UNITED STATES DEPARTMENT OF AGRICULTURE

Bureau of Agricultural Economics

Contributors

Contributors are on the staff of the Bureau of Agricultural Economics unless otherwise stated

GRADY B. CROWE represents the Bureau as leader of a research project on economics of cotton mechanization, with headquarters at Stoneville, Miss.

MARGUERITE C. BURK edits the National Food Situation and leads the projects on food-consumption data and analyses which produced Food Consumption in the United States, 1909-48 (Misc. Pub. 691) and its 1949 supplement.

DANIEL W. BURCH, economist, formerly worked in BAE on farm tax problems. He is now on the staff of the Bureau of the Budget.

RICHARD J. FOOTE, analytical statistician, in commodity research, is interested in the application of statistical methods in other fields. With others he developed a mathematical formulation of the Bean method of graphic multiple correlation. LOUIS H. BEAN, economist on the staff of the Secretary of Agriculture, has done pioneer work in economic research, development of a simplified method of multiple curvilinear correlation, new methods of analyzing elections, and in yield and weather data.

C. J. BORUM, statistician in charge of the Michigan office of Agricultural Estimates, has served in a similar capacity in the South Dakota and Washington-Oregon offices.

KARL A. FOX is associate head of the division that analyzes the current situation and outlook for agricultural products and for general levels of farm prices, farm income, and food consumption. He is particularly concerned with statistical measurements.

BUSHROD W. ALLIN studied Commons the man and economic philosopher. Last summer he used that experience while teaching courses at the University of Wisconsin, sandwiched between his regular duties as Chairman of the Outlook and Situation Board.

H. L. STEWART, Assistant Head of the Division of Farm Management and Costs, is supervising Nation-wide research on the economic utilization of farm-grown feeds in live-stock production.

WALTER H. HENDRICKS is research methodologist in Agricultural Estimates after many years devoted to experimental statistics and sampling and estimating methods.

HERMAN M. SOUTHWORTH returned last spring to BAE as research assistant in the Office of the Chief, after several years with the War Food agencies and the Council of Economic Advisers to the President. He is on the editorial staff of this magazine.

WILLIAM H. SCOFIELD, formerly with the Division of Land Economics and engaged in research in farm real estate values, is now Secretary of the Outlook and Situation Board. He too is on the staff of this magazine.

BUIS T. INMAN, is Assistant Head of the Division of Land Economics. He recently completed a study of farm land ownership throughout the United States.

CARL C. TAYLOR and his associates, in the book *Rural Life in the United States*, wrote some stimulating though compact characterizations of our differing regions that have won notice. He is Head of the Division of Farm Population and Rural Life.
