Statistical Bulletin Series

The bulletins of the statistical series will contain available statistics on one or more commodities, annual, monthly, or weekly, on production, movement from the farm, receipts at markets, reshipments, farm and market prices, exports, imports, production in foreign countries, and foreign market prices, for the current year, together with comparable data for earlier years.

Statistical bulletins have been issued or are now in press as follows:

- No. 1. Cold storage holdings.
- No. 2. Seed statistics.
- No. 3. Sheep, lamb, mutton, and wool statistics.
- No. 4. Cold storage holdings.
- No. 5. Horses, mules, and motor vehicles.
- No. 6. Grain futures: Daily data.
- No. 7. Shipments and unloads of certain fruits and vegetables.
- No. 8. Carload shipments of fruits and melons.
- No. 9. Carload shipments of vegetables.
- No. 10. Statistics of potatoes and sweet potatoes.
- No. 11. Hay and feed statistics.
- No. 12. Wheat and rye statistics.
- No. 13. Cold storage holdings.
- No. 14. Prices of farm products received by producers—North Atlantic States.
- No. 15. Prices of farm products received by producers—North Central States.
- No. 16. Prices of farm products received by producers—South Atlantic and South Central States.
- No. 17. Prices of farm products received by producers—Mountain and Pacific States.
- No. 18. Statistics of hogs, pork, and pork products.

INTRODUCTION

The purpose of this bulletin is to present the available statistical material on hogs, pork and pork products for the use of farmers, agricultural students, and those interested in the marketing and distribution of these commodities. The tables have been arranged in sequence, beginning with production data, followed by movements to markets, various phases of marketing data, meat production information, domestic and international trade movements, storage holdings, and prices.

The statistical data have been drawn from various sources including newspapers, trade papers, Government publications, and research investigation by various governmental agencies.

¹ Prepared under the direction of Lewis B. Flohr, by Florence C. Fitch, Division of Statistical and Historical Research.

NUMBERS

Data as to hogs on farms, breeds, changes in numbers, pig surveys, and losses from disease are based on the census returns and on the reports of the Division of Crop and Livestock Estimates. In the main, the various tables indicate the specific sources, as well as the nature of the data and the method used to compile them. In general, it may be said that the information of the reporting service of the Division of Crop and Livestock Estimates consists of two major parts: (1) The reports made direct to the bureau in Washington by a staff of correspondents appropriately distributed throughout the hog-producing region, and (2) the reports made by the State agricultural statisticians of the bureau, which are compiled from information derived from two sources: (a) A staff of correspondents distributed throughout the State (or States) which the statistical agent covers, and (b) the information gathered by his own travels and observation.

The information from the State statisticians of the bureau and that received in the bureau direct from the correspondents is compiled in the bureau into the completed report.

The table showing the number and value of hogs on farms in the United States is compiled by the livestock reporting service of the Bureau of Agricultural Economics, using as the basis of the data the decennial census enumeration of hogs on farms, except that in 1920 a revision of the census figures to eliminate known errors was used.

Every precaution is used to make preliminary figures as nearly correct as possible, but on revision later, the estimate of hogs on farms is carefully checked against all information on shipments, receipts at markets, and slaughter, so far as known, to insure the highest possible degree of accuracy. Data as to spring and fall pig surveys were based on data obtained by the Division of Crop and Livestock Estimates from about 140,000 farmers gathered by the rural mail carriers of the Post Office Department.

Table 18, showing feeding hog shipments from public stockyards by months, 1920-1925, with State of destination, is compiled from the Bureau of Animal Industry inspection records, and therefore represents the feeding hog shipments made on certificates of inspection. Data on hog cholera control come from the records of the activities of the Bureau of Animal Industry.

The number of hogs in principal exporting countries and principal importing countries are derived from the reports of the various countries concerned and from the International Institute of Agriculture at Rome, Italy.

RECEIPTS, SLAUGHTER, AND SHIPMENTS

The information in regard to receipts, slaughter, and shipments at the markets of the country (Tables 10-17) is derived from the sources indicated; that is, the reporting service of the Division of Marketing Livestock, Meats, and Wool, and for the earlier years the yearbooks of the various stockyards mentioned and represented. It should be noted that for certain of the years specified in connection with the tables, full information is not obtainable because of quarantine against foot-and-mouth disease.

The group of tables giving results of shipments is based on a study of the returns made to cooperative shipping associations in the year

1921 and records the results by distances and by seasons as well as by straight shipments and mixed shipments.

The weights and costs tables (Tables 21-23) are compiled from the reporting service of this bureau and for the earlier years from the yearbooks of the various stockyards. In all cases it is not possible to determine the exact method used in earlier years, but for all practical purposes it is believed that the figures are comparable.

The slaughter and production statistics for census years 1909, 1914, 1919, 1921, and 1923 are compiled from the Census of Manufacturers of the Bureau of the Census. The figures for numbers slaughtered under Federal inspection, 1907-1925, are compiled from the records of the Bureau of Animal Industry, as is also the information on carcasses condemned under Federal inspection, by causes. The statistics of slaughter in the United States, 1922-1925, are compiled by the cold-storage report section of this bureau. Those for the foreign countries enumerated are from the foreign sources indicated in connection with the number of hogs on farms in foreign countries, etc.

The table showing production of lard and substitutes in factories is prepared by the Bureau of the Census. The production of lard in meat-packing establishments is compiled by the Bureau of Agricultural Economics.

The reports on production of pork in foreign countries both exporting and importing, are compiled from sources already mentioned.

The production and consumption tables for the United States are compiled from the Bureau of Animal Industry reports (with revisions according to latest plan of procedure).

COLD-STORAGE HOLDINGS

The cold-storage holdings of pork products are taken from the cold-storage reports compiled by this bureau. The information from which the reports are compiled is secured monthly on regularly prepared schedules sent to all known cold storages holding such products. For the United States this information is practically complete, the few establishments which may not be on the list being small and the total quantity carried by them relatively insignificant.

The statement as to the livestock and meat situation, monthly, is worked out from the data available from the various sources as indicated by the contents of the table and as referred to elsewhere in this introduction.

The supply of fresh pork at eastern markets is compiled from the reports of slaughter in those markets and receipts of western dressed pork products, as reported by the reporting service of the Division of Marketing Livestock, Meats, and Wool.

The export, import, and international trade data are compiled from the reports of the Bureau of Foreign and Domestic Commerce of the United States Department of Commerce and from the various sources as to international trade, both official and unofficial, as is specified in connection with the data as presented.

PRICES

The prices paid to producers are obtained by schedules regularly received by the Division of Crop and Livestock Estimates from producers throughout the country. The prices received by breeders on purebred hogs are obtained by special price reports made to this bureau.

The corn and hog ratio consists of the number of bushels of corn required to buy 100 pounds of live hogs based on the average of farm prices of corn and of hogs for the month.

The market prices of hogs for the markets shown are compiled from the reporting service of the Division of Livestock, Meats, and Wool. The prices on fresh and cured pork products are obtained from the various commercial sources as indicated in connection with the tables and are unweighted averages; that is, they are the averages of the quotations for the time covered by the respective tables.

The table on prices of live hogs at Chicago and wholesale and retail prices of certain cuts of pork is derived from the selling price of hogs in Chicago and the wholesale and retail prices of certain cuts. Users of this table should keep in mind that the relative value of the various cuts of a hog carcass vary materially, and that especially in retailing, certain losses due to trimming and to the lower price received for the less desirable cuts must be taken into consideration.

The retail prices of bacon, sliced hams, pork chops, and lard are taken from the retail price studies of the Bureau of Labor Statistics and represent markets throughout the country.

The foreign prices of hogs at Berlin, hams at Liverpool, and lard at Bremen, Hamburg, and Liverpool are compiled from reports received from the foreign agricultural commissioners of this bureau and from the trade publications indicated in connection with the tables.

Sources of the hog feed prices in Germany and in England are indicated in connection with Table 99.

¹ Intentions are as of the close of the preceding six months' period: For example, those for spring farrowing 1924 were intentions expressed as of Dec. 1, 1923.

Division of Statistical and Historical Research. Compiled from reports of Division of Crop and Livestock Estimates. Based on reports of about 140,000 farmers gathered in cooperation with Post Office Department through the rural mail carriers. Periods covered: Dec. 1 to June 1 (spring), June 1 to Dec. 1 (fall).

¹ Fractions denote veterinarians devoting a part of their time to the work. Because of the emergency created by the outbreak of foot-and-mouth disease in Texas and California, it was necessary to assign many of the veterinarians from the hog-cholera force to the eradication of foot-and-mouth disease for a part of the year.

Division of Statistical and Historical Research. Rearranged from reports of the Bureau of Animal Industry.

¹ Estimates of the Division of Crop and Livestock Estimates of the number of hogs on farms.

² Estimate made in Bureau of Animal Industry by adjustment of the census figures to a Jan. 1 basis and to include all animals in towns, villages, and ranges as well as on farms. The estimates of the Division of Crop and Livestock Estimates have been used to obtain the fluctuations between census years.

³ Average 1909-1913, inclusive.

⁴ Estimate for present territory.

⁵ Year 1910.

⁶ Estimated average 1913-14.

⁷ Year 1912.

⁸ June, 1914.

⁹ Census.

Division of Statistical and Historical Research. Compiled from official sources and International Institute of Agriculture except as otherwise stated.

TABLE 9.—Hogs: Number in principal pork importing countries

[Thousands—i. e., 000 omitted]

Year	United Kingdom, June	Germany, December	France, December	Czechoslovakia, December	Austria, December	Belgium, December	Norway, December	Italy, April
Pre-war.....	1,23,813	22,533	7,529	2,516	1,932	1,533	158	2,685
1920.....	3,116	14,179	4,911	2,201		977	127	
1921.....	3,639	15,818	5,105			976

1923.....	4,154	17,308	5,409		1,473	1,176		
1924.....	4,559	16,895	5,802			1,139		
1925.....	3,645	16,100		2,580				

¹ Present boundaries.

² Average 1916-1914, inclusive.

³ Year 1913.

⁴ Year 1910.

⁵ No official estimate was made of hogs over 1 year old, exclusive of boars and sows, for 1920. Assuming that the percentage decrease in this class was the same as that for all other hogs an estimate for hogs over 1 year old has been made and included in the 1920 figure.

⁶ Dec. 31, 1907.

⁷ April, 1908. Estimated for present boundaries. The latest postwar estimate is 1918, when it is estimated that there were approximately 2,500,000 in the present territory.

⁸ Excludes Channel Islands, which in 1922 had 4,860 hogs.

⁹ Estimate for Oct. 1, 1923, not comparable with other years. Subtracting total estimated slaughtering for October and November from this figure would leave approximately 15,832,000 on Dec. 1, 1923.

¹⁰ March, 1923.

¹¹ Unofficial.

Division of Statistical and Historical Research. Compiled from official sources and International Institute of Agriculture except as otherwise stated.

					December	51,401	1.02	18,070	2.09

¹ Shrinkage represents the difference between the shipping-point weight and the terminal weight, including the weight of all crippled and dead. Hence the shrinkage figure is over and above the direct losses due to crippled and dead.

² Straight shipments contain but one species of livestock.

³ Mixed shipments contain more than one species of livestock.

Division of Cost of Marketing.

Division of Statistical and Historical Research. Figures prior to 1920 compiled from yearbooks of stockyard companies; subsequent figures compiled from data of the reporting service of the Division of Livestock, Meats, and Wool; computed from packer and shipper purchases. Figures from different sources owing to differing methods used are not strictly comparable.

¹ In addition there were 2,898,994 hogs slaughtered on a custom basis in 1914 and 2,290,539 for 1919. No corresponding data for 1909, 1921, or 1923.

² No data collected by Bureau of the Census for 1914, 1921, or 1923 on farm or retail slaughter.

³ No data obtainable for retail slaughter in 1919.

Division of Statistical and Historical Research. Data for wholesale slaughtering and meat-packing establishments compiled from Slaughtering and Meat Packing Report, Census of Manufactures, 1921, p. 17, and 1923, p. 14. Data for farms and ranges for 1909 from Census Report of Manufactures, 1910, Vol. X, p. 345; for 1919 from Report of Agriculture, Census of 1920, Vol. V, p. 694. Data for retail slaughter obtained by subtracting wholesale slaughter from total wholesale and retail slaughter in Census Report of Manufactures, 1910, Vol. X, p. 345.

1922		6,925	1,969		1,057	108
1923		5,830	1,594		1,189	135
1924		10,182	1,604	7975	1,385	

¹ Czechoslovakia and Italy important importing countries, not included as data are not available for these countries.

² For the years 1909-1913 the number slaughtered in the municipal slaughter houses of all France. For subsequent years the estimates are based on slaughtering at the Paris slaughter houses, which in 1911, 1912, and 1913, amounted to approximately 23 per cent of the number slaughtered in the municipal slaughter houses of all France.

³ Present boundaries.

⁴ Estimated average for agricultural years ending May 31, 1910-1914 as approved by the Ministry of Agriculture.

⁵ Year 1913.

⁶ Average 1909-1913, inclusive.

⁷ Estimates of Austrian Court Counselor, Doctor Thalmayer, for 1910 excluding Burgenland and an average for 1922-1926 including Burgenland.

⁸ Year 1912.

⁹ Average 1911-1913, inclusive.

Division of Statistical and Historical Research. Compiled from official sources and International Institute of Agriculture, except as otherwise stated.

¹ Czechoslovakia and Italy, important importing countries, excluded as data are not available for these countries.

² Agricultural years ending May 31.

³ Estimated by multiplying slaughterings by average dressed weights.

⁴ Estimate of Austrian Court Counselor, Doctor Thalmayer, for 1910, excluding Burgenland and an average for 1922-1923, including Burgenland.

⁵ In postwar boundaries.

⁶ Average 1906-16 to 1913-14, inclusive.

⁷ Year 1913.

⁸ Average 1909-1913.

⁹ Year 1912.

Division of Statistical and Historical Research. Compiled from official sources and International Institute of Agriculture, except as otherwise stated.

¹ Packer and shipper purchases.

² Difference between market sales price and net return to shippers or shipping association, as shown by account of sales on somewhat less than 10 per cent of total hogs sold at Chicago market.

Division of Statistical and Historical Research.

¹ Highest price, not average. (Does not include prices for pigs.)

² New classification combines packing hogs, smooth and rough.

³ New classification gives the weight 90 to 130 pounds.

134 Statistical Bulletin 18, U. S. Dept. of Agriculture

TABLE 77.—Hogs: Monthly average and top price in dollars per 100 pounds, June, 1918–December, 1925—Continued

EAST ST. LOUIS

Year and month	Butcher, bacon, and shipper hogs				Packing sows			Bulk of hog sales	Top price for hogs ¹	Pigs (50 pounds down), medium to choice	Stock pigs (130 pounds down), common to choice
	Heavy weight (250 pounds), medium to choice	Medium weight (200 to 250 pounds), medium to choice	Light weight (150 to 200 pounds), common to choice	Light lights (150 to 160 pounds), common to choice	Smooth (250 pounds up)	Rough (200 pounds up)	Smooth (250 pounds up)

¹ Highest price, not average. (Does not include prices for pigs.)

² New classification combines packing hogs, smooth and rough.

³ New classification gives the weight 90 to 130 pounds.

¹ Bremen prices are "duty unpaid" plus the amount of the duty (1.08 cents per pound).

² An average of Friday quotations.

³ The prices quoted from August to November, 1923, are of doubtful value because of the rapid depreciation of the currency during these months.

⁴ Average for year not computed.

Division of Statistical and Historical Research,
German prices compiled from *auswaertiger Handel*, 1909-1913; *Statistisches Jahrbuch für das Deutsche Reich*, 1922-1924. Liverpool price, compiled from *Manchester Guardian*. Exchange: Average monthly, as given by the Federal Reserve Bulletin.
