UNITED STATES DEPARTMENT OF AGRICULTURE

• Bureau of Agricultural Economics

Contributors

Contributors are on the staff of the Bureau of Agricultural Economics unless otherwise stated

KARL A. FOX is now Head of the Division of Statistical and Historical Research, wherein analyses are made of the current situation and outlook for agricultural products and of the general levels of farm prices, farm income, and food consumption.

JOE F. DAVIS was land bank appraiser, field man of the Federal Land Bank of St. Louis, land appraiser with SCS and U. S. Engineers in connection with military sites, and economist with REA, before coming to this Bureau.

MARGUERITE C. BURK, in charge of work in BAE on food consumption, is concerned with both current reporting in the *National Food Situation* and with analyzing changes in food.

JACKSON V. McELVEEN came to the Bureau in 1950 after a few years of service at Clemson College and in the Agricultural Division of the Census.

SHERMAN E. JOHNSON is an Assistant Chief of the Bureau.

JAMES P. CAVIN, once a Brookings man, has transferred from Head of the Division of Statistical and Historical Research to the Bureau of the Budget.

O. V. WELLS is the Chief of the Bureau.

CAROLINE SHERMAN is well known for her reviews of literary publications relating to agriculture and rural life. Her review in this issue was undertaken at the suggestion of professional colleagues who preferred to disbar themselves from attempting a biographical appraisal of the man around whom so much professional controversy has raged.

H. H. WOOTEN, agricultural economist, has done land utilization and valuation surveys in several regions and in Washington. He is now working on a land-use inventory.

ARTHUR F. RAPER, social scientist, has described vividly our own rural regions in his writings; following his studies for SCAP, he published *Japanese Village in Transition*.

EDITORS: CAROLINE SHERMAN
HERMAN M. SOUTHWORTH
