Contributors

NORMAN TOWNSHEND-ZELLNER is an agricultural economist in the Horticultural Crops Section, Marketing Economics Research Division, AMS. He has recently transferred to Washington, D.C., from a field office in California, where he observed firsthand the bank-charge-account plan that is the subject of the report published in this issue.

BENNETT S. WHITE, JR., an Assistant Director of the State Experiment Stations Division of ARS, served for a number of years in the Divisions of Statistical and Historical Research and Marketing and Transportation Research of the former BAE, and has taught at the Universities of Kentucky, Virginia, George Washington, and in the USDA Graduate School.

WILLIAM H. WALDORF is a member of the staff of the Marketing Economics Research Division, AMS, and is currently working on problems of output and productivity in industries marketing farm food products.

EDWARD KARPOFF does the poultry outlook work in the Statistical and Historical Research Branch of AMS.

LOUIS F. HERRMANN is Chief of the Animal Products Branch, Marketing Economics Research Division, AMS. He has the habit of browsing through German publications occasionally for information and to keep up a measure of proficiency in the language. He reviews in this issue a noteworthy German monograph on marketing margins for food.

ROBERT H. MASUCCI is Head of the Farm Income and Development Section of the Farm Income Branch, AMS.

FRANK LOWENSTEIN is head of the Cotton and Other Fibers Section of the Agricultural Economics Division, AMS. His section is responsible for analysis of demand and supply for fibers, particularly cotton and wool. Recently he spent 18 months in Burma, where he advised the government on international rice marketing, and where he analyzed demand, supply, and prices for rice in the world market.

MARTIN J. GERRA, Head of the Income and Demand Section of the Farm Income Branch, AMS, has a dual interest in economic growth. His current work relates to analysis of the general economy as it pertains to agriculture and, recently, he worked in the area of economic growth under Prof. Simon Kuznets.

MARTIN A. ABRAHAMSEN is Director of the Purchasing Division, Farmer Cooperative Service. A graduate of the University of Wisconsin, for several years he taught and conducted research in the fields of agricultural marketing and cooperation at West Virginia University and North Carolina State College of Agriculture.

RONALD L. MIGHELL is leader of the Pioneering Research Group in the Farm Economics Research Division, ARS. The group is working in the area of interfirm integration in farming, and is concerned with relationships between vertical structure of decision making under uncertainty.

BRUCE W. KELLY, a mathematical statistician, is Acting Chief, Research and Development Staff, Agricultural Estimates Division, AMS.
