INTRODUCTION

Carlot and boat shipments of fruits and vegetables originating in the United States for the calendar years 1934 totaled to an equivalent of 834,701 cars and in 1935 decreased to 806,710 cars. The total for the 2 years, however, was only 197 cars less than the total for the preceding 2 years. The total annual movement of fruits and vegetables produced in the United States is much greater than the carlot figures indicate, as there is some movement in less-than-carload lots by rail and increasingly large quantities are moved to market by motortruck. These are not included here because of lack of adequate data. In 1934 approximately 38 percent of the fresh-fruit and vegetable shipments to market, excluding strictly local marketings in villages and rural districts, moved by motortruck according to an estimate of this Bureau.

¹ Compiled by Leona Norgren. Acknowledgment and thanks are extended to the common carriers for their cooperation and valuable assistance in furnishing the original data from which this bulletin is compiled.

Information contained in this bulletin supplements that in Statistical Bulletin 50, Car-lot Shipments of Fruits and Vegetables from Stations in the United States for the Calendar Years 1932 and 1933. It is based on information obtained by the market news service of the Bureau from monthly mail reports covering 43 fresh fruits, vegetables, melons, mixed citrus and deciduous fruits, and mixed vegetables, furnished by about 8,000 local agents of railroad, express, and boat companies. These reports are checked with daily telegraphic reports furnished by the operating departments of the carriers.

Shipment figures include carlot freight and express movement by rail, and boat shipments reduced to carlot equivalents, and are confined to the movement of domestic fruits and vegetables.

Shipments are grouped by States and counties. The number of cars of each commodity billed during each of the calendar years 1934 and 1935 is shown for each station that handled 10 or more cars in either year. Stations at which less than 10 cars of a given commodity have originated are grouped together and listed as "Other stations" in their proper county. Counties in which less than 10 cars of a given commodity have originated are grouped together and listed as "Other counties" in their proper State.

Conductors' waybills cover movement from nonagency points that is forwarded on waybills made out by conductors. Where possible, such shipments have been grouped under the proper county; otherwise they are added to the State total.

Boat reports cover movements by boat reduced to carlot equivalents. In some instances it has been possible to credit such movements to the originating point; in other cases they are credited to either county or State.

A pick-up car in express service is a car that proceeds from station to station and picks up small or less-than-carload lots until a carload is accumulated. This carload may then be shipped either to final destination to one or more consignees, or it may move to a break-bulk point for reloading or consolidation with other commodities for shipment to final destination. Pick-up cars are added to State totals in this bulletin.

Table 1 contains a 10-year comparison, showing the total shipments of each commodity for each of the 10 years 1926-35. Table 2 gives a 10-year comparison by States for the same years. Table 3 shows the carlot shipments by months for the same 10-year period. Tables 4 to 49 show shipments by commodities, months, and States, 1934 and 1935. Table 50 contains the shipments by commodities, States, counties, and shipping points for the calendar years 1934 and 1935.

TABLE 1.—Summary of total United States carlot shipments of fruits, melons, and vegetables, 1926-35

| Commodity | 1926 | 1927 | 1928 | 1929 | 1930 | 1931 | 1932 | 1933 | 1934 | 1935 |

¹ No record prior to 1931.
² Included in miscellaneous melons prior to 1930.
³ Includes light cars of 250 crates or less of citrus fruits from Florida as follows: Grapefruit 4; mixed citrus fruits 64; oranges 83; tangerines 5.
⁴ Prior to 1930 included Casaba, Honey Ball, Honey Dew, Persian, and mixed melons.
⁵ Not reported separately prior to 1930 (see footnote 4).
⁶ Satsumas included. Tangerines included prior to 1930.
⁷ Included in oranges prior to 1930.

1 Greens include leafy vegetables which are ordinarily cooked in preparation for use, such as kale, turnip tops, Italian sprouting broccoll, broccoll greens (7-top turnips), mustard greens, beet greens, dandelion greens, and Swiss chard. Spinach is tabulated separately and is not included with greens.
