THE AGRICULTURAL SITUATION IN EASTERN EUROPE: PRODUCTION AND TRADE STATISTICS
1970-75. East European Area, Foreign Demand and Competition Division, Economic
Research Service. Foreign Agricultural Economic Report No. 117.

FOREWORD

Because of a temporary reassignment of staff, the narrative is omitted from this year's report.

Carolyn E. Miller was primarily responsible for updating the data, with assistance in statistical interpretation provided by Thomas A. Vankai and Miles J. Lambert. Data submitted by U.S. Agricultural Attaches stationed in Belgrade, Vienna, and Warsaw and by Foreign Service Officers stationed in Bucharest, East Berlin, and Sofia are acknowledged with appreciation.

Other regional reports are being prepared for Africa and West Asia, the Far East, the People's Republic of China, Western Europe, the Western Hemisphere, and the USSR.

1/ 1976 data are preliminary. USDA estimates are in parentheses.

2/ Sheep numbers include goats.

3/ The 1975 official figure indicates an increase of 1 million, or 40 percent. It is difficult to understand this sharp gain because feed supplies in 1974/75 were about the same as in 1972/73 and 1973/74. Furthermore, there is no indication that Bulgaria imported a large number of hogs in 1974. Prior to 1974, the number of privately-owned hogs was restricted by law. In December 1974, this restriction was lifted and, as a consequence, previously "hidden" hogs may have been counted for the first time in the January 1975 census. USDA is examining the numbers with a view toward adjusting the pre-1975 series to make it consistent with the 1975-76 official figures.
