Book Reviews.....	Richard O. Been, John A. Baker, E. H. Wiecking, Carl P. Heisig, and Robert B. Glasgow	58

UNITED STATES DEPARTMENT OF AGRICULTURE

Bureau of Agricultural Economics

Contributors

Contributors are on the staff of the Bureau of Agricultural Economics unless otherwise stated

MARGARET JARMAN HAGOOD is in charge of the farm population section of the Bureau. Earlier she was research associate of the University of North Carolina's Institute for Research in Social Science. Dr. Hagood is now on leave of absence as Visiting Professor for the spring semester at the University of Wisconsin.

JACOB S. SIEGEL is Chief, Estimates and Forecasts Unit, Population and Housing Division, Bureau of the Census. This unit issues the official estimates and projections of the population of the United States and States, prepares analytical reports on population trends, and provides consultative advice on interpretation of population estimates and projections and on methods of estimating population.

D. B. IBACH contributed recently an article to this magazine on capital and credit in new farming systems. As an economist on the staff of the Division of Farm Management and Costs he has given much attention to the Piedmont South.

RICHARD O. BEEN comes to mind when books on statistical analysis and econometrics are to be reviewed, for his studies and consultations in those fields crowd his usual activities on price spreads between farms and markets.

JOHN A. BAKER, before becoming economic assistant to the Secretary of Agriculture, served in economic or executive capacities in BAE, FSA, and PMA, and had a 3-year tour of duty in the Navy during World War II.

E. H. WIECKING is Head of the Division of Land Economics. He recently rejoined the BAE after serving for several years on the staff of the Office of the Secretary in land and water program and policy coordination.

CARL P. HEISIG, as Head of the Division of Farm Management and Costs, supervises the Bureau's research program dealing with these problems.

ROBERT B. GLASGOW, agricultural economist, has been engaged, since 1938, in research in production economics relating particularly to Southern agriculture.
