UNITED STATES DEPARTMENT OF AGRICULTURE

Bureau of Agricultural Economics

## Contributors

---

---

*Contributors are on the staff of the Bureau of Agricultural Economics unless otherwise stated*

CATHERINE SENF, agricultural statistician, has been associated with crop estimates work since 1937, working in recent years on the sampling phases and analysis of the interview surveys.

WALTER D. FISHER, now working on a project undertaken jointly by BAE and the California Experiment Station, on costs and margins of fresh fruits and vegetables distributed in California, is Assistant Professor of Agricultural Economics in the University of that State.

CHARLES F. SARLE contributed to an earlier number of this magazine an article based on his recent work in Japan.

CARL C. TAYLOR, Head of the Division of Farm Population and Rural Life, was in Guatemala this spring assisting in a statistical training conference related to the proposed World Agricultural Census of 1950.

L. D. HOWELL has written several bulletins including *Analysis of Hedging and Other Operations in Grain Futures* and *Relation of Spot Cotton Prices to Prices of Futures Contracts and Protection Afforded by Trading in Futures*.

J. A. HODGES, Acting Head of the Department of Economics and Sociology of Kansas State College, is a member of the North-Central Regional Farm Management Research Committee, and Chairman of the Subcommittee on Farm Mechanization.

RONALD W. JONES long has been interested in problems of resource allocation between agriculture and the rest of the economy—an interest heightened by graduate study at the University of Chicago during 1947-48. Before that, much of his research had been in or about the South.

REX F. DALY recently returned to the Bureau after 2 years of cooperative work and study at the University of Illinois. He is now completing a joint study of the distribution of income among farm operators in Illinois.
