INTRODUCTION

In the grain futures act of 1922 Congress provided that the Secretary of Agriculture "shall investigate marketing conditions of grain and grain products," and that he shall likewise "compile and furnish

to producers, consumers, and distributors * * * information respecting the grain markets." In the same act Congress also authorized and empowered the Secretary of Agriculture to "make such investigations as he may deem necessary to ascertain the facts regarding the operations of boards of trade" and to "publish from time to time the result of such investigation and such statistical information gathered therefrom as he may deem of interest to the public."

In its task of supervising the grain futures markets, the Grain Futures Administration has acquired considerable data. Such as are not of a confidential nature can be made available in printed form to those interested in volume of trading, open commitment figures and prices of grain futures. The data presented in this bulletin also serve as basic statistical material for those who wish to study various phases of trading in wheat futures. As 81 to 88 per cent of the trading in wheat futures in the United States is done on the Chicago Board of Trade, the material in this bulletin relates largely to trading in the principal wheat futures on that exchange.

There are 13 contract markets. On only 11 of these markets, however, has there been trading in wheat futures under Government license. These 11 are: Board of Trade of the City of Chicago (commonly known as the Chicago Board of Trade), Chicago Open Board of Trade, Minneapolis Chamber of Commerce, Kansas City Board of Trade, Duluth Board of Trade, St. Louis Merchants Exchange, Milwaukee Chamber of Commerce, Baltimore Chamber of Commerce, Seattle Grain Exchange, New York Produce Exchange, and the Portland (Oreg.) Grain Exchange. At Baltimore, futures trading subsequent to the designation of that market has been of negligible volume, no trading being recorded since 1924.

SOURCES OF INFORMATION

All of the statistical data presented in the bulletin relative to volume of trading, except for the period prior to July 10, 1923, have been compiled solely from reports furnished the Grain Futures Administration by the clearing members and the clearing associations of the exchanges. For the period of January 3, 1921, to April 30, 1923, internal-revenue reports have been virtually the sole source of information on volume of trading on the Chicago Board of Trade. Between May 1, 1923, and July 9, 1923, these internal-revenue reports have been utilized in conjunction with reports made to the Grain Futures Administration.

Open commitment figures have been compiled entirely from daily reports made directly to the Grain Futures Administration by clearing members--i. e., those brokerage houses who are members of the clearing association.

The official quotations of the Chicago Board of Trade, supplemented in a very few instances by data obtained from the brokerage houses, are the sources of price information contained in the bulletin.

VOLUME OF TRADING

SALES EQUAL PURCHASES

The figures on volume of trading represent the sales, or one side only of each transaction, according to the practice followed by the New York Stock Exchange, and a practice almost universal in reports

concerning the volume of trading in commodities. For every sale there is, of course, a corresponding purchase, so that the volume of trading figures in the bulletin may be accepted as representing either purchases or sales.

ANNUAL

The annual volume of trading in all wheat futures combined, from January 3, 1921, to December 31, 1929, for each market and for 10 contract markets taken collectively, is shown in Tables 1 and 2. The figures in Table 1 are for calendar years and in Table 2 for crop years, each crop year covering the period of July 1 of one year to June 30 of the following year.

MONTHLY

The monthly volume of trading for the 9-year period in all wheat futures combined for each market and all of the markets collectively can be seen in Table 3.

The monthly trading figures for the March, May, July, September, and December futures and for the other futures combined, are presented for the individual markets in Table 4. For the Chicago Board of Trade, they are also shown separately in Table 6. For Minneapolis and Duluth, the transactions in "other futures" represent mainly trading in October and November wheat futures.

Trading in March wheat for delivery in March, 1921, began at Chicago on July 15, 1920. Between March 31, 1921, and August 1, 1927, March wheat was not a principal future at that market.

FOR LIFE OF FUTURE

The volume of trading on the Chicago Board of Trade during the life of each future expiring during the years 1921 to 1929 is presented in Table 5. The life of the future includes the period of time elapsing between the first trade in the future and the end of the delivery month.

DAILY DATA

As most of the trading in wheat futures is done on the Chicago Board of Trade, the daily volume of trading in each principal future and in all futures combined, for the 9-year period, has been restricted to that market. These data are shown in Tables 23 to 28.

From October 1, 1925, to May 29, 1926, trading was conducted at Chicago in "old style" and "new style" 1926 May wheat futures, and from October 1, 1925, to December 31, 1925, in "old" and "new" 1925 December wheat futures. The need for these designations was occasioned by the change in grades of spring wheat deliverable on futures contracts as shown by the following tabulation:

Grade	Old style, deliverable at—	New style, deliverable at—
No. 1 Hard Spring	Delivery not provided for	2 cents per bushel premium.
No. 1 Dark Northern Spring	1½ cents per bushel premium	1 cent per bushel premium.
No. 1 Northern Spring	Contract price	Contract price.
No. 2 Dark Northern Spring	½ cent per bushel premium	2 cents per bushel discount.
No. 2 Northern Spring	Contract price	3 cents per bushel discount.
No. 3 Dark Northern Spring	3 cents per bushel discount	Not deliverable.
No. 3 Northern Spring	do.	Do.

The average daily volume of trading in each of the principal wheat futures and all futures combined traded in on the Chicago Board of Trade is given, by months, in Tables 7 to 12.

OPEN COMMITMENTS

The figures representing open commitments are for one side only as for every long commitment there is a short commitment of equal amount. Since the figures relate to the market as a whole, including all the members of the clearing house, the aggregate of the long commitments and the aggregate of the short commitments open should balance exactly, not only for each day and for each month, but for the whole "life" of each future. This balance is not affected one way or the other by the fact that some contracts were eventually settled either by "passage of notices" or by the taking in or putting out of grain by delivery. Every such settlement, of course, affects both an outstanding contract of purchase and an outstanding contract of sale.

Open commitment figures on the Chicago Board of Trade were first reported to the Grain Futures Administration on July 9, 1923; at Minneapolis and Kansas City, on August 1, 1923. The daily open commitments on the Chicago Board of Trade in all wheat futures combined and for each of the principal futures are presented in Tables 23 to 28.

The dates on which each of the principal futures became dominant are found in Table 15. The dates in the table that are prior to July 9, 1923, are estimates. The date on which the future became dominant is determined by finding the day on which the open commitments in the future first exceeded those of any other future.

The monthly maximum and minimum open commitments in all Chicago wheat futures combined, for the 9-year period, can be seen in Table 7. Tables 8 to 12 show the maximum and minimum open commitments during the life of each of the principal futures.

The amount of open commitments settled by delivery from July 1, 1924, to December 31, 1929, is shown in Table 16.

The commitments in May, July, September, and December wheat futures open at the end of each week at Minneapolis and Kansas City from August 1, 1923, to December 31, 1929, can be seen in Tables 13 and 14.

PRICES

Because the daily volume of trading and open commitment figures are of greatest value when associated with price, the high, low, and closing prices of each of the principal futures traded in on the Chicago Board of Trade are presented for the period of January 3, 1921, to December 31, 1929.

As previously indicated, the price data presented are the official quotations of the Chicago Board of Trade, supplemented occasionally by data obtained from brokerage houses. Few trades are made early in the life of a deferred future. The prices at which they are made are sometimes not called to the attention of the quotation department of the Chicago Board of Trade and therefore are not entered into the official price record of the exchange. In a few of those instances prices have been secured directly from the brokers by the Grain Futures Administration and are included in the price data presented in the bulletin.

The daily high, low, and closing prices paid for the March, May, July, September, and December futures on the Chicago Board of Trade are to be found with the net change in prices from day to day in Tables 24 to 28. The net change in price from day to day is the difference between the average of the closing range of a given future on one day and that of the previous trading day. In case the average closing range is in sixteenths of a cent, the next lowest price in eighths is used. The change in price is expressed by a plus or minus sign, the former indicating an advance in price as compared with the previous close and the latter a decline.

The high and low prices and the dates on which they were paid on the Chicago exchange, the price range for the future and the average daily price range during the life of each of the principal futures, are shown in Table 17. The monthly high and low prices, the average daily range, and the average closing price are given in Tables 18 to 22.

HIGHS AND LOWS

The official high and low prices quoted by the Chicago Board of Trade include not only the lowest and highest prices paid during the trading session but also the bid and asked prices which are higher or lower than those paid, providing, however, that they follow a trade made in the pit. Whether the high or low is a bid or asked price is not indicated in the official quotations of the Chicago Board of Trade.

CLOSING RANGE

The closing range usually includes prices prevailing at 1.15 p. m. (12 noon on Saturdays). There are times, however, when the closing range includes prices paid a few minutes before 1.15 p. m. This usually occurs when a broker has a large order to fill reading "to buy at the close" or "to sell at the close." In that case, the broker informs the board of trade representative that he has a large order to fill "at the close" and wishes to have prices paid by or to him, depending upon whether he is going to buy or sell, included in the official closing range. All trades made by him shortly before and at 1.15 p. m. are then included in the closing range for the day. Any bid or asked prices quoted at 1.15 p. m. are included in the official close and are shown by the letter b for bid, and a for asked.

Few, if any, closing prices are shown in the tables during the early life of a future. This is due to the fact that the trades made are few in number with none coming at or near the close of the market.

SPLIT QUOTATIONS

Fractions on the exchanges are expressed only in eighths of a cent, and multiples thereof. By virtue of a special provision of exchange rules, however, trades are permitted at so-called split prices, which are equivalent to prices in sixteenths of a cent. This, however, is possible only if even multiples of a lot are dealt in. Under such circumstances it is permissible to buy or sell one-half of the entire quantity at one-eighth cent above the remaining one-half. For example, a trader selling 10,000 bushels at \$1.54 $\frac{3}{8}$ split actually sells one lot of 5,000 bushels at \$1.54 $\frac{3}{8}$, and the other 5,000 bushels at \$1.54 $\frac{1}{8}$. While this is equivalent to a price of \$1.54 $\frac{1}{2}$ for the entire trade, the split involves the quantity rather than the price. The price quotation for

such transaction would be expressed by using an equal sign (=) after the lower of the two prices, viz, \$1.54 $\frac{3}{4}$ =.

In recording the highs and lows in the Chicago Board of Trade Yearbook, split quotations are not designated as such. In this bulletin if high or low prices are split quotations, they are shown as such by the use of the equal sign (=).

TABLE 15.—Dates on which the principal wheat futures became dominant on the Chicago Board of Trade during the period January 3, 1921, to December 31, 1929¹

Year life of future ended	May future	July future	September future	December future
1921		Apr. 25, 1921	June 21, 1921	Aug. 16, 1921
1922	Oct. 20, 1921	Apr. 26, 1922	June 24, 1922	Aug. 11, 1922
1923	Nov. 6, 1922	Apr. 11, 1923	June 25, 1923	Aug. 17, 1923
1924	Nov. 13, 1923	Apr. 28, 1924	June 12, 1924	Aug. 15, 1924
1925	Nov. 1, 1924	Apr. 24, 1925	June 12, 1925	Aug. 7, 1925
1926	Oct. 22, 1925	Apr. 30, 1926	June 30, 1926	Aug. 16, 1926
1927	Nov. 16, 1926	Apr. 30, 1927	June 8, 1927	Aug. 18, 1927
1928	Nov. 23, 1927	Apr. 3, 1928	June 9, 1928	Aug. 8, 1928
1929	Nov. 19, 1928	Apr. 17, 1929	June 13, 1929	July 24, 1929

¹ March wheat did not become a dominant future during this period. The date the future became dominant represents the first day that the open commitments in that future exceeded those of any of the other futures. As open commitment figures were not reported until July 9, 1923, the dates indicated prior to July 9, 1923, represent estimates.

TABLE 16.—Comparison of the volume of trading in the various wheat futures from September, 1924, through December, 1929, with the total volume of trades settled by notices passed, deliveries, and the actual amount of grain involved

[In thousands of bushels; i. e., 000 omitted]

Future	Total quantity sold during life of future	Total volume settled by notices passed	Volume of wheat futures settled by delivery ¹		Total quantity actual wheat delivered	Ratio of total number of bushels sold during life of future to number of bushels actual wheat delivered	Ratio of volume of futures settled by delivery to total number of bushels of wheat actually delivered
			Quantity	Percentage of total bushels sold during life of future			
September, 1924	Bushels 1, 638, 308	Bushels 34, 264	Bushels 12, 018	Per cent 0.65	Bushels 2, 645	1- 635	1-4.15
December, 1924	2, 862, 926	23, 082	8, 106	.28	4, 701	1- 629	1-1.72
May, 1925	7, 733, 848	25, 574	7, 645	.10	2, 470	1-3, 120	1-3.08
July, 1925	3, 178, 397	0, 489	5, 124	.16	4, 225	1- 751	1-1.21
September, 1925	2, 806, 221	12, 933	5, 036	.17	1, 708	1-1, 737	1-2.05
December, 1925	3, 262, 829	8, 505	1, 768	.05	701	1-4, 840	1-2.44
May, 1926	7, 455, 083	(²)	2, 725	.04	(³)		
July, 1926	3, 235, 235	(²)	1, 789	.06	(³)		
September, 1926	1, 657, 735	(²)	9, 466	.48	(³)		
December, 1926	2, 092, 906	(²)	5, 720	.26	(³)		
May, 1927	3, 845, 526	(²)	5, 720	.15	2, 003	1-1, 920	1-2.86
July, 1927	1, 063, 061	(²)	6, 835	.65	(³)		
September, 1927	1, 897, 730	(²)	12, 829	.68	(³)		
December, 1927	2, 254, 261	(²)	10, 888	.48	(³)		
March, 1928	238, 045	(²)	2, 300	.70	(³)		
May, 1928	1, 021, 480	(²)	7, 651	.40	(³)		
July, 1928	2, 413, 383	(²)	15, 286	.63	(³)		
September, 1928	1, 524, 704	(²)	4, 902	.25	(³)		
December, 1928	2, 215, 674	(²)	7, 581	.34	(³)		
March, 1929	215, 175	(²)	6, 081	3.15	(³)		
May, 1929	3, 176, 458	(²)	21, 300	.67	(³)		
July, 1929	2, 203, 750	(²)	11, 972	.54	(³)		
September, 1929	2, 678, 200	(²)	14, 371	.42	(³)		
December, 1929	4, 010, 162	(²)	22, 116	.45	(³)		

¹ This column shows the quantity settled by delivery and paid for, whereas the figures in the column to the left, giving the volume settled by notices passed, shows the amount settled by delivery but not paid for, the notices being passed on to others.

² Passing of notices was discontinued January 6, 1920, when the new clearing house began to function.

³ Number of bushels of actual wheat involved in the delivery not known.

TABLE 17.—Highest and lowest prices, the seasonal range and the average daily range in prices for the life of each of the principal wheat futures traded in on the Chicago Board of Trade, January 3, 1921, to December 31, 1929¹

Future	Highest price	Date	Lowest price	Date	Range for life of future	Average daily range for life of future
1921 March wheat.....	270	July 15, 1920	147	Nov. 26, 1920	129	5½
1928 March wheat.....	153¾	Aug. 11, 1927	124½	Oct. 24, 1927	29¼	1¾
1929 March wheat.....	129½	Feb. 15, 1929	112½	Jan. 5, 1929	16¾	1¾
1921 May wheat.....	187	May 31, 1921	110½	Apr. 14, 1921	67½	4¾
1922 May wheat.....	149½	Feb. 27, 1922	103½	Nov. 4, 1921	46½	3¼
1923 May wheat.....	129¾	Apr. 26, 1923	101½	Sept. 14, 1922	22¾	1¾
1924 May wheat.....	114½	Oct. 5, 1923	100¾	Mar. 28, 1924	14¾	1¾

FIGURE 6.—Daily volume of trading, open commitments, and price of the 1926 May wheat future at Chicago.

From Oct. 1, 1925, to May 31, 1926, both old and new style wheat were bought and sold. The chart shows combined volume of trading and open commitments. The price shown after Sept. 30, 1925, is only for new style wheat. See text for explanation of old and new style wheat. Table 26 shows daily prices for both old and new style wheat.
