INTRODUCTION

This bulletin contains tabulations showing the number of carloads of 18 important fruits and vegetables unloaded during 1927 and 1928 in 66 cities. In addition, tabulations are included showing the number of carload shipments of 37 fruits and vegetables during the same years, segregated by State of origin. These statistics are based upon information secured by the Division of Fruits and Vegetables of the Bureau of Agricultural Economics.

In the cities where the division maintains a representative the unloading reports were compiled by that representative, but for the other cities reports were compiled from information received direct from railroad and boat agents. The shipment figures were compiled from daily telegraphic reports rendered by railroad superintendents or other transportation officials and checked against monthly mail reports furnished to the division by station agencies of railroad, express, and boat lines.

Both the unload and the shipment figures include car-lot freight and express movement by rail, and boat shipments reduced to car-lot equivalents. The shipment reports include only the movement of fruits and vegetables produced in the United States. Complete shipment information on imported stock is not available. Unload reports, however, do include imported stock under the general heading Imports.

In a few instances the total number of cars from a given State reported as unloaded in the 66 cities exceeds the number reported as shipped from that State. Reshipments of current arrivals and of

² Compiled under the direction of Lucy Watt.

cars stored in transit, and occasionally incomplete reports, account for these discrepancies. It was impossible in some instances to avoid listing imports twice, once in the unloads of the port at which the stock entered the country and again in the unloads of the city to which they were reshipped.

The car-lot unloads of the various commodities should not be understood as representing the consuming capacity of the different cities. Freight and express receipts of less-than-carload lots and arrivals by truck are not included, and reshipments in a small way to outlying territory are in no way accounted for. The unloads do indicate, however, the number of car lots of these products that are unloaded in the cities named.

Shipment and unload figures are shown for the following:

Deciduous fruits.—Apples, grapes, peaches, pears, and plums, and fresh prunes.

Citrus fruits.—Grapefruit, lemons, and oranges (including Satsumas and tangerines).

Berries.—Strawberries.

Cantaloupes.—(Including Casaba, Honey Dew, Honey Ball, and other melons except watermelons.)

Vegetables.—Cabbage, celery, lettuce, onions, potatoes, sweetpotatoes, and tomatoes.

Watermelons.

Shipment figures are shown for the following additional crops:

Deciduous fruits.—Cherries, mixed deciduous.

Citrus fruits.—Mixed citrus fruits.

Berries.—Cranberries.

Dried fruit.—Apples, peaches, and prunes.

Vegetables.—Asparagus, string beans, carrots, cauliflower, cucumbers, eggplant, mixed vegetables, green peas, peppers, spinach, and turnips.

Dried vegetables.—Dried beans.

Cities for which car-lot unloads are shown follow:
