## STATISTICAL BULLETIN SERIES

At the present time (December 1935) statistical bulletins have been issued as follows:

1. Cold-storage holdings, year ended January 1923.
2. Seed statistics.
3. Sheep, lamb, mutton, and wool statistics.
4. Cold-storage holdings, to October 1924.
5. Horses, mules, and motor vehicles.
6. Grain futures; daily data.
7. Shipments and unloads of certain fruits and vegetables.
8. Carload shipments of fruits and melons.
9. Carload shipments of vegetables.
10. Statistics of potatoes and sweetpotatoes.
11. Hay and feed statistics.
12. Wheat and rye statistics.
13. Cold-storage holdings, year ended December 1925.
14. Prices of farm products received by producers, North Atlantic States.
15. Prices of farm products received by producers, North Central States.
16. Prices of farm products received by producers, South Atlantic and South Central States.
17. Prices of farm products received by producers, Mountain and Pacific States.
18. Statistics of hogs, pork, and pork products.
19. Carload shipments of fruits and vegetables from stations in the United States.
20. Cattle, calves, beef, veal, hides, and skins statistics.
21. American forests and forest products.
22. Vegetable statistics.
23. Carload shipments and unloads of certain fruits and vegetables, 1924-26.
24. Statistics of fats, oils, and oleaginous raw materials.
25. Dairy statistics.
26. Cold-storage holdings, year ended December 31, 1927.
27. Car-lot shipments of fruits and vegetables from stations in the United States for the calendar years 1926 and 1927.
28. Corn statistics.
29. Statistics of oats, barley, and grain sorghums.
30. Car-lot shipments and unloads of important fruits and vegetables for the calendar years 1927 and 1928.
31. Wheat futures: Volume of trading, open commitments, and prices.
32. Stumpage and log prices for the calendar year 1928.
33. Cold-storage holdings, year ended December 31, 1929.
34. Corn futures.
35. Car-lot shipments of fruits and vegetables from stations in the United States for the calendar years 1928 and 1929.
36. Stumpage and log prices for the calendar year 1929.
37. Stumpage and log prices for the calendar year 1930.
38. Car-lot shipments and unloads of important fruits and vegetables for the calendar years 1929 and 1930.
39. Cold-storage holdings, year ended December 31, 1931.
40. Grade, staple length, and tenderability of cotton in the United States, 1928-29 to 1931-32.
41. Wheat futures.
42. Car-lot shipments of fruits and vegetables from stations in the United States for the calendar years 1930 and 1931.
43. Corn futures.
44. Stumpage and log prices for the calendar years 1931 and 1932.
45. Grade and staple length of cotton carried over in the United States as related to the domestic supply, 1928-29 to 1931-32.
46. Car-lot shipments and unloads of important fruits and vegetables for the calendar years 1931 and 1932.
47. Grade, staple length, and tenderability of cotton in the United States 1928-29 to 1932-33.
48. Cold-storage holdings, year ended December 31, 1933.
49. Stumpage and log prices for the calendar year 1933.
50. Car-lot shipments of fruits and vegetables from stations in the United States for the calendar years 1932 and 1933.

**INTRODUCTION**

The statistical information tabulated in this publication shows the origin and the number of car-lot shipments of fruits and vegetables in the United States during 1932 and 1933. The shipments reported for 1932 totaled 843,881 cars, and in 1933 they decreased to 798,461 cars. The total for these 2 years was nearly 26 percent less than that of the preceding 2 years. This decrease in the car-lot movement of fruits and vegetables may be attributed, in part, to the rapid increase in the use of the motor truck as a carrier of these commodities, and to some extent to decreased consumption due to the consumer's lowered purchasing power as a result of a Nation-wide depression and other

<sup>1</sup> Compiled by Leonn Norgren of the Division of Fruits and Vegetables. Acknowledgment and thanks are extended to the common carriers for their cooperation and valuable assistance in furnishing the original data from which this bulletin is compiled.

causes. The total annual movement of fruits and vegetables produced in the United States is much greater than the car-lot figures indicate, as there is a considerable movement in less-than-carload lots by rail and increasingly large quantities are moved to market by motor truck. These are not included because of the lack of adequate data.

The information contained in this bulletin supplements that in Statistical Bulletin 42, Car-lot Shipments of Fruits and Vegetables from Stations in the United States for the Calendar Years 1930 and 1931, and is based on information obtained by the market news service of the Division of Fruits and Vegetables, Bureau of Agricultural Economics, from monthly mail reports covering 43 fresh fruits, vegetables, melons, mixed citrus and deciduous fruits, and mixed vegetables, furnished by about 8,000 local agents of railroad, express, and boat companies. These reports are checked with daily telegraphic reports furnished by the operating departments of the carriers.

Shipment figures include car-lot freight and express movement by rail, and boat shipments reduced to car-lot equivalents, and are confined to the movement of domestic fruits and vegetables.

Shipments are grouped by States and counties. The number of cars of each commodity billed during each of the calendar years 1932 and 1933 is shown for each station handling 10 or more cars in either year. Stations at which less than 10 cars of a given commodity have originated are grouped together and listed as "Other stations" in their proper county. Counties in which less than 10 cars of a given commodity have originated are grouped together and listed as "Other counties" in their proper State.

Conductors' waybills cover movements from nonagency points forwarded on waybills made out by conductors. Where possible, such shipments have been grouped under the proper county; otherwise they are added to the State total.

Boat reports cover movements by boat reduced to car-lot equivalents. In some instances it has been possible to credit such movements to the originating point; in other cases they are credited to either county or State.

A pick-up car in express service is a car that proceeds from station to station and picks up small or less-than-carload lots until a carload is accumulated. This carload may then be shipped either to final destination to one or more consignees, or it may move to a break-bulk point for reloading or consolidation with other commodities for shipment to final destination. Pick-up cars are added to State totals in this bulletin.

Table 1 contains a 10-year comparison, showing the total shipments of each commodity for each of the 10 years, 1924-33. Table 2 gives a 10-year comparison by States for the same years. Tables 3 to 48 show shipments by commodities, months, and States, 1932 and 1933. Table 49 contains the shipments by commodities, States, counties, and shipping points for the calendar years 1932 and 1933.

TABLE 1.—Summary of total United States car-lot shipments of fruits, melons, and vegetables, 1924-33

Commodity	1924	1925	1926	1927	1928	1929	1930	1931	1932	1933
Apples.....	116,183	117,028	132,265	102,517	120,154	104,771	107,033	98,330	84,633	65,244
