Income Parity Standards for Agriculture..... <i>Robert H. Masucci</i>	121
An Approach to Production Response..... <i>Richard H. Day</i>	134
Book Reviews..... <i>Martin J. Gerra, Jr., Clark Edwards, Martin E. Abel Wayne D. Rasmussen, and W. B. Sundquist</i>	149

Contributors

ROBERT H. MASUCCI, Head of the Farm Income Research and Methods Section of the Farm Income Branch, ERS, directs economic analysis of the interrelationships between farm income and national income, as well as research on income parity for agriculture. His pioneering article on "Regional Differences in Per Capita Farm and Non-farm Income" was published in the January 1960 issue of this journal.

RICHARD H. DAY is with the Farm Economics Division, ERS. His professional work is chiefly on analysis of farmers' production response to changing prices, cost rates, technology, and other factors. Many of the thoughts in his article were developed in his Ph. D. thesis at Harvard University. Day's thesis was one of three that received special awards by the American Farm Economic Association in 1961.

MARTIN J. GERRA, Jr., formerly head of the Demand Analysis Section, Outlook and Projections Branch, Economic Research Service, is now with International Business Machines Corporation in New York.

CLARK EDWARDS, Head of the Demand Analysis Section, Economic and Statistical Analysis Division, ERS, taught production economics and farm management courses at Oklahoma State University, Stillwater, Oklahoma.
