Statistical Bulletin No. 99
Revised February 1957

UNITED STATES DEPARTMENT OF AGRICULTURE
AGRICULTURAL MARKETING SERVICE
WASHINGTON, D.C.

© UPDATA 1981

EXPLANATION

This publication is designed to fill a demand for extensive statistics on cotton and related subjects. In 1951 the Bureau of Agricultural Economics issued a bulletin containing such statistics. This bulletin was titled: Statistics on Cotton and Related Data, Statistical Bulletin No. 99, Bureau of Agricultural Economics, Washington, D. C., June 1951. Since 1951 an annual supplement to Statistical Bulletin No. 99 has been published.

The present issue is a revision of Statistical Bulletin No. 99. The data were compiled by Susie J. Frazier and Mary L. Fleming under the supervision of Frank Lowenstein. The bulletin contains many of the statistical tables published in the earlier issue, but the tables in this issue contain no data for years earlier than 1920. Data for earlier years will be found in the 1951 issue.

Terms Used

Acreage.- Unless otherwise specified, the term refers to the area harvested and is usually considerably smaller than the area planted or the area in cultivation at some specified date (such as July 1 in the United States) early in the growing season.

American.- The terms "American," and "American cotton" are used in the commercial sense and refer to the United States or to cotton produced in the United States.

Bale.- The weight of bales is indicated in footnotes to each table.

Bale, running.- The actual bale as it moves in channels of trade, irrespective of weight, is called a "running bale."

Carryover.- Total stocks of ginned cotton on hand at the beginning (August 1) or end (July 31) of the cotton-marketing season which begins August 1.

City crop.- Cotton composed of rebaled samples, sweepings, and pickings from cotton damaged by weather, fire, or other causes.

Consumption.- The terms "consumption" and "mill consumption" here refer to the quantity of cotton processed in manufacturing establishments.

Cotton.- Ginned or lint cotton; the term does not include linters, which are the residual fibers removed from cottonseed at oil mills.

Cotton, commercial.- Cotton that is consumed, or eventually will be consumed, by industrial cotton mills.

Cotton, Upland.- Applies to all varieties of the Gossypium hirsutum species of cotton to distinguish it from cotton of different species such as American-Egyptian and Egyptian (Gossypium barbadense) and Indian (Gossypium herbaceum). All American cotton is Upland cotton, except for small quantities of American-Egyptian, Sea Island, and Sealand cotton.

Extra long staple cotton.- Includes American-Egyptian, Sea Island, and Sealand grown in the United States and total Egyptian, Peruvian, and Sea Island imports. It is not always possible to separate these imports into staple lengths.

The tables on exports and imports to and from foreign countries are reported for the year beginning August 1 whenever it is possible to obtain such data. In the earlier publication they were usually shown on a calendar year basis.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. - Price 50 cents

1/ Includes American Egyptian, Sea Island, Egyptian and Peruvian.
2/ Totals were made before data were rounded.
3/ American in running bales, foreign in bales of equivalent 500 pounds.
4/ Less than 50 bales.
5/ Preliminary.

1/ Bureau of the Census. Population of continental United States as of July 1, including armed forces overseas. 2/ Mill consumption as reported by the Bureau of the Census. For American cotton, tare of 22 pounds was deducted from the gross weight of bale produced through 1923; since 1924 the tare as reported by the Crop Reporting Board has been deducted, for foreign cotton 3 percent (15 pounds) was deducted. Since 1950 data have been adjusted to year ended Dec. 31. 3/ Includes apparel and carpet wool on a scoured basis. Since 1920 data were from Wool Consumption reports of the Bureau of the Census. 4/ Textile Organon, publication of the Textile Economics Bureau Incorporated. Include filament and staple fibers. Data are United States producers' domestic shipments, plus imports for consumption. 5/ Textile Organon. Nylon, orlon, glass fiber, etc. United States production less exports plus imports for consumption. 6/ Flax. Imports and estimated production. Bureau of the Census and Plant Industry through 1948. Since 1949 production is estimated by the Agricultural Marketing Service, Portland, Oregon office. Imports only since the 1953 season. 7/ Bureau of the Census. Net imports through 1933. Since 1934 imports for consumption. 8/ Total consumption divided by population and not a summation of per capita consumption of fibers. 9/ Less than 0.05 pound. 10/ Less than 0.05 percent. 11/ Less than 50,000 pounds. 12/ Preliminary.

1/ Excludes estimates for quantities destroyed and used for adjustment purposes. 2/ American in running bales, foreign in equivalent 500 pound bales. 3/ Since 1945, stocks of "commercial" cotton are identical with stocks of "all" cottons. 4/ Adjusted to August 1-July 31 year. 5/ Preliminary.

Commercial cotton, excludes the quantities produced for household uses, except as noted. Carryover and consumption in United States from reports of Bureau of the Census for all years. New York Cotton Exchange for all other data from 1920 through 1944. Since 1945 all other data are estimated by the International Cotton Advisory Comittee. Totals were made before data were rounded to thousands.

1/ Excludes estimates for quantities destroyed and used for adjustment purposes. 2/ Data for 1930, 1931 and 1932 from reports of the Federal Farm Board. From 1933 to date from reports of the Commodity Credit Corporation and includes cotton pooled, owned and loans outstanding. 3/ Running bales. 4/ Probably includes some futures, exact quantity not known. 5/ Adjusted to August 1-July 31. 6/ Preliminary.

Commercial cotton, excludes the quantities produced for household uses.

Except as noted, all data on stocks for all years, and consumption in the United States are copied from reports of the Bureau of the Census.

All other data are copied from reports of the New York Cotton Exchange for years through 1944. Since 1945 data are estimated by the International Cotton Advisory Committee. Totals were made before data were rounded to thousands, hence totals are not necessarily summation of growths.

1/ Excludes estimates for quantities destroyed and used for adjustment purposes. 2/ Bales of equivalent 500 pounds. 3/ Since 1945 stocks of "commercial" cotton are identical with stocks of "all" cottons. 4/ Adjusted to August 1-July 31 year. 5/ Preliminary.

Commercial cotton, excludes the quantities produced for household uses. Carryover and consumption for all years in the United States from reports of the Bureau of the Census. All other data are copied from reports of the New York Cotton Exchange for years 1920 through 1944. Since 1945 data are estimated by the International Cotton Advisory Committee. Totals were made before data were rounded to thousands.

1/ Bales of 500 pounds gross weight except for United States which are in running bales.
2/ Includes Pakistan through 1946-47.
3/ Data refer to Palestine prior to 1947-48.
4/ South Korea only.
5/ Lebanon included with Syria up to 1949-50.
6/ Principally French India from 1947-48 through 1953-54.
7/ Includes Manchuria.
8/ Includes Albania, Bulgaria, Czechoslovakia, Hungary, Poland, Rumania, and East Germany. Latvia, Estonia, and Lithuania are included with U.S.S.R.
International Cotton Advisory Committee, Quarterly Statistical Bulletin, Volume 9, No. 3. April 1956.

1/ Average wholesale price of unfinished cloth quoted in trade publications. Prices per yard are converted to the approximate value of cloth obtainable from a pound of cotton.

2/ Average prices in the 10 spot markets for the cotton assumed to be used in these constructions of cloth through 1949. Since then prices for Memphis territory growths in even running lots at group 201 (group B) mill points. From August 1933 to December 1935 a tax of 4.00 cents per pound gross weight was added to the price of cotton.

3/ Markets closed.

4/ Difference between adjusted cloth price and price of raw cotton.

Agricultural Marketing Service.

1/ Based on published tariffs of major units of the public cotton warehouse industry chiefly represented by those with compress facilities.

2/ From 60 to 75 percent of all major storage companies included insurance in the storage charge, through 1949. Since 1950, approximately 76 to 86 percent of storage firms include insurance in storage charges.

3/ Data were insufficient for reporting rates.

1955 6/																								

1/ Totals were made before data were rounded.
2/ American in running bales, foreign in bales of 500 pounds.
3/ Not available.
4/ Includes consumption in Vermont.
5/ Included in New Hampshire.
6/ Preliminary.

Bureau of the Census. Annual Report - "Cotton Production and Distribution".

The average monthly rate of consumption per working day before 1944 was computed by adjusting the number of working days for holidays. The series presented herein uses 5 working days to each week. The average daily rate of consumption before 1944 is not comparable to the series shown herein and therefore is not published.
Bureau of the Census.

The average monthly rate of consumption per working day before 1944 was computed by adjusting the number of working days for holidays. The series presented herein uses 5 working days to each week. The seasonally adjusted series reflects adjustments for various seasonal factors including holidays since 1944. The average daily rate of consumption before 1944 is not comparable to the series shown herein and therefore is not published.
Bureau of the Census.

1/ Prices discounts and premiums for 7/8 inch through 1 1/16 inches are averages for the 10 designated spot markets through July 31, 1954, thereafter for the 14 markets. Premiums for 1 1/8 inches and longer through July 31, 1954 are averages of premiums quoted at Memphis; since August 1, 1954 averages of premiums at Memphis and Greenwood.

2/ Prior to August 1947 average for 10 markets. August 1947 to June 1948 averages for 4 markets. From August 1949 through July 31, 1954 average of 3 Texas markets; since August 1954 averages are for the 4 Texas markets. See page 5 of "Annual Cotton Price Statistics" for 1953-54 and 1954-55 for this note.

3/ Hundredths of a cent per pound.

1/ Replaces Delta of Mississippi. 2/ Revised series. 3/ The annual return including change in inventory and estimated value of perquisites to the operator for his labor and management; to the unpaid members of the household for services rendered on the farm during the calendar year, and to total farm investment regardless of ownership. 4/ That portion of net farm income that remains after charges for real estate capital and working capital have been deducted. It is obtained by dividing the return to the operator and family by the total hours of their labor. 5/ Not available. 6/ Total farm expense including cash operating expense, change in inventory of working assets, and imputed return to operator and family labor and investment incurred in the production of each unit of product. 7/ Excluding price changes. All costs have been adjusted for change in price level. Thus the ratio of input per unit of production becomes a measure of efficiency in production.

1/ Used for planting crop of succeeding year.
2/ Prior to 1928 cottonseed production was computed on the basis of 65 pounds of seed to 35 pounds of lint.
3/ Prior to 1943 seed used for planting was computed at a constant rate per acre, by States.
4/ Preliminary.

1/ Used for planting crop of succeeding year.
2/ Prior to 1928 cottonseed production was computed on the basis of 65 pounds of seed to 35 pounds of lint.
3/ Prior to 1943 seed used for planting was computed at a constant rate per acre.
4/ Preliminary.

1/ Included in "Other States" prior to 1922.
2/ Used for planting crop of succeeding year.
3/ Prior to 1928 cottonseed production was computed on the basis of 65 pounds of seed to 35 pounds of lint.
4/ Prior to 1943 seed used for planting was computed at a constant rate per acre.
5/ Preliminary.

1/ Used for planting crop of succeeding year.
2/ Prior to 1928 cottonseed production was computed on the basis of 65 pounds of seed to 35 pounds of lint.
3/ Prior to 1943 seed used for planting was computed at a constant rate per acre.
4/ Preliminary.

1/ Uncompressed in carload lots, f.o.b. cottonseed oil mills (mills at ports not included) and based on the official standards of the United States for American cotton linters.

2/ Average for 10 months.

3/ Calculated in part from average grade differentials.

4/ Dallas only.

5/ No quotations.

6/ Average of prices quoted at Los Angeles.

Cotton Division, Agricultural Marketing Service.

1/ Includes duck, tire fabrics, all other cotton cloths, bleached, unbleached, yarn dyed and colored, and mixtures made largely of cotton yarns.
2/ Totals were made before figures were rounded to millions.
3/ Linear yards.
4/ If any included in other countries.
5/ Less than 50,000 square yards.
6/ Preliminary.

Bureau of the Census.
