Car-Lot Shipments and Unloads of Important Fruits and Vegetables¹ for the Calendar Years 1924-1926

Prepared by the Division of Fruits and Vegetables, Bureau of Agricultural Economics²

INTRODUCTION

The purpose of this bulletin is to show the origin and the number of carloads of 16 important fruits and vegetables unloaded in 36 important markets during 1924, 1925, and 1926, and the shipments by States of origin of these 16 fruits and vegetables, together with 21 other fruits and vegetables which are of lesser importance. These statistics are based upon information secured by the Division of Fruits and Vegetables of the Bureau of Agricultural Economics.

The unload records have been compiled from reports by representatives of that division in the case of those cities where such representatives are stationed. Unloads for other cities have been compiled from statements furnished by railroad and boat agents. The shipment figures are based upon daily telegraphic reports made by railroad superintendents or other transportation officials, which have been checked and verified by monthly mail reports received from local railroad agents.

Both the unload and the shipment figures include car-lot freight and express movement by rail, and boat shipments reduced to car-lot equivalents. In a few instances, the total number of cars from a given State reported as unloaded in the 36 cities exceeds the number reported as shipped from that State. Reshipments of current arrivals and of cars stored in transit, and incomplete or incorrect reports, account for these discrepancies.

Shipment reports are confined to the movement of fruits and vegetables produced in the United States alone. Imports have not been included because it has not been possible to secure a complete record of them. Unload reports, however, do include imported stock under the general heading "Imports." In some instances it has been impossible to avoid listing imports twice; once in the unloads of the port at which the stock entered the country, and again in the unloads of the city to which it was reshipped.

The unload reports should not be understood as representing the consuming capacity of the cities listed for the 16 fruits and vegetables tabulated, as they do not include rail receipts of less than carload lots or arrivals by truck. They do indicate, however, the number of car lots of these products that are handled in the cities.

¹ Includes shipments of dried beans.

² Compiled under the direction of Miss Lucy Watt.

Shipment and unload figures are shown for the following:

Deciduous fruits.—Apples, grapes, and peaches.

Citrus fruits.—Grapefruit, Lemons, and oranges.

Berries.—Strawberries.

Melons.—Cantaloupes and watermelons.

Vegetables.—Cabbage, celery, lettuce, onions, potatoes, sweet potatoes, and tomatoes.

Shipment figures are shown for the following additional crops:

Deciduous fruits.—Cherries, mixed deciduous, pears, plums, and fresh prunes.

Citrus fruits.—Mixed citrus fruits.

Berries.—Cranberries.

Dried fruit.—Apples, peaches, and prunes.

Vegetables.—Asparagus, string beans, carrots, cauliflower, cucumbers, egg-plant, mixed vegetables, green peas, peppers, spinach, and turnips.

Dried vegetables.—Dried beans.

Cities for which car-lot unloads are shown follow:

Atlanta, Baltimore, Birmingham, Boston, Buffalo, Chicago, Cincinnati, Cleveland, Columbus, Dallas, Denver, Detroit, Fort Worth, Indianapolis, Kansas City, Los Angeles, Louisville, Memphis, Milwaukee, Minneapolis, Newark, New Orleans, New York, Omaha, Philadelphia, Pittsburgh, Portland, Oreg., Providence, St. Louis, St. Paul, Salt Lake City, San Francisco, Seattle, Spokane, Toledo, and Washington.
