged in performing services other than veterinary for cattle, hogs, sheep, goats, and poultry are classified in Industry 0751. Establishments primarily engaged in training racehorses are classified in Services, Industry 7948.

Pedigree record services for pets and other animal specialists
Showing of pets and other animal specialists
Training horses, except racing
Training of pets and other animal specialists
Vaccinating pets and other animal specialists, except by veterinarians

FARM LABOR AND MANAGEMENT SERVICES

Establishments primarily engaged in supplying labor for agricultural production or harvesting. Establishments primarily engaged in machine harvesting are classified in Industry 0722.

Putro labor contractors

Establishments are primarily engaged in providing farm management services, including management or complete maintenance of citrus groves, orchards, and vineyards. Such activities may include cultivating, harvesting, or other specialized activities, but establishments primarily engaged in performing such services without farm management services are classified in the appropriate specific industry within Industry Group 072.

Vineyard management and maintenance, with or without crop services

LANDSCAPE AND HORTICULTURE AT STRENGTH

Landscape Counseling and Planning

Establishments primarily engaged in landscape planning and in performing landscape architectural and counseling services.

**Garden planning
Horticultural advisory or counseling
services**

**Landscape architects
Landscape counseling
Landscape planning**

0782 Lawn and Garden Services

Establishments primarily engaged in performing a variety of lawn and garden services. Establishments primarily engaged in the installation of artificial turf are classified in Construction, Industry 1799.

Bermuda springing services
Cemetery upkeep, independent
Garden maintenance
Garden planting
Lawn care
Lawn fertilizing services
Lawn mowing services
Lawn mulching services

Lawn seeding services
Lawn spraying services
Lawn sprinkling services
Mowing highway center strips and edges
Seeding highway strips
Sod laying
Turf installation, except artificial

0783 Ornamental Shrub and Tree Services

Establishments primarily engaged in performing a variety of ornamental shrub and tree services. Establishments primarily engaged in forestry services were classified in Major Group 08. Establishments primarily engaged in general lawn and garden planting and maintenance are classified in Industry 0782, and those primarily engaged in performing shrub and tree services for farm groups are classified in Industry 0721.

Arborist services
Ornamental bush planting, pruning,
braiding, spraying, removal, and sur-
vey
Ornamental tree planting, pruning,
braiding, spraying, removal, and sur-
vey

Tree trimming for public utility lines
Trees, ornamental: planting, pruning, bracing, spraying, removal, and surgery
Utility line tree trimming services

Major Group 08. —FORESTRY

The Major Group as a Whole

This major group includes establishments primarily engaged in the operation of timber tracts, tree farms, forest nurseries, and related activities such as reforestation services and the gathering of gums, barks, balsam needles, maple sap, Spanish moss, and other forest products.

081
TIMBER TRACTS

0811 Timber Tracts

Establishments primarily engaged in the operation of timber tracts or tree farms for the purpose of selling standing timber. Establishments holding timber tracts as real property (not for sale of timber) are classified in Real Estate, Industry 6519; and logging establishments are classified in Manufacturing, Industry 2411.

**Christmas tree growing
Timber tracts**

Tree farms

083

FOREST NURSERIES AND GATHERING OF FOREST PRODUCTS

0831 Forest Numerics and Gathering of Forest Data

Establishments primarily engaged in growing trees for purposes of reforestation or in gathering forest products. The concentration or distillation of these products, when carried on in the forest, is included in this industry.

Balmain needles, gathering of
Distillation of gums if carried on at the
gum farm
Distillation of turpentine and rosin if
carried on at the gum farm
Forest nurseries
Gathering of forest products: (e.g.,
gums, barks, seeds)
Climate, gathering of
Huckleberry stems, gathering of

Lac production
Maple sap, gathering of
Moss, gathering of
Pine gum, extraction of
Rubber plantations
Spanish moss, gathering of
Sphagnum moss, gathering of
Teaberries, gathering of
Tree seed gathering, extracting, and
selling

085

FORESTRY SERVICES

0851 Forestry Services

Establishments primarily engaged in performing, on a contract or fee basis, services related to timber production, wood technology, forestry economics and marketing, and other forestry services, not elsewhere classified, such as cruising timber, firefighting, and reforestation.

Cruising timber
Estimating timber
Fire prevention, forest
Firefighting, forest
Forest management plans, preparation
of

Forestry services
Pest control, forest
Reforestation
Timber valuation

Major Group 09.—FISHING, HUNTING, AND TRAPPING

The Major Group as a Whole

This major group includes establishments primarily engaged in commercial fishing (including crabbing, lobstering, clamming, oystering, and the gathering of sponges and seaweed), and the operation of fish hatcheries and fish and game preserves, in commercial hunting and trapping, and in game propagation.

Industry
Group
No. Industry

Salmon, catching of
Sea herring, catching of
Sharks, catching of
Tuna, catching of
Whiting, catching of

0913 Shellfish

Establishments primarily engaged in the catching or taking of shellfish.

Clams, digging of
Crabs, catching of
Crabs, catching of
Fishes, catching of
Lobsters, catching of
Mussels, taking of

Oyster beds
Oysters, dredging or longing of
Shellfish, catching of
Squid, catching of
Squid, catching of

0919 Miscellaneous Marine Products

Establishments primarily engaged in miscellaneous fishing activities, such as catching or taking of sea urchins, terrapins, turtles, and frogs. The gathering of seaweed and sponges is also included in this industry.

Cultured pearl production
Frogs, catching of
Sea urchins, catching of
Seaweed, gathering of

Sponges, gathering of
Terrapins, catching of
Turtles, catching of

092

0921 Fish Hatcheries and Preserves

Establishments primarily engaged in operating fish hatcheries or preserves. Establishments primarily engaged in the production of fish or frogs under controlled feeding, sanitation, and harvesting procedures are classified in Industry Group 027.

Fish hatcheries

Fishing preserves

097

0971 Hunting and Trapping, and Game Propagation

and preparing electrotyping and stereotype plates, but not blue-printing or photocopying services; Electroplating, plating, metal heat treating, and polishing for the trade;

There are also some manufacturing-type activities performed by establishments which are primarily engaged in activities covered by other divisions, and are, thus, not classified as manufacturing. A few of the more important examples are:

Agriculture, Forestry, and Fishing

Processing on farms is not considered manufacturing if the raw materials are grown on the farm and if the manufacturing activities are on a small scale without the extensive use of paid labor. Other exclusions are threshing and cotton ginning.

Mining

The dressing and beneficiating of ores; the breaking, washing, and grading of coal; the crushing and breaking of stone; and the crushing, grinding, or otherwise preparing of sand, gravel, and nonmetallic chemical and fertilizer minerals other than barite are classified in Mining.

Construction

Fabricating operations performed at the site of construction by contractors are not considered manufacturing, but the prefabrication of sheet metal, concrete, and terrazzo products and similar construction materials is included in the Manufacturing Division.

Wholesale and Retail Trade

Establishments engaged in the following types of operations are included in Wholesale or Retail Trade: cutting and selling purchased carcasses; preparing feed at grain elevators and farm supply stores; stemming leaf tobacco at wholesale establishments; and production of wiping rags. The breaking of bulk and redistribution in smaller lots, including packaging, repackaging, or bottling products, such as liquors or chemicals, is also classified as Wholesale or Retail Trade. Also included in Retail Trade are establishments primarily engaged in selling, to the general public, products produced on the same premises from which they are sold, such as bakeries, candy stores, ice cream parlors, and custom tailors.

Services

Tire retreading and rebuilding, sign painting and lettering shops, computer software production, and the production of motion picture films (including video tapes) are classified in Services. Most repair activities are classified as Services. However, some repair activity such as shipbuilding and boatbuilding and repair, the rebuilding of machinery and equipment on a factory basis, and machine shop repair are classified as manufacturing.

ABBREVIATIONS USED FOR INDEX ITEMS

mach.—machinery
mfgm.—made from purchased materials or materials transferred from another establishment
mises—made in the same establishment as the basic materials

Major Group 20.—FOOD AND KINDRED PRODUCTS

The Major Group as a Whole

This major group includes establishments manufacturing or processing foods and beverages for human consumption, and certain related products, such as manufactured ice, chewing gum, vegetable and animal fats and oils, and prepared feeds for animals and fowls. Products described as dietetic are classified in the same manner as nondietetic products (e.g., as candy, canned fruits, cookies). Chemical sweeteners are classified in Major Group 28.

Industry Group No.	Industry No.
201	MEAT PRODUCTS
2011	Meat Packing Plants

Establishments primarily engaged in the slaughtering, for their own account or on a contract basis for the trade, of cattle, hogs, sheep, lambs, and calves for meat to be sold or to be used on the same premises in canning, cooking, curing, and freezing, and in making sausage, lard, and other products. Also included in this industry are establishments primarily engaged in slaughtering horses for human consumption. Establishments primarily engaged in slaughtering, dressing, and packing poultry, rabbits, and other small game are classified in Industry 2015, and those primarily engaged in slaughtering and processing animals not for human consumption are classified in Industry 2048. Establishments primarily engaged in manufacturing sausages and meat specialties from purchased meats are classified in Industry 2013, and establishments primarily engaged in canning meat for baby food are classified in Industry 2032.

Bacon, side and sliced—mises	Lard—mises
Beef—mises	Lamb—mises
Blood meal	Lamb roasts—mises
Boiled beef—mises	Lamb roasts, except poultry—mises

Hides and skins, cured or uncured	Variety meats edible organs—mises
Hot meat for human consumption—mises	Veal—mises

2013 Sausages and Other Prepared Meat Products

Establishments primarily engaged in manufacturing sausages, cured meats, smoked meats, canned meats, frozen meats, and other prepared meats and meat specialties, from purchased carcasses and other materials. Prepared meat plants operated by packing houses as separate establishments are also included in this industry. Establishments primarily engaged in canning or otherwise processing poultry, rabbits, and other small game are classified in Industry 2015. Establishments primarily engaged in canning meat for baby food are classified in Industry 2032. Establishments primarily engaged in the cutting up and resale of purchased fresh carcasses, for the trade, (including boxed beef) are classified in Wholesale Trade, Industry 5147.

Yogurt, except frozen

203 CANNED, FROZEN, AND PRESERVED FRUITS, VEGETABLES, AND FOOD SPECIALTIES

The canned products of this industry group are distinguished by their processing rather than by the container. The products may be shipped in bulk or in individual cans, bottles, retort pouch packages, or other containers.

2032 Canned Specialties

Establishments primarily engaged in canning specialty products, such as baby foods, nationally specialty foods, and soups, except seafood. Establishments primarily engaged in canning seafoods are classified in Industry 2031.

Baby foods (including cereal), canned
Beans, sprouts, canned
Beans, baked, with or without meat—
canned
Breads, except seafood, canned
Chicken broth and soup, canned
Chili con carne, canned
Chinese foods, canned
Chop suey, canned

CANNED, FROZEN, AND PRESERVED FRUITS, VEGETABLES, AND FOOD SPECIALTIES—Con.

2038 Frozen Specialties, Not Elsewhere Classified

Establishments primarily engaged in manufacturing frozen food specialties, not elsewhere classified, such as frozen dinners and frozen pizza. The manufacture of some important frozen foods and specialties is classified elsewhere. For example, establishments primarily engaged in manufacturing frozen dairy specialties are classified in Industry Group 202, those manufacturing frozen bakery products are classified in Industry Group 205, those manufacturing frozen fruits and vegetables are classified in Industry 2037, and those manufacturing frozen fish and seafood specialties are classified in Industry 2092.

Dinner, frozen packaged
French toast, frozen
Frozen dinner, packaged
Meat, frozen
Native food, frozen

Pizza, frozen
Soup, frozen except seafood
Spaghetti and meatballs, frozen
Waffles, frozen
Whipped topping, frozen

204

GRAIN MILL PRODUCTS

2041 Flour and Other Grain Mill Products

Establishments primarily engaged in milling flour or meal from grain, except rice. The products of flour mills may be sold plain or in the form of prepared mixes or doughs for specific purposes. Establishments primarily engaged in manufacturing prepared flour mixes or doughs from purchased ingredients are classified in Industry 2045, and those milling rice are classified in Industry 2044.

Bar and middlings, except rice
Bread and bread-type roll mixes—mills
Buckwheat flour
Cake flour—mills
Cereal, cracked grain—mills
Corn grits and flakes for brewers' use
Dough ball mix—mills
Dough, refrigerated or frozen—mills
Durum flour
Farina, except breakfast food—mills
Flour mill, cereal except rice
Flour mill, mill
Flour, bleached, prepared, or self-rising—mills
Flour, buckwheat, corn, graham, rye, and wheat

Protein doughs—mills
Graham flour
Granular wheat flour
Grits and flakes, corn for brewers' use
Hominy grits, except breakfast food
Meal, corn
Milling of grain, dry, except rice
Milling of grain, wet, except rice
Milled grain, cake, biscuits, doughnuts—mills
Pancake batter, refrigerated or frozen—mills
Pizza mixes and prepared dough—mills
Semolina (flour)
Sorghum grain flour
Wheat germ
Wheat mill feed

2043 Cereal Breakfast Foods

Establishments primarily engaged in manufacturing cereal breakfast foods and related preparations, except breakfast bars. Establishments primarily engaged in manufacturing granola bars and other types of breakfast bars are classified in Industry 2064.

Breakfast food, cereal
Coffee substitutes made from grain
Corn flakes
Corn, puffed (cereal breakfast food)
Farina, cereal breakfast food
Granola, except bars and clusters
Hominy grits prepared as cereal breakfast food

Infants' foods, cereal type
Oatmeal (cereal breakfast food)
Oats, rolled (cereal breakfast food)
Rice breakfast food
Wheat flakes

Industry
Group
No.

2044 GRAIN MILL PRODUCTS—Con.

2044 Rice Milling

Establishments primarily engaged in cleaning and polishing rice, and in manufacturing rice flour or meal. Other important products of this industry include brown rice, milled rice (including polished rice), rice polish, and rice bran.

Rice, rice
Rice bran
Rice hulls
Rice polish
Rice, brown
Rice, white
Rice cleaning and polishing

Rice polish
Rice, brown
Rice, white
Rice, vitamin and mineral enriched

2045 Prepared Flour Mixes and Doughs

Establishments primarily engaged in preparing flour mixes or doughs from purchased flour. Establishments primarily engaged in milling flour from grain and producing mixes or doughs are classified in Industry 2041.

Biscuit mixes and doughs—mills
Bread and bread-type roll mixes—mills
Cake flour—mills
Cake mixes—mills
Dough, biscuit—mills
Dough, refrigerated or frozen—mills
Dough, refrigerated or self-rising—mills
Flour, bleached or self-rising—mills

Protein doughs—mills
Glutenized mixes—mills
Mixes, flour, e.g., pancake, cake, biscuits, doughnuts—mills
Pancake batter, refrigerated or frozen—mills
Pancake mixes—mills
Pizza mixes and doughs—mills

2046 Wet Corn Milling

Establishments primarily engaged in milling corn or sorghum grain (milo) by the wet process, and producing starch, syrup, oil, sugar, and byproducts, such as gluten feed and meal. Also included in this industry are establishments primarily engaged in manufacturing starch from other vegetable sources (e.g., potatoes, wheat). Establishments primarily engaged in manufacturing table syrups from corn syrup and other ingredients, and those manufacturing starch base dessert powders, are classified in Industry 2099.

Corn oil cake and meal
Corn starch
Corn syrup (including dextrose), unimixed
Dextrine
Distillers
Feed, gluten
Fructose
Glucose
High fructose syrup
Hydrolysis
Meal, gluten

Oil, corn, crude and refined
Potato starch
Rice starch
Starch, instant
Starch, liquid
Starches, edible and industrial
Syrup, corn
Tapioca
Wheat gluten
Wheat starch

2047 Dog and Cat Food

Establishments primarily engaged in manufacturing dog and cat food from cereal, meat, and other ingredients. These preparations may be canned, frozen, or dry. Establishments primarily engaged in manufacturing feed for animals other than dogs and cats are classified in Industry 2048.

Cat food

Dog food

Industry
Group
No

204

GRAIN MILL PRODUCTS—Con.

2048 Prepared Feeds and Feed Ingredients for Animals and Fowls, Except Dogs and Cats

Establishments primarily engaged in manufacturing prepared feeds and feed ingredients and adjuncts for animals and fowls, except dogs and cats. Included in this industry are poultry and livestock feed and feed ingredients, such as alfalfa meal, feed supplements, and feed concentrates and feed premixes. Also included are establishments primarily engaged in slaughtering animals for animal feed. Establishments primarily engaged in slaughtering animals for human consumption are classified in Industry Group 201. Establishments primarily engaged in manufacturing dog and cat foods are classified in Industry 2047.

Alfalfa, cubed
Alfalfa, prepared as feed for animals
Animal feeds, prepared except dog and cat
Bird feed, prepared
Buttermilk emulsion for animal food
Chicken feed, prepared
Citrus seed meal
Earthworm food and bedding
Feed concentrates
Feed premixes
Feed supplements
Feed prepared (including mineral) for animals and fowls—except dogs and cats
Feeds, specially mixed, minus pigs, minis, etc.
Fish feed
Hay, cubed
Homemix, except for human consumption

Keep meal and pellets
Livestock feeds, supplements, and concentrates
Meal, bone prepared as feed for animals and fowls
Mineral feed supplements
Oyster shell, pulverized, and rolled
Oyster shell, ground, used as feed for animals and fowls
Pet food, except dog and cat, canned, frozen, and dry
Poultry feeds, supplements, and concentrates
Shell crushing for feed
Slaughtering of animals, except for human consumption
Stock feeds, dry

205

BAKERY PRODUCTS

2051 Bread and Other Bakery Products, Except Cookies and Crackers

Establishments primarily engaged in manufacturing fresh or frozen bread and bread-type rolls and fresh cakes, pies, pastries and other similar "perishable" bakery products. Establishments primarily engaged in producing "dry" bakery products, such as biscuits, crackers, and cookies, are classified in Industry 2052. Establishments primarily engaged in manufacturing frozen bakery products, except bread and bread-type rolls, are classified in Industry 2053. Establishments producing bakery products primarily for direct sale on the premises to household consumers are classified in Retail Trade, Industry 5461.

Bakery products, fresh bread, cakes, pastries, etc., partially cooked except frozen
Bakery products, partially cooked except frozen
Biscuits, baked baking powder and raised
Bread, brown, Boston and other—canned
Bread, including frozen
Buns, bread-type (e.g., hamburger, hot dog), including frozen
Buns, sweet, except frozen
Cakes, bakery, except frozen

Charlotte, Russe (bakery product), except frozen
Croissants, except frozen
Custards, except frozen
Doughnuts, except frozen
Frozen bread and bread-type rolls
Kishka, except frozen
Kishka, except frozen; e.g., Danish, frozen
Pies, bakery except frozen
Rolls, bread-type, including frozen
Rolls, sweet, except frozen
Sponge goods, bakery, except frozen
Sweet yeast goods, except frozen

Group
No

205

BAKERY PRODUCTS—Con.

2052 Cookies and Crackers

Establishments primarily engaged in manufacturing fresh cookies, crackers, pretzels, and similar "dry" bakery products. Establishments primarily engaged in producing other fresh bakery products are classified in Industry 2051.

Bakery products, dry: e.g., biscuits, crackers, pretzels
Biscuits, baked: dry, except baking powder and related
Combination wafers
Cookies, ice cream
Cookies

Cookies and crumbles
Crackers: e.g., Graham, soda
Maccos
Pretzels
Sables
Sultanas
Zwickels

2053 Frozen Bakery Products, Except Bread

Establishments primarily engaged in manufacturing frozen bakery products, except bread and bread-type rolls. Establishments primarily engaged in manufacturing frozen bread, bread and bread-type rolls are classified in Industry 2051.

Bakery products, frozen: except bread and bread-type rolls
Cakes, frozen: pound, layer, and cheese
Croissants, frozen

Doughnuts, frozen
Pies, bakery, frozen
Sweet yeast goods, frozen

206

SUGAR AND CONFECTIONERY PRODUCTS

2061 Cane Sugar, Except Refining

Establishments primarily engaged in manufacturing raw sugar, syrup, or finished (granulated or clarified) cane sugar from sugarcane. Establishments primarily engaged in refining sugar from purchased raw cane sugar or sugar syrup are classified in Industry 2062.

Cane sugar, made from sugarcane
Molasses, blackstrap, made from sugar
Molasses, made from sugarcane
Sugar, granulated, made from sugar
Sugar, raw

Sugar, invert, made from sugarcane
Sugar, powdered, made from sugarcane
Sugar, raw, made from sugarcane
Syrup, cane, made from sugarcane

2062 Cane Sugar Refining

Establishments primarily engaged in refining purchased raw cane sugar and sugar syrup.

Molasses, blackstrap, made from purchased raw cane sugar or sugar syrup
Refined cane sugar
Sugar, granulated, made from purchased raw cane sugar or sugar syrup
Sugar, invert, made from purchased raw cane sugar or sugar syrup

Sugar, powdered, made from purchased raw cane sugar or sugar syrup
Sugar, refined, made from purchased raw cane sugar or sugar syrup
Syrup, made from purchased raw cane sugar or sugar syrup

2063 Beet Sugar

Establishments primarily engaged in manufacturing sugar from sugar beets.

Beet pulp, dried
Beet sugar, made from sugar beets
Molasses, beet pulp
Molasses, made from sugar beets
Sugar, granulated, made from sugar beets

Sugar, invert, made from sugar beets
Sugar, liquid, made from sugar beets
Sugar, powdered, made from sugar beets
Syrup, made from sugar beets

SUGAR AND CONFECTIONERY PRODUCTS—Con.

2064 Candy and Other Confectionery Products

Establishments primarily engaged in manufacturing candy, including chocolate candy, other confections, and related products. Establishments primarily engaged in manufacturing solid chocolate bars from cacao beans are classified in Industry 2066, those manufacturing chewing gum are classified in Industry 2067, and those primarily engaged in roasting and selling nuts are classified in Industry 2068. Establishments primarily engaged in manufacturing confectionery for direct sale on the premises to household consumers are classified in Retail Trade, Industry 5441.

Bar, candy including chocolate covered bars
Breakfast bars
Cake ornaments, confectionery
Candy, except solid chocolate
Chewing candy, except chewing gum
Chocolate bars, from purchased cocoa or chocolate
Chocolate candy, except solid chocolate
Confectionery
Cough drops, except pharmaceutical preparations
Dietary chocolate covered, sugared, and stuffed
Fruit, peel products: candied, glazed, iced, and crystallized
Fruit, candied, glazed, and crystallized
Pudge (candy)
Granola bars and clusters
Halvah (candy)
Licorice candy
Lemon candy
Meringue candy
Marshmallows
Milk candy covered
Nuts, candy covered
Popsicles
Puffed balls and candy covered pop-corn products

2066 Chocolate and Cocoa Products

Establishments primarily engaged in shelling, roasting, and grinding cacao beans for the purpose of making chocolate liquor, from which cocoa powder and cocoa butter are derived, and in the further manufacture of solid chocolate bars, chocolate coatings, and other chocolate and cocoa products. Also included is the manufacture of similar products, except candy, from purchased chocolate or cocoa. Establishments primarily engaged in manufacturing candy from purchased cocoa products are classified in Industry 2064.

Baking chocolate
Bar, candy solid chocolate
Cacao bean products: chocolate, cocoa butter, and cocoa
Cacao bean shelling, roasting, and grinding for making chocolate liquor
Candy, solid chocolate
Chocolate coatings and syrups
Chocolate liquor
Chocolate syrup
Chocolate, instant
Chocolate, sweetened or unsweetened
Cocoa beans
Cocoa milk, instant
Cocoa, powdered mixed with other substances

2067 Chewing Gum

Establishments primarily engaged in manufacturing chewing gum or chewing gum base.

Chewing gum

Chewing gum base

2068 Salted and Roasted Nuts and Seeds

Establishments primarily engaged in manufacturing salted, roasted, dried, cooked, or canned nuts or in processing grains or seeds in a similar manner for snack purposes. Establishments primarily engaged in manufacturing confectionery-coated nuts are classified in Industry 2064, and those manufacturing peanut butter are classified in Industry 2099.

Nuts, dehydrated or dried
Nuts, salted, roasted, cooked, or canned

Seeds, salted, roasted, cooked, or canned

Industry
Group
No.

Industry
No.

207

FATS AND OILS

2074 Cottonseed Oil Mills

Establishments primarily engaged in manufacturing cottonseed oil, cake, meal, and linters, or in processing purchased cottonseed oil other than into edible cooking oil. Establishments primarily engaged in refining cottonseed oil into edible cooking oils are classified in Industry 2079.

Cottonseed oil, cake, and meal: made in cottonseed oil mill

Cottonseed oil, deodorized
Linters, cottonseed

2075 Soybean Oil Mills

Establishments primarily engaged in manufacturing soybean oil, cake, and meal, and soybean protein isolates and concentrates, or in processing purchased soybean oil other than into edible cooking oil. Establishments primarily engaged in refining soybean oil into edible cooking oils are classified in Industry 2079.

Lecithin, soybean
Soybean flour and grits
Soybean oil, cake, and meal

Soybean oil, deodorized
Soybean protein concentrates
Soybean protein isolates

2076 Vegetable Oil Mills, Except Corn, Cottonseed, and Soybean

Establishments primarily engaged in manufacturing vegetable oil, cake and meal, except corn, cottonseed, and soybean, or in processing similar purchased oils other than into edible cooking oil. Establishments primarily engaged in manufacturing corn oil and its byproducts are classified in Industry 2066, those which are refining vegetable oil into edible cooking oil are classified in Industry 2079, and those refining these oils for medicinal purposes are classified in Industry 2833.

Cedar oil and pomace
Coconut oil
Lard
Lard, rendered
Oil, vegetable, except corn, cottonseed, and soybean
Olefin oil
Palm kernel oil
Peanut oil, cake, and meal
Safflower oil
Safflower seed oil
Tallow, vegetable
Tallow
Walnut oil

2077 Animal and Marine Fats and Oils

Establishments primarily engaged in manufacturing animal oils, including fish oil and other marine animal oils, and fish and animal meal; and those rendering inedible stearin, grease, and tallow from animal fat, bones, and meat scraps. Establishments primarily engaged in manufacturing lard and edible tallow and stearin are classified in Industry Group 201; those refining marine animal oils for medicinal purposes are classified in Industry 2833; and those manufacturing fatty acids are classified in Industry 2839.

Feather meal
Fish liver oil, crude
Fish meal
Fish oil and fish oil meal
Grease, rendering, inedible
Meal, meat and bone, not prepared as feed
Meat and bone meal and lard
Oils, animal
Oils, fish and marine animal: e.g., herring, menhaden, whale (refined), sawdust
Rendering plants, inedible grease and tallow
Slaughter animal inedible
Tallow rendering, inedible

Industry
Group
No.

Industry
No.

207

FATS AND OILS—Con.

2079 Shortening, Table Oils, Margarine, and Other Edible Fats and Oils, Not Elsewhere Classified

Establishments primarily engaged in manufacturing shortening, table oils, margarine, and other edible fats and oils, not elsewhere classified. Establishments primarily engaged in producing corn oil are classified in Industry 2046.

Baking and frying fats (shortening)
Cottonseed cooking and salad oil
Margarine, including imitation
Margarine, including imitation
Nonhydrogenated edible
Oil, hydrogenated, edible
Oil, partially hydrogenated, edible

Oil, vegetable winter season
Peanut cooking and salad oil
Shortening, compound and vegetable
Soybean cooking and salad oil
Vegetable cooking and salad oil, except corn oil, refined

208

BEVERAGES

2082 Malt Beverages

Establishments primarily engaged in manufacturing malt beverages. Establishments primarily engaged in bottling purchased malt beverages are classified in Industry 5181.

Ale
Beer (alcoholic beverage)
Brewer's grain
Liquors, malt

Malt extract, liquid, and syrups
Near beer
Porter (alcoholic beverage)
Stout (alcoholic beverage)

2083 Malt

Establishments primarily engaged in manufacturing malt or malt byproducts from barley or other grains.

Malt byproducts
Malt, barley, rye, wheat, and corn

Malt houses
Sprouls, made in malt houses

2084 Wines, Brandy, and Brandy Spirits

Establishments primarily engaged in manufacturing wines, brandy, and brandy spirits. This industry also includes bonded wine cellars which are engaged in blending wines. Establishments primarily bottling purchased wines, brandy, and brandy spirits, but which do not manufacture wines and brandy, are classified in Wholesale Trade, Industry 5182.

Brandy
Brandy spirits
Wine cellars, bonded, engaged in blending wine

Wine cellars (beverages)
Wines

2085 Distilled and Blended Liquors

Establishments primarily engaged in manufacturing alcoholic liquors by distillation, and in manufacturing cordials and alcoholic cocktails by blending processes or by mixing liquors and other ingredients. Establishments primarily engaged in manufacturing industrial alcohol are classified in Industry 2869, and those only bottling purchased liquors are classified in Wholesale Trade, Industry 5182.

Applejack
Cocktail, alcoholic
Cordials, alcoholic
Distilled spirits, grain and soluble
Rum, alcoholic

Ethyl alcohol for medicinal and beverage purposes
Gin (alcoholic beverage)
Grain alcohol for medicinal and beverage purposes

Industry
Group
No.

Industry
No.

2086

BEVERAGES—Con.

2086 Distilled and Blended Liquors—Con.

Liquors, distilled and blended—except brandy
Rum
Spirits, distilled, except fruit—for beverage purposes

Vodka
Whiskey, bourbon, rye, switch type, and corn

2086 Bottled and Canned Soft Drinks and Carbonated Waters

Establishments primarily engaged in manufacturing soft drinks and carbonated waters. Establishments primarily engaged in manufacturing fruit and vegetable juices are classified in Industry Group 2083, those manufacturing fruit syrups for flavoring are classified in Industry 2087, and those manufacturing nonalcoholic cider are classified in Industry 2099. Establishments primarily engaged in bottling natural spring waters are classified in Wholesale Trade, Industry 5149.

Beer, light and root, bottled or canned
Carbonated beverages, nonalcoholic
Drinks, fruit, bottled, canned, or fresh
Ginger ale, bottled or canned
Iced tea, bottled or canned

Lemonade, bottled, canned, or fresh
Mineral water, carbonated, bottled or canned
Soft drinks, bottled or canned
Tea, bottled or canned
Water, packaged, bottled or canned

2087 Flavoring Extracts and Flavoring Syrups, Not Elsewhere Classified

Establishments primarily engaged in manufacturing flavoring extracts, syrups, powders, and related products, not elsewhere classified, for soda fountain use or for the manufacture of soft drinks, and colors for bakers' and confectioners' use. Establishments primarily engaged in manufacturing chocolate syrup are classified in Industry 2066.

Beverage bases
Bitters (flavoring concentrates)
Burnt sugar (flavoring)
Cocoa, natural and synthetic
Cocoa flavonoids and syrups
Colors for bakers' and confectioners' use, except synthetic
Cordials, nonalcoholic
Dried powders and concentrates

Flavoring concentrates
Flavoring extracts, pastes, powders, and syrups
Food colorings, except synthetic
Food glazes, for glazing foods
Fruit juices, concentrates for fountain use
Fruits, crushed for soda fountain use

209

2091 Canned and Cured Fish and Seafoods

Establishments primarily engaged in cooking and canning fish, shrimp, oysters, clams, crabs, and other seafoods, including soups; and those engaged in smoking, salting, drying, or otherwise curing fish and other seafoods for the trade. Establishments primarily engaged in shucking and packing fresh oysters in nonsealed containers, or in freezing or preparing fresh fish, are classified in Industry 2092.

Canned fish, crustaceans, and mollusks
Caviar, canned
Clams, oysters, fish and seafood, canned
Crabs, oysters, fish, shrimp, and other seafoods, bottled or canned
Coddle, smoked, salted, dried, and pickled
Cub maki, canned and cured
Finnan haddock (smoked haddock)
Fish and seafood cakes, canned
Fish egg ball, canned

Fish, canned and cured
Fish, cured, dried, pickled, salted, and smoked
Herring, smoked, salted, dried, and pickled
Mackerel, smoked, salted, dried, and pickled
Oysters, canned and cured
Salmon, smoked, salted, dried, canned, and pickled
Seafood, canned
